Champion Battery Company.—D. J. Bortz and Edith Bortz, trading as Champion Battery Company and as The Ball Company, are charged, in a complaint, with misrepresentation. The respondents, with their principal office and place of business in the Morgan Building, Detroit, are engaged in the sale and distribution to retail dealers of so-called sales promotional plans, including the sale and distribution of "advertising gift checks", "gift certificates", and various articles of merchandise, novelty gifts and premiums.

The complaint alleges that the respondents, under the respective trade names Champion Battery Company and The Ball Company, through their salesmen and agents, in connection with their sales promotional plans, represent that Champion Battery Company is a representative of or is putting on an advertising campaign for the Champion Spark Plug Company, Toledo, Ohio, and similarly represent that The Ball Company is connected with Ball Brothers Company, Muncie, Ind., manufacturers of glass fruit preserving jars. In truth, the complaint continues, the respondents are not
representatives or of connected in any way with the Champion Spark Plug Company or Ball Brothers Company.

The respondents allegedly represent that gift checks purchased by dealers for distribution to their customers as they purchase the respondents' merchandise may be redeemed in "free" premiums by such customers after they have bought a specified amount of merchandise and that upon such redemption of gift checks by their customers dealers will be reimbursed for the amounts they paid for such checks. However, it is alleged that dealers are not so reimbursed; customers do not receive "free" merchandise; purchasers of flash light bulbs and batteries pay a sum which not only covers the value of the batteries and bulbs but that of the premiums received, and purchasers of dinnerware pay 39 cents with each gift certificate returned to the respondents for redemption, such amount not covering only the value of the ware but representing a substantial profit to the respondents.

In selling dinnerware under the name of The Ball Company, the respondents allegedly represent that they are introducing a new line of colored chinaware of high grade and celebrated type known as "Fiesta," when in fact it is not genuine "Fiesta" ware, but only cheap milk-white glassware of a type found in five and ten cent stores.

Batteries sold by the respondents, the complaint alleges, are not manufactured by Champion Spark Plug Company, although the word "Champion" is placed upon the labels of the batteries, and dinnerware products sold in connection with use of the word "Ball" are not manufactured by Ball Brothers Company. (4134)

**Standard Distributing Company**—Philip Harry Koolish and Sarah Allen Koolish, trading as Standard Distributing Company, are charged, in a complaint with use of lottery methods in the sale of merchandise to ultimate consumers. The respondents, whose place of business is at 2222 Diversey St., Chicago, and who formerly were located at 6227 Broadway, Chicago, are engaged in the sale and distribution of flashlights, electric mixers and other merchandise.

The complaint charges that the respondents, in connection with the sale of their merchandise, have furnished various devices and plans of merchandising involving the operation of games of chance, gift enterprises or lottery schemes, and have distributed to the purchasers public literature and instructions, including push cards, order blanks and circulars explaining their plan of selling merchandise and allotting it as premiums or prizes. The complaint alleges that the respondents thus supply to and place in the hands of others the means of conducting lotteries. (4135)

**STIPULATIONS**

Following stipulations have been entered into by the Commission:

**Academy of Hawaiian Music**—Eleanor Moore, trading as Academy of Hawaiian Music, 18 South 17th Ave., Maywood, Ill., has entered into a stipulation in which she agrees to discontinue certain representations in the sale of a "Home Study Course for the Hawaiian Guitar."

The respondent agrees to desist from the representation that her course is a new method of instruction for learning to play the Hawaiian guitar; that no talent, or special talent, is required to learn to play this allegedly new method; that all pupils can, through the respondent's instruction, learn to play the Hawaiian guitar.

A further representation which the respondent agrees to discontinue is that a pupil can learn to play the Hawaiian guitar from regular piano music or any other kind of sheet music, unless such representation is qualified to explain that such music must include a separate score upon which the melody notes are written and upon which a chord designation is printed above each bar.

The respondent also stipulates that she will cease advertising that a pupil can learn to play regular songs after receiving and studying the first lesson of the course and that she will desist from using the word "Academy" or any other term of like import as part of her trade name or to describe the business of selling a correspondence course in music. (02560)

**American Landscape School**—The stipulation of American Landscape School, whose offices are in the Plymouth Building, Des Moines, is supplemental to one accepted by the Commission in March, 1939, in which the respondent agreed to discontinue various representations concerning its courses. In the supplemental stipulation American Landscape School agrees to cease representing that the number of positions open in landscape architecture and gardening greatly exceed the number of persons qualified and available to fill them; that the respondent daily receives letters from prospective employers offering its students and graduates opportunities for employment in landscape architecture and gardening, or that opportunities for employment are greater than is actually the case. (02349)

**Battle Creek Dietetic Supply Co., 16 Court St., Battle Creek, Mich., engaged in selling cosmetics, food supplements and medicinal preparations designated "Health House Brand Hormone Cream," "Health House Brand Vitamin F Cream," "Health House Brand Yeast Vitamin Tablets," "Health House Brand Vegetable Mineral Broth," "Health House Brand Vegetable Tablets," "Health House Brand Wheat Germ," "Health House Brand Vitamin E Capsules," and "Health House Brand Cough Syrup with Vitamins A, B, D, and G," agrees among other things to desist from representing that vitamins tend to normalize weight or that vitamins will help reduce obese persons to normal weight, except where such condition is due to vitamin deficiency. The Battle Creek Dietetic Supply Co. also agrees that where any of its products contain any fatty acids, it will cease and desist from designating such acids as "Vitamin F." (02564)

**Chief Two Moon Herb Company, Inc., Waterbury, Conn., engaged in selling "Chief Two Moon Bitter Oil," "Chief Two Moon Cough Elixir," "Chief Two Moon Skin Cream," "Chief Two Moon All-Herb Stomach Relief," "Chief Two Moon All-Herb Kidney Relief," "Chief Two Moon All-Herb Nerve Remedy," "Chief Two Moon All-Herb Female Tonic," "Chief Two Moon All-Herb Rheumatism Remedy," "Chief Two Moon All-Herb Asthma Remedy," and "Chief Two Moon All-Herb Liver Remedy," has agreed to discontinue representing that Chief Two Moon was the "world's greatest herbist"; that the remedies are "Indian remedies" or "herb remedies," except where the major portion of the active ingredients are herbs; that they have brought relief and restored health to thousands of sufferers, or that they are effective treatments for stomach trouble, tumors, rheumatism, kidney and liver ailments, nervousness and asthma.

In addition to disclaiming claims for each of the remedies, the corporation also agrees to cease use of the words "Nervine," "Nervine Tea," "Nerve Remedy," "Asthma Remedy," or "Asthma Relief" to designate any of its products, and further agrees to cease and desist from the circulation and dissemination of a booklet entitled "Chief Two Moon Herbs for Health," containing many claims, representations and testimonials concerning the alleged benefits which have been and are to be derived from use of the preparations. (02565)

**V. G. Fernandez, trading as Wonder Laboratory, Chicago, Ill., stipulates that he will desist from advertising his preparation "Anticalvez" as being a new discovery and as being capable of eliminating dandruff, stopping falling hair, giving to the hair the vigor and luster of youth, improving the hair or scalp, preventing baldness or gray hair and causing one to have an abundant growth of hair. The respondent agrees to cease representing, by use of the word "Laboratory," or any abbreviation thereof as a part of his trade name, or by any other means, that he maintains a laboratory, unless he owns, operates or controls, under direct supervision of a qualified scientist, a properly equipped laboratory where scientific analysis, tests and experiments are conducted. (02562)

**C. G. Ives, trading as Ives Drug Company, Glenwood Drug Company and Ives Druggist, Minneapolis, Minn., agrees to cease representations that "Pile Remedy" is an effective remedy or a competent treatment for hemorrhoids or piles; that its use will avoid an operation, or that it has any therapeutic value in the treatment of piles in excess of a mild, temporary palliative for the itching, burning, and similar irritations that are usually due to, or associated with, the superficial symptoms of some types of piles. The respondent further agrees to cease employing the word "Remedy" or any term of like import as part of a trade name used to describe the preparation. (02561)
Discriminations in price were made between different purchasers by deviating from this schedule, as follows:

(1) Discrimination in price between customers who purchased all of their requirements and those who bought part of their requirements from the respondent. For example, a customer whose monthly requirement was 4,500 pounds and who bought this entire amount from the respondent, paid, according to scale, 18 cents a pound, but another customer, whose monthly requirements was 7,500 pounds and who purchased 4,500 pounds from the respondent, paid only 16 cents a pound for the 4,500 pounds so bought.

(2) Discrimination between different customers who purchased some but not all of their requirements from the respondent. For example, a customer whose requirements were 4,500 pounds a month and who bought 500 pounds of this from the respondent, paid, according to scale, 18 cents a pound for the 500 pounds, while another customer, whose requirements were 1,000 pounds a month and who bought from the respondent only 500 pounds, paid the respondent 20 cents a pound for the 500 pounds because his requirements were only 1,000 pounds a month.

(3) Discrimination between certain customers within a definite quantity bracket by selling to some customers at so-called "off-scale" prices. For example, if the customer took all of his requirements of yeast from the respondent and should pay, according to the scale, a certain price, the respondent would sell him that quantity at a lower price.

(4) Discrimination might be brought about by the respondent through selling its customers on the basis of total consumption or purchases irrespective of the number or quantity of the individual deliveries. By this method of selling yeast, independent dealers operating a single plant were obliged to pay a great deal more for yeast than large customers operating on a plant in the same area as an independent, might have received the same quantity of yeast at that particular branch as the independent dealer received. Different prices for the same quantities of yeast were paid by the respective customers in this instance because the price was not based upon the quantity delivered to the particular branch of the large customer but upon the total quantity delivered to all branches of the large customer.

By selling bakers' yeast in accordance with its price scale and by deviating from prices in the manner set forth, large bakers and chains have been enabled to make substantial savings which may be reflected in many different ways in lessening or injuring competition. For example, a customer whose requirements are 4,500 pounds a month and who purchased 500 pounds of this from the respondent, paid, according to scale, 18 cents a pound for the 500 pounds so bought. If the customer bought only part of his requirements from the respondent he would still pay 20 cents a pound, regardless of what portion of his requirements he so purchased.

May 24, 1940
Jobbers Produce Company, Inc.—See Mississippi Sales Company, Inc.

Mississippi Sales Company, Inc.—Prohibiting unlawful payment and acceptance of brokerage fees, in violation of the Robinson-Patman Act, an order has been issued against Mississippi Sales Company, Inc., a general merchandise brokerage house, and Jobbers Produce Company, Inc., a produce jobber, both of Meridian, Miss., and against three sellers. Commission findings are that:

The order further directs S. O. Scott to desist from receiving or accepting from sellers any brokerage fees or commissions, or any allowance or discount in lieu thereof. The respondent Ray Rennison, according to findings, was represented as “Director” of the “Bureau,” as having “personally worked in the mail service” or Government service, and as having “forestry experience and a vast knowledge of wild life.” However, the Commission further found that he is not a graduate of any school of forestry or of any college and that he is not an expert in forestry. The respondent Ray Rennison, according to findings, was represented as having “Forest Service or forestry expert, and that the respondents’ forestry course affords adequate preparation for State and Federal forestry ex-

Rayson Service Bureau—Prohibiting misrepresentations in the sale of correspondent courses in forestry and of other courses preparatory for Civil Service examinations, a cease and desist order has been issued against Ray Rennison, Denver, Colo., who sells such correspondence courses under the name Rayson Service Bureau. The order also names as a respondent Martha A. Rennison, who formerly was associated with Rennison in the business.

Commission findings are that representations of these respondents implied that they were an agency of or connected with the United States Government, when such was not the fact. Among such representations according to findings, were use of the word “Bureau” in their trade name and description of the building in Denver where they conduct their business as the “United States National Building,” when in fact it is the “United States National Bank Building.”

The respondents’ advertising material was found to create the impression that their course in forestry was intended for and adapted to preparing students for examinations and positions in State and Federal forestry. In fact only graduates with degrees in forestry from recognized institutions having full four-year courses in that subject are eligible for such positions, a fact which the respondents did not reveal to applicants. Certain minor positions in such service also have requirements as to education or experience that are not fulfilled by the training offered by the respondents.

The Commission order directs discontinuance of the respondents’ representations implying connection or association with the Federal Government. The order further prohibits the use of representations that the respondent, Ray Rennison, is a Civil Service or forestry expert, and that the respondents’ forestry course affords adequate preparation for State and Federal forestry ex-

...
S. M. Laboratories Company, Seattle, and B & T Sales Company, Indianapolis, have been ordered to discontinue misleading representations in the sale of medicinal preparations advertised as treatments for delayed menstruation. Under the Commission order, S. M. Laboratories Company is prohibited from disseminating advertisements which represent that "Neofem Liquid," "Neofem Capsules" and "Cerene" are cures or remedies for painful or delayed menstruation; that they constitute safe, competent or effective treatments therefor, or that use of these products will provide safe or sane ways of self-medication in obtaining relief from the ailment. Failure to reveal in advertisements that use of the respondent's preparations may result in serious and irreparable injury to health, also is forbidden. The Commission's findings are that these products contain the drugs ergot, oil of savin and aloin in quantities sufficient to cause serious and irreparable injury if used under conditions prescribed in the advertisements or under customary or usual conditions.

Findings are that the practices prohibited under the order occurred prior to March 28, 1940. The order against the Indianapolis firm, which is composed of Howard L. Brewer and Albert L. Tribbett, trading as B & T Sales Company, prohibits advertisements representing that their preparation "Menstru-Eze" is a cure or remedy for delayed, difficult, painful or irregular menstruation or that it has therapeutic value in the treatment of such conditions or in relieving incidental pain.

Dr. Van Vleck Company, Jackson, Mich., engaged in the sale and distribution of medicinal preparations known as "Dr. Van Vleck's Ointment," "Dr. Van Vleck's Muco Cones," and "Dr. Van Vleck's Pills," represented as remedies for piles, has been ordered to cease and desist from misrepresentations concerning the preparations. The Commission finds that in advertisements in newspapers, periodicals and other printed matter, the respondent has represented, among other things, that: "There is no doubt that Dr. Van Vleck's Ointment and Muco Cones will usually relieve the acute pain of piles without any further treatment, but Dr. Van Vleck was not satisfied with what many would call real relief. He believed it was his duty to bring about a substantial relief and for that purpose included in his Treatment his pills. These are taken internally. The result is that Dr. Van Vleck has indeed brought immeasurable happiness into a suffering world."

Through the use of these statements and other representations, the respondent has represented, the Commission finds, that the preparations, used conjointly, are an effective and scientific cure and remedy for, and an effective treatment of, piles; that application of the preparations conjointly constitutes an "Absorption Treatment" which removes piles without surgical aid; that their use insures immediate and lasting relief with no return of suffering, and will remove or correct the cause of piles.

In truth, the findings continue, the preparations are not cures or remedies for piles, nor do they constitute a competent or effective treatment therefor, other than to give some small degree of relief by means of the analgesic properties thereof and the prevention of constipation. The respondent is ordered to cease and desist from further representations that the preparations, whether used separately or conjointly, are cures or remedies for piles or constitute competent or effective treatments therefor; that they have any therapeutic value in the treatment of piles in excess of the relief obtained through the prevention of constipation and the use of a mild analgesic; that they will bring immediate or lasting relief, or will correct or remove the cause of piles, or will absorb, remove or eradicate protruding external or internal hemorrhoidal protuberances without surgical aid.

FTC DISMISSES COMPLAINTS

The Commission found that with respect to the allegations of the complaint concerning the payment of brokerage to, and the receipt thereof by, the Mississippi Sales Company, Inc., of Meridian, Miss., upon the purchases of the Penny and the Buckley-Young companies, the Mississippi Sales Company, Inc., had not acted for or in behalf or subject to the control of either of these companies. It also did not appear that the four individuals trading as William Henderson Sugar Refinery firms, concerning all of whom the complaint had been dismissed, had either negotiated or entered any agreement, and the record contained no evidence of its corporate identity.

In a press release issued for morning newspapers of Monday, May 20, concerning an order to cease and desist issued against the Mississippi Sales Company, Inc., and other companies and the Mississippi company's principal officer, there was an omission of the names of the Penny, Buckley-Young, Pacific Fruit and William Henderson Sugar Refinery firms, concerning all of whom the complaint in the proceeding had been dismissed.

The Commission has also ordered that a complaint issued against Goldblatt Bros., Inc., 3912 South Lincoln St., Chicago, sports goods distributor, charged with unfair methods of competition, be dismissed.

May 24, 1940
FCC Bans Commercial Television Operation

No commercial television until "the engineering opinion of the industry is prepared to approve any one of the present competing television systems."

That was the heart of the FCC report this week on television. It was unanimous. The text follows:

The Commission's report:

FEDERAL COMMUNICATIONS COMMISSION
Washington, D. C.

May 28, 1940.

In the Matter of:

ORDER NO. 65 SETTING TELEVISION RULES AND REGULATIONS FOR FURTHER HEARING

Docket No. 5806

REPORT

By the Commission:

On April 8, 1940, a hearing was begun by the Commission to obtain information relative to certain problems connected with television broadcasting which had arisen subsequent to the promulgation by the Commission on February 29, 1940, of its revised rules and regulations governing television broadcast stations. The issues which are at this time presented for Commission determination are those involved in that hearing. In the main they involve questions as to the wisdom (1) of selecting and setting at this time a single uniform system of standards for television transmitting equipment and (2) of continuing television broadcast licenses on an experimental as distinguished from a commercial basis. These issues can be adequately considered only against the broader background of the Commission's functions in relation to the development of television.

The Commission, in addition to being charged with the duty of licensing radio transmission stations, has the obligation to promote experimentation in radio, encourage its wider use and regulate the kind of apparatus to be used by sound and television stations. These powers are set forth in Section 303 of the Communications Act which provides:

"The Commission, from time to time as public interest requires, shall

"Study new uses for radio, provide for experimental uses of frequencies, and generally encourage the larger and more effective use of radio in the public interest; . . ."

"Regulate the kind of apparatus to be used with respect to its external effects and the purity and sharpness of the emissions from each station and from the apparatus therein; . . ."

"Make such regulations not inconsistent with law as it may deem necessary to carry out the provisions of this Act."

No party to the proceeding has challenged the Commission's jurisdiction in this matter. On the contrary, Manton Davis, General Counsel of the Radio Corporation of America, the chief protestant of the action of the Commission, conceded its jurisdiction by the following statement at the April hearing:

"Most certainly we do not challenge the jurisdiction of the Commission to fix any standards with respect to transmission of broadcasting, television, or any other transmission signals. Moreover, we do not challenge the jurisdiction of the Commission to make any investigations or to collect or correlate any facts that might be helpful to them in that endeavor."

From the duty to regulate the kind of apparatus to be used by broadcasting stations stems the duty to fix transmission standards of such stations. Transmission standards may be simply defined as engineering rules governing the characteristics of the radio signal transmitted by the operation of radio apparatus. Such standards as a practical matter must require "a fair degree of efficiency and assure to the public in basic outline a single uniform system of broadcasting which will enable every transmitting station to serve every receiver within its range.

In its regulation of television in the public interest, the Commission, in the light of the evidence before it, has set as its goal unfettered technical development and engineering advance. In dealing with the problem of setting television transmission standards the Commission has, therefore, sought to avoid action which would freeze the state of the art at an unsatisfactory level of performance. As a necessary corollary it has sought to avoid action which might result in the freezing of standards by the industry itself. Hence, as evidence bearing on the issues at the hearing, the Commission has considered the effect which a widespread distribution to the public of television receiving equipment currently available will have on the future improvement of television transmitting systems.

Previous Commission Action with Regard to Television

The art of television has been under development for more than a decade. During this time the Commission has issued a number of licenses for experimental purposes looking toward the development of the science to the point where the Commission could be reasonably assured of television's readiness for a competitive public service upon a sound technical basis and upon a single uniform system.

Throughout this period the Commission has carefully observed and studied television's technical advancement and problems and has kept abreast of engineering developments in the field. On September 10, 1938, there was submitted for the Commission's consideration a proposed set of television transmission engineering standards which had been adopted by the Radio Manufacturers' Association, a trade association of radio manufacturers.

On January 3, 1939, the Commission appointed a committee, consisting of Commissioners Craven, Brown and Case, known as the Television Committee, which was charged with the duty of investigating and submitting recommendations with regard to the fixing of television broadcasting standards by the Commission and the disposition of a number of pending applications for television experimental licenses.

In order to secure information as to the nature of the proposed standards, and the effect of such standards upon the future development of television as a service in the interest of the public, the Television Committee met with representatives of the industry, visited various television laboratories, and conferred with several organizations concerned with the development of television from both the manufacturing and operating standpoint. The results of the Committee's studies were embodied in a public report dated May 22, 1939, in which particular emphasis was laid upon the
vital questions of public interest which were inherently connected with the Commission's duty to prescribe uniform transmission standards in the television broadcasting field. The bearing of the peculiar function and the relationship between television transmitter and receiver upon the Commission's duty to set uniform transmission standards was sharply manifested in these words:

"However, a serious question of public interest would arise in the future if the Commission should specify external transmitter performance capabilities differing from the operating capabilities of receivers in the hands of the public. This is because of the resultant possibility that the public's receivers would be incapable of receiving programs emanating from transmitters licensed by the Commission."

The Committee's studies disclosed that technical advancement of the art had not progressed to the point where it would be in the public interest to adopt any transmission standards for television broadcasting. In the light of the demonstrated fluidity of the art and its current movement toward a higher level of efficiency, it was recognized that the acceptance of any fixed set of standards would entail the undesirable consequences of checking or retarding meritorious research. It was, therefore, the Committee's recommendation that pending further studies upon the progress of television experimentation and research, no standards be adopted by the Commission.

On November 15, 1939, a second report submitted to the Commission by its Television Committee was made public. In this report, the Committee noted that certain progress had been achieved in television experimentation since the date of its previous report. It was left to the Committee that although the television industry had not advanced beyond the experimental stage, it had arrived at the point where more rapid progress could be expected by the licensing of a class of station to render sponsored programs to the public on a limited basis. A revision of the Commission's rules to make this proposal effective was recommended. It was the conviction of Commissioners Craven, Brown and Case, in making this recommendation, however, that the development of television was still in a rapid state of flux and the Committee asserted that, therefore, "No interests should be permitted to raise public hopes falsely, nor to encourage public investments where the state of scientific or economic development leaves any doubt that such hopes or expenditures are justified for the use of the public property in the radio spectrum."

On December 22, 1939, the entire Commission tentatively adopted the rules recommended in this second report of the Television Committee, with minor modifications, and on the same date, all interested parties desiring to be heard with respect to these proposed rules were invited to participate in a public hearing on January 15, 1940, before the Commission.

Pursuant to the Commission's invitation, leading concerns engaged in experimentation and research in the television field appeared and gave evidence upon the matters under investigation. Included among the parties who submitted evidence at this hearing were the Radio Corporation of America, a company engaged in the development, production and sale of radio and television transmitting apparatus and the licensing of such production pursuant to its patents, and in conducting sound and television broadcasting through its wholly owned sub-sidiary, the National Broadcasting Company; Philco Radio and Television Corporation, a company engaged in the development and production of radio and television receiving apparatus and in the operation of an experimental television broadcast station in Philadelphia, Pennsylvania; Allen B. DuMont Laboratories, Inc., a company engaged in the development and production of television apparatus, and in television broadcasting; Farnsworth Television and Radio Corporation, a radio and television manufacturing organization; Zenith Radio Corporation, a manufacturer of radio and television apparatus; Columbia Broadcasting System, Inc., and Don Lee Broadcasting System, broadcasting concerns in the radio and television fields; and numerous other manufacturers and broadcasters in the radio and television fields.

The January hearing extended over a period of eight days. The volume of evidence and data submitted was sufficiently extensive to comprise the expression of the views of different members of the industry with respect to the Commission's proposed rules, and extensive testimony of the industry's leading television engineers concerning the technical status of the television art, and the desirability of the adoption of television transmission standards by the Commission.

Differences of Engineering Opinion Within the Industry

The hearing revealed a serious conflict of engineering opinion upon the question of standards among the representatives of various responsible elements in the industry engaged in important research and experimentation. If the frame frequency, the rate at which the reproduced picture will have flicker and the motion will be flickerless picture with continuous motion. The rate at which the complete scanning of a scene is accomplished is called the "frame frequency," and means merely the number of times the complete scene is scanned per second. If the frame frequency is too low, the reproduced picture will have flicker and the motion will be jerky; if the number of lines is too small, the picture lacks clarity and detail. In general, it may be said that an increase in the number of lines transmitted.

The "memory" of the human eye is, however, limited and therefore it is necessary to scan each scene completely in a fraction of a second and in rapid repetition in order that the eye may perceive the series of individual pictures as a single continuous flickerless picture with continuous motion. The rate at which the complete scanning of a scene is accomplished is called the "frame frequency," and means merely the number of times the complete scene is scanned per second. If the frame frequency is too low, the reproduced picture will have flicker and the motion will be jerky; if the number of lines is too small, the picture lacks clarity and detail. In general, it may be said that an increase in the number of lines transmitted.

Two of the important television problems outstanding are to develop (a) a better picture with more detail and greater clarity and (b) a larger picture. If the screen is enlarged with a given frame and line frequency, the quality of detail and clarity diminishes in an increase in the width of the transmitted line, and is the only known method of satisfactorily accomplishing either of the desired ends. This could be most easily accomplished by increasing the frame frequency, only by reducing the frame frequency.

The number of radio frequencies being severely limited, it is regarded as essential to explore all possibilities of improving performance within
the present 6000 kilocycle band assigned. Since within any given channel an increase in the number of lines entails a lower frame frequency,—fewer pictures per second,—the problem of flicker and jerky motion is raised.

Consideration of this research has been carried on in recent years to accomplish a lowering of frame frequency without injury to the quality of the picture. Screens with "memory," or a chemically retentive quality, have been developed to a substantial but not to a satisfactory degree. Progress has been made but no one yet claims the answer.

In the transmission of the picture units it is essential that the receiver follow the scanning process at the transmitter so that the picture elements reproduced will have the same relative position. In order to keep the receiver locked to the transmitter, it is necessary for the transmitter transmitter to synchronize the various signals in order to maintain the relationship of the transmitted picture units. These signals are known as synchronizing pulses and enable the receiver to be synchronized with the transmitter. In the development of television a number of different pulses have been under study. It is the synchronizing pulse which is the foundation of the lock and key relationship between television transmitter and receiver.

The dispute brought into light at the January hearing centered mainly around proposals regarding frame frequencies, numbers of lines and the character of the synchronizing pulse of transmission. A further clearance is needed and involves polarization and is related to the type of antenna to be used.

Upon the question of frame and line frequencies, the RMA proposal of a frequency of a fixed system of 30 frames per second and 441 lines per frame was attacked upon the grounds that it does not permit sufficient pictures so produced are unsatisfactory for public use, that the development of larger pictures is precluded by such a standard and that the scheme lacks flexibility. Alternate proposals suggested by the critics of this proposed standard involved (1) a flexible frame frequency range of from 15 frames to 30 frames and a range of between 441 lines and 800 lines per frame, and (2) a frequency of 24 frames per second with 500 lines or more per frame. Proponents of the RMA proposals on this question characterized the foregoing alternatives as unsatisfactory for the reason that low frame frequencies create the problem of flicker and smear in reproduction. It was admitted, however, that an increased number of lines produces more desirable flicker picture detail but that an increase in the number of lines to as much as 625 lines necessarily requires reduction in the number of frames to 15 per second with its concomitant problem of flicker and smear. The admitted advantages of increased number of lines and testimony to the effect that further research was in progress towards the development of retentive screens designed to eliminate objectionable flicker and smear, indicated the desirability that the fixing of standards should await the results of such research.

Upon the question of synchronizing pulses DuMont contended that the RMA pulse would not permit automatic reception by receivers of increases or decreases in frame frequencies, which might be found desirable for varying types of programs. He urged as the fundamental essential of flexibility a synchronizing pulse having characteristics enabling automatic adjustment by receivers to various frame frequencies being transmitted. The evidence on this question indicated to the Commission that research directed towards the achievement of such flexibility should go forward.

Philo Radio and Television Corporation opposed the RMA recommendation of horizontal polarization. Many advantages were claimed by Philco for the system of vertical polarization on which research and experimentation were still being conducted. Enough was said in evidence to convince the Commission that further research upon the matter of polarization was necessary.

Although a divergence of engineering opinion existed with respect to the merits of a system of various systems in question, the members of the industry appearing before the Commission were in substantial unanimity on the need for the possibilities of improvement in these basic aspects of the television art.

Report of February 29, 1940

On February 29, 1940, the Commission issued a report embodying its conclusions upon the problems raised during the January hearings. In making this report, the Commission adopted with few changes the rules which it had previously approved tentatively. Sponsored program service for one class of stations (Class II) on a limited basis was to begin on September 1, 1940.

The keynote of the Commission’s report and the policy underlying the Commission’s rules was that television broadcasting was still in an experimental stage and that in view of evidence revealing a substantial possibility of significant improvements in the art, “research should not halt” and “scientific methods should not be frozen in the present state of the art.” The Commission expressed the belief that the crystallization of standards at the current level of the art, by whatever means accomplished, would inevitably stifle research in basic phases of the art in which improvement appeared promising.

Recognizing the danger that research in television might be unduly retarded by immediate promotional activities for a single fixed system, prior to the establishment of standards for this new art, the Commission’s unanimous report of February 29, 1940, urged restraint in such activities in order to avoid consequences inimical to the public interest. The report stated:

“The issuance or acceptance of transmission standards by the Commission, especially in combination with the more extensive experimental program service which will in all probability develop under the rules, would have a tendency to stimulate activity on the part both of manufacturers and the public in the sale and purchase of receivers for home use. It is inescapable that this commercial activity inspired and then reinforced by the existence of Commission standards would cause an abatement of research. To a greater or less extent the art would tend to be frozen at that point. . . .

“The same considerations which demonstrate the unwisdom of the Commission’s promulgating standards at this time dictate the undesirability of the industry itself attempting to impose such a code on all points. The Commission therefore recommends that no attempt be made by the industry or its members to issue standards in this field for the time being. In view of the possibilities for research, the objectives to be attained, and the dangers involved, it is the judgment of the Commission that the effects of such an industry agreement should be scrupulously avoided for the time being. Agreement upon standards is presently less important than the scientific development of the highest standards within reach of the industry’s experts.”

The Position of the Industry on Setting Standards

The objectives outlined in the February 29 report were a reflection of the almost unanimous opinion of the industry as expressed at the January hearing that standards should not be fixed if research was to go forward and the science developed in the public interest.

The Radio Corporation of America appeared to be in accord with these objectives as is demonstrated by the testimony of E. W. Engstrom, its chief engineering witness and the statements of its counsel, F. W. Wozencraft. Engstrom testified as follows:

“I, as an engineer, am not recommending that standards be frozen in the term that I believe has been discussed at this hearing. I think that everyone should have an opportunity to work through the systems in which they are operating.”

Wozencraft stated,

“I am advocating only that the Commission permit applicants to proceed experimentally using certain standards which the Commission will permit the applicant to use. I think the
Alternatives. Sarnoff stated:

"We have no desire to recommend to the Commission that everybody have to conform to the RMA standards, or have to show that everybody who is operating under RMA standards should have to change to another set of standards because a new invention wants to use a new set of standards. We do not suggest anything which makes it hard for anybody who thinks he can promote television and render service in that field and serve public interest." ** **

From the foregoing the Commission felt assured that no attempt would be made to freeze the standards by any means. The statements to the Commission, the record shows, were with the knowledge and approval of the RMA president, David Sarnoff. Yet, on February 29th a letter carefully drafted and reviewed by the Radio Corporation's officials including its president, was signed by Engstrom and delivered to a meeting of the RMA Subcommittee on Television Standards at the Hotel New Yorker, New York City. That letter stated:

"Since television transmission service and the sale of television receivers to the public have already begun on the basis of RMA approved standards, proposals involving changes in transmission standards must necessarily be considered from the point of view of their superiority, if any, over existing standards. The proponents of changes in these approved standards must, of necessity, bear the burden of proof that such changes would reflect a substantial improvement in the service to the public and that a change under the circumstances above referred to is warranted."

In April, Engstrom testified as to RAC's meaning in the use of the phrase "burden of proof" as follows:

"Chairman Fly: Well, tell me just what you mean by 'burden of proof'?

The Witness: I mean by that, the kind of activity in the RMA group where one man or one organization brings to that group the experience that he has in a particular line, it is usually up to him—and it always was up to us when we brought such information—to demonstrate to the other members that there was merit in his suggestion. That is what I mean.

"Chairman Fly: Yes. But, now, wait a minute. Now, wait a minute. The notion that one member would come in with such a single proposition, and then, would take the burden of demonstrating to your satisfaction—"

"The Witness: Not to mine, sir.

"Chairman Fly: Well, to the satisfaction of the association.

"The Witness: Yes, sir.

"Chairman Fly: Carries the implication that there is status quo there, does it not?

"The Witness: That is correct, but there is an established procedure for changing any standard at any time.

"Chairman Fly: And, of course, there would be no need for changing any standard that was not, in effect, fixed.

"The Witness: Yes, that is right."

Meanwhile, on February 8, 1940, at a highly controversial meeting of the RMA Board of Directors, Sarnoff had opposed a proposal by Philco that before any commercialization were undertaken, the RMA standards should be reopened for consideration of any standards other than those of RMA futile. At the same meeting, all the members except RCA and Farnsworth voted in favor of considering new proposals as against the suggestion that the RMA standards be reaffirmed, but there is no record of any further action being taken on new proposals.

The persistent determination of RCA to move forward commercially is thus seen as independent of industry opinion and of the Commission's attitude on standards and commercialization. Announcement of RCA's plans had been made to the industry on February 8 and reiterated on February 29th both prior to the Commission's decision on the latter date. Determination was persisted in despite both industry opposition then and the Commission's decision later. The Commission's report was clear and no misunderstanding of it can be assumed. The record shows moreover that on the day following the announcement of the Commission's report, Robert Gedera, Executive Vice President of the RMA, addressed to Sarnoff and the other members of the RMA a telegram reading in part as follows:

"Federal Communications Commission announced decision to permit limited commercial television operations September first authorizing advertising charges covering cost sponsored programs, Commission did not fix standards but stated that television shots should not be frozen in the present state of the art unquote."

Further Hearing of the Commission

Yet, on March 20, 1940, pursuant to RCA's earlier announced intentions to the industry, an intensive promotional campaign was launched by the Company the effect of which continued and successful would in the opinion of the Commission tend toward the freezing of television broadcasting standards to the single system. Although regular program service by RCA's broadcasting subsidiary, NBC, was promoted and emphasized in extensive and varied public announcements, no mention was made of the experimental character of television broadcasting operations, or of the fact that only one station was on the air in New York City, the NBC station operated a program service irregularly for two or three hours per day but not on all days of the week, or that future stations employing alternative systems of transmission might not be received by the sets offered for sale. 

The foregone factors are of concern to this Commission not because of any question of fair trade practices, but because of the possible impact of RCA's whole course of conduct upon television broadcasting standards. It was apparent to the Commission that it was necessary to reexamine the situation in order to ascertain whether the rules which had been adopted on February 29, 1940, were contributing toward a result contrary to their fundamental purpose of maintaining fluidity in the art in order to promote its advance and to avoid the premature crystallization of transmission standards, the result against which both the Commission and the industry had warned. Indeed, action in the light of these facts was compelled by the Congressional mandate under which the Commission serves. It would be a violation of its statutory obligations for the Commission to disregard any facts which might foreclose a proper exercise of its duty to fix transmission standards for a single uniform system of television broadcasting. The Commission cannot ignore its duty to "encourage the larger and more effective use of radio" and close

---

1 Thomas F. Joyce, head of the RCA Sales Department, had testified as follows at the January hearing:

"Q. You can't contemplate the type and character of a change that would make the television, in your opinion, whether it would be greater or smaller, is a question of degree, but it might be rendered obsolete. Is that true?

A. That is correct.

Q. You further feel that the public should be told about this coming contingency?

A. Yes, I do."
its eyes to activities impending technical progress in the television art.

Accordingly, on March 22, 1940, the Commission scheduled a further hearing to begin April 8, to determine whether any revisions of the rules adopted on February 29 should be made or other action taken by the Commission, and whether the effective date for the beginning of limited commercial operations should be postponed.

The hearing was begun before the full Commission on April 8, 1940, and extended over a period of five days. The testimony given at the January hearing that the position of the entire industry, including RCA, was to avoid a freezing of standards at this time, whether this be accomplished by Commission actions or by the commercial activities of the industry itself. Nevertheless, it is difficult to avoid the conclusion that the "burden of proof" agreement which RCA urged upon the Association, combined with the reiteration of forcefully worded assertions of plans for sales promotion, the influence of those plans on the other manufacturers, and the other commercial activities themselves, would have had the practical effect of crystallizing television transmission standards to the RCA proposals and of causing a curtailment of research on other proposals. Indeed, recognizing that "certain companies presumably will proceed with receiver sales," W. R. G. Baker, Director of the RCA Engineering Department, remarked in a letter dated February 27, 1940, to Mr. A. S. Wells, President of the RCA, that "if enough sets are sold the standards may be formulated by reduction to practice."

This conclusion is regarded as inevitable by various other parties to the Commission's hearings. Philco has stated in its brief submitted after the second hearing:

"The Witness: Our position, sir, was that in order to do research that would be definitely outside of the present standards, the only condition under which that could be done would be with, let's say, a reasonable hope that these improvements could be brought into the standards. As we stated in January, and we would like to repeat right now, that if the standards are actually frozen by the commercial activity of the industry, you cannot reasonably expect one to go ahead and do research outside of those standards."

Witnesses of other companies engaged in research outside of the RCA standards testified that the same considerations would require a discontinuance or curtailment of such research if commercial activities continued on a wide scale. Dr. de Forest, for example, stated in its second brief that if commercial activities in the sale of receivers capable of receiving only 441 line—30 frame pictures continued, "it too would have been obliged to diminish or abandon its research program", and that "there would have been a burden upon any other manufacturer, including DuMont, to prove the superiority of existing and available tested transmission methods under most adverse circumstances."

U. A. Sanabria, an associate of Lee de Forest in American Television Laboratories, which is engaged in general television research and in particular upon a system of interfaced scanning designed to reduce flicker in pictures, testified that there would be no incentive for him to continue his researches in television if a large number of sets operating on present systems were distributed.

The testimony of David B. Smith of Philco was as follows:

"The Witness: Our position, sir, was that in order to do research that would be definitely outside of the present standards, the only condition under which that could be done would be with, let's say, a reasonable hope that these improvements could be brought into the standards. As we stated in January, and we would like to repeat right now, that if the standards are actually frozen by the commercial activity of the industry, you cannot reasonably expect one to go ahead and do research outside of those standards."

Indeed, these conclusions reached by a preponderant portion of the industry interested in television's further improvement are inevitable in view of the very nature of television and its operation. In general, it may be said that television transmission will reach satisfactorily only sets designed to receive the number of lines and frames and the type of synchronizing pulse transmitted. Due to this lock and key relation of television transmitter and receiver, substantial changes in transmitters in respect to lines and frames and the type of synchronizing pulse transmitted. Due to this lock and key relation of television transmitter and receiver, substantial changes in transmitters in respect to lines and frames, the retention of quality in programs, and synchronizing pulses, cannot be brought about after widespread distribution of receivers operating on a different combination of these factors. Thus widespread public distribution of sets of a system operating on present levels will undermine incentive for further advance in television broadcasting and the Commission will be confronted with the accomplishment of frozen transmission standards.

It is this consideration that distinguishes the development of television from that of sound radio. At the time of the initial widespread distribution of sound radio receiving sets to the public, these sets were capable of receiving all types of radio transmission and the Commission was not prepared to accept Sarnoff's premise of "We live on obsolete receivers" as a bar for justifying a heavy public investment at current levels of efficiency. Indeed, these conclusions reached by a preponderant portion of the industry interested in television's further improvement are inevitable in view of the very nature of television and its operation. In general, it may be said that television transmission will reach satisfactorily only sets designed to receive the number of lines and frames and the type of synchronizing pulse transmitted. Due to this lock and key relation of television transmitter and receiver, substantial changes in transmitters in respect to lines and frames, the retention of quality in programs, and synchronizing pulses, cannot be brought about after widespread distribution of receivers operating on a different combination of these factors. Thus widespread public distribution of sets of a system operating on present levels will undermine incentive for further advance in television broadcasting and the Commission will be confronted with the accomplishment of frozen transmission standards.

It is this consideration that distinguishes the development of television from that of sound radio. At the time of the initial widespread distribution of sound radio receiving sets to the public, these sets were capable of receiving all types of radio transmission and the Commission was not prepared to accept Sarnoff's premise of "We live on obsolete receivers" as a bar for justifying a heavy public investment at current levels of efficiency. Indeed, these conclusions reached by a preponderant portion of the industry interested in television's further improvement are inevitable in view of the very nature of television and its operation. In general, it may be said that television transmission will reach satisfactorily only sets designed to receive the number of lines and frames and the type of synchronizing pulse transmitted. Due to this lock and key relation of television transmitter and receiver, substantial changes in transmitters in respect to lines and frames, the retention of quality in programs, and synchronizing pulses, cannot be brought about after widespread distribution of receivers operating on a different combination of these factors. Thus widespread public distribution of sets of a system operating on present levels will undermine incentive for further advance in television broadcasting and the Commission will be confronted with the accomplishment of frozen transmission standards.

Conclusions

The rules adopted by the Commission on February 29, 1940, were intended to provide for a more rapid development of television by permitting programming experiments concurrently with necessary technical research leading to establishment of transmission standards by the Commission. Subsequent events, however, have demonstrated that commercial television broadcasting without the complete cooperation of the manufacturing industry,
is irreconcilable with the necessary objectives of further technical research and experimentation.

The positions of the different companies on this whole problem cannot be viewed with total disregard of the patent interests of competing manufacturers which find expression in a desire to lock the scientific levels of the art down to a single uniform system based in whole or in part upon such patents. The functions of this Commission are not to be usurped and utilized as a means of monopolizing this important industry either through this or other devices.

It is related to the program of television that there be not a mere semblance of competition, but that there be a genuine and healthy competition within an unfettered industry. The American system of broadcasting has been established by the Congress on a competitive basis. Television will be an important part of that system and for the purposes of such a system the development of a new system for television broadcasting is essential—so far as basic standards are concerned—must also be accomplished. Certain basic policies in the licensing of these experimental operations must be prescribed by the Commission were once again clearly manifested at the Commission’s most recent hearing. Engineering opinion on many of the basic problems is still divided at this time. The industry now is no less anxious to continue further engineering improvements on basic aspects of the science than it was at the time the Committee held its earlier hearing. RCA’s own engineering expert, for example, testified that his preference was for a system using 507 lines and 30 frames rather than the existing RMA standard of 441 lines and 30 frames. And in fact the very basic problem of what channel width or band of frequencies television shall employ must be regarded as a question not yet closed.

Contrary to the experience of other industries which have found that technical improvements were stimulated by large public use, in the television field a major portion of the industry takes the view that successful promotional activities can act only as an anchor on experimental efforts to go forward. Premature crystalization of standards will, as has thus been pointedly illustrated to the Commission, remove the incentive for technical research toward higher levels of efficiency. If technical research having this goal is retarded or halted, the Commission’s duty to fix transmission standards with due regard for considerations of public interest will have been, for all practical purposes, nullified.

It is, therefore, the conclusion of the Commission that in order to assure to the public a television system which is the product of comparative research on known possibilities, standards of transmission should not now be set. It has further been decided that there should be no commercial broadcasting with its deterring effects upon experimentation until such time as the probabilities of basic research have been fairly explored. The Commission agrees that the industry should not be deprived entirely of commercial operations by an intermediate half step of partial commercialization to be taken next September cannot be relied upon to serve a useful purpose. The provisions in the rules for Class II stations will be eliminated. As soon as the engineering opinion of the industry is prepared to approve any one of the competing systems of broadcasting as the standard system the Commission will consider the authorization of full commercialization. That a single uniform system of television broadcasting is essential—so far as basic standards are concerned—must also be amply clear. The public should not be infected with a hodgepodge of different television broadcasting and receiving systems.

It may be expected that industry opinion will insist upon such standards as will give definite assurance of satisfactory performance and of continuity of service for the public comparable to the continuity of service displayed in the past history of the radio industry. At this time, television is a standard—the standard gauge they may be termed—should afford within their limits reasonable flexibility for future advances in the science of television broadcasting. With the view to encouraging research and experimentation on a wholly flexible basis, the Commission is prepared to authorize broader experimental operations by existing stations and by a number of additional stations. Action will be taken promptly upon a number of pending applications for television experimental stations. These will be apportioned among various parts of the country with the view of locating them in any one of the dominant commercial cities under consideration for such facilities as San Francisco, Los Angeles, Chicago, Washington, Albany, Cincinnati, Boston, and others. Each station will be utilized for the predominant purpose of advancing the science of television broadcasting in its engineering aspects. The Commission invites other responsible individuals or companies who are prepared to carry on this work to apply for a license.

Certain basic policies in the licensing of these experimental operations will be followed. A substantial job of research must be done by each station. The channels available are strictly limited, and they must be utilized in the public interest. The radio spectrum is public domain—development in television must be undertaken and advanced in order that this domain be devoted to the best public use. There is no room for squatters and there can be no preemption in this field. Monopoly must be avoided. Free competition must be promoted and preserved. Accordingly the Commission deems it to be in the best interests of the public that there be a strict limitation on the number of authorizations to any one licensee for television broadcast stations which as a part of the experimentation may take programs to the public. In addition, rules for the regulation of television stations engaged in chain broadcasting will be promulgated at an appropriate time.

No time limit can now be set for the adoption of standards. The progress of the industry itself will largely determine this matter. The Commission will continue its study and observation of television developments and plans to make a further inspection and survey in the early fall. Meanwhile the Commission stands ready to confer with the industry and to assist in working out any problems concerned with television broadcasting.

Revised rules designed to carry into effect the conclusions reached herein will be issued in the near future.

DISTRICT MEETINGS

Final arrangements have been made for meetings in all of the Districts required under the By-Laws to meet this year for the bi-annual election of Directors. In addition, Sales Managers groups in at least two of the Districts have scheduled meetings in connection with the District meeting.

Following is the schedule with the name of the Director and the Sales Manager Chairman who will preside:

District 2—Director, Harry C. Wilder, WSYR, Rochester, New York, Sagamore Hotel, June 22. Sales Manager Chairman, Charles F. Phillips, WFBL, June 21 (Friday evening).
District 4—Director, John A. Kennedy, WBLK, Greensboro, N. C., Sedgfield, Country Club, June 1-2.
District 6—Director, Edwin W. Craig, WSM, Peabody Hotel, Memphis, Tenn., June 20.
District 8—Director, John E. Fetzer, WKZO, Election of Director held at District meeting, December 6, 1939.
District 10—Director, John J. Gillin, Jr., WOW, Chase Hotel, St. Louis, Mo., June 8.
District 14—Director, Eugene P. O’Fallon, KFEL, Hotel Utah, Salt Lake City, Utah, June 12.
District 16—Director, Donald W. Thornburgh, KNX, June 17.

The NAB Executive Committee, meeting Tuesday in New York, adopted the following resolution about the Code:

“Resolved, that the Executive Committee believes the Code has created greater public confidence than ever before enjoyed by the industry, and that the Executive Committee approves the work and actions of the Code Committee and directs the Code Committee to continue to carry on educational work with the membership in District Meetings and at the annual meeting.”

The BMI Board met in New York the same day.

INSURANCE COMMITTEE

The NAB Insurance Committee will meet Wednesday, June 5, at the Ritz Tower, New York. Roger W. Clipp, WFIL, is chairman.
IMPORTANT NOTICE!

All present broadcast station licenses expire on August 1 and it is necessary to file an application for renewal 60 days prior thereto. The article on page 4278 of last week's NAB REPORTS might be erroneously construed by the reader as meaning that renewal applications did not need to be filed for the August 1 expiration date.

ALL-EXPENSE TOURS

Members planning to travel to and from the NAB Convention at San Francisco on the Official All-Expense Tours should note the following. The number of rooms with twin beds at the Biltmore Hotel in Los Angeles is limited. Twin bedded rooms will be assigned by the Biltmore in order of application as long as the supply lasts. It's necessarily a case of “first come, first served.” Those booking early will get the preferred accommodations. Nuf ced!

Those taking the Three-Weeks Tour will leave San Francisco August 8 for Portland and Seattle, thence homeward by way of the Canadian Rockies or Glacier National Park or Yellowstone Park, as they choose. Because the equipment on the “Cascade Limited” out of San Francisco is somewhat limited, such members are urgently requested to send in their reservations at once. Those booking late cannot be assured accommodations on the “Cascade Limited.”

Everything possible is being done by NAB and Raymond-Whitcomb to provide a grand and glorious trip to the Convention and return. To insure smooth operation and freedom from inconvenience, the cooperation of the NAB membership is vitally necessary. Time is getting short! Bookings should be made at once. All reservations and requests for information should be addressed to Raymond-Whitcomb, Inc., 414 North Charles St., Baltimore, Md.

BMI Developments

All the BMI stations have received a letter dated May 22, 1940, from George M. Marlo, BMI's Professional Manager, asking their cooperation in giving special attention to two of the BMI songs during the period from May 27 to June 9 inclusive.

This is an important part of the work of selling BMI music. We are on a schedule of 30 songs a month. The greatest success for the catalogue will be achieved if plugging efforts are concentrated on only a few songs at a time. Cooperation of all member stations will make these plugs a genuine nationwide campaign that will produce results. It is planned to list the “plug songs” for each week in these notes. The same songs may be continued for several weeks, being moved from No. 1 and No. 2 down to lower places as new numbers are added to the list for each succeeding week. The length of time during which any particular song is held on the “plug” list will be determined in part by indications of the way it is being received by the listening public.

The naming of songs for special plugging should not, of course, be allowed to work to the detriment of the rest of the catalogue. It is intended only that the songs named should be “aired” with greater frequency and, if possible, with special emphasis and special program attention during the plugging period.

BMI PLUG TUNES OF THE WEEK

June 1—June 9

IN THE SILENCE OF THE DAWN

BMI now has a representative on the Pacific coast. Richard S. Hartman of Hollywood, formerly business manager for the Society of Composers and Arrangers, resigned from that position to take up the work for BMI.

It was considered important that BMI should be directly represented on the west coast because of the large number of composers who are engaged in staff work for the motion picture companies. Mr. Hartman's experience has given him wide contacts with the creative musicians in that industry and throughout that section of the country.

The first consignment of manuscripts sent by him has just reached the New York office and is in the hands of the editorial staff.

In the near future BMI will publish an album of songs written by Frank Luther—some twenty pieces in one volume. The songs are varied in type, but all of them, like the rest of Mr. Luther’s numbers, are characteristically American. They include ballad numbers, novelties, one or two cowboy songs, and several pieces from the Barbary Coast. These latter are really discoveries made by the composer in person. He picked up the music in that famous lurid strip of old California, arranged it and wrote the words.

M. E. Tompkins, BMI's General Manager, announces that by the first of July, BMI will have published more than sixty songs under its own imprint. That is approximately a song for each day of the working week since the first numbers appeared. As a record of production
During the formative period of the working organization, it gives cause for genuine satisfaction.

The BMI directors held a meeting at the New York office on Tuesday, May 28. It was announced that NBC and CBS will each appoint a coordinator whose work will be to arrange for more vigorous plugging of BMI music on the network programs. This is considered a step of major importance in building the popularity of the BMI catalogue. The names of the coordinators will be announced later.

The directors also decided on a formula for the compensation of composers for performance rights in their music. Terms of the formula will be given out after it has been put in definitive form by counsel.

Carl Haverlin, BMI Station Relations Director, has received the following letter from one of the college radio stations:

We are in complete sympathy with the problem of the commercial radio industry. We have felt for many years that ASCAP has been a monopoly—and as such, should have some serious and aggressive competition. If we can aid in the formation and growth of this competition by becoming members of Broadcast Music, Inc., we shall apply for membership.

Several other non-commercial stations are already BMI subscribers.

Promotion

TWO FAIRS TO JOIN HANDS FOR FREE RADIO FETE

Plans for the celebration of America's freedom of radio to be celebrated at the World's Fair have been shifted from the July 4 date to the tentative dates of August 3 or August 7, to coincide with the NAB Convention in San Francisco.

The scope of the event has been considerably enlarged. According to present plans, both the New York and the San Francisco World's Fairs will join hands to convey to the industry the thanks of listeners for the public service rendered by American broadcasters. Exercises on the grounds of both Fairs, as now contemplated, will center around the unveiling of a plaque symbolic of the American system of free radio, which gives American listeners the right to hear as well as the right to be heard. Distinguished representatives of government, religion, education, labor, business, women's organizations, American youth, and the general public will join in the ceremony.

Outstanding radio personalities will take part in an elaborate radio program to be broadcast by the three major networks. The program will also be made available to all non-network stations who desire to participate in this public tribute to the entire industry. It is anticipated that this special broadcast will require at least a full hour.

In connection with Broadcasting Day at the World's Fairs, NAB has called the attention of Paul Specht, organizer of the "Congress of Radio Events to Commemorate the Twentieth Anniversary of Radio Broadcasting," to the fact that no individual may speak for the industry; that the broadcasters of the country have set up the NAB for that specific purpose.

According to the letterhead of Mr. Specht's committee, this celebration will take place from August 20 to September 15, 1940. According to a story in the May 21 Christian Science Monitor, in connection with the proposed ceremonies by this committee, "A bill has been presented to Congress at Washington asking the President to proclaim August 26 as National Radio Day in honor of Dr. De Forest." No request for such a proclamation has been made by NAB.

Last week Mr. Specht addressed a letter to NAB objecting to a story appearing in The Trade Press concerning Broadcasting Day at the New York World's Fair. In order to clear up any misunderstanding, we reprint our reply to Mr. Specht, made by Ed Kirby, in whom Mr. Miller has placed responsibility for the industry's institutional promotion.

Mr. Paul L. Specht, Chairman, Congress of Radio Events, 551 Fifth Avenue—Room 1712, New York City.

Dear Mr. Specht:

Your letter to Mr. Miller, asking the question "How come the announcement of 'Broadcast Day' at the N. Y. World's Fair in Monday's Radio Daily?" has been referred to me. I would have answered your letter sooner, were it not for the fact that I was out of town most of last week.

Your letter requests that we look back over your correspondence and, if possible, "give me a credit line for the thought." Without going into the fact that there was a broadcasting day at the World's Fair in 1939, immediately following the NAB Convention in Atlantic City, the New York World's Fair has, since the first of the year, been in contact with this office for the purpose of lining up a day set aside in honor of broadcasting. In fact, at one time, serious consideration was given the use of a large building for exhibition and promotional work throughout the entire Fair by the NAB. At no time, to my knowledge, was your name brought up, or any reference made to any plans you had developed.

I am sure you understand that the broadcasters of the country stations as well as networks—have long since set up the NAB as its central trade body to further the industry-wide interests of broadcasting. If anyone is to speak or to plan for the industry as a whole, it is to be the NAB—not an individual, whether within or without the industry. I am certain you can appreciate the fact that if no such organization did exist, there would be no opportunity for the development of an orderly industry policy and radio would be left to whims of outside, individual exploiters and promoters, however worthy their schemes might be.

Ever since the reorganization of the NAB in 1937, the Public Relations Department which was then instituted has been charged with the duty of promoting radio on all fronts. To further implement the work, an additional man was added to the staff a year ago—Mr. Arthur Stringer. We are currently promoting National Radio Festival—essentially an individual station promotion—to be followed either on the 4th of July or in August on the eve of the NAB Convention, by a broadcast event—
phrasing America's freedom of radio which parallels freedom of the press, freedom of religion, etc. During the active presidential campaign, radio's role will be emphasized by both political parties who will urge voters to "Listen Before You Vote." Not until late fall, until after the campaign is over, do our plans call for the celebration of radio's twentieth birthday. These plans have been carefully formulated and follow a logical pattern laid down in 1938-39. They are geared industry-wide. Even should our policy permit, there is no opportunity for us to tie up with any other promotions in the current year. Nor can anyone be permitted to seek government participation, nor to make arrangements in the name of the broadcasting industry. This is the function of the NAB.

I hope this clears up some of the misunderstanding reflected in your letter.

Very truly yours,

Edward M. Kirby
Director of Public Relations.

RADIO FESTIVAL

All Oklahoma City stations, KTOK, KOMA, WKY and KOCY; all Pittsburgh stations, KDKA, WCAE, WJAS, KQV and WWSW are set for joint Radio Festival celebration.

Boston's WEEI has completed plans, KABR, Aberdeen, S. D., and WSYR, Syracuse, announce 100 per cent support with details to come. WCAU, Philadelphia, has prepared a veritable radio show. WTAD, Quincy, is completing a fine job. Here's the line up:

**ABERDEEN—KABR**

Through KABR, Aberdeen, South Dakota joins the long list of states which will observe National Radio Festival. Comes word from R. Thompson Mable, production manager: "You may be sure that we will cooperate in Radio Festival in a big way. Details later."

**BOSTON—WEEI**

A pair of Open Houses, two contests, a quiz series and an interview series are what WEEI will offer listeners during National Radio Festival week, June 3-8. Here's how L. G. Del Castillo, production manager, has planned it:

1—Open House at the studios and transmitter.
2—The NAB essay contest.
3—A WEEI contest. Prizes to be awarded for the longest list of advertising slogans heard over station.
4—An audience-participation studio quiz on the station's daily staff orchestra programs. Cash prizes will be given for the correct answers to questions dealing with WEEI and radio history.
5—A series of daily interviews with members of staff.

Window displays and publicity will supplement the above program features.

**OKLAHOMA CITY—KOCY-KOMA-KTOK-WKY**

"You can count Oklahoma City in on National Radio Festival Week ONE HUNDRED PER CENT! All four stations here are together...the Governor has issued the proclamation as has the Mayor of Oklahoma City. The 'Week' is to be the one you suggested in the BULLETIN and Oklahoma City is certainly going to be well aware of radio during that week!"

W. S. Lukenbill, director of promotion, KOMA, is authority for the above quote. Here's the rest of the story:

1—Special 3-hour show at the Oklahoma City Municipal Auditorium, free to the public. One hour of the show will be broadcast by WKY-KTOK-KOMA-KOCY.
2—Special newspaper section—Sunday, before National Radio Festival.
3—Most prominent "island" window in town to be converted into a news room with AP and UP printers. Announcers from four stations will work in relays. Public address system to be set up for spectators' benefit. Also large displays in windows.
4—Special programs and announcements are planned by all stations individually during the week.

In signing off, Brother Lukenbill contributed something which goes to show the warm feeling "folks" have for radio. This feeling comes from the heart as well as the mind. It makes radio what it is today. The statement is: "...we are certainly getting fine cooperation from all concerned..." That makes it possible for Mr. Lukenbill to add enthusiastically: "We expect a tremendous success from this promotion."

**PITTSBURGH—WWSW-KQV-WJAS-WCAE-KDKA**

On the last day of Pittsburgh's National Radio Festival, Saturday, June 8, the city's five stations will climax the festivities with a simultaneous broadcast, according to W. B. McGill, sales manager, KDKA. At the conclusion of the Pittsburgh broadcasters, on Radio Festival plans, it was agreed that each of the five stations would also broadcast at least three special programs between June 3 and 8.

**SACRAMENTO—KFBK-KROY**

Letter of Howard Lane, business manager, KFBK, containing news of National Radio Festival, reached headquarters too late for inclusion in last week's NAB Reports though it was written and posted in ample time, normally, to make the headline, "Radio Festival, May 27-June 1," says Mr. Lane, "promises to be the biggest promotion of this kind that we have ever put on and will cover practically the entire KFBK coverage area."

KFBK and KROY together will launch the opening broadcast for the week, 6:00-6:30 p.m., Monday, with state and city officials among the speakers. Included will be Governor Culbert L. Olson and California State Superintendent of Public Education W. F. Dexter. The Sacramento City Junior College a Capello Choir is scheduled to make an appearance.

KFBK will actually take radio programs to the schools. Special programs will be produced before assemblies of both the Sacramento Senior High School and the McClatchy Senior High School. These programs, which will be staged on Tuesday and on Friday will include George Breece and the KFBK studio orchestra; vocalist Ruth O'Kane; a talk on "News Used for Radio" by Hugh Gagos, Pacific Coast manager, radio division, United Press; a brief talk and a sample baseball re-creation by Tony Koester, sports announcer; a condensed musical skit, A Typical Radio Day, to be performed by producer Larry Robertson; and several other acts as yet undetermined.

Personal calls were made on the principals of the five Sacramento Junior High Schools and groups of their students will visit KFBK studios. Through the cooperation of State Superintendent Dexter letters were mailed to every school in the Sacramento Valley, calling attention to the purposes of National Radio Festival and inviting classes to visit KFBK studios.

During the week KFBK news broadcasts will originate in the windows of the Eastern Outfitting Company; and baseball re-creation of the Sacramento Pacific Coast League games will be staged in Sears Roebuck Company's window.

Three and possibly more special school musical programs will be aired from KFBK studios during the week.

**Syracuse—WSYR**

WSYR is another station to announce ONE HUNDRED PER CENT SUPPORT for National Radio Festival. Arnold Schoen, service director, wrote: "...you can count on WSYR's supporting Radio Festival Week 100%. Just as soon as we finish our plans I will let you know."

**PHILADELPHIA—WCAU**

WCAU has announced ambitious plans for "Radio Open House," which is the Philadelphia version of Radio Festival. Here's what's on the docket for the customers of WCAU. (Philadelphia stations have prepared individual plans.)

1—Television. A complete RCA unit.
2—Facsimile.
3—Pennsylvania State Police Teletype Exhibit.
4—Aviation Radio Exhibit. Supplied by United Airlines.
5—Voice Mirror. From American Tel. & Tel.
6—Radio Set Exhibits.
7—Exhibits of tubes, early television models, microphones, etc.
8—CBS network programs. Several shows will be brought from New York to be broadcast from WCAU's auditorium during the week.

QUINCY—WTAD

In Quincy, Ill., WTAD began the celebration of Radio Festival on Sunday, May 26, with final programs on Thursday. Townspeople, both youngsters and parents, entered into the activities so enthusiastically that the week was an outstanding success from all points of view.

Twenty merchants donated prizes for essay contest winners, one for each school, with a grand prize of a big radio set to the "best" school. Dramatized versions of the basic essay (American system of broadcasting) material were aired by high school students. In addition entire grades listened to information on American radio during school hours.

The Mayor's Radio Festival proclamation was sent early to teachers, including high school and college; to radio dealers, servicemen and other business houses.

Radio dealers set up special displays during the week and reception of visitors at WTAD's studios began well in advance of the week, itself.

C. Arthur Fifer, general manager, accompanied by Francis Wentura, chief engineer, made a succession of talk-demonstrations before civic clubs.

BEDTIME RADIO

"Last year Memphis radio announcers won a lot of praise from a lot of folks by suggesting that volume be reduced after 9:30 or 10 in the evenings, and we hope they will give an encore on that kindly act this year. . . . Man's inhumanity to man found a new avenue of expression when radio came in, but the most of it comes from lack of thought rather than from definitely evil intent."

The above is part of a May 20 editorial in the Memphis Commercial Appeal. The campaign to control night time loudspeaker volume, instituted by individual stations, is striking a responsive cord.

Sales

FREE OFFERS

Comes the month of June and free offers blossom forth like the proverbial flowers in spring. As one member expresses it, "it seems that every association from hairdressers to hotels is having a National Week," and judging from the money and effort expended on the various free offers, it would also seem that the very life or death of these promotions depended on radio. If that is the case, the following organizations ought to be good prospects for regular radio advertising, and the Bureau has invited them to consider buying time:

- The American Golf Institute (A. G. Spalding & Bros, Inc.)
- The American Hotel Association
- The Crowell-Collier Publishing Company
- "Life With Father"—Press Department
- Abbott Kimball Company (on behalf of Pamilla Silver Cloth)
- Exercycle Corporation

The Abbott Kimball Agency in reply disclaims any intention of trying to chisel time, adhering to their original premise that Pamilla Silver Cloth has definite news value for radio listeners, but adding "I personally would like to see our client buy time on the air."

COMING CONVENTIONS

- June 6-8—National Federation of Sales Executives, Milwaukee.
- June 17-20—Mid-Summer convention, National Retail Dry Goods Association, Palmer House, Chicago.
- June 17-20—National Association of Retail Grocers, Hotel Pennsylvania, New York City.
- June 23-27—Annual Convention, Advertising Federation of America, Hotel Sherman, Chicago.
- July 7-10—Annual convention, Pacific Coast Advertising Clubs Association, Vancouver, B. C.
- August 4-7—Annual convention, National Association of Broadcasters, San Francisco.

Labor

APEX DECISION

The Supreme Court said Monday that the Sherman Anti-trust Act could be applied to labor unions to prevent activities which resulted in "constraint upon commercial competition in the marketing of goods and services."

The decision was a blow to both A. F. of L. and C. I. O. Both organizations had contended that the Sherman Act could not be applied to labor unions at all.
STATE LEGISLATION

LOUISIANA:
S. 72 (Carabajal) COPYRIGHTED MUSIC—To repeal Act 137 of 1934, which imposes a license tax on copyrighted music, books and records.

NEW JERSEY:
A. 459 (Palese) CHIROPODIST—ADVERTISING—To prohibit chiropodists from advertising their products or prices for their work. Referred to Committee on Public Health.

The Commission

"RADIO IN A DEMOCRACY"

James Lawrence Fly, FCC Chairman, gave the following talk at the dedication of the Radio Studio of the University of North Carolina, Chapel Hill, N. C. It was carried over MBS from Station WRAL, Raleigh, N. C., and also by CBS Stations WBIG and WBT at Greensboro and Charlotte, N. C., respectively, at 5 p. m. EST, May 26, 1940:

Today it is our privilege to pause in the peace and security of Chapel Hill—to dedicate to the public service this studio of the University of North Carolina.

Seemingly we pause here in the shadow of a mighty conflict of greater import. Yet, on this quiet spot I cannot but feel the spell of an event of real significance to our own democracy.

Contrast of environment carries its own significance. For the peace and security of Chapel Hill are the peace and the security of America.

With the democracies of the Old World in peril, it is well to reflect upon our own democracy—and more particularly—to take stock of the institutions upon which our republic was founded and upon which its future will depend. Kings Mountain is of lasting importance only as an effort to project into the future principles that would endure as the bases of the life of a free people.

It is essential that government be responsive to public opinion—only as an agent does it rule.

President Washington observed that "In proportion as the structure of a government gives force to public opinion, it should be enlightened."

Washington realized that the democratic form of government, to function properly and achieve its ideals, must depend upon the intelligence and understanding of its peoples. One of his essential admonitions in the Farewell Address was to "promote—as an object of primary importance, institutions for the general diffusion of knowledge."

Public education and an intelligent, well informed public opinion are basic in our way of life and in our process of self government.

In sharp contrast, under other systems, mental and spiritual subjugation have preceded the subjugation of peoples generally and their eventual alignment with machines which rule by force.

In general it may be observed that rule by force has not been accomplished internally where there existed a free educational system and the unfettered means for the reception of information.

Seizure of the radio has been an early step in the process of subjugation.

Our system of public education has come down to us from the days of Washington and has continued to serve the basic purposes he enunciated.

The University of North Carolina is a great progressive public educational institution. In one of our parent states it has brought down to us the principles of our fathers and has equipped us to effectuate those principles as instruments of public welfare.

More importantly, Chapel Hill is symbolic—the symbol of the whole system of public education which we have inherited as a part of the American dream.

The advent of radio presents us with another facility of great import. It has a tremendous influence upon the lives of the peoples, their customs, their pattern of thought.

Recently, the press carried a story concerning the death of a French physicist, Dr. Edouard Brany, who cooperated with Marconi in the development of radio. It is stated that he had frequently expressed his disgust with having had anything to do with the development of an instrument which is now being so frequently perverted for propaganda purposes.

But there is no question as to whether this powerful instrument exerts a great influence—the only question is whether that force is to be used to serve the ends of a few who would dominate or shall function as a servant of the people.

It is well to remember that radio is not an instrumentality for foisting upon the public the particular social, religious or political philosophy of any individual or group of individuals.

My predecessor, that distinguished North Carolinian, has reminded you that the radio serves primarily the millions of listeners and only secondarily the few who speak. I should be happy if it were possible for everyone to use the radio for purposes of free speech. That is impossible. From the very limited nature of the facility it is at once apparent that the paramount interest is not in the single speaker—but in the millions of listeners. A duty would seem to arise, therefore, to recognize and to serve that great public interest, among other ways, by a full and fair dissemination of facts.

But the conclusion rests not merely upon a contrast in the relative numbers of listeners and speakers. The radio spectrum is public domain—not private. A radio frequency is not subject to ownership. Therefore any occupancy of the air waves is charged with a public trust.

As education has long been essential to democracy, a radio system to serve the public interest has now become essential to education.

It should and it can rise to its responsibilities.

Radio is an advancing art. As new forms are developed, and more and better facilities are provided, radio will, if possible, exert a still greater force upon our lives. The Commission has recently authorized the full commercial operation of frequency modulation—which will give an improved radio service and open up a range of frequencies not heretofore in use by radio. Particular care was taken to set aside a number of the FM frequencies to be utilized exclusively by educational stations.

Research and experimentation in television are advancing and in a few years this combination of radio sight and sound may be expected in your homes.

But radio today is one of our mightiest forces—it has served and will serve important functions.

In passing, we ought to recognize the great work which the radio broadcasters are doing in the presentation of war news and commentaries, their balanced reporting of general information and their grants of time for the discussion of public issues. Editorial attitudes are seldom displayed by broadcasters. These services lead toward the goal of a well informed public—the best informed public in the world. Under these circumstances the legal right to form an independent judgment upon public issues takes on real substance.

Much time has been given to programs by educational institutions. And this makes possible the effective work of studios such as this of the University of North Carolina.

For a stronger reason this studio and those engaged here are not to serve a selfish end. By this act today, this studio is dedicated to the enduring service of the people. Here indeed is the grant of a privilege to reach into the homes of the millions. But of far greater significance is the attendant responsibility upon you to meet the needs of a free people. The freedom involved is not yours in any peculiar sense—the freedom is that of the people to be served.

One of your problems is to devise programs and methods of presentation which will reach actual listeners. A possible listenering public is not sufficient. But, into these questions as to particular programs and techniques, I shall not intrude. It is of greatest importance as a matter of principle that the work done here shall be designed fairly and effectively to promote the informational needs of the people. In that way, the cause of democracy is served. To no greater purpose could we today, in the quiet peace of Chapel Hill, solemnly dedicate this studio.
TO ELIMINATE DOUBLE CALL-LETTERS

To prevent confusion and in the interests of simplification, the FCC is moving to eliminate the few remaining double call-letter designations retained by standard broadcast stations as a result of past consolidations.

Accordingly, the Commission is writing letters to WIOD-WMBF, the Isle of Dreams Broadcasting Corporation, Miami, Fla., and WSYR-WSYU, Central New York Broadcasting Corporation, Syracuse, N. Y., suggesting that they dispense with one half of their respective combinations, and allowing them to make such choice.

KWBD CP CANCELLED

The FCC has cancelled a construction permit issued W. B. Dennis on July 12, 1939, for a radio broadcast station at Plainview, Texas.

This action was taken after the permittee admitted, as a result of a show cause order issued March 12 last, that he made misstatements relative to his financial position in applying for the permit. The station, which had been assigned the call letters KWBD, proposed to operate daytime on 1200 kilocycles with 100 watts power.

FEDERAL COMMUNICATIONS COMMISSION

DECISION

FCC has adopted as final its Proposed Findings of Fact and entered an order granting the application of Neptune Broadcasting Corp. for a construction permit for a new radio broadcasting station at Atlantic City, N. J., to operate unlimited time, using the frequency 1420 kilocycles, with power of 100 watts night, 250 watts day, upon the condition that the corporation file an application for modification of construction permit, specifying the exact transmitter location and the antenna system, within two months.

FINDING OF FACTS

The Commission has announced its Proposed Findings of Fact and Conclusions, proposing to grant the application of Pawtucket Broadcasting Company for a new station at Pawtucket, Rhode Island, to operate on the frequency of 1390 kilocycles with power of 1000 watts, unlimited time, subject to the condition that Paul Oury shall not have any interest in the proposed station or be associated with it as manager or in any other capacity.

In its findings of fact, the Commission concludes:

1. The applicant as now constituted, the capital stock in the corporation formerly held by Paul Oury having been surrendered and the latter having withdrawn from any connection with the applicant, is qualified to construct and operate the proposed station.

2. The use of the frequency of 1390 kilocycles for operation of a station as proposed by applicant will provide service to Pawtucket and to some extent, particularly in the daytime, to surrounding areas.

3. The frequency specified by the applicant may be employed in the situation presented here to better advantage than any other regional frequency or local frequency which might have been requested, and the proposed use of the frequency subject to the conditions which have been indicated is not inconsistent with the purposes of the Commission's plan of allocation.

The Commission has announced its proposed findings of fact and conclusions (No. B-107), proposing to GRANT the renewal of license for station WAAB, The Yankee Network, Inc., Boston, Mass., for the main and auxiliary transmitters: (station operates on 1410 kc., 1 KW, unlimited time); and DENY the application of The Mayflower Broadcasting Corporation for authority to establish a new station on 1410 kc., 500 watts night, 1 KW day, unlimited time (the facilities of WAAB).

In its conclusions the Commission states:

1. Applicant, the Mayflower Broadcasting Corporation, is not shown to be financially qualified to construct and operate the station proposed by it.

2. Representations made to the Commission in the application, under oath, were not in fact true. Whenever an applicant, such as here, makes material representations in its application which are at variance with the true facts, a serious question is presented and problems arise which affect and, in fact, substantially impede, the progress of the Commission in carrying out its mandate under the statute. Under no circumstances can the Commission excuse or condone action of this sort. A proposed licensee who acts in this manner cannot be entrusted with the burdens imposed by a broadcast license.

3. The granting of the application of the Mayflower Broadcasting Corporation will not serve public interest, convenience or necessity.

The granting of the applications of The Yankee Network, Inc. (WAAB), for renewal of licenses for main and auxiliary transmitters will serve public interest, convenience or necessity.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following hearings and oral argument are scheduled in broadcast cases before the Commission for the week beginning Monday, June 3. They are subject to change.
Monday, June 3

Thursday, June 6

Oral Argument Before a Quorum of the Commission on Petition for Rehearing

WPAY—Chester A. Thompson (Transferor), and The Brush-Moore Newspapers, Inc. (Transferee), (applicants for consent to transfer control of Vee Bee Corporation, licensee of Station WPAY, Portsmouth, Ohio).—Re: Petition for Rehearing.

FEDERAL COMMUNICATIONS
COMMISSION ACTION

APPLICATIONS GRANTED

Gainesville Broadcasters, Gainesville, Ga.—Granted construction permit for new station to operate on 1210 kc., 250 watts, unlimited time. Exact transmitter site and type of antenna to be determined subject to Commission's approval.

The Valley Broadcasting Co., Steubenville, Ohio.—Granted construction permit for new station to operate on 1310 kc., 250 watts, S.H. (all hours not used by WSAJ, Grove City, Pa.). Exact sites of transmitter and studio location and type of antenna system to be determined by Commission's approval.

Leonard A. Versluis, Grand Rapids, Mich.—Granted construction permit for new station to operate on 1310 kc., 250 watts, unlimited time, Class IV station. Exact transmitter site and type of antenna to be determined subject to Commission's approval.

WLAP—American Broadcasting Corp. of Kentucky, Lexington, Ky.—Granted modification of license to increase night power from 100 to 250 watts, operating unlimited time on 1420 kc.

WARM—Union Broadcasting Co., Scranton, Pa.—Granted modification of construction permit to make changes in antenna, increase night power from 100 to 250 watts, change transmitter site locally, and extend commencement date and completion date to 60 days after grant and 192 days thereafter, respectively.

KSLM—Oregon Radio, Inc., Salem, Ore.—Granted modification of license to increase night power from 500 watts to 1 kW, operating on 1500 kc., unlimited time.

KSCI—Perkins Bros. Company (The Sioux City Journal), Sioux City, Iowa.—Granted modification of construction permit authorizing changes in directional antenna system.

WJRD—James R. Doss, Jr., Tuscaloosa, Ala.—Granted modification of license to increase night power from 100 to 250 watts, on 1200 kc.

WKAT—A. Frank Katzentine, Miami Beach, Fla.—Granted construction permit to install new transmitter, change frequency from 1500 to 1350 kc., increase power from 250 watts to 1 kW, move transmitter and install new antenna.

WICA—WICA, Inc., Ashtabula, Ohio—Granted construction permit to make changes in equipment and increase power from 500 watts to 1 kW, operating daytime only on 940 kc.

WKAR—Michigan State College, East Lansing, Mich.—Granted construction permit authorizing increase in power from 1 kW to 5 kW, operating daytime only on 880 kc.

DESIGNATED FOR HEARING

George F. Meyer, Medina, Wis.—Application for construction permit for new radio broadcast station to operate in Medina, Wis., Class IV, on 1500 kc., 100 watts, unlimited time (B4-P-2501).

Capital Broadcasting Co., Washington, D. C.—Application for construction permit for new radio broadcast station to operate in Washington, D. C., Class IV, on 1120 kc., 250 watts, unlimited time (B1-P-2679).

General Broadcasting, Inc., Miami, Fla.—Application for construction permit for new radio broadcast station to operate in Miami, Fla., Class III-B, on 1330 kc., 500 watts night, 1 kW day, unlimited time (B3-P-2749).

Oscar Kronenberg, Steubenville, Ohio.—Application for construction permit for new radio broadcast station to operate in Steubenville, Ohio, on 1310 kc., 250 watts, unlimited time (B2-P-2657).

Hobart Stephenson, Milton Edge and Edgar J. Korsmeyer, d/b/a Stephenson, Edge and Korsmeyer, Jacksonville, Ill.—Application for construction permit for new radio broadcast station to operate in Jacksonville, Ill., on 1150 kc., 250 watts, daytime (B4-P-2465). (Docket No. 5779); and Helen L. Walton and Walter Bellatti, Jacksonville, Ill.—Application for construction permit for new radio broadcast station to operate in Jacksonville, Ill., on 1150 kc., 250 watts, daytime (B4-P-2623).

Joint hearing on above two cases.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the period June 1 to August 1, 1940:

KFKU, Lawrence, Kans.; KGVO, Missoula, Mont.; KSAL, Chico, Calif.; KSAL, Salina, Kans.; KVOR, Colorado Springs, Colo.; WDAE, Tampa, Fla.; WHA, Madison, Wis.; WICA, Ashtabula, Ohio; WREN, Lawrence, Kans.; WRW and auxiliary, Dallas, Tex.; WTCN, Minneapolis, Minn.; WBNX, Springfield, Vt.

The following stations were granted extension of licenses upon a temporary basis only, to not later than July 1, 1940, subject to whatever action may be taken upon the pending application for renewal of license:

KGBU, Ketchikan, Alaska; KXO, El Centro, Calif.; KTHS, Hot Springs National Park, Ark.; KFAK, Fairbanks, Alaska; KOV, Phoenix, Ariz.; WMC and auxiliary, Memphis, Tenn.; WGST and auxiliary, Atlanta, Ga.; KMA, Shenandoah, Iowa; KTBC, Austin, Tex.; KTW, Seattle, Wash.; WDSU, New Orleans, La.

KWJB—Sims Broadcasting Co., Globe, Ariz.—Granted extension of special temporary authority to Bartley T. Sims, remaining partner of the partnership formerly composed of Bartley T. Sims, W. J. Sims, and John W. Sims, d/b/a Sims Broadcasting Co. (Bartley T. Sims, Manager), to operate Station KWJB, upon a temporary basis only, to not later than July 1, 1940, subject to whatever action may be taken upon the application for renewal of the station's license, and upon the further condition that such special temporary authority shall not be construed as a finding by the Commission that the operation is, or will be, in the public interest beyond the terms hereof.

W2XOQ—Knickerbocker Broadcasting Co., Inc., Flashing, N. Y.—Granted renewal of high frequency broadcasting station license for the period ending April 1, 1941.

W9XSP—Star-Times Publishing Co., St. Louis, Mo.—Granted further extension of facsimile broadcast station license, upon a temporary basis only, pending determination upon application for renewal of license, to not longer than July 1, 1940.

W9XG—Purdue University, West Lafayette, Ind.—Granted further extension of television broadcast station license, upon a temporary basis only, pending receipt and determination upon application for renewal of license, to not longer than July 1, 1940.

W9XK—State University of Iowa, Iowa City, Iowa.—Granted further extension of television broadcast station license, upon a temporary basis only, pending receipt and determination upon application for renewal of license, to not longer than July 1, 1940.

The following high frequency broadcast stations were granted extensions of licenses upon a temporary basis only, pending receipt and or determination upon applications for renewal of licenses, to not later than July 1, 1940:

W8XWJ, Detroit, Mich.; W2XDA, Schenectady, N. Y.; W2XOV, Albany, N. Y.

MISCELLANEOUS

WGAX—Portland Broadcasting System, Inc., Portland, Me.—Granted special temporary authority to operate from 10:45
p. m. to 11 p. m., EDST, on May 26, 1940, in order to broadcast the complete address of the President.

WHKC—United Broadcasting Co., Columbus, Ohio.—Granted special temporary authority to operate from 9:45 p. m., EST, to the conclusion of President Roosevelt’s defense program speech on May 26, 1940.

KFBF—The Farmers and Bankers Broadcasting Corp., Wichita, Kans.—Granted special temporary authority to operate from 8:45 p. m. to 9 p. m., CST, on May 26, 1940, in order to broadcast the President’s fireside chat.

WTBO—Associated Broadcasting Corp., Cumberland, Md.—Granted special temporary authority to operate from 8:15 p. m., EST, to the conclusion of President Roosevelt’s speech on May 26, 1940.

WNAD—University of Oklahoma, Norman, Okla.—Granted special temporary authority to operate from 8 to 9:15 p. m., CST, on June 9, 16, 23, 30; from 9:15 to 9:30 p. m., CST, on June 11, 12, 13, 1940, in order to broadcast special educational programs (provided EGGF remains silent); to remain silent from 7:15 to 9:15 p. m., CST, on June 4 and 6, and from 8:15 to 9:15 p. m., CST, on June 5, 1940, in order to observe beginning of summer school term (B3-S-464).

WRGA—Rome Broadcasting Corp., Rome, Ga.—Granted special temporary authority to rebroadcast program material to be received from frequency modulated transmitter on Amateur Station W4DCC operating on the five meter band. On June 2, 1940, in order to demonstrate frequency modulation to the assembly at the annual Northwest Georgia Amateur Radio Club “Hamfest.”

KFOR—Voice of Longview, Longview, Tex.—Granted special temporary authority to operate with power of 250 watts from 7:45 p. m., CST, to the conclusion of Graduation Exercises on May 30, 1940, in order to broadcast said program only.

KGGF—Hugh J. Powell, Coffeyville, Kans.—Granted special temporary authority to remain silent from 8 to 9:15 p. m., CST, on June 9, 16, 23, 30; from 9:15 to 9:30 p. m., CST, on June 11, 12, 13, 1940, in order to permit WNAD to broadcast special educational programs; to operate from 7:15 to 9:15 p. m., CST, on June 4 and 6, and from 8:15 to 9:15 p. m., CST, on June 5, 1940, in order to permit WNAD to remain silent during beginning of summer school term (provided WNAD remains silent) (B4-S-710).

WBAA—Purdue University, W. Lafayette, Ind.—Granted special temporary authority to operate from 8:30 a. m. to 9 a. m. and from 9 a.m. to 10 a. m., EST, on May 30, 1940, in order to broadcast Morning Musicale and Memorial Day tribute respectively; to operate from 8:30 a.m. to 10 a.m. EST, for the period June 17, 1940, to not later than June 28, 1940, exclusive Saturdays and Sundays, in order to broadcast the Morning Musicale from 8:30 to 9 a.m., Favorite Waltzes from 9 to 9:30 a.m., and Tuneful Topics from 9:30 to 10 a.m.; all programs to be sustaining (provided WSVS remains silent).

WNBM—National Broadcasting Co., Inc., New York, N. Y.—Granted special temporary authority to operate relay broadcast Station W1EPX from board site at Kingsport, Tenn., using 500-watt NBC Composite transmitter, type P-500-A, serial No. 1, crystal control, high level modulation with 4 RCA 805 tubes in the last radio stage under the permissive proviso of Sec. 308(a) of the Act, and to operate on additional frequencies 4797.5, 6415, 9135, 12802.5, 15701 kc., in order to relay broadcast Toscanini Concerts and special program material from the Brazil station, for east coast South American ports to the NBC network for the period May 30, 1940, to not later than June 28, 1940 (providing no interference caused ship station WSBW).

WKPT—C. P. Edwards, Jr., and Howard Long, d/b as Kingsport Broadcasting Co., Kingsport, Tenn.—Granted modification of construction permit for new broadcast station, for approval of antenna and approval of studio site at Commerce St., Kingsport, and transmitter site at Kingsport, Tenn.; 1370 kc., 250 watts, unlimited time (B3-MP-965).

KERN—McClatchy Broadcasting Co., Bakersfield, Calif.—Granted modification of construction permit for change of frequency, increase in power, installation of new transmitter and antenna, and move of transmitter and studio, for approval of antenna and transmitter site at Oak at Ming, Bakersfield, Calif., studio location at present site, and install new transmitter; frequency 1380 kc., 1 KW power, unlimited (B5-MP-964).

W8XVH—WBNS, Inc., Columbus, Ohio.—Granted construction permit to install new equipment in high frequency broadcast station (B2-PHB-239).

WABA—Purdue University, W. Lafayette, Ind.—Granted special temporary authority to operate from 4 p.m. to 6 p.m., CST, June 9, 1940, in order to broadcast the complete Commencement Service of Purdue University only (B4-S-501).

The Broadway Co. and The St. Lawrence University.—Granted motion to dismiss without prejudice the application of St. Lawrence University, Canton, N. Y. (WCAD), for assignment of license from St. Lawrence University to The Broadway Co.; station operates on 1520 kc., 500 watts, specified hours.

WTW—Minnesota Broadcasting Co., Minneapolis, Minn.—Granted petition for leave to amend its application for construction permit to change frequency from 1250 kc., 1 KW, 5 KW local sunset, to 710 kc., 10 KW, 10 KW local sunset, unlimited time, directional antenna, with respect to proposed site and directional antenna.

WWRL—Long Island Broadcasting Corp., Woodside, L. I.—Adopted order extending effective date of Provision (3) of Commission Order of December 5, 1938, for a period of 60 days from May 28, 1940.

WAG—Liberty Broadcasting Corp., Atlanta, Ga.—Granted petition to accept amended application substituting the Fort Industry Company as proposed transferee in place of James M. Cox, Jr., reconsidered its action of April 13 in designating the application for hearing, and granted amended application, authorizing the operation of new station operated by Fort Industry Corp., licensee of Station WAGA, from Norman K. Winston to The Fort Industry Co. Station operates on 1450 kc., with 500 watts night, 1 KW LS, unlimited time.

KWDB—W. B. Dennis, Plainview, Tex.—Adopted an order rescinding action of June 12, 1939, granting a construction permit for a new station to operate on 1200 kc., 100 watts, and cancelled the authorization.

KGNF—Great Plains Broadcasting Co., North Platte, Nebr.—Granted license to cover construction permit for changes in equipment; 1430 kc., 1 KW power, daytime hours of operation (R4-E-1150).

KLB—Chas. M. Finley and Mrs. Eloise Finley, LaGrande, Ore.—Granted license to cover construction permit for changes in equipment; 1120 kc., 250 watts, unlimited time (B5-L-1144).

WJSN—Heard Radio, Inc., Milwaukee, Wis.—Granted authority to determine operating power by direct measurement of antenna input, for main and auxiliary transmitters (B4-Z-395).

WFN—W. C. Ewing and Harry Haymon, d/b as Cumberland Broadcasting Co., Fayetteville, N. C.—Granted modification of construction permit to install new type transmitting equipment and approval of studio site, and extend date of completion from May 20, 1940, to June 30, 1940 (B3-MP-982).

KFOR—Voice of Longview, Longview, Tex.—Granted special temporary authority to operate with power of 250 watts from 7:45 p. m., CST, to the conclusion of church service on June 2, 9, 16, 23, and 30, 1940, in order to broadcast church services only.

WLJO—The Crosley Corp., Cincinnati, Ohio.—Granted extension of special temporary authority to operate the old transmitter of International Broadcast Station WLJO on 6090 kc. from May 30, 1940, to not later than June 28, 1940, pending adjustments to be made on new transmitter before other frequencies licensed for the use of that station can be employed over the new transmitter.

WSV—Shenandoah Valley Broadcasting Corp., Harrisonburg, Va.—Granted special temporary authority to operate from 7:45 p.m. to 9:30 p.m., EST, June 1, 1940, in order to broadcast an address by the Chief of Staff of the U. S. Army, General George C. Marshall, only.

W10XMC—McNary and Chambers, Washington.—Granted special temporary authority to use Commonwealth CT, 100-watt transmitter on 1210 kc., for a period not to exceed 30 days, in order to make tests of possible transmitter sites and propagation characteristics in this area on this frequency to more accurately determine the results of operation of proposed station in area of Schenectady, N. Y., pending action on formal application for developmental broadcast station (File No. B-PFX-33).
APPLICATIONS FILED AT FCC

550 Kilocycles
KOAC—Oregon State Agricultural College, Corvallis, Oregon.—Construction permit to install new transmitter, increase power from 1 KW to 5 KW, move transmitter, and install directional antenna for day and night use. Amended: To request 1 KW night and 5 KW day.

600 Kilocycles
KFJ—KFJi Broadcasters, Inc., Klamath Falls, Oregon.—Construction permit to install new transmitter, new antenna system, change frequency from 1210 kc. to 600 kc., increase power from 100 watts to 300 watts night, 1 KW day, move of transmitter from Willard Hotel, 215 Main St., Klamath Falls, Oregon to Rocky Pt. Rd., Klamath Falls, Oregon. Class III-B Station.

620 Kilocycles
NEW—North Jersey Advertising Co., Elizabeth, N. J.—Construction permit for a new broadcast station to be operated on 620 kc., 250 watts, unlimited time. Class IV Station.

880 Kilocycles
WSUI—State University of Iowa, Iowa City, Iowa.—License to cover construction permit (B4-P-2260) to increase power, install new transmitter and directional antenna for day and night use, and move transmitter.

920 Kilocycles
WWJ—The Evening News Assn., Detroit, Mich.—Construction permit to make changes in transmitting equipment, increase power from 1 KW night, 5 KW day to 5 KW day and night, and install directional antenna for night use. Requests Class III-A Station.

1200 Kilocycles
WCOL—WCOL, Inc., Columbus, Ohio.—License to cover construction permit (B2-P-2508) for change in frequency, increase in power, changes in equipment.

1340 Kilocycles
KGNO—The Dodge City Broadcasting Co., Inc., Dodge City, Kansas.—Modification of license to increase power from 250 watts night, 1 KW day, to 500 watts night, 1 KW day.

1350 Kilocycles
WMBG—Havens & Martin, Inc., Richmond, Va.—Construction permit to install new auxiliary transmitter using power of 1 KW instead of 250 watts, for emergency use only.

1360 Kilocycles
WCSG—South Carolina Broadcasting Co., Inc., Charleston, S. C.—Authority to transfer control of corporation from The Liberty Life Insurance Co. to John M. Rivers, 200 shares common stock.

1370 Kilocycles
WARM—Unicon Broadcasting Co., Scranton, Pa.—Modification of construction permit (B2-P-2366) as modified, for a new station, requesting authority to install new type transmitter, and extend completion date 60 days after grant.

NEW—Ralph L. Lewis, Greensboro, N. C.—Construction permit for a new broadcast station to be operated on 1570 kc., 100 watts, unlimited time. Class IV Station. Amended: To specify transmitter site as 101-107 S. Davie St., Greensboro, N. C.

WRJN—Racine Broadcasting Corp., Racine, Wisc.—Authority to determine operating power by direct measurement of antenna power.

1500 Kilocycles
NEW—Roanoke Broadcasting Corp., Roanoke, Va.—Construction permit for a new broadcast station to be operated on 1500 kc., 250 watts, unlimited time. Class IV Station.

FEDERAL COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

American Crayon Company, Sandusky, Ohio, and Binney & Smith Company, 41 East 42nd St., New York, manufacturers of crayons, chalk, paint sets, educational supplies and allied products, have been served with complaints alleging violation of the Robinson-Patman Act.

It is alleged that the respondents have been discriminating in price between different purchasers by selling their products to some of their customers at lower prices than they sell articles of like grade and quality to other customers competitively engaged one with the other in the resale of such merchandise.

According to the complaints, the respondents sold their products at one list price from which they allowed a 50 per cent trade discount to customers who bought in case lots either for use or for resale. It is alleged that The American Crayon Company designated certain of this class of customers as "Multiple Discount Customers," and to some of them granted additional discounts over and above the regular trade discount ranging from 5 to 15 per cent, while to others of this class it allowed a discount of 10 plus 10 per cent over and above the regular trade discount.

It is alleged that the Binney & Smith Company designated certain of its customers receiving the 50 per cent trade discount as "Competitive Distributors," allowing to some of them an additional discount of 5 per cent over and above the trade discount, and to others of this class a discount of 10 per cent over and above the regular trade discount.

The complaint alleges that the "Multiple Discount Customers" of The American Crayon Company and the customers of the Binney & Smith Company known as "Competitive Distributors," who were granted the discounts over and above the regular trade discount of 50 per cent off list price, are in active competition with others of the respondents' customers who purchase in case lots and who do not receive any discounts over and above the trade discount.

4301  May 31, 1940
The result in each case is alleged to be a substantial lessening of competition in the sale, distribution, and resale of the respondents' products. It is further alleged that the respondents have been granting compensation in the form of percentage discounts or allowances to some of their customers designated “Special or Promotional Distributors” in the case of The American Crayon Company and “Special or Promotional Representatives” in the case of the Binney & Smith Company. Such percentage discounts allegedly have been granted to favored customers in consideration for mer­chandising and selling services furnished in connection with the sale of the respondents' products. The percentage discounts allegedly are deducted from the invoice price and are over and above the regular trade discount. It is charged that the respondents have granted such percentage discounts to their favored customers without making them available on proportionally equal terms to other customers competing with such favored customers in the sale and distribution of the respondents' products.

The complaints point out that the other customers not receiving the special discounts are able and willing to furnish the respondents the same services and facilities as do the favored customers and have requested that they receive the special compensa­tion but that the respondents have refused to grant it. (4142-4143)

Binney & Smith Company—See American Crayon Company.

Empire Style Designers League, Inc.—Alleging a price-fix­ing conspiracy in the fur coat pattern business a complaint has been issued against Empire Style Designers League, Inc., 276 Fifth Ave., New York, and ten New York pattern producers who are members of the league and the dominant factor in the fur coat pattern trade. Respondent league members are: Sol Vogel, trading as Sol Vogel Fashion Imports, and Octave Golos, both of 330 Seventh Ave.; Alexander Greenstein and Abraham Fessler, doing business as Greenstein Fur Modes, 345 Seventh Ave.; Samuel Handelman, Mendel Levine, and Anthony T. Sozio, all of 333 Seventh Ave.; Lazare T. Sherman, 370 Seventh Ave.; Evangelista Pet­rocelli, doing business as An-Cell Fur Fashion Company, 372 Third and Thirtieth St.; Benedict Savio, trading as Savio Fur Modes, 352 Seventh Ave., and Bern Publishers, Inc., trading as American-Mitchell Fashion Publishers, 360 Seventh Avenue, all engaged in the creation of styles and the designing and making of patterns for women’s fur coats and the grading, copying and sale and distribution of such patterns in interstate commerce.

It is alleged that the respondent members, acting jointly through the league as a clearing house, combined, agreed and conspired in (1) arranging for and fixing uniform prices at which their products were and are to be sold; (2) publishing such prices in lists, newspapers, magazines and other periodicals and circulars, and (3) adhering to the uniform prices as set forth in the issued and published price lists.

According to the complaint, the respondents' practices have re­sulted in a prevention of price competition among themselves; placed in them the power to control and enhance prices of their products, and tended to create in them a monopoly. (4136)

Farmers Vaccine & Supply Company—Alleging misrepre­sentation in the sale of a drug preparation recommended for use in rendering cattle immune to “Bang's Disease,” a complaint has been issued against John H. Osterhaus, trading as Farmers Vac­cine & Supply Company, 1619 West Sixteenth St., Kansas City, Mo.

The respondent allegedly represented that by one injection of his product “Abortion Vaccine” into each animal of a herd of cattle, the herd and each animal treated is rendered immune to Bang’s disease, any will not, although later exposed, become infected.

Among other representations alleged to have been made by the respondent are that one dose of Abortion Vaccine gives lasting protection; that considerable protection is afforded in two weeks; that these results may be attained in all cases regardless of the animal's age or whether or not infected at the time of treatment, and that all treated females will carry their calves for the full term.

The complaint alleges that the respondent’s representations are exaggerated and misleading. According to the complaint, the respondent recommended the use of his vaccines for cattle of any age, although the United States Department of Agriculture, on May 26, 1938, ordered that licensed vaccine establishments recommend use of abortion vaccine only for the treatment of calves from four to eight months old. The complaint points out that the respondent, while not a vaccine manufacturer, obtains his product from a licensed manufacturer. (4137)

General Baking Corporation—Eight bakery companies, a teamsters' labor union local and its officers and members, all operating in the Omaha, Nebr., and Council Bluffs, Iowa, area, are charged in a complaint with restraint of competition in the sale of bread and other bakery products.

It is alleged that the baking companies and the union local combined to prevent the sale of such products by certain peddlers or so-called independent bread men and that the union intimidated and used force against such dealers.

Respondents are:

General Baking Corporation, New York, operating a plant in Omaha; Interstate Bakeries Corporation, Kansas City, Mo., operating the Schulze Baking Company, Omaha, Omaha, Inc., Omaha; Quaker Baking Company, Council Bluffs; P. F. Peterson Baking Company, Omaha; Continental Baking Company, Wilmington, Del., operating an Omaha plant; Mose Adler, trading as Adler Bakery, Omaha and Council Bluffs, and Charles W., Charles G. and Lawrence F. Ortman, trading as Ortman Bakery, Omaha.

General Drivers Union, Local No. 554 of the International Broth­erhood of Teamsters of Omaha, whose members are bakery truck drivers and salesmen in the Omaha and Council Bluffs area; Walter Karl Stultz, president of the local; Louis Miller, vice president; Alfred Russell, recording secretary; Thomas V. Smith, secretary, and Malcolm G. Love, Alson Jeffries, and Glenn Karch, trustees, all of Omaha, and all named respondents in their official capacities and as representatives of the union’s membership as a class.

Pursuant to an understanding, agreement and conspiracy, al­legedly entered into on or about July 1, 1939, the respondents agreed to and did prevent certain peddlers and independent bread men from selling bread and other bakery products in the Omaha and Council Bluffs area, and from obtaining such products to sell either at wholesale or retail. According to the complaint, they set apart as a class of approved dealers who could and did sell such products in the area the respondent baking companies and inde­pendent bread men and peddlers who had been in business prior to July 1, 1939.

It is alleged that the respondent baking companies, after July 1, 1939, carried out contracts with the teamsters' union local which provided in part that “After this date, within an area of fifty (50) miles from the city limits of Omaha, Nebr., and Council Bluffs, Iowa, it is agreed that no product shall be sold for resale to ped­dlers or so-called independent bread men other than those to whom previously they have sold.”

The teamsters’ union local allegedly (1) executed and procured pledges from the signers of the contracts and from bakeries and dealers not signers of the contracts, to adhere to and enforce the provisions of the contract; (2) intimidated and harassed and forced violence upon and against men who sought to enter business subsequent to July 1, 1939, to prevent their han­dling bakery products in the Omaha-Council Bluffs area, and (3) used similar methods against bakers and dealers who did not sign the contracts in order to persuade and compel them to stop selling their products to peddlers and independent bread men who had not been in business prior to July 1, 1939, and also to prevent their selling to bakers and dealers who intended selling their products to such peddlers and independents.

These practices, according to the complaint, tended to (1) un­lawfully restrain interstate commerce in bread and other bakery products; (2) monopolize the sale of such products in the Omaha-Council Bluffs area in the respondent baking companies and those independents who had been in business prior to July 1, 1939, and (3) enhance prices and maintain them at artificial levels, in viola­tion of the Federal Trade Commission Act. (4139)

Monahan's Bakery—Alleging restraint of competition in the sale of bread and bakery products in the Minneapolis area, a complaint has been issued against 19 bakery companies, a wagon drivers' labor union local and its officers and members. It is alleged that the baking companies and the union local combined to prevent the sale of such products by certain peddlers or so-called independent bread men from obtaining such products for resale in the Minneapolis area, and that the union intimidated and used force against such dealers.

May 31, 1940
4302
Respondents are:

Bakery, Cracker, Pie & Yeast Wagon Drivers’ Union Local No. 289, affiliated with the American Federation of Labor and chartered by the International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers of America, and its executive board and officers: Harry DeBoer, president; Sam Ash, vice president; Joseph F. O’Hare, secretary-treasurer; Gregory Helwig, recording secretary, Loren Johnson, Chester Ryan, and Mel Edstrom, trustees, all of Minneapolis, and all named respondents in their individual and official capacities and as representatives of the union’s membership as a class.

Pursuant to an understanding, agreement and conspiracy, allegedly entered into on or about February 1, 1939, the respondents agreed to and did prevent certain peddlers and so-called independent bread men, by intimidation and coercion, to prevent their delivering bakery products to sell either at wholesale or retail in the Minneapolis trade area. According to the complaint, they set apart the respondent baking companies as a class of approved dealers who could and would sell sucrofats the respondents controlled.

It is alleged that the respondent baking companies, after February 1, 1939, carried out contracts with the wagon drivers’ union local which provided in part that “After this date, it is agreed that no product shall be sold for resale to peddlers or so-called independent bread men and no member shall be permitted to furnish vehicles to be used in the delivery of goods in connection with his employment.”

The wagon drivers’ union local allegedly (1) executed and procured pledges from the signers of the contracts to adhere to and enforce the provisions of the contracts; (2) intimidated and harassed and used force and violence against peddlers and so-called independent route men or bread men from obtaining bread and other bakery products to sell either at wholesale or retail in the Minneapolis trade area. According to the complaint, they set apart the respondent baking companies as a class of approved dealers who could and would sell sucrofats the respondents controlled.

Pursuant to an understanding, agreement and conspiracy, allegedly entered into on or about February 1, 1939, the respondents agreed to and did prevent certain peddlers and so-called independent bread men, by intimidation and coercion, to prevent their delivering bakery products in the Minneapolis area; and (3) used similar methods against bakers and dealers in order to induce and compel them to stop selling their products to peddlers and so-called independent route men or bread men.

These practices, according to the complaint, tended to (1) unlawfully restrain interstate commerce in bread and other bakery products; (2) monopolize the sale of such products in the Minneapolis area in the respondent bakery companies; and (3) enhance bread prices at all retail levels, in violation of the Federal Trade Commission Act. (4140)

Pyroll Company—Dean Ladd Kidder, individually and as executrix of the estate of William V. Kidder, deceased, doing business as Pyroll Company, La Crosse, Wis., engaged in the manufacture and sale of a preparation known as “Pyroll,” designed for addition to motor fuels and lubricants, is named respondent in a complaint charging misrepresentation.

The complaint alleges that in advertisements in newspapers and periodicals and in commercials broadcast from radio stations, the respondents have represented, among other things: “The use of PYROLL, a Super High-Pressure Friction and Heat-Proof Scientific Lubricant, will double the life of a motor. Use PYROLL-Lubricated gasoline or simply add PYROLL-A to your gasoline. Also add PYROLL-B to your motor oil, thereby doubling the life of your car and protecting your car investment. PYROLL DOES WHAT OIL ALONE CANNOT DO. PYROLL ACTUALLY MAKES METAL SELF LUBRICATING, AND IS THE LATEST SCIENTIFIC ACHIEVEMENT IN LUBRICATION.”

“Would you dare drive your car 745 miles WITHOUT any oil? You would be foolhardy to do so . . . UNLESS you had PYROLL mixed in with your gasoline and your motor had been PYROLL treated. A car drove 745 miles without any oil . . . BUT . . . it had been previously treated with PYROLL.”

The complaint alleges that these representations and others made by the respondent are misleading and false, and that the respondent’s product, when added to motor fuels or lubricants, does not effect substantial economy in operation, appreciably prolong the life of an automobile engine, nor penetrate the metal, filling in cracks and crevices, nor does its use enable an automobile to be driven continuously for 700 miles without oil in the crankcase. The complaint also charges that use of the product does not increase power, add mileage, reduce friction, lower temperatures, eliminate carbon, nor create a smoother, better-running engine, as claimed by the respondent. (4141)

United States Marble & Granite Company—Misrepresentation in the sale of marble and granite tombstones and monuments is alleged in a complaint issued against Asa L. Wooten, trading as United States Marble & Granite Company, Oneco, Fla.

In his advertising matter the respondent allegedly represented that his memorials will stand the ravages of time forever; that they are the world’s best genuine marble or granite monuments which will always retain their original brightness, and that, through his “Gold Bond Guarantee,” purchasers are assured of these lasting qualities and are protected in case the respondent’s representations as to durability are not proved to be true.

The complaint alleges that the respondent’s representations are misleading and deceptive in that his products will not last forever and retain the other qualities advertised, and that the so-called “Gold Bond Guarantee” in no wise protects purchasers as it is not supported by any fund set aside by the respondent or anyone else for assuring fulfillment of its terms. (4138)

CAESE AND DESIST ORDERS

No cease and desist orders were issued by the Commission last week.

STIPULATIONS

During the week the Commission has entered into the following stipulations:

Abraham & Strauss, Inc., of Brooklyn, has entered into a stipulation to discontinue certain representations in the sale of rugs.

The respondent corporation agreed to cease using in advertising matter or as a brand the words “Persian,” “Chinese,” “Numdah” or other distinctive Oriental names as descriptive of rugs which are not in fact made in the countries or localities designated with all the essential characteristics and qualities of such rugs.

The Brooklyn corporation also stipulated that it will discontinue employing the phrase “Persian Chinese Numdah Reproductions” or otherwise using the word “Reproduction” as descriptive of rugs which are not in fact reproductions of the types named.

The respondent further agreed to discontinue employing the words “Persian,” “Chinese,” “Numdah” or other distinctive Oriental appellations in connection with rugs which do not contain all the inherent qualities and properties of Oriental and Chinese rugs, unless, when properly used to describe the design or pattern only, the words “Persian,” “Chinese” or “Numdah” shall be immediately accompanied by a word such as “Design” or “Pattern” in type equally conspicuous to clearly indicate that only the form delineated on the surface of the rug is a likeness of the type names and converses, nor does its use enable an automobile to be driven continuously for 700 miles without oil in the crankcase. The complaint also charges that use of the product does not increase power, add mileage, reduce friction, lower temperatures, eliminate carbon, nor create a smoother, better-running engine, as claimed by the respondent. (4141)

Further representations which the respondent agreed to discontinue were use of designations such as “Importer’s Surplus—Persian, Chinese, Numdah” and “Importer’s Close-Out of Gem-Like Reproductions—Chinese, Persians, Numdahs,” and of the words “Importer’s” or “Imported” in connection with geographic names in any way tending to create the impression that goods actually made in countries other than those named are from the countries named. The stipulation provides that if the word “Imported” or similar term is properly employed to indicate that such goods are not of domestic origin and geographic names are correctly used to describe the type of product imported, then the true country of origin shall be clearly and nondeceptively disclosed in direct connection therewith. The stipulation points out that the rugs so advertised by the respondent were not made in the Orient, had none of the Oriental characteristics except design; were machine-woven, and were imported from Belgium and Italy. (2809)
Balassa Laboratories—Joseph Balassa, trading as Balassa Laboratories, 47 Sixteenth Ave., Newark, N. J., engaged in selling a preparation designated “Corn Stick,” agrees to cease representing that the preparation will end, mitigate or relieve the pain incident to the condition known as bunions, or that it will take away or remove the diseased condition known as bunions. (02570)

Blossom Products Corporation, manufacturer of women’s undergarments, and its wholly owned sales subsidiary, Rayon Corporation of America, both of Allentown, Pa., entered into a stipulation in which they agree to discontinue certain representations in the sale of their products.

Among the representations which the respondent corporations agree to cease are: (1) Misstatements of the percentage of any fiber present in any product offered for sale; (2) deceptive concealment of the true fiber content or failure to make full and nondeceptive disclosure of the fiber content of articles purporting to be wool (having the appearance and feel of being wool), and (3) using the unqualified terms “Woolywarms” or “Woolies” or words of similar import as descriptive of garments when their fiber is not composed wholly of wool.

The respondents also agree to cease attaching to merchandise certain brands, labels or other indications bearing the name “Dr. Ames” or other fictitious name or symbol, having a tendency to mislead purchasers as to the origin or sponsorship of such merchandise. The stipulation points out that the respondents designated certain undergarments as “Dr. Ames Woolywarms,” when in fact no “Dr. Ames” has been connected with the corporations or has, as implied, designed or sponsored the products bearing such fictitious name. (2807)

Blossom Products Corporation, manufacturer of women’s undergarments, and its wholly owned sales subsidiary, Rayon Corporation of America, both of Allentown, Pa., entered into a stipulation in which they agree to discontinue certain representations in the sale of their products.

Among the representations which the respondent corporations agree to cease are: (1) Misstatements of the percentage of any fiber present in any product offered for sale; (2) deceptive concealment of the true fiber content or failure to make full and nondeceptive disclosure of the fiber content of articles purporting to be wool (having the appearance and feel of being wool), and (3) using the unqualified terms “Woolywarms” or “Woolies” or words of similar import as descriptive of garments when their fiber is not composed wholly of wool.

The respondents also agree to cease attaching to merchandise certain brands, labels or other indications bearing the name “Dr. Ames” or other fictitious name or symbol, having a tendency to mislead purchasers as to the origin or sponsorship of such merchandise. The stipulation points out that the respondents designated certain undergarments as “Dr. Ames Woolywarms,” when in fact no “Dr. Ames” has been connected with the corporations or has, as implied, designed or sponsored the products bearing such fictitious name. (2807)

Cra-Tex Corporation, 1302½ Farnam St., Omaha, Nebr., manufacturer of gauze bandages sold under the name “Cra-Tex,” agrees to desist from using the word “Sterilized” or other words of similar implication in advertising matter as descriptive of products which are not under sanitary conditions of sterility at the time of their removal from the package by the purchaser, and from use of that word in any way the effect of which tends to convey the idea that the products are free from aerobic and anaerobic bacteria and other micro-organisms at the time of their removal from the package by the purchaser. (2517)

Darling Dimple Company—John H. Lofquist, trading as Darling Dimple Company, Rock Island, Ill., vendor of a so-called dimple making device, agrees to cease representing that it will produce permanent dimples on the face of the user; that it is the subject matter of a United States or other patent, unless and until such is a fact, and that it was patented or invented by Dr. J. H. Lofquist or contains special or scientific features which are the result of medical advice or services. (2815)

Hobo Medicine Company, Beaumont, Tex., selling a medicinal preparation designated “Hobo Medicine,” has agreed to cease representing that the preparation is a competent treatment for kidney or bladder disorders, is an aid to restoring normal health to those suffering from such disorders or will relieve or aid in correcting them; will help cure or remove from the system or blood stream excessive poisons, irritating acid or dangerous poisonous wastes, or have any effect upon the blood stream, or is an aid to lovelier skin, and that men and women have been aided to better health by its use. (02568)

Hyman & Zaslay, Inc.—See Yebbon & Co., Inc. (02568)

Imperial China Company, Inc.—Under a stipulation entered into Imperial China Company, Inc., 4246 Sheridan Road, Chicago, agrees to discontinue certain representations in the sale of table and kitchenware in connection with a sales promotion plan.

Through its sales agency, in any manner or in any other way, the respondent company agrees to cease representing that it is affiliated with Royal China, Inc., of Sebring, Ohio, or that that corporation owns 80 per cent of the respondent’s stock, or that under a working agreement between the two corporations, Imperial China Company, Inc., has taken over and is conducting the business of Royal China, Inc., in Texas or other designated territory and will supply the requirements of all customers, including those of Royal China, Inc.

A further representation to be discontinued is that Imperial China Company, Inc., will furnish patterns identical to those supplied by Royal China, Inc., and that the respondent owns or controls the pottery in which the table and kitchenware are made.

The stipulation points out that the respondent company’s contracts with retail dealers provided, among other things, that “redemption dealers” would purchase and carry the respondent’s stock, for the benefit of their customers and the customers of certain other dealers in the same locality known as “cooperating dealers.”

The respondent company agrees to cease representing that it or its salesmen would obtain a specified minimum number of “co-operating dealers” who would agree to purchase certificates from the respondent and distribute them among their own customers for redemption by “redemption dealers”; that the salesmen would remain in a locality for a sufficient time to properly instruct the “cooperating dealers” in the operation of the plan; or that newspaper advertising and publicity campaigns to assure the success of the plan would be provided or undertaken by the salesmen at the expense of Imperial China Company, Inc., unless such representations actually are fulfilled. (2808)

Imperial Lingerie Store—See Linen Mart.

Linen Mart—Agreeing to discontinue certain representations in the sale of rugs, Irving Heiney, trading as Linen Mart and as Imperial Lingerie Store, 1223 G St., N. W., Washington, D. C., has entered into a stipulation.

The respondent, in his printed or advertising matter or on window display cards, agreed to refrain from use of the words “Chinese,” “Persian,” “Sarouk,” “Kirman,” “Karvan,” “Bagad,” “Calcutta,” “India,” “Irak” or other distinctively Oriental names or depictions in connection with the rugs he sells; from use of any words or illustrations implying that such rugs are made of the materials and in accordance with the processes used in manufacturing true Oriental or Chinese rugs, and from employing the phrases “Imported Sarouk Replica,” “Imported Persian Replica,” or otherwise using the word “Replica” or a similar word implying that the article designated is a replica or duplicate of an original, when the rugs so described are not in fact reproductions of the types named.

Further representations which the respondent agreed to discontinue were use of the names “Chinese,” “Persian,” “Sarouk,” “Kirman,” “Karvan,” “Smarkand,” “Bagad,” “Calcutta,” or other distinctively Oriental appellations in connection with rugs not made in the country or locality designated or implied and which do not contain all the inherent qualities and properties of Oriental or Chinese rugs, unless, when properly used to describe the design or pattern only, such words of Oriental appellation shall be immediately accompanied by a word such as “Design” or “Pattern” in type equally conspicuous to clearly indicate that only the design is copied from the rug or its fabric; from use of any words or illustrations implying that such rugs are made of the materials and in accordance with the processes used in manufacturing true Oriental or Chinese rugs, and from employing the phrases “Imported Sarouk Replica,” “Imported Persian Replica,” or otherwise using the word “Replica” or a similar word implying that the article designated is a replica or duplicate of an original, when the rugs so described are not in fact reproductions of the types named; for example “Persian Design,” “Chinese Pattern.”

The respondent agreed to discontinue employing designations such as “Imported Sarouk Replica” and “Imported Persian Replica,” and to cease using the word “Imported” in connection with geographic names in any way tending to create the impression that goods actually made in countries other than those named are from the countries named. The stipulation provides that if the word “Imported” or similar term is properly employed to indicate that such goods are not of domestic origin and geographic names are correctly used to describe the type of product described, then the true country of origin shall be clearly and nondeceptively disclosed in direct connection therewith. The stipulation points out that the rugs so advertised were not made in the Orient; had none of the Oriental characteristics except design; were machine-woven, and were imported from Belgium or France. (2810)

Marvan Laboratory, Inc., 30 East 3d St., New York, engaged in selling a medicinal preparation designated “Marvan Dermopathic Salve,” agrees to discontinue representing that the product is an effective remedy or competent treatment for eczema, itching, and other skin diseases, or that it has any therapeutic value in the treatment of such ailments or conditions in excess of a temporary relief. Itching and similar irritations often associated with the disorders named; that the product will relieve, stop or remove itching or burning or other irritations immediately.

May 31, 1940
or will relieve inflammation, allay irritation or will heal, or that the product is anti-pruritic or antiphlogistic. The respondent further agrees to discontinue representing, by use of the word "Laboratory" or any other term of similar meaning or import as a part of its trade name or in any manner, that it conducts or operates a laboratory, when such is not a fact. (02569)

MM Importing Company, Inc., stipulates that it will cease use of the word "Importing" as part of its corporate or trade name or in any other way in connection with the sale of products which it does not actually import. The respondent corporation also agrees to cease employing the word "Importing" as part of the corporate or trade name under which it sells cigarettes made wholly or partly of domestically grown tobacco or which are manufactured in the United States. The respondent also agrees to desist from using the word "Importing" or other words of similar implication, alone or in connection with the words "Turkish cigarettes," or in any way, the effect of which tends to convey the belief to purchasers that such cigarettes are made wholly or in part of imported tobacco or are manufactured abroad, unless, if the word "Importing" is employed in connection with the sale of cigarettes, which are composed wholly of imported tobacco, but which are made in the United States, then it shall be disclosed clearly on the face of the container of the cigarettes that they are domestically manufactured or are not of foreign manufacture. (2815)

Morten Laboratories, Inc., 308 South Harwood St., Dallas, Tex., until October 25, 1939, when the present corporate name was adopted, operated under the name Hay-No Laboratories, Inc., and sold a medicinal preparation designated "Hay-No." The respondent corporation agrees to cease representing that "Hay-No" or adopted, operated under the name Hay-No Laboratories, Inc., and Tex., until October 25, 1939, when the present corporate name was adopted. (02571)

Num-O-Col Company, Inc., 9 South Walker St., Oklahoma City, Okla., has entered into a stipulation in which it agrees to cease advertising that its medicinal preparation "Milt's Num-O-Col Ointment" is an effective treatment or competent remedy for pneumonia, influenza or common colds. The respondent company also agrees to cease representing that its preparation is an effective treatment or competent remedy for sore throat or rheumatism, unless the representation is limited to such relief of symptoms of these conditions as may be afforded by its counter-irritant properties. (02572)

Power Battery Company—Norris Ouellette, trading as Power Battery Company, 134 Main St., Richmond, Mich., engaged in the manufacture and sale of storage batteries, has agreed to cease representing that his "Power Cell" or other batteries of similar construction, maintain a high voltage under excessive load, or otherwise representing that the terminal voltage maintained by "Power Cell" is either higher than or more enduring than that of standard competitive batteries on the market, or that "Power Cells" or batteries of similar construction charge fully in one-third to one-half the time required for other batteries, or in any specified comparative time not fully established by competent and reliable scientific evidence. (2811)

Solvosol Company—Lionel E. Samuels, trading as Solvosol Company, 38 Park Row, New York, in the sale of "Solvosol," a cleaning fluid, agrees to cease using the word "New," alone or in connection with the word " Entirely" or "Process" or with other words as descriptive of his product, which is not in fact new, and to discontinue use of the phrase "Leaves No Ring" or other representation of similar implication tending to convey the impression that the product will not leave a ring or discoloration when applied only to the spot to be removed from certain fabrics, as for example, weighted silks. (2816)

Yeblon & Co., Inc., and Hyman & Zaslav, Inc., in the sale of their jewelry and other products through Yeblon & Co., Inc., agree to cease using the terms "List Prices," "Discount," "Catalog List Price," or "Subject to Our Regular Distributors Discounts" in catalogs, printed matter or otherwise; or to discontinue representing in any way, directly or inferentially, that the prices at which they sell their merchandise constitute a discount to the purchaser or are wholesale prices, when in fact such prices are the usual and customary prices. (2812)

FTC CLOSES CASE

The Federal Trade Commission has closed without prejudice its case against Maurice M. Goldberg and Tetrine Chemical Sales Company, a corporation, 521 Fifth Ave., New York, who were charged with misrepresentation in the sale and distribution of fire extinguishers and chemical fluids.

The closing order recites that it appears the corporate respondent has been dissolved and the practices as charged in the complaint discontinued.

Closing of the case was ordered without prejudice to the Commission's right to reopen it and resume prosecution should future facts so warrant.
Communist Broadcasts

Before the three major networks carried talks by Earl Browder last Sunday, Neville Miller suggested that recent European developments might require reconsideration of that section of the Federal Communications Act dealing with political broadcasts.

Mr. Miller made the following statement:

"Recent articles in the press have raised the question of the propriety of radio stations carrying broadcasts of the Communist Party's National Convention which is now in session in New York City, especially the speech scheduled for Sunday night by Earl Browder, who has been scheduled because at that time undoubtedly he will be the Communist Party's candidate for the Presidency.

In these troubled days, when developments abroad reveal the devastating effects of fifth column activities, it is urgent, as the President points out, that we scrutinize the objectives of those in our midst whose only use of our free institutions springs from a desire to destroy them and the liberties of our people.

In examining the position of radio, it should be remembered that radio stations are governed by the Federal Communications Act, Section 315 of which reads as follows:

'If any licensee shall permit any person who is a legally qualified candidate for any public office to use a broadcasting station, he shall afford equal opportunities to all other such candidates for that office in the use of such broadcasting station, and the Commission shall make rules and regulations to carry this provision into effect: PROVIDED, That such licensee shall have no power of censorship over the material broadcast under the provisions of this section. No obligation is hereby imposed upon any licensee to allow the use of its station by any such candidate.'

"This Section clearly requires radio stations to either exclude the candidates of all parties, or to extend equal facilities to the candidates of all parties. This rule was not made by the radio stations, but was enacted by Congress, and Congress alone has the power to change it. Under it, radio stations do not have the right to pick and choose. Last April, it was thought that it would be in the public interest to carry brief talks by the candidates of all parties at the time each candidate was nominated. The Socialist Party held its convention in April, and Norman Thomas, its candidate for the Presidency, was given time on the radio. Equal opportunity was also given John W. Aiken, the candidate of the Socialist Labor Party, and under the law, the same opportunity must be given to the candidates of all other parties, including the Communist Party.

"Furthermore, it should be noted that under the law the radio stations have no power of censorship over the material broadcast. The stations must broadcast the speeches as written by the candidates, with no power to blue pencil the sentiments expressed therein.

"Undoubtedly, in enacting these provisions of the Federal Communications Act, Congress was particularly interested in providing for the protection of freedom of speech, and prohibiting censorship. Recent developments in Europe have brought to our minds many dangers which then were not realized and which may require a reconsideration of the subject. However, in the meantime, radio stations have no alternative—they must obey the law as written."

On Friday, Senator Wheeler, during a speech on "Civil Liberties" in the Senate, made the following remarks:

"This morning representatives of the National Broadcasting Co. and the Columbia Broadcasting Co., and the head of the organization of all the broadcasters, called at my office. They called my attention to the following statement which they had issued:

New York, N. Y., May 30, 1940.

Gillis, Radio Station WJSV.,
Washington, D. C.:

The Columbia Broadcasting System in response to several inquiries concerning Earl Browder's talk Sunday night, issued the following statement: The radio law requires broadcasters to give the same treatment to all candidates for any public office. In compliance with this law we have arranged to carry on Sunday evening, June 2, a 15-minute talk by Earl Browder on the Communist Party's representation that, at that time he will be the duly nominated candidate for the Presidency. It is obvious that when the Congress enacted the communications law, present conditions and their dangers were not apparent. Columbia is of course obedient to the laws of the United States but it is of the belief that the communications law should be changed so that no broadcaster is compelled to give time to the candidates of any political party if it is proven to be subservient to a foreign power.

In this connection I call attention to the statute. When we passed the communications law some years ago it contained this provision:

'Sec. 315. If any licensee shall permit any person who is a legally qualified candidate for any public office to use a broadcasting station, he shall afford equal opportunities to all other such candidates for that office in the use of such broadcasting station, and the Commission shall make rules and regulations to carry this provision into effect: PROVIDED, That such licensee shall have no power of censorship over the material broadcast under the provisions of this section. No obligation is hereby imposed upon any licensee to allow the use of its station by any such candidate.'

The present law was drafted, not in a Democratic administration, but in a Republican administration, to preserve the right of free speech in the United States, and to see to it that each candidate for public office shall have the right to express his views, whether we agree with them or not, and I certainly do not agree with Mr. Browder, the Communist Party, or their theory of government. I think that the law probably should be
COMMUNIST BROADCASTS
(Continued from page 4307)
changed, because of the fact that it perhaps goes too far in one respect as the Commission has interpreted it. Today a broadcaster is liable in damages if the speech contains libelous matter. Either the broadcaster should be relieved of liability or libelous matters should not be permitted."

On Sunday, CBS issued a second statement:

Inquiries have been received as to why the Columbia Broadcasting System could not bar Earl Browder from the air under the last sentence of Section 315 of the Communications Act, which reads:

“No obligation is hereby imposed upon any licensee to allow the use of its station by any such candidate.”

The forepart of this section reads:

“If any licensee shall permit any person who is a legally qualified candidate for any public office to use a broadcasting station, he shall afford equal opportunities to all other such candidates for that office in the use of such broadcasting station, and the Commission shall make rules and regulations to carry this provision into effect: Provided, That such licensee shall have no power of censorship over the material broadcast under the provisions of this section.”

The complete section permits the licensee to decide whether it will carry speeches by all the presidential candidates or none of them. Since the Columbia Broadcasting System proposes as usual to carry speeches by the Democratic and Republican nominees and has already carried the speeches of two other nominees for the presidency, namely, that of Norman Thomas, for the Socialist Party on April 7 and that of John W. Aiken, nominee of the Socialist Labor Party, on April 28, Columbia has already begun to function in this campaign as it and practically all broadcasters always have done in this and previous campaigns, under the first part of the section. Consequently, Columbia considers itself obligated under that part of Section 315 which says that if any licensee shall permit any person who is a legally qualified candidate for any public office to broadcast, it shall afford equal opportunity to all other such candidates for that office. It would be against public policy for a nationwide network such as Columbia, in its efforts to render public service, not to carry speeches by any candidates for the presidency, especially of the major parties.

The law is simple and clear and there is no way in good faith to escape the meaning of its provisions. Either a network or radio station offers its facilities to all candidates, or it cannot, without violating the law, offer its facilities to any candidates for any given office. Thus it may be seen that, if the law is followed in its obvious mandate, barring of the candidate for President of the Socialist Party, the Socialist Labor Party, the Prohibition Party (scheduled for June 19), or the Communist Party would necessitate—unless the law be violated—barring candidates of the major parties.

The network statements led Representative Cox (D-Ga) to renew his suggestion in the House that the “broadcasting business” should be investigated. (Congressional Record, June 3, p. 11179.)

WAGE AND HOUR ACT

How hard a small radio station can be hit for violation of the Wage and Hour Act was well illustrated this week in the case of WJW, Akron, Ohio.

A consent decree entered in the Federal District Court in Cleveland ordered the station to pay 41 employees and former employees a total of $4,540.29 in back wages and overtime.

The decree also permanently enjoined the station from violating the act.

The violations all were due to misunderstanding of the law on the part of the station’s previous management. “Student announcers” and “guest announcers” worked without pay. Overtime was not reported. Wage and hour records did not jibe with log sheets.

Forty-five hundred dollars is a lot of money for a small station to have to pay out in one chunk.

Again, the NAB Labor Relations Department urges all members to make sure that they are complying with the law. Members who have any questions, no matter how trivial they may seem, should send them to the Labor Relations Director.

As a starter, it is suggested that the questions and answers in the NAB Reports of February 23, page 4051, should be reviewed.

A southern broadcaster contemplates giving an announcer a raise. He asks whether he can use the raise to protect himself against paying overtime.

Specifically, he is now paying the announcer $42 for a 42-hour week. The announcer’s regular hourly rate is $1, and his overtime rate is $1.50. If the announcer is raised to $46.50, can he work up to 45 hours without any overtime payment.

The answer is: No.

However, if the announcer works 45 hours each week, his paycheck will be $46.50 (42 hours at $1 an hour, and 3 hours at $1.50 an hour), and the same result will be the same.

It is important that the announcer work his full 45 hours each week. If he works an irregular number of hours, his hourly rate must be determined by dividing his regular weekly salary by the number of hours he works each week. Overtime for each hour above 42 must then be determined by multiplying this hourly rate by one and one-half.
Milton Denbo, chief opinion attorney for the Wage and Hour Administration, gave the NAB this interpretation.

Protests from the NAB and others led the Wage and Hour Administration this week to relax a rule which required records to be kept at transmitters for technicians employed there.

Records may be kept at the central record keeping place of the employer, on condition that such records shall be produced “at the place or places of employment” within 72 hours following notice from a Wage and Hour inspector.

The broadcasting industry got caught in a rule intended for employers who had factories scattered over the country but kept all records at the “home office.” With the rule amended it is not likely that a broadcaster will ever have to produce his records at the transmitter, for the inspector easily could obtain access to the records a few miles away.

**AFRA TRANSCRIPTION “CODE”**

Representatives of the leading transcription companies are about to start negotiations with the American Federation of Radio Artists on a contract (“Code”) to cover actors, singers, announcers and sound effects men. AFRA sent out its proposed contract on May 27.

It cannot be stated accurately at this time just how much the AFRA demands would increase the cost or price of transcriptions.

Section 4 of the “Recording Rules” states: “The producer agrees, on notice by AFRA that any radio station has been declared unfair by AFRA, not to require members of AFRA to perform services in connection with recordings released to such station, not to make available to such station, nor to make available to such station recordings on which AFRA members are used, for the purpose of aiding and abetting such station in continuing its unfair practices.”

In brief: if that clause were agreed to, AFRA could declare “unfair” any station which did not have an AFRA contract, and that station then could get no transcriptions from the leading transcription companies.

The NAB labor relations director will keep stations advised of developments.

**BMI Developments**

Two new stations join BMI: WTMA of Charleston, South Carolina, and KGNO of Dodge City, Kansas.

*I Could Be a Superman for You* is the title of a song by Chaylie Saxe which will be published by BMI within a few weeks. Saxe’s story suggests that he had to be something of a superman anyway to write his music and get it published.

For five years he has been laying siege to the offices of music publishers. Always the answer has been the same. Today Chaylie can reel it off rapidly by heart because he has heard it so often. He says:

“They all tell you, ‘Sure, the music’s good. We’d take it if you had a name. But you’re an unknown cluck, so—go on home and teach school.’ ”

He is a teacher of English and history. This past year he has been doing substitute work in one high school and four junior highs in his home town of New Britain, Connecticut. Born in 1918, graduated from the University of Alabama in 1939, he permits himself no delusions of grandeur because he has at long last sold a song. He loves music but he does not expect to rely upon it for a livelihood. He began to play in childhood and by the age of fifteen he was conducting his own 11-piece band. But it was scholarship that let him earn his way through college and it is in teaching that he plans his career.

The idea for his BMI song came out of the classroom, where he found that he had to confiscate a great many books of the “Superman” comic strip in order to get any work done by his pupils. But that, of course, was only half of the idea. The song was written, he admits, for a “super-girl.”

Milton Wolf, who collaborated with Saxe on the lyrics, is a clerk in a New Britain store. He was once runner-up for the intercollegiate welterweight boxing championship.

Saxe and Wolf are excellent illustrations of the freshness of the music sources which BMI is opening to the public. Their story offers the sharpest contrast with the career of such an eminent composer as Bruno Grant (Granichstaedten). That very contrast emphasizes both
the force of the new musical urge in America and the broadly inclusive character of the catalogue which BMI is building.

## BMI FEATURE TUNES
June 10-23

1. **WE COULD MAKE SUCH BEAUTIFUL MUSIC**
2. **WHAT GOOD'S THE MOON?**
3. **HERE IN THE VELVET NIGHT**
4. **IN THE SILENCE OF THE DAWN**

Transcriptions of BMI music together with names of the recording bands, where these have been announced, are given below under the names of the companies making the transcriptions. It is possible that other companies also have made transcriptions, but for the benefit of broadcasters, such information as BMI possesses is given below:

### Associated Music Publishers
- Here in the Velvet Night
- Sagebrush Serenade
- We Could Make Such Beautiful Music

### Langlois-Wentworth
- Here in the Velvet Night—Jean Ellington
- In the Silence of the Dawn—Ray Heatherton
- We Could Make Such Beautiful Music—Ray Heatherton

### Standard Radio
(All recorded by Don Allen’s Orchestra)
- Here in the Velvet Night
- In the Silence of the Dawn
- Sagebrush Serenade
- We Could Make Such Beautiful Music
- What Good’s the Moon?

### NBC Thesaurus
- In the Silence of the Dawn—Joe Sudy
- Sagebrush Serenade—Joe Sudy
- Here in the Velvet Night—Ted Steele and Gwynn Williams
- We Could Make Such Beautiful Music—Ted Steele and Gwynn Williams
- Give Me Music—Al Kavelin
- Keep an Eye on Your Heart—Al Kavelin
- Please Don’t Tell Her I Told You—Al Kavelin

### World Broadcasting
(All recorded by Vic Arden)
- Here in the Velvet Night
- In the Silence of the Dawn
- Practice Makes Perfect
- We Could Make Such Beautiful Music

“Delay ASCAP Forms,” says a headline, announcing that the ASCAP board has postponed for a week the distribution of new contract blanks. Is that news? If recollection serves, ASCAP’s original announcement was that it would be ready to negotiate the contracts on April 15, but that date was passed in silence. Of course no one really expected the contracts to be ready then, and it was no surprise either when May 29 was also allowed to pass without the appearance of the contracts.

W. J. SCRIPPS, WWJ, APPOINTED RESEARCH COMMITTEE CHAIRMAN

Neville Miller announced this week the appointment of W. J. Scripps, Manager of Station WWJ, Detroit, Michigan, as Research Committee chairman. In the original announced appointment of a Research Committee, Mr. H. K. Carpenter, Vice President, WHK-WCLE, Cleveland, Ohio, and WHKC, Columbus, Ohio, was asked to serve in this capacity. However, pressure of business caused Mr. Carpenter to suggest the appointment of another chairman who could devote sufficient time and energy to the task which Mr. Carpenter described as of utmost importance to the industry.

Mr. Scripps has accepted the appointment and will shortly announce a meeting date for the committee. The membership of the Research Committee as now constituted, is as follows: Mr. W. J. Scripps, Manager of WWJ, Detroit, Michigan, chairman; H. M. Beville, Jr., Research Manager of the National Broadcasting Company; Scott H. Bowen, President of Radio Station WIBX, Utica, New York; Arthur B. Church, President of Radio Station KMBC, Kansas City, Missouri; James D. Shouse, Vice President of Radio Stations WLW-WSAI, Cincinnati, Ohio; Dr. Frank N. Stanton, Research Director of the Columbia Broadcasting System; and, Theodore C. Streibert, Vice President of Radio Station WOR, Newark, New Jersey. Neville Miller and Paul F. Peter will serve ex-officio.

ALL ABOARD FOR SAN FRANCISCO!

You may not realize it but the Eighteenth Annual Convention to be held at the St. Francis Hotel, San Francisco, is less than two months away. All of the members have received outlines of all-expense tours and requests for responses direct to our travel agents, Raymond-Whitcomb, Inc., of 414 North Charles St., Baltimore, Maryland. The response has been gratifying but in order to protect railroad, hotel and sightseeing reservations tentatively made, it is essential that we have immediate responses. We know you will want to go to the San Francisco convention. Don’t delay. Put in your reservations now for one of these all-expense tours or a special trip which Raymond-Whitcomb can arrange for you.

The tentative program of the San Francisco convention has been sent to the Directors for examination and approval. In next week’s issue of the Reports the high points of the program will be covered. Watch for this. It’s important. If you have suggestions as to topics or speakers, don’t hesitate to send them in. This is your convention and we want it to meet your ideas and cover the problems in which you are interested.

June 7, 1940

W.J. SCRIPPS, WWJ
**DISTRICT 4 MEETING**

John A. Kennedy, WCHS, was reelected director for the next two years at a District 4 meeting June 1-2 at Sedgefield Inn, Greensboro, N. C.

Guest speakers included Mrs. Dorothy Lewis, national radio chairman of the National Society of New England Women; Dr. J. C. Waldron, United States Office of Education; Carl Haverlin, BMI, and Joseph L. Miller, NAB labor relations director.

Edney Ridge, WBIG, was in charge of arrangements for the meeting.

Those present included:

James C. Howe, WBTM; C. T. Lucy, WRVA; Philip P. Allen, WLVA-WBTM; Endey Ridge, WBIG; H. W. Wilson, WGTM; Allen Wannamaker, WGTM; O. L. Maxey, WRTD; John W. New, WTAI; Bruce P. Beard, WSTP; John J. McAllister, WHKY; Wayne M. Nelson, WMFR; F. C. Todd, WGNZ; Pat McSwain, WGNC; John W. Shultz, WDBJ; J. F. Jarman, Jr., WDNC; Gill Murray, WMFR; F. C. Todd, WGNC; Pat McSwain, WTAR; Bryce P. Beard, WSTP; John J. McAllister, WHKY; Allen Wannamaker, WGTM; O. L. Maxey, WRTD; John W. New, WTAI; Bruce P. Beard, WSTP; John J. McAllister, WHKY; Wayne M. Nelson, WMFR; F. C. Todd, WGNZ; Pat McSwain, WGNC; John W. Shultz, WDBJ; J. F. Jarman, Jr., WDNC; Gill Murray, WMFR; F. C. Todd, WGNC; Pat McSwain, WTAR; Bryce P. Beard, WSTP; John J. McAllister, WHKY; Allen Wannamaker, WGTM; O. L. Maxey, WRTD; John W. New, WTAI; Bruce P. Beard, WSTP; John J. McAllister, WHKY; Wayne M. Nelson, WMFR; F. C. Todd, WGNZ; Pat McSwain, WGNC; John W. Shultz, WDBJ; J. F. Jarman, Jr., WDNC; Gill Murray, WMFR; F. C. Todd, WGNC; Pat McSwain, WTAR; Bryce P. Beard, WSTP; John J. McAllister, WHKY; Allen Wannamaker, WGTM; O. L. Maxey, WRTD; John W. New, WTAI; Bruce P. Beard, WSTP; John J. McAllister, WHKY; Wayne M. Nelson, WMFR; F. C. Todd, WGNZ; Pat McSwain, WGNC; John W. Shultz, WDBJ; J. F. Jarman, Jr., WDNC; Gill Murray, WMFR; F. C. Todd, WGNC; Pat McSwain, WTAR; Bryce P. Beard, WSTP; John J. McAllister, WHKY; Allen Wannamaker, WGTM; O. L. Maxey, WRTD; John W. New, WTAI; Bruce P. Beard, WSTP; John J. McAllister, WHKY; Wayne M. Nelson, WMFR; F. C. Todd, WGNZ; Pat McSwain, WGNC; John W. Shultz, WDBJ; J. F. Jarman, Jr., WDNC; Gill Murray, WMFR; F. C. Todd, WGNC; Pat McSwain, WTAR; Bryce P. Beard, WSTP; John J. McAllister, WHKY; Allen Wannamaker, WGTM; O. L. Maxey, WRTD; John W. New, WTAI; Bruce P. Beard, WSTP; John J. McAllister, WHKY; Wayne M. Nelson, WMFR; F. C. Todd, WGNZ; Pat McSwain, WGNC; John W. Shultz, WDBJ; J. F. Jarman, Jr., WDNC; Gill Murray, WMFR; F. C. Todd, WGNC; Pat McSwain, WTAR; Bryce P. Beard, WSTP; John J. McAllister, WHKY; Allen Wannamaker, WGTM; O. L. Maxey, WRTD; John W. New, WTAI; Bruce P. Beard, WSTP; John J. McAllister, WHKY; Wayne M. Nelson, WMFR; F. C. Todd, WGNZ; Pat McSwain, WGNC; John W. Shultz, WDBJ; J. F. Jarman, Jr., WDNC; Gill Murray, WMFR; F. C. Todd, WGNC; Pat McSwain, WTAR; Bryce P. Beard, WSTP; John J. McAllister, WHKY; Allen Wannamaker, WGTM; O. L. Maxey, WRTD; John W. New, WTAI; Bruce P. Beard, WSTP; John J. McAllister, WHKY; Wayne M. Nelson, WMFR; F. C. Todd, WGNZ; Pat McSwain, WGNC; John W. Shultz, WDBJ; J. F. Jarman, Jr., WDNC; Gill Murray, WMFR; F. C. Todd, WGNC; Pat McSwain, WTAR; Bryce P. Beard, WSTP; John J. McAllister, WHKY; Allen Wannamaker, WGTM; O. L. Maxey, WRTD; John W. New, WTAI; Bruce P. Beard, WSTP; John J. McAllister, WHKY; Wayne M. Nelson, WMFR; F. C. Todd, WGNZ; Pat McSwain, WGNC; John W. Shultz, WDBJ; J. F. Jarman, Jr., WDNC; Gill Murray, WMFR; F. C. Todd, WGNC; Pat McSwain, WTAR; Bryce P. Beard, WSTP; John J. McAllister, WHKY; Allen Wannamaker, WGTM; O. L. Maxey, WRTD; John W. New, WTAI; Bruce P. Beard, WSTP; John J. McAllister, WHKY; Wayne M. Nelson, WMFR; F. C. Todd, WGNZ; Pat McSwain, WGNC; John W. Shultz, WDBJ; J. F. Jarman, Jr., WDNC; Gill Murray, WMFR; F. C. Todd, WGNC; Pat McSwain, WTAR; Bryce P. Beard, WSTP; John J. McAllister, WHKY; Allen Wannamaker, WGTM; O. L. Maxey, WRTD; John W. New, WTAI; Bruce P. Beard, WSTP; John J. McAllister, WHKY; Wayne M. Nelson, WMFR; F. C. Todd, WGNZ; Pat McSwain, WGNC; John W. Shultz, WDBJ; J. F. Jarman, Jr., WDNC; Gill Murray, WMFR; F. C. Todd, WGNC; Pat McSwain, WTAR; Bryce P. Beard, WSTP; John J. McAllister, WHKY; Allen Wannamaker, WGTM; O. L. Maxey, WRTD; John W. New, WTAI; Bruce P. Beard, WSTP; John J. McAllister, WHKY; Wayne M. Nelson, WMFR; F. C. Todd, WGNZ; Pat McSwain, WGNC; John W. Shultz, WDBJ; J. F. Jarman, Jr., WDNC; Gill Murray, WMFR; F. C. Todd, WGNC; Pat McSwain, WTAR; Bryce P. Beard, WSTP; John J. McAllister, WHKY; Allen Wannamaker, WGTM; O. L. Maxey, WRTD; John W. New, WTAI; Bruce P. Beard, WSTP; John J. McAllister, WHKY; Wayne M. Nelson, WMFR; F. C. Todd, WGNZ; Pat McSwain, WGNC; John W. Shultz, WDBJ; J. F. Jarman, Jr., WDNC; Gill Murray, WMFR; F. C. Todd, WGNC; Pat McSwain, WTAR; Bryce P. Beard, WSTP; John J. McAllister, WHKY; Allen Wannamaker, WGTM; O. L. Maxey, WRTD; John W. New, WTAI; Bruce P. Beard, WSTP; John J. McAllister, WHKY; Wayne M. Nelson, WMFR; F. C. Todd, WGNZ; Pat McSwain, WGNC; John W. Shultz, WDBJ; J. F. Jarman, Jr., WDNC; Gill Murray, WMFR; F. C. Todd, WGNC; Pat McSwain, WTAR; Bryce P. Beard, WSTP; John J. McAllister, WHKY; Allen Wannamaker, WGTM; O. L. Maxey, WRTD; John W. New, WTAI; Bruce P. Beard, WSTP; John J. McAllister, WHKY; Wayne M. Nelson, WMFR; F. C. Todd, WGNZ; Pat McSwain, WGNC; John W. Shultz, WDBJ; J. F. Jarman, Jr., WDNC; Gill Murray, WMFR; F. C. Todd, WGNC; Pat McSwain, WTAR; Bryce P. Beard, WSTP; John J. McAllister, WHKY; Allen Wannamaker, WGTM; O. L. Maxey, WRTD; John W. Nelson, WMFR; F. C. Todd, WGNZ; Pat McSwain, WGNC; John W. Shultz, WDBJ; J. F. Jarman, Jr., W
NINE GOVERNORS PROCLAIM FESTIVAL

Nine Governors of states have issued National Radio Festival proclamations.

Art Stringer will appreciate hearing from members if any names are omitted from the list below:

California—Gov. Culbert L. Olson.
Kansas—Gov. Payne Ratner.
Louisiana—Gov. Samuel Houston Jones.
New Jersey—Gov. A. Harry Moore.
New Mexico—Gov. John E. Miles.
West Virginia—Gov. Homer A. Holt.

WROK SIGNS POWER COMPANY MONDAY THROUGH SATURDAY

WROK, Rockford, got tired of going without power company business, and decided to do something about it. They thought there was some sense to the statement: “Your power company can be your best local account.”

Result: Central Illinois Electric and Gas Company has been on WROK, Monday through Saturday, 9:15 to 9:30 a.m. since April 15 and “the sponsor is very happy.”

The program is the “Town Crier” show. According to copy on the 30,000 inserts in customers’ bills, the townspeople are invited to use the program for making announcements concerning their “religious, fraternal, civic and social organizations.”

When William R. Traum, sales promotion manager, took time out to give us the good news he included some spring tonic for us: “We used quotations from your March 1 bulletin in our presentation to the C.I.E.G. company and feel they helped sell the idea.”

WFBM, WENR AND WMAQ USE RADIO PLUGS

WFBM, Indianapolis, WENR and WMAQ, Chicago, are each paying attention to circulation.

Jack Ryan, of the Chicago stations, has sent us some recent announcements which were included in “Radio Fanfare” and Radio Parade. They are always placed in the lead.

“Thanks for the announcements for portable radios, radios as wedding gifts and auto service,” wrote Lester W. Lindow, acting manager of WFBM. “We shall be glad to use these announcements . . . please be assured of our continued cooperation.”

WBAB HAS FESTIVAL SHOW FOR NATION’S UTILITY EXECUTIVES

Good news for stations without utility business! Members of the Edison Electric Institute, the trade organization of the power companies, held its annual convention in Atlantic City during Radio Festival week.

The convention attendants and townspeople were invited to a 30-minute broadcast, “Radio,” in the huge Atlantic City auditorium on the boardwalk, over WBAB, Friday evening, June 7, 9:30 to 10:00. The host and sponsor of the show was the Atlantic City Electric Company which has been serving south Jersey for forty years. The program was prepared by Norman Reed, station director.

The 30-minute program with a cast of twelve showed the power company officials how radio “ticks”. It also explained the workings of the American system of broadcasting. All in all, the whole affair was just about one of the finest pieces of power company-radio promotion that any individual station could desire.

Our private grapevine also brings the news that power company officials in great numbers are giving studied attention to broadcasting as a medium to promote their business.

So far this year member stations have gotten substantial increases in power company business. Non-users of radio facilities have become users; old users have increased their time on the air.

RADIO FESTIVAL

This is the week that scores of Radio Festival celebrations are being held throughout the United States. Observance of the event began in May, will continue through June and even into late August. News of the August event came on June 3 from Bill Dean, publicity and promotion director, WDAY, Fargo, N. D.

Bill has already included everything but the kitchen sink in his plans and that is to be incorporated a little later on. Here’s his wire:

“Count on WDAY cooperation National Radio Festival with radio week all set for latter part August. Plans yet incomplete though will definitely include: special programs from fair ground studios during Red River Valley Fair biggest event in locality; “Show windows downtown Fargo; educational radio booth at fair grounds; open house at downtown studios, transmitter and fair ground studios; quiz contest with studio and transmitter visits aired; man-on-street devoted to event; special all-talent revue built around American radio; transcriptions made of passers-by and interviews at fair; explanation given during process; do you know your radio program built for purpose of education; advance promotional announcements and newspaper publicity; “Promises to be greatest promotion event in history of WDAY. More details later.”

West Virginia

Seattle—KIRO, KJR, KOMO, KRSC, KXA
Tacoma (and Seattle)—KIRO

These NAB members in the northwest empire took National
Radio Festival to their bosom with joint and individual participations.

Group effort highlight was a special “Radio Week Info Please” program, a take-off on Canada Dry’s classic, with Mayor Langle, of Seattle, doing the Clifton Fadiman. Representatives of the six stations constituted the board of experts.

Unlike the original, this program was written and rehearsed, then transcribed to be used on each participating station one night during the week.

The joint schedule included a series of short call letter spots and thirty to fifty word spots. Some of the sponsored local programs as well as sustaining and participation shows carry mention of Radio Festival Week.

In addition to this group effort, each station produced at least one promotional program on its own facilities and its own place in the general plan of the American broadcasting system.

At KOMO and KJR, according to Peter Lyman, public relations director, was produced a “Washington (state, not D. C.) at Work” program featuring KOMO and KJR at work. This program was one of a weekly series spotlighting leading Washington industries. “KOMO-KJR at Work” ended with a message from Birt F. Fisher, manager.

ROCHESTER—WHEC

Residents of Rochester heard of Radio Festival over WHEC and read about it in both of the Rochester daily papers. Gunnar Wieg, general manager, OK’d a column of copy for insertion in both papers which reads:

“WHEC will devote a large part of its broadcasting schedule next week to the school children of the Rochester territory. The purpose of this “Radio Festival” is to instruct and educate these future citizens regarding the American System of Broadcasting, and to instill in them an appreciation of the American Program Service.

“Boys and girls will participate in a number of these broadcasts.”

ROANOKE—WDBJ

The Roanoke Times, Sunday morning, June 2, devoted most of its radio page to the Festival with an eight-column banner. “Station WDBJ to Hold Open House in Celebration of Radio Festival Week.”

In addition to news stories there was a 450-line ad with the main display reading: WDBJ, RADIO FESTIVAL WEEK, June 3 to 8.

RICHMOND—WMBG, WRNL, WRTD, WRVA

Down in the other part of the “Old Dominion” the Richmond stations were likewise busy. The Hon. James H. Price, Governor of Virginia, proclaimed National Radio Festival Week. The NAB contest was a part of the festivities.

All week WMBG conducted interviews with high school students in the studio lobby, decorated for the occasion. Walter Bishop, promotion manager, WRVA, was also a busy man during the week as was D. S. Freeman, vice president, WRNL.

A note from Bernard M. Dalney, Jr., director of sales promotion, WRTD, said that WRTD got under way with Radio Festival Friday evening, June 1, with a half-hour broadcast from the final ball of the Thomas Jefferson High School. . . .

For the entire week seven to nine news broadcasts per day were handled by students from the staffs of the publications of the Richmond high schools. This included commercial news programs as well as sustaining shows. Of the several dramatic shows which were scheduled one depicted the “differences between radio in 1921 and radio today.”

The NBC—Red and Blue

Clay Morgan, NBC director of public relations, sent down a batch of scripts showing how Radio Festival had been incorporated into various programs over WEAF and the Red and WJZ and the Blue. They contributed to an understanding of the fact that National Radio Festival was a grass roots promotion, with activity built around stations. Thank you, Mr. Morgan.

JAMESTOWN—WJTN

During Radio Festival Week, June 3-8, WJTN performed a notable feat in interpreting the City of Jamestown to its citizens.

Result of the week of Si Goldman, acting manager, “we have obtained the enthusiastic support of the entire city. Already the broadcasts have tied us in solidly with every civic group.”

National Radio Festival was announced in a 600 line ad in both Jamestown papers, Because the Jamestown Radio Festival was pointed to civic-mindedness: the program, copied from an advertisement, appears below:

“Monday, June 3—7:00 to 7:30 p.m. — Opening Broadcast

Place—New Jamestown High School Auditorium.

Music—Town High School Band, New York State Champions.

Speakers—Mayor Leon F. Roberts; Fire Chief Rudolph Swanson; City Legal Consultant Anthony Saeli; Superintendent of Schools Clinton Bush; Police Chief Harry Nelson; Rev. Dr. A. E. Randell, formerly of City Hospital Board; Charles Laycock, Secretary of Chamber of Commerce; Julius King, Publicity Director of Chautauqua.

Jamestown Telephone Broadcast—9:30 to 10:00 p.m. Place—Jamestown Telephone Exchange Building.

“Tuesday—Fire Department Broadcast—8:00 to 8:30 p.m. Place—City Hall Engine House, and Wellman Building, to which there will be a demonstration call. 9:15 to 9:30 p.m.—JAMESTOWN DIVISION ALFRED UNIVERSITY EXTENSION.

“Wednesday—3:00 to 3:30 p.m.—Newspaper Broadcast. Place—Jamestown Evening Journal. Participants—Dept. Heads and Newspaper Workers.

8:30 to 9:00 p.m.—City Administration Broadcast. Place—Council Chamber of Jamestown City Hall. Participants—Mayor Roberts and City Department Heads.

“Thursday—8:30 to 9:00 p.m.—Jamestown Public School System Broadcast. Place—WJTN Studios. Music—Jamestown High School A Cappella Choir. Participants—Superintendent of Schools Clinton Bush, and Department Heads.

9:30 to 10:00 p.m.—Police Department Broadcast. Place—Demonstration call between police transmitter and prow car, to be picked up and rebroadcast by WJTN’s transmitter; and round-table police discussion in WJTN Studios.

“Friday—8:30 to 9:00 p.m.—City Hospital Broadcast. Place—Jamestown General Hospital. Participants—Ward and Department Heads.

“Saturday—8:30 to 9:00 p.m.—Chamber of Commerce Broadcast. Place—WJTN Studios. Music by the Trumpeteers. Participants—Charles Laycock, Secretary of Chamber of Commerce; and Julius King, Publicity Director of Chautauqua Institution; Charles Brown, Chautauqua Regions.”

DURHAM—WDNC

“Super crook” Bob Stratton, program director, WDNC, Durham, N. C., matched wits with local police during National Radio Festival and won by two minutes.

It happened during the stolen car demonstration broadcast. The public listened in on the complicated chase as reported via 2-way police radio and WDNC.

“The police were very cooperative,” said Mr. Stratton, “and the resulting program was very interesting.”

On Friday evening WDNC broadcast an amateur radio demonstration. During the week all types of radio sets were displayed in the large studio.

DES MOINES—KSO-KRNT

Twenty thousand and three hundred (23,300) people attended KSO-KRNT, Des Moines, Radio Festival picnic, Sunday, June 2. 23,300 folks said it was a big success.

The event was publicized for two weeks over the air. In addition, Mary Little’s column in the Register and Tribune carried notes and there were regular KSO-KRNT posters on the backs of all street cars.

June 7, 1940
At the entrance gate each picnicker received a list of the forty prizes for the drawings and tickets for the free rides in the amusement park where the event was held. The picnic began at 10:00 a.m. and ended at 11:00 p.m. with a "fireworks display from across the lagoon."

The stations are continuing Radio Festival through June with a daily give-away of a radio set. "It is having a very decided effect on the general radio listening," according to Craig Lawrence, commercial manager.

COLUMBUS—WHKC

WHKC, Columbus, Ohio, "is right on top in National Radio Festival Week" according to Bob French, production manager.

Mr. French wrote:

"Not only is this station carrying out the plans for talks and announcements which you outlined, but we are incorporating several ideas of a purely local nature, which we believe will stack up with the best of them.

"Again may we thank you for your suggestions and assure you of our utmost cooperation in this very worthwhile venture."

BRIDGEPORT—WICC

"At the end of this week we will have completed what I feel has been a real effort to sell radio to the public; and especially we have made a great many school children conscious of our industry."

That's the conclusion of Joseph Lopez, supervisor, WICC, Yankee Network, Bridgeport, Conn. In addition he wrote:

"We began last week carrying special programs made up from the various schools of this area to announce the National Radio Festival and are intensifying this project this week. We have been able to get together some very good programs of school groups and have made this open house at our studios. We are showing in the windows of our New Haven building a display built around the Festival. Last night (June 3) I concluded a series of three talks taken from the ABC of Radio which have also been well received.

"About a month ago we began, in cooperation with other Connecticut stations, an essay contest among the children of the 6th, 7th and 8th grades elementary schools, and all grades of high school on the subject: 'The American System of Broadcasting—Why It is Best for Americans.' The booklets, 'The ABC of Radio' were widely distributed among the schools for reference.

"All essays have been submitted to general headquarters for Connecticut at WTIC, Hartford, for judging and awarding of prizes.

"This essay contest not only aroused considerable interest but the booklet has been widely examined and has also created additional interest in radio. This coming Saturday evening (June 8) we are planning to carry a special half hour program from Hartford to present the winners, etc."

ATLANTIC CITY—WBAB

The Honorable A. Harry Moore, Governor of New Jersey, was the first Governor of the seaboard states to proclaim National Radio Festival. The event was celebrated during the week of June 3-8.

Norman Reed, managing director of WBAB, Atlantic City, secured Governor Moore's proclamation as well as one by Thomas D. Taggart, Jr., Atlantic City's Mayor.

WBAB maintained Open House throughout the week, presented special educational programs and announcements. A highlight was a 30-minute dramatic presentation on Friday at 9:30 p.m., in which the public was taken behind the scenes in a broadcast station.

**Engineering**

**IRE CONVENTION**

The Fifteenth Annual Convention of the Institute of Radio Engineers will be held June 27, 28, 29 at Hotel Statler, Boston, Massachusetts. This year's program should be of unusual interest to broadcast engineers because about half of the program will be devoted to television, frequency modulation, high-power air-cooled tubes, and ultra-high-frequency transmission.

Several inspection trips of unusual interest have been scheduled. Probably the outstanding trip will be the one to Paxton to inspect the 50 KW transmitter of the Yankee Network. Paul deMars, Technical Director of the Yankee Network, will demonstrate frequency-modulated-wave reception and relay transmission and will illustrate the peculiar merits of frequency modulation. Other inspection trips of unusual interest will be made to the new WBZ 50 KW transmitter, Hygrade Sylvania Tube factory, U. S. Coast Guard air base at Salem, Harvard Engineering and Research Laboratories, General Radio, and Massachusetts Institute of Technology.

Eight highly interesting papers will be presented on television. These will be:

The subject of Frequency Modulation will be well covered by six timely papers on the subject. These will be:

R. N. Harmon, of Westinghouse, will describe an air-cooled 50 KW transmitter and I. E. Mouromtseff and W. G. Morgan, of Westinghouse, will deliver a paper on large air-cooled tubes for use in 50 KW transmitters.

FLY SAYS TELEVISION INTERESTS ARE MOVING FORWARD

FCC Chairman James Lawrence Fly, at a press conference early this week, said that he saw some indications of the industry’s getting to work on television and trying to do the job constructively and to move forward. This answer was made by the Chairman to a question as to whether the Commission saw any indication of the television industry getting together.

Mr. Fly told newsmen that the question of the industry’s agreement was not the sole question. The prime question, he said, was one of satisfactory performance. The Commission, Mr. Fly stated, was not concerned with an agreement in the sense of commercial interests getting together and agreeing on a scheme to satisfy their own business interests. The Commission will rely on engineering opinion as to efficiency and actual improvement of television standards.

“What we are shooting at,” Chairman Fly said, “is a level of performance and looking for engineering opinion on the merits of standards.”

Television was not deadlocked, he said. On the contrary it has been put on a basis for engineering advance. The Commission, Mr. Fly said, was ready to make a substantial number of grants which would allow the public to participate in experimentation.

Mr. Fly told the conference that he expected the Monopoly Committee will make its report to the Commission sometime this week, but he said no action has been taken by the Commission itself as to when or if the report will be made public.

FLY SAYS TELEVISION INTERESTS ARE MOVING FORWARD

BROWN REAPPOINTED

President Roosevelt this week nominated Col. Thad H. Brown to succeed himself as a member of the FCC. His present term expires on June 30 and the new term is to be from June 30, 1940, to June 30, 1947. The nomination has been referred to the Senate Committee on Interstate Commerce.

FOREIGN AMATEUR COMMUNICATION BANNED

Immediate ban on amateur radio communication with foreign stations was today ordered by the Federal Communications Commission. There are approximately 55,000 amateurs licensed by the Commission.

This prohibition, however, does not apply to amateur communications between licensed amateur stations in the continental United States and its territories and possessions; nor does it apply to United States citizens authorized to operate amateur stations in the Philippine Islands or the Canal Zone when such persons are communicating with amateurs in the United States.

Order No. 72, pursuant to Section 303 of the Communications Act and in accordance with Article 8, Section 1, General Radio Regulations (Cairo Revision, 1938) annexed to the International Telecommunications Convention (Madrid, 1934), as issued today, reads in the main:

"IT IS ORDERED, That amateur radio operators and amateur radio stations licensed by the Federal Communications Commission shall not exchange communications with operators or radio stations of any foreign government or located in any foreign country; Provided, however, that this Order is not intended to prohibit the exchange of communications between licensed amateur operators and licensed amateur stations in the continental United States and licensed amateur operators and licensed amateur stations in the several Territories and possessions of the United States, or between licensed amateur operators and licensed amateur stations in the Continental United States and United States citizens authorized to operate amateur stations in the Philippine Islands or the Canal Zone, or between licensed amateur operators and licensed amateur stations in the several Territories and possessions of the United States.

IT IS FURTHER ORDERED, That all Rules and Regulations of the Commission inconsistent with this Order BE, AND THE SAME ARE HEREBY, SUSPENDED, pending the further Order of the Commission.

This Order shall become effective immediately."

FCC AMENDS BROADCAST RULES

FCC has announced that Section 3.71 of its rules dealing with minimum operating schedules has been amended to read as follows:

"Except Sundays, the licensee of each standard broadcast station shall maintain a minimum operating schedule of two-thirds of the total hours that it is authorized to operate between 6 a.m. and 6 p.m., local standard time, and two-thirds of the total hours it is authorized to operate between 6 p.m. and midnight, local standard time, except that in an emergency when, due to causes beyond the control of the licensee, it becomes impossible to continue operating, the station may cease operation for a period of not to exceed 10 days, provided that the Commission and the Inspector in Charge shall be notified in writing immediately after the emergency develops."

FCC ASSIGNMENTS

FCC has announced that the work, business and functions of the Commission for the month of June have been assigned as follows:

Commissioner Payne—Designated to determine, order, report or otherwise act upon all applications or requests for special temporary standard broadcast authorizations.

Commissioner Walker—Designated to hear and determine, order, certify, report or otherwise act upon; (a) except as otherwise
ordered by the Commission, all motions, petitions, or matters in cases designated for formal hearing, including motions for further hearing, excepting motions and petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission and those requesting change or modification of a final order made by the Commission; provided, however, that such matters shall be handled in accordance with the provisions of Sections 1.231 to 1.235, inclusive, of the Commission's Rules of Practice and Procedure; (b) the designation pursuant to the provisions of Section 1.231 to 1.232 of the Commission's Rules of Practice and Procedure of officers, other than Commissioners, to preside at hearings.

HIGH FREQUENCY ALLOCATIONS

Specific allocations of frequencies in the band 116,000 to 119,000 kilocycles, and in the band 156,000 to 162,000 kilocycles, have been approved by the Federal Communications Commission in accordance with Order No. 67 to become effective June 18 as follows:

Frequencies between 116,000 and 119,000 kilocycles are assignable on an experimental basis only in the service for which allocated until January 1, 1942. In the first mentioned band, assignments made prior to January 1, 1941, will be on a basis of non-interference to existing broadcast stations on frequencies between 116,000 and 118,000 kilocycles, and to existing Government stations on frequencies between 118,000 and 119,000 kilocycles.

Frequencies between 129,000 and 132,000 kilocycles, and between 140,000 and 144,000 kilocycles, are also available for experimental purposes in accordance with the rules and regulations governing such service.

FEDERAL COMMUNICATIONS COMMISSION

FINAL ORDERS

The FCC has announced the adoption of an order granting the applications of the Nevada Broadcasting Company and the Las Vegas Broadcasting Company, both for new stations in Las Vegas, Nevada, the Nevada Broadcasting Company to operate on frequency 1370 kilocycles, with power of 100 watts night, 250 watts day, unlimited time, and the Las Vegas Broadcasting Company to use 1120 kilocycles, with the same power and unlimited hours of operation, subject to the condition that permittees shall file application for modification of construction permit, specifying exact transmitter locations within two months after effective date of order.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

No hearings or oral arguments are scheduled to be heard before the Commission in broadcast cases during the week beginning June 10.

FUTURE HEARINGS

During the past week the Commission has announced the following tentative dates for hearings in broadcast cases. They are subject to change.

July 1
NEW—Anthracite Broadcasting Co., Inc., Scranton, Pa.—C. P., 1370 kc., 250 watts, unlimited time.

July 2
NEW—The Kaw Valley Broadcasting Co., Inc., Topeka, Kans.—C. P., 1500 kc., 250 watts, unlimited time.

July 3
NEW—Anthracite Broadcasting Co., Inc., Scranton, Pa.—C. P., 1370 kc., 250 watts, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

Western Radio Corp., The Dalles, Ore.—Granted construction permit for a new station to operate on 1200 kc., 100 watts night, 250 watts day, unlimited time (B5-P-2838).

June 7, 1940
WTSP—Sam H. Mann, McKinney Barton and Dorothy Line, St. Petersburg, Fla.–Granted authority to transfer control of The Pinellas Broadcasting Company, licensee of station WTSP, from Sam H. Mann, McKinney Barton and Dorothy Line, to Nelson P. Poynter, 50 shares of common stock for a total consideration of $39,000. Station operates on 1370 kc., 250 watts, unlimited time (B3-TC-211).

WSY—WSY—M. S. Wilder, Syracuse, N. Y.—Granted authority to transfer control of Central New York Broadcasting Corp., licensee of WSYR—WSYJ, from M. S. Wilder to H. C. Wilder, 1500 shares of common stock (par value $15,000). Station operates on 570 kc., 1 kw, unlimited time, DA day and night (B1-TC-208).

WJTN—Harry C. Wilder, Jamestown, N. Y.—Granted authority to transfer control of James broadcasting Corp., Inc., licensee of WJTN, from Harry C. Wilder to Jay E. Mason, 490 shares of common stock for $4,900 and 75 shares of preferred stock for $750. Station operates on 1210 kc., 250 watts, unlimited time, (B1-TC-208).

W8XWJ—The Evening News Assn., Detroit, Mich.—Granted renewal of high frequency broadcast license for the period ending January 1, 1941, on an experimental basis only, conditionally.

WLWO—The Crosley Corp., Cincinnati, Ohio.—Granted modification of license to add frequency 17800 kc., in addition to the presently authorized frequencies used by international station WLWO—6060, 9590, 11870, 15270, and 21650 kc. (B2-MLIR-27).

WSPB—WSPB, Inc., Sarasota, Fla.—Granted modification of license to increase nighttime power from 100 to 250 watts, operating on 1120 kc. (B3-ML-950).

KUIN—Southern Oregon Broadcasting Co., Grants Pass, Ore.—Granted construction permit to make changes in transmitter and increase power from 100 to 250 watts, unlimited time, on 1310 kc. (B5-P-2779).

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Granted construction permit to install new transmitter and increase power from 100 to 250 watts on 1210 kc., 5-WGBB-WTHB (B1-P-2786).

KYUM—Yuma Broadcasting Co., Yuma, Ariz.—Granted modification of license to increase night-time power from 100 to 250 watts, on 1210 kc., unlimited time (B5-ML-993).

WTHT—The Hartford Times, Inc., Hartford, Conn.—Granted modification of construction permit (B1-P-2240) authorizing increase in night power from 100 to 250 watts, operating on 1200 kc., unlimited time (B1-MP-897).

The Commission announced the grant of the following application:

West Virginia Radio Corp., Morgantown, W. Va.—Granted construction permit for a new station to operate on 1200 kc., 250 watts, unlimited time. Exact transmitter, studio site and antenna system to be determined subject to Commission’s approval.

**DESIGNATED FOR HEARING**

Glover Weiss, trading as Glover Weiss Co., Jacksonville, Fla.—Application for construction permit to erect a new station to operate on 1410 kc., 250 watts, unlimited time (B3-P-2812).

**MISCELLANEOUS**

KVIO—Puget Sound Broadcasting Co., Inc., Tacoma, Wash.—Denied petition for rehearing filed in re application of KIRO, the Queen City Broadcasting Company, for authority to move transmitter and increase power from 1 kw to 10 kw, unlimited time, which was granted by the Commis¬sion April 16.

WCAD—St. Lawrence University, Canton, N. Y.—Granted special temporary authority to change hours of operation from EST to EDST for the period June 1 to August 1. Also granted special temporary authority to operate from 10:30 a. m. to 12:30 p. m., EST on June 9, in order to broadcast Counselor’s exercises of Theological School; from 2:30 to 4 p. m., EDST on June 9, in order to broadcast Baccalaureate sermon of College; from 10 a. m. to 12:30 p. m., in order to broadcast Graduating exercises of College, and from 1:30 to 3 p. m., EDST on June 10 in order to broadcast Commencement exercises.

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Granted special temporary authority to operate from 9:15 p. m. to 12 midnight EST, on June 7 in order to broadcast election returns only; also granted special temporary authority to operate from 9:15 p. m. to 10 p. m., EST on June 7, in order to broadcast the Mersey University Graduation Exercises.

WMO—Martin R. O’Brien, Aurora, Ill.—Granted special temporary authority to operate with power of 100 watts local sunset (June 7:30 p. m., CST) to 9 p. m., CST on June 5, in order to broadcast commencement exercises of Madonna High School and to operate from 7:30 to 9 p. m., CST on June 14, in order to broadcast Americanism pro¬gram to be presented by Aurora Lodge of Elks.

Anthracite Broadcasting Co., Inc., Scranton, Pa.—Granted motion for a temporary extension of hearing from June 3 to July 2 on application for new station to operate on 1370 kc., 250 watts, unlimited time.

The Kaw Valley Broadcasting Co., Inc., Topeka, Kans.—Granted petition for continuance of hearing from June 11 to July 2 in re application for new station to operate on 1500 kc., 250 watts, unlimited time, (B1-TC-208).

WMBG—Havens & Martin, Richmond, Va.—Granted construction permit to install new auxiliary transmitter, using 1 kw instead of 250 watts, for emergency use only. (B2-P-2876).

WBZ—Winghouse E and M Co., Boston, Mass.—Granted modification of construction permit (B1-P-2161) as modified, for extension of completion date from 6-30-40 to 9-30-40. (B1-MP-984).

WSUI—State University of Iowa, Iowa City, Ia.—Granted license to cease operation, permit being authorized, increase in power from 1 kw, 5 kw, 6 kw, installation of new transmitter and DA for day and night use, and move of transmitter; 880 kc. Also granted authority to determine operating power by direct measurement of antenna power. (B4-L-1153 and B4-Z-401).

KVOR—Out West Broadcasting Co., Colorado Springs, Colo.—Granted authority to determine operating power by direct measurement of antenna power. (B5-Z-399).

WRJN—Racine Broadcasting Corp., Racine, Wis.—Granted authority to determine operating power by direct measurement of antenna power. (B5-Z-399).

WDAE—Tampa Times Co., Tampa, Fla.—Granted license to cover construction permit (B3-P-2554), which authorized changes in equipment, installation of directional antenna for day and night use and increase in power to 5 kw; 1200 kc., unlimited time (B3-L-1112). Also granted authority to determine operating power by direct measurement of antenna power. (B3-Z-398).

KEGE—A. E. Belo Corp., area of Dallas, Tex.—Granted construction permit to install new transmitter and decrease power from 3 to 2 watts in portable-mobile relay station. (B3-PRE-356).

WXPY—Bell Tel. Labs., Inc., Whippany, N. J.—Granted license to cover construction permit for new developmental broadcast station; frequency 43,200 kc., 5 kw. (B1-LEX-14).

WSVA—Shenandoah Valley Broadcasting Corp., Harrisonburg, Va.—Granted modification of construction permit (B2-P-2578), authorizing approval of antenna and specifying transmitter site to be used for 1 kw equipment as site now used; 5 miles So. of Harrisonburg, East of Valley Pike. (B2-MP-966).

WHLD—The Niagara Falls Gazette Publ. Co., Niagara Falls, N. Y.—Granted license to cover construction permit (B1-P-2210) as modified, which authorized a new station to operate on 1500 kc., 1 kw, daytime hours of operation (B1-L-1151). Also granted authority to determine operating power by direct measurement of antenna input. (B1-Z-396).

WEHH—Columbia Broadcasting System, Inc., Portable-Mobile, area of North Y. Y. City.—Granted modification of construction permit (B1-PRE-281) as modified, which authorized changes in equipment and reduction of power to 15 watts, for authority to increase power from 15 watts to 30 watts and make changes in equipment. (B1-MPRE-44).

Hagerstown Broadcasting Co., Md.—Granted construction permit for new relay broadcast station; frequency 1622, 2058, 2150, 2790 kc., 100 watts. (B1-PRY-220).

WEGP—Berks Broadcasting Co., Portable-Mobile, area of Reading, Pa.—Granted construction permit to increase power in relay station to 2 watts, and install new transmitter. (Bq-PRE-353).

WAAU—Columbia Broadcasting System, Inc., New York, N. Y.—Granted special temporary authority to transmit to standard
APPLICATIONS FILED AT FCC

WHPR—WHP, Inc., Portable-Mobile (area Harrisburg, Pa.—License to cover construction permit (B2-PRE-339) for a new relay broadcast station.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Agricultural Insecticide & Fungicide Association—An unlawful price fixing conspiracy in the sale of chemicals, fertilizers, insecticides, fungicides and related items, is alleged in a complaint issued against the Agricultural Insecticide & Fungicide Association, New York, its officers, directors and members, and against five
cooperating corporations, the Allegheny Chemical Corporation, Reading, Pa.; Ansbacher-Siegel Corporation, Brooklyn, and General Chemical Company, Phelps Dodge Refining Corporation, and Tennessee Corporation, all of New York.

Association officer respondents are: R. N. Chipman, Bound Brook, N. J., chairman; R. N. Chipman and June C. Hellman, secretary and treasurer, and June C. Heitzman, secretary, both of New York.

Respondent members are the association board of directors are: R. N. Chipman, Bound Brook, N. J.; H. D. Whitteles, Cleveland; H. P. Mansfield, Wilmington, Del.; J. B. Cary, Middlesport, N. Y.; J. H. Boyd, Memphis, Tenn.; A. J. Flebut, Richmond, Calif.; J. H. Boyd, Memphis, Tenn.; and L. S. Hitchner, president and treasurer, and June C. Heitzman, secretary, both of New York.

The complaint alleges that operation of the respondents' device involves insertion of a needle into the hair follicle for destroying the root of the hair by electrolysis, which process may cause serious injury to health. The complaint further alleges that the device will not accomplish the results claimed and is not safe, painless and harmless when used by the unskilled lay public.

The respondents are further charged with disseminating false advertisements through their failure therein to reveal that use of the device under conditions prescribed in the advertisements, or under customary or usual conditions, may result in serious and irreparable injury to health.

Upon petition of the Commission, the United States District Court for the Southern District of New York recently issued an order restraining the respondents from further dissemination of false advertisements of their product pending issuance and final disposition of the Commission's complaint now issued. (4144)

Mayos Products Company—George D. Moorman and Roy C. Stockbridge, individually and trading as Mayos Products Company and as M. P. Company, engaged in the sale and distribution of a medicinal preparation designated "Mayos Periodic Compound," are charged, in a complaint with misrepresentation.

The complaint charges that the respondents, whose office and principal place of business is at 1833 West Larchmont Ave., Chicago, have represented, in advertisements in newspapers, periodicals, and other advertising literature in connection with the sale and distribution of their product, that the preparation is a cure or remedy for delayed, scanty, irregular or painful menstruation, and is a competent and effective treatment for such ailments, and that there is no danger of ill effects upon the health of the user.

The complaint alleges that these representations are false and misleading; that the preparation does not constitute a competent or effective treatment for any of the ailments, and contains ergotin, aloe, extract cotton root bark, extract black hellebore and oil of savin in quantities sufficient to cause serious and irreparable injury to health if taken under the conditions prescribed in the advertisements or under such conditions as are customary and usual. (4147)

M. P. Company—See Mayos Products Company.

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

Crete Mills, Crete, Nebr., engaged in the business of milling and selling feed for animals, including chicken feed manufactured and sold under the trade name of "Victor Chick Pellets," has been ordered to cease and desist from misrepresentation.

The Commission finds that in publications and advertising in connection with the sale of their product, that "Victor Chick Pellets" will grow chicks faster than other feed; that pullets fed upon the product will keep indefinitely, cost less, and excel all other feeds. The Commission finds that these representations are misleading, and orders the respondent to cease and desist from such representations.

The Commission finds that these representations are misleading, and orders the respondent to cease and desist from such representations.

Beautiderm Company—See Electrolysis Associates, Inc.

Electrolysis Associates, Inc., 1451 Broadway, New York, and its president, treasurer and majority stockholder, Louis Zinberg, trading as Beautiderm Company, of the same address, have been served with a complaint alleging misleading representations in the sale of "Beautiderm Midget," a device for removing superfluous hair.

Among representations allegedly contained in the respondents' advertising matter were that their device is an effective, efficient, safe and scientific apparatus for the electrolytic removal of superfluous hair permanently, painlessly and harmlessly by individual self-application.

The complaint alleges that operation of the respondents' device involves insertion of a needle into the hair follicle for destroying the root of the hair by electrolysis, which process may cause serious injury to health. The complaint further alleges that the device will not accomplish the results claimed and is not safe, painless and harmless when used by the unskilled lay public.

The respondents are further charged with disseminating false advertisements through their failure therein to reveal that use of the device under conditions prescribed in the advertisements, or under customary or usual conditions, may result in serious and irreparable injury to health.

Upon petition of the Commission, the United States District Court for the Southern District of New York recently issued an order restraining the respondents from further dissemination of false advertisements of their product pending issuance and final disposition of the Commission's complaint now issued. (4144)
product costs less than any other similar feeds or excels all other feeds, regardless of price.

The respondent is also ordered to cease representing that any feed containing corn other than kiln-dried corn is dangerous to the health and life of chicks. (3408)

**Hydrosal Company.** 333 East Eighth St., Cincinnati, has been ordered to discontinue misleading representations in the sale of "Hydrosal Liquid" and "Hydrosal Ointment."

The order directs the respondent company to cease and desist from disseminating advertisements representing that the respondent's preparations possess remedial, curative or healing properties with respect to eczema, piles, athlete's foot, poison ivy, or disorders characterized by or associated with pimples, skin outbreaks or itching.

Also prohibited is the representation that the respondent's preparations possess therapeutic value in the treatment of such conditions in excess of affording temporary relief from the symptoms of itching usually accompanying or associated with such disorders, or that the preparations are in general use by the medical profession or hospitals. (4049)

**Income Record Publishing Co.—See United States Business Card Co.**

**Manhattan Hat Company, Inc.**—Prohibiting misleading representations in the sale of hats and caps, an order has been issued against Manhattan Hat Company, Inc., 124 Wooster St., New York, and Gary Samnick, its president; Jacob Samnick, its secretary, and Louis Reinken, its treasurer.

According to Commission findings, the respondents reconditioned and refitted old, worn and previously used hat bodies so that they had the appearance of being new and sold them to the trade without any markings or designation stamped thereon to indicate to purchasers that these products were made from old and previously used hat bodies and other materials.

The findings point out that various manufacturers made finished hats and caps not only from newly manufactured materials but from (a) previously used hat bodies, and (b) felt hat bodies obtained from new but shopworn hats. Shopworn hats, the findings continue, are new hats reclaimed from merchants' shelves by hat and cap manufacturers, who clean, steam and renovate them in practically the same manner as they do hats made from old, previously used hat bodies.

The respondents, according to findings, had stamped in hats and caps the legend "DeLuxe Quality," and also, in illegible and inconspicuous type, the legend "Made Over." The respondents' use of the term "Made Over," according to findings, was wholly insufficient to inform prospective purchasers that the hats and caps so sold were made of old, worn and previously used hat bodies rather than from shopworn hats which had never been worn or used.

The Commission order directs the respondents to cease and desist from representing that hats or caps composed in whole or in part of used or second-hand materials are new or are composed of new materials by failure to stamp on the sweat bands thereof, in conspicuous and legible terms which cannot be removed or obliterated without mutilating the sweat bands, a statement that such products are composed of second-hand or used materials, provided that if sweat bands are not affixed to such hats or caps, then such stamping must appear on the bodies of the hats or caps in conspicuous and legible terms which cannot be removed or obliterated without mutilating such bodies.

The order also prohibits representation in any manner that hats or caps made in whole or in part from old, used or second-hand materials are new or are composed of new materials. (1898)

**McDonell & Sons, Inc.** of Buffalo, N. Y., and Barre, Vt., has been ordered to discontinue misleading representations in the sale of granite grave markers, monuments, memorials and mausoleums.

According to Commission findings, the respondent company advertised that sales of its products were made by the respondent directly from quarry to cemetery; that the respondent company operated a quarry and that its work turned out by it was manufactured and finished by craftsmen in the plant and shops operated by the respondent and that its quarrying and manufacturing facilities placed it in a position to execute the highest grade of memorial work at the lowest possible cost.

These representations, according to findings, had a tendency to deceive buyers into believing that the respondent's products were made entirely from granite which had been finished in its own plant. Many purchasers, the findings point out, prefer buying directly from the quarry and manufacturer in the belief that they may thereby obtain lower prices and other advantages not available when purchases are made through middlemen. (4321)

Findings are further that the respondent company's business was established about 82 years ago and that it still owns a quarry and a finishing plant at Barre, Vt., but has not operated them in recent years. Since 1932, the findings continue, the respondent has purchased granite parts for grave markers, monuments, memorials and mausoleums from other operators and quarry owners. Such stock has been processed and work has been produced under supervision of an officer of the respondent located at Barre, Vt.

The Commission order directs the respondent to cease and desist from representing that products which are not made from granite obtained from its own quarry are sold directly to the ultimate purchaser; or that the granite from which such products are made is produced in a quarry owned and operated by the respondent; or, that products which are not manufactured and finished in a plant owned, operated or controlled by the respondent, are made or manufactured by the respondent. (9097)

**Southern Vitrified Pipe Association—Nine manufacturers of vitrified clay sewer pipe in the southeastern part of the United States and the Southern Vitrified Pipe Association, Cincinnati, and the association's officers, have been ordered to discontinue practices deemed to be in restraint of price competition in the sale of their products.**

Respondent officers of the association are: Cliff B. Beasley, president; W. Clement Boren, Jr., vice president; D. M. Strickland, secretary-manager, and John M. Byrne, treasurer.

The association's membership comprises most of the manufacturers of vitrified sewer pipe east of the Mississippi and south of the Ohio and Potomac rivers. Large quantities of that product are sold to Federal, State and municipal governments.

Commission findings are that, among other things, the respondent manufacturers combined to restrict competition by price agreements, customer participation in sealed bids, and by agreements for the purpose of causing dealer customers to submit identical bids on Governmental orders.

The Commission order directs the respondent manufacturers or any two or more of them to cease and desist, by concerted action, agreement or understanding, by fixing or establishing prices, terms and conditions of sale; (2) carrying on, through the respondent association or other central agency, or through meetings, or otherwise, discussions and exchanges of information concerning proposed or future prices; (3) promising to adhere to filed prices, terms and sale conditions pending the filing of changes with the association, and adherence to such promises; (4) quoting and selling on a delivered basis only to equalize costs to buyers regardless of variations in freight from different points of production and shipment; (5) fixing arbitrary weights to be used in calculating freight charges and equalizations so as to make delivered prices and quoted prices uniform; (6) refusing to quote or sell to Government purchasers on an f.o.b. mill basis and (7) exchanging prices proposed for quotation in bids in advance of submission and opening of sealed bids on Federal, State and municipal projects.

Other cooperative practices ordered discontinued are: (1) fixing and establishing prices in advance of submitting sealed or open quotes; (2) agreeing with their respective dealer customers as to prices to be quoted on the resale of vitrified clay sewer pipe; (3) determining what concerns shall be recognized as dealers entitled to purchase

June 7, 1940
at dealers' prices; (4) restricting the quantity of vitrified clay sewer pipe to be produced by the respondent manufacturers, and (5) collaborating with trade associations composed of vitrified clay sewer pipe manufacturers in other sections, but who sell in the respondents' territory, so as to effect restriction of price competition in the respondents' territory.

The order also prohibits the respondents from concurredly obtaining adherence to prices, terms and sale conditions filed by the manufacturers with the respondent association or any other central agency, by exchanging price information at meetings held under association auspices; by investigating complaints of alleged price deviation by the manufacturers by examination of books and records of suspected offenders, and by threats of legal action against them.

The respondents are directed to cease employing "The Byrne Organization" to act as an agency in performing any practice forbidden by the Commission. Findings are that this organization, owned in part by the respondents D. M. Strickland and John M. Byrne, was employed as an agency for putting the respondents' practices and policies into effect.

The Commission ordered dismissal of its amended complaint in this proceeding as to P. Bannon Pipe Company, Louisville, Ky., a corporation which, having been adjudicated a bankrupt, is in the process of dissolution. (3868)

United States Business Card Company, United States Stationery Corporation, and Lewis Weisman, individually and trading as Income Record Publishing Company, engaged in selling stationery and business forms, with offices and principal place of business at Elizabeth, N. J., have been ordered to cease and desist from certain misrepresentations.

Findings of the Commission are that Lewis Weisman, who is in business under the name Income Record Publishing Company, also is president and treasurer of United States Business Card Company and United States Stationery Corporation, owns a majority of the stock of each corporation, and directs and controls their sales policies. United States Business Card Company, a New York corporation, has been inactive since 1937.

The Commission finds that in promoting the sale of their goods the respondents have represented that certain of their business forms were approved by the United States Government, by placing on the forms the phrase "U. S. Approved." The United States Business Card Company, the findings are, also represented that it was the world's largest manufacturer of business cards exclusively.

In truth, the Commission finds, none of the business forms sold by the respondents was ever approved by or manufactured according to specifications of the United States Government, nor was the United States Business Card Company the world's largest manufacturer of business cards.

The respondents are ordered to cease and desist from representing that their products are approved by or manufactured according to specifications of the United States Government or any agency thereof, and the United States Business Card Company is ordered to cease representing that it is the world's largest manufacturer of business cards or that it is the world's largest manufacturer which is engaged solely in the manufacture of business cards. (3784)

United States Stationery Corp.—See United States Business Card Co.,

STIPULATIONS

Following stipulations have been entered into by the Commission:

Bluebird Studios—Harry, Senia, Margaret and August Doehla, co-partners trading variously under the firm names of Bluebird Studios and Harry Doehla Company, Fitchburg, Mass., in connection with the sale of greeting cards or other merchandise, agree to cease advertising "free samples" to prospective salesmen of their products or making any other use of the word "free" or similar expression in a manner purporting a gift or gratuity only, where any consideration such as payment of money, rendering of services, or otherwise, is required of the person receiving articles of merchandise sent in response to his request for such free samples or other gratuity.

The respondents also stipulate that they will cease delivering any invoice article of merchandise to a customer or prospective customer without prior notice of the terms under which such article is to be sent and without first obtaining permission to make the shipment. The respondents also agree to cease inducing a customer to order samples or other goods by deceptively concealing the terms of the transaction, or in any other way imposing a burden upon a customer or prospective customer either to pay for goods received by him or return them when he has not been previously apprised of such conditions. (2819 and 2822)

Leonard J. Hartman, 1538 West Fifth St., Brooklyn, in the sale of "Concentrated Food Particle (Wheat Germ Oil)", agrees to cease advertising that the product will prevent or overcome disease, afford an increase in health or energy, and is a competent treatment or effective remedy for certain ailments of women. The respondent also agrees to discontinue advertising that the preparation will restore potency or is a competent treatment or effective remedy for sterility, unless the representation is limited to its aid in treating the condition when it is due to a Vitamin E deficiency and it is further explained in direct connection therewith that sterility due to a Vitamin E deficiency is an extremely rare occurrence. (02573)

Alexandra de Markoff Sales Corporation, 642 Fifth Ave., New York, engaged in the sale of cosmetics, has entered into a stipulation in which it agrees to desist from use of the words "compound by hand," or other words of similar import, to describe products which are not compounded by hand, or from use of the words in any way tending to convey the belief that the products referred to are in fact made or mixed by hand; from use of the words "Skin Food," or other words of similar import to designate a product which does not, in fact, serve as a food or nourishment for the human skin or tissues, and from use of the words in any way so as to imply that the product will feed or nourish the skin or tissues to which it is externally applied.

The respondent corporation also agrees to discontinue representing that its so-called "Skin Food," when applied to the skin, is absorbed by the skin with the result that the skin is fed or nourished or otherwise therapeutically benefited by absorption of the product, and to cease representing that its products can erase or remove lines or wrinkles from the skin, build up the tissues, remodel the face or restore or perpetuate youthful or firm contours to the face or throat. (28114)

Robbin's Camera Shop—Maurice and Hilda Robbin, trading as Robbin's Camera Shop, 529 Fourteenth St., N. W., Washington, D. C., have entered into a stipulation in which they agree to discontinue certain representations.

In the sale of "John Shannon Vacuum Filler Sacless Fountain Pens," the respondents agree to cease representing that such products have a $3 or other alleged valuation in excess of the actual value or usual price; that the offered retail sales price is "Special" or for "3 days only," when in fact it is the regular price without limitation as to time, and that bona fide protection for life is extended when in fact no such protection is offered and the products are not of such quality as to last for the period of life expectancy.

The respondents also stipulate that they will discontinue employing the statement "Your first investment is your only investment" or any other statement of like meaning, when in truth such statement is contrary to fact. (2821)

Southern Greeting Card Company—See M. B. Grogan Company.
Spiegel, Inc., 1061 West 35th St., New York, has entered into a stipulation in which it agrees to cease misleading representations in the sale of men's shirts.

The respondent corporation agrees to cease representing by statement or inference that yarn dyed shirts or other textile materials are "Vat Dyed," or in any other way passing off as "Vat Dyed" any merchandise not actually dyed by the vat process.

The stipulation points out that when a textile material steeped in a liquor containing a dye is exposed to the air, the dye is reformed by oxidation and precipitated in the fiber. Dyes so used are called "Vat Dyes." Fabrics made of yarn dyed before being woven are referred to as "Yarn Dyed." The stipulation recites that to the trade and purchasing public the term "Vat Dyed" connotes a superior quality of dye coloring which commands a higher price for a product than if it were yarn dyed. (2823)

Stern Brothers, New York, has entered into a stipulation to discontinue certain representations in the sale of machine-made rugs.

Among representations which the respondent corporation agrees to discontinue are use of the words "Kara Kirman" or other distinctively Oriental names as descriptive of rugs which are not in fact made in the countries or localities designated or implied, with all the essential characteristics and qualities of such rugs, and use of the words "Oriental Reproductions," "Sarouk, Kirman, Kashan Reproductions," "American-Made Oriental Reproductions," or other use of the word "Reproduction" or similar word implying that the article referred to is a reproduction, replica or duplicate of an original, as descriptive of rugs which are not in fact reproductions of the types indicated.

The respondent corporation also stipulates that it will cease employing the words "American Oriental," "Domestic Oriental" or other appellation including the word "Oriental" or other expression indicative of an Oriental type, as descriptive of a rug which does not contain all the inherent qualities, properties, and constructive features of a true Oriental rug.

Other representations which the respondent agrees to desist from using are the words "Sarouk," "Kirman," "Kashan," or other distinctively Oriental appellations in connection with any rug which was not made in the country or locality designated and does not contain all the inherent qualities and properties of such Oriental rugs; unless, when properly used to describe the design or pattern only, such Oriental appellations are accompanied by a word such as "Design" or "Pattern" printed in type equally conspicuous to indicate clearly that only the form delineated on the surface of the rug is a likeness of the type named; for example, "Kirman Design," "Sarouk Pattern". (2818)

Wilson Bros. Paint and Hardware Company, 3863 Cottage Grove Ave., Chicago, agrees to cease advertising that its preparation "Distol Concentrate" will kill bed bugs or bed bug eggs instantly; that most bed bug mixtures scatter bed bugs into the walls or woodwork; that roaches are carriers of cancer, and that Distol Concentrate is odorless. The respondent also agrees to cease representing that its product "Thymite" will eliminate roaches from all buildings overnight; that one application will keep any building clean of roaches, water bugs, silver bugs or ants, for one year, and that there are no other insecticides which will achieve substantially the same results as will Distol Concentrate or Thymite.

FTC CLOSES CASE

The Federal Trade Commission has closed without prejudice its case against United Distillers Products Corporation, 5599 Hudson Blvd., North Bergen, N. J., which has been charged with misleading use of the word "Distillers" in its corporate name.

The order of dismissal recites that the respondent now owns and operates registered distillery No. 1 at Amston, Conn., under Distiller's Permit No. 841, issued to it by the Federal Alcohol Administration.

Closing of the case was ordered without prejudice to the Commission's right to reopen it and resume prosecution, should future facts so warrant.
THE WEEK IN WASHINGTON

The FCC “monopoly” committee issued its report, sharply critical of many parts of the present broadcasting structure. Current contracts between networks and affiliated stations came in for special condemnation. (p. 4325.)

James C. Petrillo was nominated without opposition for president of the American Federation of Musicians, to succeed Joe Weber, retiring because of ill health. (p. 4329.)

WPRO, Providence, became the 300th member of BMI. Representatives of the radio departments of leading advertising agencies expressed a desire to cooperate with BMI in every way feasible. (p. 4329.)

District meetings were held in St. Louis, Wichita and Salt Lake. Meetings are scheduled next week for Los Angeles (June 17), Memphis (June 20), and Rochester, New York (June 22). (p. 4331.)

Monopoly Report

Contracts between networks and affiliates were strongly criticized in the long awaited “monopoly” report prepared by an FCC committee and made public Wednesday.

The 138-page report, with six volumes of exhibits, is being carefully studied by the NAB, with a view to determining how it might affect the entire industry. Appropriate action will be taken, if any is found advisable.

Here is the FCC description of the report:

“Many arbitrary and inequitable practices” on the part of the radio networks are cited by a special committee of the Federal Communications Commission as the result of a two-year investigation of chain broadcasting methods.

“The heart of the abuses of chain broadcasting is the network-outlet contract,” declares the committee in its report, submitted to the Commission today. Accordingly, it recommends “reformation” of these contracts to eliminate such abuses while retaining the advantages of chain service.

The Commission authorized release of the so-called “monopoly” committee’s report pending its consideration by the full Commission.

The 1300-page report of the committee, comprising Commissioner Thad H. Brown as chairman, and Commissioners Paul A. Walker and Frederick I. Thompson, “reveals at every turn the dominant position of the network organizations in the field of radiobroadcasting.” It is based upon more than 10,000 pages of testimony and nearly 800 exhibits, largely obtained through hearings which continued for 73 days, in an investigation pursuant to a Commission order of March 18, 1938.

The report discusses in detail practices employed in connection with the simultaneous broadcasting of identical programs by two or more stations. It differentiates between stations owned or directly controlled by the networks, and affiliated “outlet” stations which broadcast the same program under contractual arrangement with the networks.

The committee finds that the interests of these outlet stations “have been subordinated in the interests of the network owned and controlled station.” It points out that of the 660 standard broadcast stations operated in 1938, more than half—350—were on major networks and included almost all of the country’s high-powered stations. The 660 stations were owned by 460 persons. However, 87 of these persons owned more than one station and received approximately 52 per cent of the total business of all commercial broadcast stations.

Apart from the stations affiliated with their networks, the National Broadcasting Company and the Columbia Broadcasting System in 1938 owned or controlled 23 stations, of which 15 were 50-kilowatt, unlimited time, clear channel stations. The record reveals that the chains have developed around these key stations and have been operated largely for their benefit.

“The predominance of network organization is evidenced by their disproportionate share of the income of the radio broadcasting industry,” comments the committee in reporting that of the $18,854,784 net operating income of all the stations and networks for 1938, nearly half—$9,277,352—went to National and Columbia.

Examples of “arbitrary and inequitable practices” on the part of the networks in their relation with affiliated stations are cited by the report as follows:

“The provision that the outlet station cannot accept programs (Continued on page 4326)
from any network other than the one to which it is bound by contract deprives the station of profitable business and the listening public of programs for which there is a demand. "The practice of requiring stations to set aside all or a major portion of their broadcast time for the utilization of the networks, regardless of whether such time is used or not, places an undue burden upon the outlet station and lessens the ability of the station to serve the local needs of the community." "The provision that non-network rates for national advertising business cannot be less than those of the network prevents the outlet station from entering into a healthy competition for advertising business. "The provisions of the contract concerning the free use of the first converted hours (a nighttime hour or its equivalent in two daytime hours operation), combined with low initial compensating rates for the next hours, results in an inequitable distribution of proceeds from network broadcasting. Whereas Columbia and National had aggregate network time sales of $44,313,778 for the year 1938, they paid to the 253 independently controlled stations on their networks only $12,267,560, approximately one-half of which was paid to 25 of these stations with a relatively strong competitive position based on the need of the networks for their particular facilities. "Moreover, the contracts generally cover periods of time far in excess of the period for which the station is licensed and bind the outlet to network policies far beyond the expiration date of the license." The committee finds these arbitrary contractual arrangements further reflected in the program policies of the networks, mentioning: "Outlet stations are required by their contracts to accept all commercial programs sent by the network organizations unless they are able to prove to the satisfaction of the networks that a particular program will not serve public interest. Since the outlet stations have only general advance knowledge of the content of the program, they have come to accept whatever the network chooses to forward to them. Furthermore, approximately 90 per cent of the commercial programs sent by network organizations are produced by advertising agencies, so that the delegation of program responsibility by the licensee is carried one step further."

The committee cites a number of instances in which chains have gone even farther than the regular network-outlet contract and have "actually taken over the management" of the affiliated station in violation of Section 310(b) of the Communications Act. The Commission has already taken cognizance of this problem and is investigating these contracts.

Pointing out that all but two of the 34 high-power, clear-channel stations and all the high-power regional stations are on the two major networks, the committee reaches "the inescapable conclusion . . . that National and Columbia, directed by a few men, hold a powerful influence over the public domain of the air and measurably control radio communication to the people of the United States," adding: "If freedom of communication is one of the precious possessions of the American people, such a condition is not thought by the committee to be in the public interest and presents inherent danger to the welfare of a country where democratic processes prevail."

The National Broadcasting Company has two distinct networks with separate service to two stations in each of many cities. The manner in which they are operated is regarded as evidence of the "complete domination" of the affiliated stations and is also "one of the most inequitable by-products of these contracts." The report explains:

"The contracts which stations have with National do not specify to which of its chains the outlet is to be linked. The outlet station is only informed that it is a part of the National network. By virtue of this factor, National has the power to determine the economic fate of many of its outlets by arbitrarily assigning to the prosperous Red network or to the unprofitable Blue network."

The policy of Columbia and National of placing talent under exclusive contract, according to the report, has the effect of limiting the efforts of much of the best talent in the country to network programs and of arbitrarily restricting the programs of independent competing stations, as well as the communities in which these independent stations are located. These two networks between them control about 800 of the best known artists in the broadcast and concert field.

The report reveals the National Broadcasting Company a dominant factor in the field of electrical transcriptions, stating: "It has gained great competitive advantages in this field from its position in radio-broadcasting and its transcription activities have, in turn, buttressed its position in the radiobroadcast industry. The committee feels that such domination reacts to public disadvantage by penalizing independent stations which, not being members of a network, must make frequent use of electrical transcriptions. Approximately one-half of all commercial transcriptions sold by National in 1938 in the United States were broadcast by the stations on its network, while slightly less than one-fifth were broadcast by stations on the networks of Columbia and Mutual. "During the past ten years," to quote the report, "networks have so developed that today programs are broadcast to the general public, not by the stations whose owners applied for and received licenses for such a privilege, but through the network organizations. The record shows that network organizations today are utilizing about 48 per cent of the broadcast time of more than 50 per cent of the commercial stations in the United States."

As a example of the dominant position occupied by the stations that are owned and directly controlled by networks, as distinguished from affiliated stations, the committee notes:

The 23 stations owned or controlled by Columbia or National had one-sixth of the total time sales for all 660 stations.
The amount paid by Columbia and National from network time sales to their 23 owned stations was nearly one-third the amount received from all three major networks by 327 independently controlled stations on the networks.

Of non-network business sold to national advertisers, the 23 stations had one-seventh of the amount for all 660 stations.

The net operating income of the 23 stations was nearly one-third of the net operating income of all 660 stations.

The net operating income of the 23 stations was more than one-half of the net operating income of the 327 independently controlled stations.

While 310 stations not on major networks lost $149,000, the 23 owned or controlled stations had net operating income of $4,958,289.

The 23 stations broadcast sustaining programs for approximately 50 per cent of their time, while the 327 independently controlled stations broadcast sustaining programs for approximately 70 per cent of their time.

It appears to the committee that stations owned or controlled by Columbia and National are in a favored position compared to the independently controlled stations affiliated with networks. It observes: “The independently controlled stations do not reach the network advertiser directly but only through the networks for network time sales. Therefore, they have no voice in selling their time to network advertisers and must rely absolutely upon the network sales force. As between two stations serving the same area, either with primary or secondary signal, self interest determines the extent to which the network sales force will undertake to influence the choice of the network advertiser in favor of the network owned or controlled station.”

The networks (with the exception of Columbia, Mutual, and Yankee) retain the revenues from all sales of network time during the first hours of commercial broadcasting in each 28-day period. Columbia retains the revenues from the first five “converted hours” of commercial broadcast per week and National retains the revenue of from four to five such hours.

The practices of Mutual, it is pointed out, differ somewhat from the general network operations. At the time of the hearings, Mutual took no options on the time of stations and received only a commission, not exceeding 15 per cent, on the proceeds of network commercials. While it has an organization for selling network commercial program time to advertising agencies, the stations which served as Mutual outlets have the privilege of also selling the network time, for which they share commissions with Mutual. Also, Mutual has no program producing facilities.

“The business of broadcasting is the fastest growing source of advertising revenue in America,” comments the report in showing that income from this source increased from $28,000,000 gross in 1928 to $165,000,000 ten years later. But unlike other big business enterprises, broadcasting is not the chief activity of its owners, but is operated principally as a “side line” to the main business. More and more of the applications filed with the Commission for authority to own stations show the applicants to be persons of other large business interests, such as manufacturing, banking, publishing, natural resources development, public utility, etc.

Two-thirds of the nation’s standard broadcast stations are operated as incidental to other businesses. In many cases, the actual owners of the stations do not personally operate them. In addition to the operation of approximately 300 stations by newspapers, 125 other stations are operated by businesses of various kinds. Two-thirds of all standard broadcast stations are licensed to corporations or are under their control. Examination of the minutes of meetings of directors of these corporations for 1938 indicates the surprising fact that no consideration was given to the operation of the stations in the directors’ meetings of some 80 per cent of the corporations.

Many of the largest corporations which control broadcast stations directly or indirectly are themselves controlled through proxy voting by a very small number of persons who, themselves, hold no material ownership interest in the companies. For example: Radio Corporation of America, which owns the National Broadcasting Company, is controlled by three persons who between them own only 5,829 shares of a total of 9,864,502 voted by them.

The report places ownership of commercial stations in four categories:

(a) Forty-one owners controlling stations which have 33 per cent of the revenues of all stations.
(b) Thirty-five owners controlling stations which have 10 per cent of the revenues of all stations.
(c) Eleven owners controlling stations which have 15 per cent of the revenues of all stations.
(d) Three hundred and seventy-seven owners controlling stations which have 42 per cent of the revenue of all stations.

For the privilege of entering rich markets, high prices have been paid by the networks for broadcast stations. National has paid 386 per cent of book value, and Columbia 280 per cent. In 1938 National and Columbia actually had greater profits from their own or controlled stations than from their entire network operations.

Network organizations are not required to obtain a license or other Federal authority in order to function. The Communications Act fixes responsibility upon individual station licensees for operation in the public interest. In practice, however, the record shows that the responsibility discharged by the licensee of a station engaged in chain broadcasting is reduced to the matter of simply selecting the network with which the station is to be associated. After the station becomes an outlet for a network by undertaking the obligations of the outlet contract now in general use, the matter of selecting programs, accepting advertising material, and, in general, the broadcasting of programs by the station insofar as network programs are concerned is placed in the control of the network.

The networks, in turn, have passed on to advertising agencies the right of selection and production of these

June 14, 1940—4327
network programs. The responsibilities are shifted still further from the station when, as in many instances, the advertising agencies have passed them on to program producing agencies. The networks have not supervised the selection of the types or the production of these programs, and the record shows they seldom reject programs offered to them either by advertising agencies or their program producing agencies. At least 90 per cent of all network commercial programs broadcast in this country are thus produced. These programs brought the networks approximately $50,000,000 in revenue for 1938.

As the committee sums it up: "The station licensee has very limited supervision over network programs. The protection of the listening public is thus passed from licensee to network to advertising agency to program producing agency. The responsibility for serving the public interest placed by the statute upon the station licensee evaporates when it is so diffused."

The committee cites the broadcasting of the 1939 World Series baseball games as an illustration of the effect of exclusive outlet contracts upon presentation of particular programs. The report relates:

"Mutual obtained exclusive privileges from the baseball authorities for the broadcasting of the series with the Gillette Company as commercial sponsor. It then attempted to purchase time from stations in various communities, making offers to stations which were then under contract with other networks. Columbia and National immediately called upon their outlet stations to respect the provisions of their contracts under penalty of jeopardizing their rights under the contracts. This prevented certain licensees from accepting a program for which they believed there was public demand and which they thought would be in the public interest. It also deprived the advertiser of network advertising service in some areas, and prevented the licensee from receiving income which could have been obtained from acceptance of the program series. Mutual, on the other hand, refused to allow other stations to broadcast the program in communities where it had exclusive outlets and also refused the program to stations in other communities which it considered were within the area covered by Mutual outlets. As a result, thousands of potential listeners failed to hear the World Series of 1939."

The primary service rendered by the networks is far from nationwide in scope, according to the committee's findings, and "millions of persons receive no adequate network program service under existing conditions." Likewise, it believes that network duplication should be held to a minimum. The report continues:

"The basic theory of the Communications Act is that broadcast stations shall render service to the public. Chain broadcasting is valuable to the furnishing of a complete program service. The two principal networks have compiled a record of profitable business operation, and have established themselves in a dominant position in the radio field. But, perhaps not unnaturally, the desire for profits appears to have been foremost, and unquestionably, the profit motive has operated to restrict the distribution of network service, and to deprive many listeners of the advantages of chain broadcasting service.

Although the major networks purport to be national in their scope, the record shows that, while they have voluntarily gone into the better markets, they have neglected the less profitable ones and, as a result, some 320 stations, including about 220 which are the only stations in their communities, remain without major network connections."

"New contract relations between network and outlet, the potential advantages of chain broadcasting in this country can be retained. . . . It is our opinion, based upon the extensive investigation which we have just completed, that public interest, convenience or necessity are adversely affected by inclusion in the network-outlet contracts of many of the contractual provisions discussed. . . . The elimination of arbitrary and inequitable contractual arrangements will tend to subject the networks to active competition and will render the independent station more secure within the industry, and better able to cope with the networks in all fields of network activity."

"The committee believes that the Commission is in its report. It is our opinion, based upon the extensive investigation which we have just completed, that public interest, convenience or necessity are adversely affected by inclusion in the network-outlet contracts of many of the contractual provisions discussed. . . . The elimination of arbitrary and inequitable contractual arrangements will tend to subject the networks to active competition and will render the independent station more secure within the industry, and better able to cope with the networks in all fields of network activity."

"The committee believes that the Commission should proceed at once to deal with these problems to the extent that Congress has given it authority in the Communications Act of 1934. In our opinion, the Commission possesses ample power under the Communications Act to redefine its licensing policy and require the elimination of inequitable and arbitrary contractual arrangements which affect the duty of the licensee to serve the public interest. The actual administrative experience which the Commission will obtain under its new licensing policy will enable it to suggest to the Congress the enactment of amendatory legislation if such is later found to be necessary."

"It is the opinion of the committee that through the exercise of the powers of the Commission in dealing with the contractual relations between network and outlet, the potential advantages of chain broadcasting in this country can be retained. At the same time, the abuses which have prevented many of its potential advantages from being realized can be corrected. It is the committee's belief that the excision of arbitrary and inequitable provisions from network-outlet contracts will enhance many of the detrimental practices involved in chain broadcasting without sacrificing any of the benefits."
PETRILLO HEADS A. F. OF M.

James C. Petrillo was nominated, without opposition, for president of the American Federation of Musicians at the union's annual convention Thursday in Indianapolis, Ind.

Petrillo was slated to succeed Joe Weber, president for 40 years, who was made "technical adviser" for life. Weber announced Monday that the state of his health made retirement necessary.

Petrillo has been president of the Chicago local. All other national officers were nominated for reelection without opposition.

One of Weber's last big jobs as president was to defeat a resolution calling for all members to refusal to make records and transcriptions. The convention likewise rejected a resolution calling for the Canadian Broadcasting Company to quit using recorded programs.

PAYMENT FOR REST PERIODS

Employees under the Wage and Hour Act must be paid for short rest periods, according to announcement this week by Colonel Philip B. Fleming, Administrator.

A "short" rest period, as construed in instructions sent to all field representatives of the Division by Colonel Fleming, will include periods up to and including 20 minutes. When rest periods customarily taken by employees are longer, final decision on whether or not the employee will be paid for it will rest with the Regional Director.

The following considerations will guide the Regional Director in making his decision: the freedom of the employee to leave the premises and go where he pleases during the intermission; the duration of the intermission—which sufficient to permit the employee reasonable freedom of action and a real opportunity for relaxation; whether the intermission is clearly not an attempt to evade or circumvent the provisions of the Fair Labor Standards Act. In all cases where the Regional Director decides that an intermission shall not be counted as "hours worked," he has been instructed to report the results of his investigation and the reasons for his action to the Administrator.

For enforcement purposes, computation of hours worked under the new rule generally will apply only since April 1, 1940. Where time spent in rest periods prior to that date has been deducted from hours worked, ordinarily, the deductions will be allowed to stand, Colonel Fleming said.

WPRO, Providence, R. I., was the 300th station to join BMI. The Rhode Island station sent in its subscription this week.

Sydney M. Kaye, BMI's vice president and general counsel, addressed a group of sixty representatives of the radio departments of leading advertising agencies at a luncheon on Wednesday (June 12) at Stouffer's Restaurant, 540 Fifth Avenue at which M. E. Tompkins, BMI's General Manager was guest of honor.

After outlining the reasons for the current controversy, Mr. Kaye compared the present situation of both broadcaster and advertiser in regard to music to that of the inhabitant of a tropical island who, needing only a breech clout, was forced to pay for a dozen fur coats. Research has revealed, he explained, that in 1938 only 388 tunes accounted for 43 per cent of the playing time on the air and 2121 tunes for 42 per cent, or that a total of 2500 numbers filled 85 per cent of air time. BMI, he promised, will have many times 2500 tunes, both new and public domain, arranged and available for broadcasting before the end of 1940. In this connection he pointed out that both broadcaster and advertiser had been doing a preposterous thing in paying ASCAP for something which was free—i.e., public domain music—and that public domain tunes, not only the classics but the old favorites and the "heart" songs, would be made available in new arrangements.

All users of music, he declared, have been exploited by ASCAP but the broadcaster is "forty times as big a sucker as any other" as the broadcaster has been paying forty times more per dollar of gross revenue than any other ASCAP licensee.

Broadcasters are chiefly interested, he added, in promoting a free competitive situation in music performance via radio, as music on the air is the only material used by either broadcaster or advertiser subject to monopolistic control. The industry is seeking a "per use" basis of payment and believes that the sponsors of commercial programs not using ASCAP music should not be forced to pay for it.

"There isn't a person in this room," he said, "who pays 7½ per cent of his income for the privilege of using a product or service—yet ASCAP is asking the networks to pay 7½ per cent of a program's revenue not only for the privilege of using its music but also for the privilege of not using it."

In outlining what the advertiser could do he mentioned four classifications of music appeal on which BMI could be of material assistance. They are (1) theme songs (2)
“Mood music” or that of background appeal (3) Music of Secondary Appeal and (4) Music of Primary Appeal.

Following his speech Mr. Kaye answered all questions to the satisfaction of everyone. The agency men were enthusiastic over the possibilities of BMI and expressed a desire to cooperate in every way feasible.

3. WE COULD MAKE SUCH BEAUTIFUL MUSIC
4. WHAT GOOD'S THE MOON?
5. HERE IN THE VELVET NIGHT
6. IN THE SILENCE OF THE DAWN

Carl Haverlin, BMI’s Station Relations Director, now making the rounds of the NAB district meetings, has received a wire from Frank King, of WMBR, President of the Florida Broadcasters Association, which says:

FLORIDA ASSOCIATION PASSED RESOLUTION UNANIMOUSLY APPROVING POLICIES PLAN AND ACTIVITY. COMMITMENTS INDICATE AT LEAST AN ADDITIONAL EIGHT BMI SUBSCRIBERS.

Mr. Haverlin reports that the Tenth and Twelfth Districts have also registered unanimous approval for BMI.

Here is the “proof of the pudding”. BMI subscribers have now had BMI music for several weeks. They have been putting it on the air, using it to build their programs. They have had experience of BMI service, become acquainted with the work of the organization as it is developing. Their approval means that BMI’s is marching along the right road, the road that leads to satisfactory practical results.

The effect of such approval is shown by Mr. King’s telegram—more BMI subscribers.

Recently the publicity agent for the Robbin-Feist-Miller group of music publishing houses issued a release in which Jack Robbins suggested ways and means that the publishers might find useful in combatting what he called radio’s “Blitzkrieg on American composers and publishers.” Aside from the fact that it is a bit of unappetizing smugness for an ASCAP publisher to adopt the pretense of concern over the welfare of the American composer, Mr. Robbins’ proposals had at least one other aspect that was ironical.

“Robbins’ second channel of exploitation”—so runs the publicity release—“will be the automatic music machines, whose numbers are estimated to now total over 400,000 around the country.”

“Exploitation” is the right word beyond question. It is the old familiar ASCAP technique of trying to make the victim tie himself to the whipping-post.

By a clause in the 1909 Copyright Act, coin-operated phonographs were specifically exempted from paying fees for the performance of copyright music unless admission is charged to the place in which they are played. ASCAP, of course, has always gone green around the gills at mention of this provision in the law, has tried to circumvent it—unsuccessfully, and is now trying to have it repealed.

ASCAP officials, in a statement to the Congressional committee on the proposed revision of the copyright law, said that under the new law they expected to collect a “nominal fee” of $60.00 a year from the coin machines. Since it is reliably estimated that the net earnings of the machines average between $10 and $15 a year, it is easy to understand why the coin-machine industry is heart and soul behind BMI.

Now an ASCAP publisher proposes to use this industry as a “channel of exploitation” through which to combat the effort to free all commercial users of music, coin-machines included, from the grip and the threat of the ASCAP monopoly power.

He proposes to use the machines to enable ASCAP to levy a confiscatory tax on the machines!

Referring to the government’s anti-trust moves against ASCAP, an ASCAP official was quoted last week as saying that “he was at a loss to understand why every country in the world excepting the United States did everything in its power to encourage the performing rights societies and foster native musical talent, whereas Federal government here was doing exactly the opposite.”

The point is worth answering. The answer lies in the difference between ASCAP and other performing rights societies. It emphasizes anew the basic errors in the whole ASCAP system.

According to the statement of Gene Buck, ASCAP’s President, made this past April, ASCAP’s composers and authors number 1,083.

According to E. C. Mills, Chairman of ASCAP’s Administrative Committee, in his article, What is ASCAP? the membership of ASCAP’s foreign affiliates brings the total up to about 45,000.

The foreign societies show this much larger membership, not because there are so many more composers in other countries, but because membership in the performing rights societies in those countries is not restricted. Any writer can become a member on application. The society then collects his fees for him on the basis of performance.

ASCAP will not even consider an application for mem-
bership until the applicant has already had five numbers published and then will accept or reject the application as its Board may choose. In event that the application is accepted, the new member must spend a year as a Non-Participating Member. Thereafter he will be allowed to share in the division of proceeds on the basis of ASCAP's curiously inequitable classification system.

In other words, every other performing rights society in the world admits all writers to membership; ASCAP is a small and exclusive club, a little closed shop.

In other societies distribution of fees for performance of music is based on performance. In ASCAP it is based on performance only in part, based also on seniority, favoritism, and the arbitrary decision of the ASCAP Board.

Other societies are controlled by their members. In many cases the by-laws provide that the society shall be dissolved at stated intervals, usually every seven years. On such dissolution the members can recover the rights to their music, reorganize the society, take any other steps that seem to them desirable.

ASCAP is governed by a Board of Directors which is self-perpetuating. Sigmund Romberg has written:

“The individual member has no voice in the management of ASCAP. Some of our biggest members, those who are not on the Board, complain bitterly against this self-perpetuating system—and justly so. It is un-American and against our traditions of liberty, freedom and equality.”

Performing rights societies in other countries are organized and operated to collect fees for the performance of music in behalf of the writers of that music—all writers.

ASCAP is organized to collect fees for some writers to the exclusion and detriment of others, acting in accordance with the wishes and interests of a group of twelve publishers and twelve writers.

Other societies are organized on a democratic basis, operated fairly. ASCAP is organized on the basis of an exclusive club, seeking to dominate the music market for the benefit of its members—and chiefly for the benefit of a small inner circle even among its own members.

The fight against ASCAP, on the part of the government as well as on the part of the broadcasters and other commercial users of music, is not a fight against a selfish monopolistic control in the hands of a few writers and publishers which does as much harm to all other writers as it does to those who play the music.

It is actually a fight for democracy.

**District Meetings**

**District 10**

The morning session of the District 10 meeting, held in St. Louis June 8, was taken up with a complete resume by President Neville Miller of NAB of the various activities of the Association. Labor, Legislation, FM and Television developments, Copyright, FCC Reports and a variety of other matters were covered. C. E. Arney, Jr., Assistant to the President of NAB, reported on the tentative plans for the Annual Convention to be held in San Francisco on August 4th to 7th.

Craig Lawrence, KRNT, Des Moines, who served as chairman of the Tenth District Sales Manager's Conference held Friday at the Chase Hotel reported to the meeting upon the happenings of that conference. He presented a resolution calling upon the Board of Directors of NAB to approve a survey and study of the effect of Daylight Savings Time upon the program and commercial phases of radio. This resolution was unanimously adopted by the membership meeting.

The St. Louis broadcasters were host to the entire delegation at a delightful luncheon in the Chase Club Room at which talented performers from various St. Louis stations put on an entertaining show.

The afternoon session was taken up with a complete report on the progress and accomplishments of Broadcast Music Inc. Carl Haverlin, Stations Relations Director of BMI, presented a most interesting and revealing series of charts depicting in graphic manner the present status of BMI and the support being given it by the industry. He also explained charts which show the music requirements of the industry and of individual operators and the extent to which BMI is now prepared to meet that problem and the plans and programs in the making that will enable the BMI organization to care for the full needs of broadcasters when the ASCAP contracts expire. His presentation made a distinct impression upon his listeners. A motion was unanimously passed expressing the complete confidence of 10th District broadcasters in BMI and Father W. A. Burk, WLW, long a leader of thought and action among midwest broadcasters, took the floor and announced his subscription to BMI, and other broadcasters followed suit.

The biennial election of a Director for the 10th District followed and John J. Gillin, Jr. (WOW-Omaha), was unanimously renamed for the two-year term.

Edgar Bill, WMBD, Peoria, Illinois, Chairman of the NAB Code Compliance Committee, outlined the need for united support on the part of the broadcasters of the Code. He pointed out that the public, including educational, religious, civil liberties and other groups, had been lavish in their endorsement of the Code and that it had raised the industry to a most favorable position. He asked for a better understanding on the part of broadcasters. His remarks were followed by lengthy discussion of a generally favorable character but no action was taken.

Following the afternoon session which lasted until after 5 p. m., the St. Louis broadcasters again played the role
of hosts at a delightful cocktail party and buffet supper.

Twenty-five of the thirty-three member stations of the National Association of Broadcasters were represented at the meeting:

L. A. Benson of WIL, St. Louis; Hale Bondurant, WHO, Des Moines, Iowa; Father W. A. Burk, S. J., of WEW, St. Louis; William B. Quarten, WMT, Cedar Rapids, Iowa; Beryl Leuttridge, WOC, Davenport, Iowa; Craig Lawrence, KRVN, Des Moines, Iowa; Mike Carmichael, KWK, St. Louis; Ken Church, KMOX, St. Louis; R. T. Convey, KWK, St. Louis; Bob Dohlich, KDKO, Sedalia, Mo.; Bill Durney, WIL, St. Louis; Ray Dady, KWK, St. Louis; Harold Fair, WHO, Des Moines, Iowa; Dean Fitzger, WDAF, Kansas City, Mo.; L. O. Fitzgibbon, WOC, Davenport, Iowa; Harold Fulton, WHO, Des Moines, Iowa; John J. Gillin, Jr., WHO, Omaha, Neb.; Luther Hill, KSO, Des Moines, Iowa; Oscar Hirsch, KFVS, Cape Girardeau, Mo.; Charles A. Kennedy, KVFV, Fort Dodge, Iowa; J. O. Malland, WHO, Des Moines, Iowa; Cy Rapp, KMA, Shenandoah, Iowa; William Reuss, WOW, Omaha, Neb.; Claude Rock, WIL, St. Louis, Mo.; R. H. Sawyer, KMA, Shenandoah, Iowa; Vernon H. "Bing" Smith, KOWH, Omaha, Neb.; C. L. Thomas, KFRI, Columbia, Mo.; "Woody" Woods, WHO, Des Moines, Iowa; E. C. Woodward, KFNE, Shenandoah, Iowa; John Bohm, KMOX, St. Louis; Merle S. Jones, KMOX, St. Louis; Arthur Casey, KMOX, St. Louis; J. Soulard Johnson, KMOX, St. Louis; Don Scarie, KOIL, Omaha, Neb.; KMMJ, Grand Island, Neb.; and KFAB, Lincoln, Neb. In addition Edgar Bill, Chairman of the NAB Code Compliance Committee and President of WMBD, Peoria, Illinois, and Genor Bath, Public Relations Director of KMBD; Morris Blink of Standard Radio were in attendance.

The Sales Managers of NAB stations in the 10th District, embracing stations in Iowa, Missouri and Nebraska, held a most interesting session at the Hotel Chase in St. Louis on Friday, June 7. Recommendations respecting some of the subjects discussed were adopted by the Sales Managers for consideration by the members of the Tenth District who convene for a general business session and the election of a Director at the Hotel Chase on Saturday the 8th. Those in attendance at the Sales Managers meeting were:

John W. Bohm, KMOX, St. Louis; L. O. Fitzgibbon, WOC, Davenport, Iowa; Mike Carmichael, KWK, St. Louis; John J. Gillen, WOW, Omaha, Nebraska. Director of the 10th District; Ray Dady, KWK, St. Louis; Chas. A. Kennedy, KVFV, Fort Dodge, Iowa; Bill Durney, WIL, St. Louis; Wm. B. Quarten, WMT, Cedar Rapids, Iowa; Claude C. Rock, WIL, St. Louis; J. "Cy" Rapp, Shenandoah, Iowa; Don Scarie, KOIL, KFAB-KMMJ, Omaha, Lincoln and Grand Island, Nebraska; Bob Convey, KWK, St. Louis; Harold Fulton and Hale Bondurant of WHO, Des Moines, Iowa, and Craig Lawrence of KSO-KRVN, Des Moines, who presided over the session. C. E. Arney, Jr., Assistant to President Neville Miller, represented the headquarters staff at the session.

**District 12**

The broadcasters of Kansas and Oklahoma, comprising the Twelfth District of the National Association of Broadcasters, met in the Farmers and Bankers Life Building—home of Station KFBI in Wichita—on Sunday, June 9.

Nineteen of twenty-four NAB member stations were present at the Fourteenth District Meeting in Salt Lake City, June 12. The meeting passed unanimously a resolution endorsing BMI and praising its progress and accomplishments. Four stations—KVOD, Denver; KDYL, Salt Lake; KIDO, Boise, and KEUB, Price, Utah—signed BMI subscriptions in open meeting. Gene O'Fallon, KFEL, Denver, was unanimously re-elected director. Earl Glade, KSL, Salt Lake, member of the NAB Code Compliance Committee, made stirring appeal for united support on part of industry of Code provisions, especially those dealing with controversial issues. He pointed out that emergency situation placed heavy responsibility on broadcaster and extreme care was needed to further national interest. The meeting lasted all day and included lunch under auspices of sales managers with Walt Wagstaff, KDYL, in charge.

### Sales

**RETAILERS TO "TRY" RADIO**

The NAB Sales Managers' Division, in cooperation with the Bureau of Radio Advertising, is progressing...
rapidly with plans for NAB participation in the forthcoming NRDGA and AFA conventions.

The National Retail Dry Goods Association, which convenes at the Palmer House, Chicago, June 17-20, has asked the Bureau to put on another "Radio for Retailers" session. The meeting, scheduled for Wednesday morning, June 19, will take the form of a "mock trial by jury" on the question "Can Radio Help the Retailer Fortify the Forties?". A panel of six or more prominent broadcasters and retail executives will serve as combination jury and expert witnesses. NAB members are welcome at the discussion and a printed transcript will later be made available, similar to the "Radio Transcript" recently published by the NRDGA.

NAB Plans "Radio Night" at AFA Convention

Plans for NAB participation in the Advertising Federation of America convention, which meets at the Hotel Sherman, Chicago, June 23-27, include the usual Sales Managers' departmentals the mornings of June 24 and 25, and an elaborate Radio Cabaret entertainment the evening of June 25. All Chicago member stations and the networks are contributing talent and special acts, and the networks will also provide an orchestra for dancing in compliment to the AFA and its members.

William R. Cline, commercial manager of WLS, Chicago, and chairman of the NAB Sales Managers' Division, is in charge of general arrangements with Jules Herbeaux, NBC, as chairman of the Program Committee, and Oren Weaver, CBS, heading the Program Promotion Committee.

Stations to Salute AFA Members

The Bureau of Radio Advertising has suggested to all member stations that they arrange local "salute" broadcasts tying in with the AFA's 36th Annual Convention. The AFA is composed largely of local advertising clubs throughout the country and the theme of this year's meeting is "Advertising's Contribution to the American Way of Living".

The broadcasters will present one or more programs to honor advertising and advertising men and what they have done to reduce cost of goods, step up distribution, raise living standards and promote prosperity. Local AFA delegates and advertising club officials will be heard on the broadcasts, which will be scheduled the week immediately following the AFA convention.

The Bureau's letter points out the advantages of capitalizing on the national promotion, doing a double-barrel job of building good will among advertisers and listeners and providing an effective answer to the consumer movement as it affects the radio medium. Chicago stations and networks are already planning similar salute broadcasts to the AFA and its affiliated Chicago Federation of Advertising Clubs.

Promotion

RMA Convention

A new horizon for listening (circulation) was opened to broadcasters this week, in Chicago, at the 16th annual convention of the Radio Manufacturers Association and the Radio Parts National Trade Show. The horizon is to be extended with a new pocket size radio set weighing only twenty-six (26) ounces.

It is the brain child of Arthur T. Haugh, Glendale, Cal., a former president of the RMA and one of its founders. General use of the set which is expected to sell at ten dollars, retail, would add millions of hours of program listening per day.

On a broadcast over WENR and NBC-Blue Wednesday (June 12) night, Dr. O. H. Caldwell, former radio commissioner, and editor of "Radio Today," praised the radio industry campaign to increase listeners and listening. He concurred in NAB's contention that there are so many good things on the air that the listening level, both daytime and nighttime, will attain a new plateau if extra effort is made to induce the purchase of additional sets.

James S. Knowlson, president, Stewart-Warner Corporation, Chicago, was elected new president of RMA on Wednesday. Retiring president was A. S. Wells, president, Wells-Gardner & Company, Chicago.

Four vice presidents elected to office were: Paul V. Galvin, president, Galvin Manufacturing Corporation, (Motorola), Chicago; Roy Burlew, president, Ken-Rad Tube and Lamp Corporation, Owensboro, Ky.; H. E. Osmun, vice-president, Centralab, Milwaukee; and Donald MacGregor, general manager, The Webster Company, Chicago.

Leslie F. Muter, president, The Muter Company, Chicago, was re-elected treasurer.

PICNIC CLIMAX TO WWVA FESTIVAL

By proclamation of Mayor John J. Mathison, the City of Wheeling is celebrating Radio Festival, June 10-16.

Always on the alert to sell radio to the good townsfolk, WWVA is exerting greater effort in that direction during the special week set aside to honor radio in general and WWVA in particular.

In Wheeling store windows, special Board of Trade window cards are saluting the city's voice of the air. Open house is being observed at the WWVA studios and listeners may sit in on their favorite broadcasts.

To climax the big week a Jamboree picnic is to be held at Wheeling Park, the playground of the Ohio Valley with a ball game between the WWVA staff and entertainers as the big feature. The game will be broadcast as a demonstration of "Little WWVA," popular station mobile unit which will also pick up the various regular shows presented throughout the day at the park.

For Saturday night, June 15, Texas Bill Thomas, known the country over as master of ceremonies of the famous WWVA Jamboree, has arranged two bang-up performances for the Wheeling Municipal Auditorium. Sunday, June 16, there will be a special broadcast of the 200-voice Industrial Chorus from the amphitheater at Oglebay Park and the week will be brought to a grand

June 14, 1940—4333
climax with the Sunday afternoon coast-to-coast broadcast of Wheeling's own network show "It's Wheeling Steel," direct from the auditorium of Wheeling's Capitol Theater through WWVA.

WIBW AWARDS FESTIVAL CASH

Sixteen-year-old Lynn Pittaway, a junior in the Hodgeman County High School, Jetmore, Kansas, won the WIBW, Topeka essay contest.

Ben Ludy, station manager, awarded twenty-five dollars to the winner and the same amount to his school. The next fifty runners-up received one dollar each.

Lynn's essay will now compete for the NAB hundred dollar award.

2,500 PARTICIPATE IN FESTIVAL AT KQW

Over 50 quarter hour programs, featuring school orchestras and bands, glee clubs, choruses, discussion and forum groups and dramatic classes and more than 2,500 of San Jose's 10,000 school students took part in the National Radio Festival.

KQW's manager, C. L. McCarthy, said that the educational project was one of the most ambitious ever undertaken in radio.

For five consecutive Saturdays, May 4-June 1, the station turned its entire operation over to the San Jose school students from nine until noon.

WHBF PROMOTES CIRCULATION

WHBF, Rock Island, Ill., through Ivan Streed, production manager, reports: "We have been using auto radio and Radio Servicemen of America announcements for quite some time and will continue to do so."

INSURANCE COMMITTEE

Roger W. Clipp, WFIL, chairman of the NAB Insurance Committee, sends the following report on a June 5 meeting in New York:

Committee members present were: William I. Moore, WBNX; C. A. Wall, National Broadcasting Company; J. R. Poppele, WOR; C. R. Dean, Columbia Broadcasting System; and R. W. Clipp, WFIL, chairman. Also present were Benjamin W. Blakey, of Benedict and Benedict, Insurance, New York; and Brian B. Kane, Insurance Company of North America.

The Committee adopted the following plan for handling the insurance problems of broadcasters:

1. Determine the various types of insurance carried by the majority of broadcasters.
2. Outline the types of risks covered by insurance which is now available to broadcasters.
3. Get the insurance companies to standardize the insurance policies for broadcasters.

It will be necessary to prepare a detailed but simple questionnaire to send to the membership to gather information which will be used as a starting point. Having secured this, we will proceed on the other points outlined above. Regarding detailed data, the committee will work with the Edison Institute—the organization which functions for all of the public utilities on insurance matters.

This report which you will publish I think should serve the purpose of notifying the membership that the committee is in action and working on the insurance and that we will continue to pursue it as quickly as time will permit.

There is a great deal of information which we must collect before we can accomplish the most important point which is standardization of risks as it applies to broadcasting stations. We find that many broadcasters are almost totally unfamiliar with the fact that in the first place they are subject to many risks that they know nothing about, and that there exists types of insurance to cover most—if not all—of these risks. We also discovered that insurance companies on the other hand are not too familiar with the problems of broadcasters so there exists a good opportunity to do an educational job in all directions.

PORTER TO NATIONAL DEFENSE

Paul Porter was today appointed Executive Assistant to Mr. Chester C. Davis, member of the National Defense Advisory Commission responsible for accommodating national agricultural problems and policies to the defense program, particularly with respect to maintenance of the parity system of agricultural and industrial prices.

Mr. Porter, Washington Attorney for the Columbia Broadcasting System, has been granted a leave of absence to join Mr. Davis' staff. He was Executive Assistant to Mr. Davis when the latter was Administrator of the Agricultural Adjustment Administration.

Mr. Porter's responsibilities will involve close contact with various Government agencies such as—Office of the Secretary of Agriculture, the Surplus Commodities Corp., the Bureau of Agricultural Economics, the Agricultural Adjustment Administration, Reconstruction Finance Corp., and the Red Cross.

EDDIE CARTER, RUTH HILL

Station KVOS, Bellingham, Washington, would like to know the whereabouts of Eddie Carter and Ruth Hill.

STATE LEGISLATION

LOUISIANA:

H. 778 (Barranger) RACE TRACK INFORMATION—To repeal act 28 of the 1st Special Session of 1934 as amended by act 13 of the 2nd Special Session of 1934 relating to information pertaining to any race track.

836 STATIONS

During the month of May, 1940, the Federal Communications Commission issued operating licenses to four stations, and granted twelve permits for the construction
FLY DISCUSSES AMATEURS AND TELEVISION PROGRESS

Questioned at a press conference early this week, FCC Chairman James Lawrence Fly said that it is possible that something further may have to be done in connection with the amateurs and the present war situation.

He pointed out that he was pretty sure, for example, that the Commission would give serious attention to the question of the citizenship of applicants. While he was speaking particularly of amateurs, he inferred that this might be carried further. In an application the Commission simply asks “Are you a citizen?”, and heretofore the Commission has simply taken the applicant’s word for it. Now, however, he said the Commission wants proof of citizenship, not only for amateurs but for others as well. He said, for instance, that the Commission wants enough information to establish citizenship beyond any doubt and also as a means of quick reference.

Chairman Fly told the newsmen that he has recently conferred with a limited number of television companies and applicants with a view to assisting in research and programs. He said that he hasn’t had conferences with any of the television manufacturers with a view to reaching an agreement. In the first place, Mr. Fly said, the Commission is anxious to see stations get going and for the Commission to get those grants out and programs started. That is the Commission’s first order of business as regards television. He said that he will continue to confer on programs of experimental and coordinating nature. As this narrows down, he will get to the question of standards.

STATION LICENSES EXTENDED FOR TREATY REALLOCATIONS

In order to permit further studies of the frequency assignments to stations under the North American Regional Broadcast Agreement, the FCC today extended standard broadcast station licenses expiring August 1 for an additional two months, to October 1. The Commission will announce at a later date the procedure with respect to the licensing of facilities which will be available under the provisions of this agreement.

Today’s order applies to all standard broadcast stations, and automatically extends the expiration date of all licenses for which applications for renewals have been filed. Modified licenses to cover the new expiration date will not be issued.

Licensees who have not as yet submitted renewal applications are notified that in order to permit operation after August 1 applications for renewal, based on the present authorized facilities, must be filed. However, if an application for renewal covering the period beyond August 1 has been filed, it will not be necessary to re-file such application under the provisions of today’s order.

Licensees are required to post the Commission’s order attached to their licenses in accordance with the rules governing posting of licenses.

MINIMUM OPERATING SCHEDULES

The recent amendment to Section 3.71 of the FCC’s Rules covering minimum operating schedule (NAB Reports, June 7, 1940, p. 4315) is intended merely to clarify the meaning of that section. Some stations have been operating under a mistaken interpretation of the rule and find it burdensome to make the required change in operating schedule at once. NAB suggests that such stations request of the Commission an extension of time within which to comply.

EARLY MORNING BROADCAST SERVICE FOR RURAL AREAS

Early morning broadcast service to many rural sections now denied such service is invited by Federal Communications Commission action in authorizing daytime and limited-time standard broadcast stations to begin operation at 4 a.m., local standard time.

Many farmers and other dwellers in rural areas arise before sunrise and in the past have had to rely upon distant broadcast stations for program service. The new ruling, announced today, will permit local stations generally to start broadcasting earlier, thus furnishing farm communities with general news and vital information concerning local weather conditions and agricultural market reports at the beginning of the work day.

Although some interference may result from this new opportunity to broadcast between the hours of 4 a.m. and sunrise, the Commission believes that the overall effect of its order will be to benefit particularly those residents of farming areas who have heretofore not had such early local program service.

The new order of the Commission does not change any of the rules and regulations regarding standard broadcast operations which apply to the regular broadcast day, which is defined as that period of time between local sunrise and 12 midnight local standard time. Additional hours are granted during the experimental period which is defined in Section 3.10 of the Commission’s rules as

June 14, 1940—4335
that time between midnight and local sunrise; consequently, any interference which may result to standard broadcasting will be experienced chiefly during the "experimental period."

ORDER NO. 74

At a meeting of the Federal Communications Commission held in its offices at Washington, D. C., on the 7th day of June, 1940:

Pursuant to authority contained in Section 303 of the Communications Act of 1934, as amended, it is ORDERED That pending further Order of the Commission or amendment of the Rules and Regulations:

(a) the provisions of Sections 3.6, 3.8, 3.9, 3.23, 3.79 and 3.84 shall not prohibit the operation between four o'clock a.m., local standard time, and local sunrise, of standard broadcast stations licensed to operate during day time hours or limited time hours;

(b) nothing contained in outstanding instruments of authorization for such stations shall prohibit such operation:

(c) the period 4:00 a.m. to 6:00 a.m., local standard time, shall not be included in determining compliance with Sec. 3.71 (as amended June 4, 1940) of the Commission's Rules and Regulations.

This Order shall become effective immediately.

FEDERAL COMMUNICATIONS COMMISSION,
T. J. SLOWIE,
Secretary.

FROM THE FCC MAIL BAG

Recent events prompt the Federal Communications Commission to reiterate that, having no authority to censor radio programs, it can neither put anybody off the air nor on the air.

In the matter of broadcast time for candidates for public office, the Communications Act specifies: "If any licensee (station) shall permit any person who is a legally qualified candidate for public office to use a broadcasting station, he shall afford equal opportunities to all other such candidates for that office in the use of such broadcasting stations. . . ." and shall have "no power of censorship" over the material so broadcast. However, there is no requirement that the station must give such time in the first place, for Section 315 of the Act stipulates: "No obligation is hereby imposed upon any licensee to allow the use of its station by any such candidate."

(Federal Communications Commission held in its offices at Washington, D. C., on the 7th day of June, 1940: Pursuant to authority contained in Section 303 of the Communications Act of 1934, as amended, it is ORDERED That pending further Order of the Commission or amendment of the Rules and Regulations:

(a) the provisions of Sections 3.6, 3.8, 3.9, 3.23, 3.79 and 3.84 shall not prohibit the operation between four o'clock a.m., local standard time, and local sunrise, of standard broadcast stations licensed to operate during day time hours or limited time hours;

(b) nothing contained in outstanding instruments of authorization for such stations shall prohibit such operation;

(c) the period 4:00 a.m. to 6:00 a.m., local standard time, shall not be included in determining compliance with Sec. 3.71 (as amended June 4, 1940) of the Commission's Rules and Regulations.

This Order shall become effective immediately.

FEDERAL COMMUNICATIONS COMMISSION,
T. J. SLOWIE,
Secretary.

TIME SIGNAL BROADCASTING

Notice to All Broadcast Station Licensees:

Subject: Rebroadcast of Naval Observatory Time Signals.

(This supersedes Notice on same subject under date of February 9, 1940.)

Under date of February 9, 1940, the Commission announced that upon request any broadcast station showing compliance with the following conditions would be authorized to rebroadcast Naval Observatory Time Signals:

(1) Announcement of the time signal must be made without reference to any commercial activity;

(2) The signal to be rebroadcast must be obtained by direct reception from a Naval radio transmitter which is broadcasting the time signal;

(3) The Naval Observatory time signals are intended to be sufficiently accurate for astronomical and other scientific purposes. No time may, therefore, be announced as a Naval Observatory time signal if any time lag has been introduced.

In order to meet requirements (2) and (3), it is necessary that the Naval Observatory time signals be obtained by direct reception from a Naval radio station which is transmitting the time signal with relatively short circuits between the receiver and the broadcast transmitter. This required that stations which formerly obtained the time signals from the networks either discontinue the practice or make provisions for direct reception. A number of stations made such provisions; however, still others did not and, as a consequence, a large number of complaints have been received by both the Navy Department and the Commission in regard to the discontinuance of the rebroadcast of these time signals.

The original requirements were made in order that the accuracy of the time signals might be improved so as to be acceptable for normal scientific purposes. However, upon receipt of the complaints mentioned above, this question was restudied and it appears that the time signals as transmitted by the various broadcast stations whether obtained by direct reception or by means of telephone lines, either local or national networks, are

**Second-order time signals.** These are time signals for chronometer rating and scientific use, normally correct as broadcast to less than one-tenth of a second. The average error of the Washington time signals has been reduced to less than 0.02 of a second.

In the event of a failure or an error occurring in any of the time signals, except the re-broadcast of Washington time signals at San Francisco and Pearl Harbor, T. H., another time signal will be transmitted 1 hour later on the same frequency. San Francisco in the event of a failure or error occurring in the Washington time signal, will transmit a time signal from the clock at that point.

FCC WARNING

The FCC on June 8 issued a sharp warning to all United States ship radio operators and to station licensees, that superfluous, unnecessary, or unidentified communications from ship stations to other ships or to shore stations will not be tolerated and that violation in this respect will be vigorously prosecuted.

FEDERAL COMMUNICATIONS COMMISSION

FINAL ORDERS

FCC has announced adoption as final its Proposed Findings of Fact and Conclusions, as modified, granting the applications of Ben S. McGlashan, Los Angeles, Calif., for renewal of license of High Frequency Broadcast Station W6XKG, and granting renewal of license of High Frequency Broadcast Station W6XRE, in part, in so far as it requests authority to use the frequency 350,000 kilocycles, with power of 500 watts, and denied in so far as it requests authority to use the frequencies 42,300 kilocycles and 116,950 kilocycles. The authority granted for the operation of these stations is subject to the conditions that the applicant will supply satisfactory proof that he has a program of research and experimentation which is within the purview of Section 4.112 of the Commission’s Rules and Regulations, and that the authorizations issued are upon an experimental basis only and subject to change or cancellation by the Commission at any time, without advance notice or hearing.

FINDING OF FACT

Denial of the application for renewal of license for Station KRKO, located at Everett, Washington, operated by Lee E. Mudgett on 1370 kilocycles, with 50 watts power, sharing time with KEEN at Seattle, has been announced by the FCC.

The Commission in its Proposed Findings of Fact and Conclusions, held that “the licensee, in the conduct of business and the exercise of rights associated with the operation of Station KRKO, has been dominated and directed by various persons who have provided funds in substantial amounts for the original acquisition of the station in 1934 and for its subsequent maintenance and operation ... and the granting of the application for renewal of license for KRKO will not serve public interest, convenience or necessity.”

Action of the Commission with reference to the granting of applications for renewal of licenses of stations in

June 14, 1940—4337
the radio broadcast service is by the express provisions of the Communications Act limited to and governed by the same considerations and practice which affect the granting of original applications.

"Neither the letter nor the spirit of the licenses heretofore granted to Lee E. Mudgett for the operation of station KRKO has been observed," the Commission explained, and "inasmuch as he has not been free to exercise the rights conferred therein, or to accept the responsibility thereby delegated to him, without intervention of outside influences, the granting of the application for renewal of license will not serve public interest, convenience or necessity."

In addition to the application for renewal of license, the licensee applied for construction permit to move antenna site locally, install new equipment and vertical radiators, change operating assignment from 50 watts sharing equally with KEEN, Seattle, to 100 watts night, 250 watts until local sunset, with unlimited hours of operation, and to voluntarily assign the KRKO license to The Everett Broadcasting Company, Inc.

In view of the foregoing conclusions the applications for assignment of license and construction permit will be dismissed.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

No hearings or oral arguments are scheduled to be heard before the Commission in broadcast cases during the week beginning Monday, June 17.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KGX—Louis Wasmer, Olympia, Wash.—Granted consent to control of corporation KGX, Inc., from Louis Wasmer to Tom Ohern, involving 53 1/2% shares of outstanding capital stock of licensee corporation, for a consideration of $9,291. (Station operates on 1210 kc., 100 watts, unlimited except when station KITW is operating.) B2-TC-213.

KWJB—Sims Broadcasting Company, Globe, Ariz.—Granted consent to voluntary assignment of license from Sims Broadcasting Company (Bartley T. Sims, Manager) to Bartley T. Sims, d/b/a Sims Broadcasting Company. Station operates on 1210 kc., 250 watts, unlimited time (BS-P-2644).

KWJR—Sims Broadcasting Company, Globe, Ariz.—Granted renewal of license for the period ending August 1, 1940 (B5-R-840).

KTBG—Sims Broadcasting Assn., Inc., Austin, Tex.—Granted extension of present license upon a temporary basis only for the period ending August 1, 1940, subject to all of the terms and conditions of the order of revocation entered February 7, 1940, and subject further to final determination of the Commission on said order (B3-R-1007).

DESIGNATED FOR HEARING

North Jersey Broadcasting Co., Inc., Paterson, N. J.—Application for construction permit for new station to operate on 900 kc., 1 kw, daytime hours (B1-P-2624).

KRLC—W. E. Studlecker, Lewiston, Idaho.—Application for modification of license to change frequency from 1390 to 1370 kc., contingent upon application of KUJ.* (B5-ML-902).

KUJ—KUJ, Inc., Walla Walla, Wash.—Application for construction permit to move transmitter, exact site to be determined subject to Commission's approval; install new transmitting equipment and antenna; change frequency from 1370 to 1390 kc.; and increase power from 100 watts to 1 kw, contingent upon application of KRLC for modification of license (B5-P-2644).

KYOS—Merced Broadcasting Co., Merced, Calif.—Application for construction permit to install new transmitting equipment; make changes in ground system; change frequency from 1040 to 1390 kc.; increase power from 250 watts to 500 watts night, 1 kw, LS, and operating time from day only to unlimited (contingent upon the granting of KOY's application for change of frequency from 1390 kc. to 350 kc.)* (B5-P-2545).

* Hearing to be combined with two applications from Riverside, Calif., already designated.

MISCELLANEOUS

WLOF—Hazlewood, Inc., Orlando, Fla.—Granted modification of construction permit which authorized new station, for approval of antenna and transmitter site, change location of studio, and install new transmitter; tower to be painted and lighted in accordance with Sec. 3.45(d); upon the express condition that this grant shall not be construed as a finding by the Commission upon the application of Radio Corp. of Orlando requesting the same facilities, nor upon the application for license to operate Station WLOP when the construction of same has been completed, nor upon any of the issues involved therein, nor that the Commission has found that operation of this station is, or will be, in the public interest beyond the express terms hereof (B3-MP-971).

KTMS—News-Press Publishing Co., Santa Barbara, Calif.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-403).

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—Granted special temporary authority to operate from 9 a.m. to 11 a.m. and from 1 p.m. to 3 p.m., EST, on July 4, 1940, in order to broadcast holiday program (provided WOSU remains silent).

KFRU—KFRU, Inc., Columbus, Mo.—Granted special temporary authority to operate simultaneously with Station WGFB with power reduced to 250 watts from local sunset (June 7:30 p.m., CST) to the conclusion of special baseball games on June 14 and 21, 1940, in order to broadcast baseball games only.

WGFB—Evansville on the Air, Inc., Evansville, Ind.—Granted special temporary authority to operate as above except simultaneously with KFRU, in order to permit KFRU to broadcast baseball games.

KOAC—Oregon State Agricultural College, Corvallis, Ore.—Granted special temporary authority to operate from 9 a.m. to 1 p.m., and from 6 p.m. to 10 p.m., PST, for the period July 1, 1940, to not later than July 30, 1940 (instead of unlimited time as licensed) in order to observe the regular vacation period.

WFDJ—Flinn Broadcasting Co., Flint, Mich.—Granted petition to amend application for construction permit requesting change in frequency from 1310 to 880 kc., and power from 100 watts to 1 kw, unlimited time, to modify proposed directional antenna.

Oscar Kronenberg, Steubenville, Ohio—Granted petition to dismiss without prejudice application for new station to operate on 1310 kc., 250 watts, unlimited time.

WQXR—Interstate Broadcasting Co., Inc., New York, N. Y.—Granted modification of construction permit for new equipment, move of transmitter, and increase in power, for application of antenna and transmitter site, provided tower is marked in accordance with Sec. 3.45(d).

WARM—Union Broadcasting Co., Scranton, Pa.—Granted modification of construction permit authorizing new station, to install new type of transmitter (B2-MP-925).

4338—June 14, 1940
Arlington Broadcasting Corp., Arlington, Va.—Denied as in case of default the application for construction permit for new broadcast station at Arlington, Va., to operate on 1120 ke., 250 watts, 250 watts LS, unlimited time.

WGAR—WGAR Broadcasting Co., Cleveland, Ohio.—Granted special temporary authority to operate from 9:30 p.m. to 1 a.m. EST, the night of June 16, 1940, with power reduced to 250 watts, for the operation of station WGBF from 4:45 p.m. to 5:30 p.m., EST, on June 17, 1940, in order to broadcast a special baseball game.

KFRU—KFRU, Inc., Columbia, Mo.—Granted special temporary authority to operate simultaneously with Station WGBF with power reduced to 250 watts, from 9:30 p.m. to 10 p.m., CST, on June 27, 1940, in order to broadcast a special baseball game.

W2XOY—General Electric Co., Schenectady, N.Y.—Granted special temporary authority to relay through high frequency broadcast station W2XOY the frequency modulated programs of high frequency station W2XMN, for the period ending in no event later than July 1, 1940.

WHKU—United Broadcasting Co., Columbus, Ohio.—Denied special temporary authority to operate simultaneously with Station W2XOY the frequency modulated programs, described in application (File No. Bl-PVB-28) on channels 156 to 168 me., for the period ending in no event later than January 1, 1941.

KFRU—KFRU, Inc., Columbia, Mo.—Granted special temporary authority to operate in addition to WGBF with power reduced to 250 watts, from 9:30 p.m. to 10 p.m., CST, on June 27, 1940, in order to broadcast the Greater Cleveland Red Cross Program, designed to raise funds for European relief.

W2XOY—General Electric Co., Schenectady, N.Y.—Granted special temporary authority to relay through high frequency broadcast station W2XOY the frequency modulated programs of high frequency station W2XMN, for the period ending in no event later than July 1, 1940.

W2XOY—General Electric Co., Schenectady, N.Y.—Granted special temporary authority to relay through high frequency broadcast station W2XOY the frequency modulated programs of high frequency station W2XMN, for the period ending in no event later than July 1, 1940.

WKY—WKY Radiophone Co., Oklahoma City, Okla.—Modification of license to increase power from 250 watts to 500 watts.

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Extension of special experimental authorization to operate simultaneously with KFAB from sunset at Lincoln, Nebr., to midnight, period 8-1-40 to 2-1-41.

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.—Extension of special experimental authorization to operate simultaneously with WBBM from local sunset at Lincoln, Nebr., to midnight, CST, period beginning 8-1-40.

WWL—Loyola University, New Orleans, La.—Extension of special experimental authorization to operate simultaneously with WJZ on 750 ke., 1 kW night, 5 KW daytime, to 5 KW day and night.

WEAU—Central Broadcasting Co., Eau Claire, Wis.—Granted special temporary authority to operate from 8 p.m. to midnight, CST, on June 14, 1940, in order to broadcast the National Flag Day celebration being sponsored by the Elks Clubs of Eau Claire and Chippewa Falls.

W9XUI—University of Iowa, Iowa City, Iowa.—Modification of license to request change in frequencies from 42000-56000, 60000-86000 kc. to 50000-56000 kc. Amended: Form 318, requesting Class I station and change frequencies to 60000-66000 kc.

KAIZ—Woodmen of the World Life Insurance Society, Portable-Mobile.—License to cover construction permit (B4-PY-201) for a new relay broadcast station.

KQCB—Queen City Broadcasting Co., Inc., Portable-Mobile.—Construction permit to increase power from 12 to 40 watts and install new transmitter.

NEW—B. B. Shapiro, F. P. Shapiro and H. Shapiro, d/b as Leroy’s Jewelers, Los Angeles, Calif.—Construction permit for a new television broadcast station to be operated on 66000-72000 kc., power 1 KW, emission A3 and A5 for both visual and aural. Form 318, requests Class II television station.

NEW—Television Productions, Inc., Los Angeles, Calif.—Construction permit for a new television broadcast station to be operated on 66000-72000 kc., power 1000 watts for both visual and aural, emission A3 and A5 and special. Form 318, requests Class II television station.

KFAS—Midnight Sun Broadcasting Company, Portable-Mobile, area of Fairbanks, Alaska.—License to cover construction permit (B-PRE-344) for a new relay broadcast station.

NEW—Atlantic Coast Broadcasting Co., Portable-Mobile, area of Charleston, S. C.—Construction permit for new relay broadcast station to be operated on 31220, 35620, 37920, 39260 kc., 2 watts, A3 emission.

NEW—Don Lee Broadcasting System, San Francisco, Calif.—Construction permit for a new television broadcast station to be operated on 41000-50000 kc., 1000 watts for both visual and aural transmitters, emission A3, A5 and special. Amended to request frequencies 50000-56000 kc.

NEW—R. B. Eaton, Des Moines, Iowa.—Construction permit for a new television broadcast station to be operated on 41000-50000 kc., 100 watts for both visual and aural transmitters, emission A3 and A5. Form 318, requests Class II television station.

NEW—The Crosley Corp., Cincinnati, Ohio.—Construction permit for a new television broadcast station to be operated on 50000-56000 kc., power visual and aural 1000 watts, emission A3 and A5. Form 318, requests Class II television station.

W2XKT—National Broadcasting Co., Inc., Portable.—Modification of license to change frequency from 150000-162000 to 162000-168000 kc.

WIXG—General Television Corp., Boston, Mass.—Construction permit to install audio transmitter to use with video transmitter, 500 watts power, A3 emission. Amended re location of audio transmitter.

**FEDERAL TRADE COMMISSION ACTION**

**COMPLAINTS**

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

W. C. Allen Candy Company, Inc., 1028 East Burnside St., Portland, Ore., is alleged to distribute to dealers assortments of merchandise so arranged as to involve use of a lottery. One of them allegedly consists of various containers, candy and a suitcase, together with a punch board from which customers buy numbers at different prices. Recipients of certain specified numbers are entitled to receive boxes of candy and the buyer of the last punch on the board draws a suitcase, according to the complaint. It is alleged that a purchaser failing to punch one of the specified numbers receives nothing but the privilege of punching the board and that the prices thus are distributed wholly by lot or chance. (4156)
Continental Blade Corporation—See Lightfoot Schultz Co.

Economy Sales Company, Inc., 910 Bergen Ave., Jersey City, N. J., and Samuel Knight, alias Samuel Nitke, individually and as an officer of the corporate respondent, distributors of luggage, jewelry and other merchandise, allegedly distribute various lottery plans including a push card plan for use in connection with clubs and fraternal organizations in promoting the sale of the respondents' merchandise. It is alleged that the respondents also offer to conduct carnivals and dances for such organizations, awarding prizes to purchasers of tickets for these events who hold tickets containing certain specified numbers or to the purchaser of the last ticket in a book. (4150)

G & F Sales Company—Lilliam M. Granger, L. H. Murray, and Clara and Adolf Feitler, trading as G. & F. Sales Company, 35 South Franklin St., Chicago, are dealers in radios, watches and other merchandise. They are alleged to sell certain assortments, one of which contains several tins of peanuts and a radio, together with a punch board the numbers on which are effectively concealed and sold for 5 cents each. The person punching the number corresponding to that concealed under a seal on the board receives the radio, and persons punching certain other numbers receive for five cents a tin of peanuts worth more than that amount, wholly by lot or chance, according to the complaint. (4155)

Lightfoot Schultz Company, Continental Blade Corporation, and Lawrence Distributing Corporation, are charged, in a complaint, with unfair and deceptive acts and practices in commerce.

Lightfoot Schultz Company has its principal office at 663 Fifth Ave., New York, and a factory in Hoboken, N. J. The offices of Continental Blade Corporation are at 66 Court St., Brooklyn, and it has a factory at 315 Jay St., Brooklyn. Lawrence Distributing Company has its principal office and place of business at 315 Jay St., Brooklyn. All the respondents are wholly owned subsidiaries of the American Safety Razor Corporation.

The complaint points out that Lightfoot Schultz Company is engaged in the manufacture and sale of soaps and toilet preparations, the Continental Blade Corporation in the manufacture and sale of safety blades and also in the sale and distribution of soaps manufactured by Lightfoot Schultz Company. Lawrence Distributing Corporation is also engaged in the sale and distribution of soaps manufactured by Lightfoot Schultz Company.

For the purpose of inducing the purchase of the various products sold and distributed by them, the complaint charges, the respondents have been engaged in the practice of falsely representing the retail price at which their products are customarily sold. Typical of such representations are the respondents' representations with reference to resale prices of various soaps manufactured by Lightfoot Schultz Company. These products are customarily sold by the respondents to wholesalers and jobbers for resale to peddlers packed in cartons of three cakes of soap each. On each of these cartons is imprinted the legend "Combination Price 75c." By use of these words and figures, the complaint continues, the respondents represent that the cartons of soap have an actual retail value or selling price of 75 cents each, and the price marks serve as representations on the cartons in no sense represent the actual value or retail values of the soaps are the prices or actual retail selling prices of the products but are fictitious and greatly in excess of the actual prices.

In truth, the complaint alleges, the prices placed by the respondents on the cartons in no sense represent the actual value or retail selling price of the products but are fictitious and greatly in excess of the actual prices or the actual retail selling prices, and the soaps are sold by the respondents at from $2.60 to $3.30 per gross cakes, or at a price of from 5 to 6 cents per carton of three cakes of soap.

As a result of the respondents' representations, the complaint alleges, the purchasing public is led to believe that the actual retail values or usual retail selling prices of the soaps are the prices stamped or marked on the cartons, when in fact those prices are fictitious and greatly in excess of the actual values or the actual retail values of the soap. By this means, the complaint alleges, the respondents have placed in the hands of unscrupulous peddlers and canvassers a means and instrumentality whereby such peddlers and canvassers are enabled to mislead and deceive the purchasing public. (4148)

May's Cut Rate Drug Company—Complaints have been issued against drug companies in Clarksburg and Charleston, W. Va., and McKeesport, Pa., alleging false advertisement of a drug preparation the use of which under usual conditions or under conditions as prescribed in advertisements may be injurious to health. The respondents are May's Cut Rate Drug Company, 109 South Fourth St., Clarksburg, W. Va., May's Cut Rate Drug Company of Charleston, 911 Quarry St., Charleston, W. Va., and Pittsburgh Cut Rate Drug Company, 329 Fifth Ave., McKeesport, Pa.

According to the complaints, these respondents advertised as a competent and effective, non-harmless treatment for delayed menstruation, a preparation designated as "Genuine Mayco English Crown Female Capsules for Delayed Periods" and also as "Genuine Mayco English Crown Female Capsules," described further as either "Double Strength" or as "Triple Strength."

It is alleged that this preparation is not competent and effective as a treatment for delayed menstruation and that it is not safe or harmless in that it contains the drugs apoligren, ergotin, oil of sylvan and aloin in quantities sufficient to cause serious and irreparable injury to health if used under the conditions prescribed in the advertisements or under customary or usual conditions. The complaints further allege that the respondents' advertisements are false in that they fail to reveal that use of the preparation under such conditions may result in serious and irreparable injury to health.

Upon petition of the Federal Trade Commission, each of the respondents companies recently was restrained by a United States District Court from further advertisement of this preparation pending issuance and final disposition of the complaints now issued by the Commission. (4152-4153-4154)

Omega Electrolysis Institute—See Omega Manufacturing Co., Inc.

Omega Manufacturing Company, Inc., a corporation, trading as Omega Electrolysis Institute, and Milton L. Brownshield, individually and as an officer of the corporation, 516 Fifth Ave., New York, are charged, in a complaint with misrepresentation.

The complaints further allege that the respondents' advertisements involve insertion of a needle into the hair follicle for destroying the root of the hair by electrolysis, which process may cause serious injury to health. The complaint further alleges that the device will not accomplish the results claimed and is not safe, foolproof, painless, pleasant, quick, simple and easy to use and will have no ill effects upon the human body.

The complaint alleges that operation of the respondents' device involves insertion of a needle into the hair follicle for destroying the root of the hair by electrolysis, which process may cause serious injury to health. The complaint further alleges that the device will not accomplish the results claimed and is not safe, foolproof and painless when used by the unskilled lay public.

The respondents are further charged with disseminating false advertisements through their failure therein to reveal that use of the device under conditions prescribed in the advertisements, or under customary or usual conditions, may result in serious and irreparable injury to health.

Upon petition of the Commission, the United States District Court for the Southern District of New York recently issued an order restraining the respondents from further dissemination of false advertisements of their product pending issuance and final disposition of the Commission's complaint now issued. (4146)

Pittsburgh Cut Rate Drug Co.—See May's Cut Rate Drug Co.

Thomas Brothers—Chester E. Thomas, trading as Thomas Brothers, 20 N. E. Weidler St., Portland, Oreg., is alleged to distribute to wholesalers and jobbers for resale to peddlers packs of peanuts as to involve use of a lottery. One assortment allegedly is composed of a platter of paris toy and 30 bags of salted peanuts of uniform size, shape and quality, each bag containing a number tab. It is alleged that purchasers pay 1 to 5 cents a bag, according to the number drawn; that the buyer of the last package of peanuts receives the toy, and that the price of each bag is determined, and the toy is distributed, wholly by lot or chance. Another assortment, it is alleged, consists of a box of chocolates and several bars of candy of uniform size and shape, together with a push

June 14, 1940—4341
CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

Herb Juice-Penol Company, Inc., a corporation, trading as Pow-O-Lin Laboratories, Danville, Va., has been ordered to discontinue misrepresentations in the sale of "Pow-O-Lin," a medicament.

Commission findings are that in newspaper, circular and radio advertising, the respondent represented that "Pow-O-Lin" possesses beneficial therapeutic properties with respect to curing, remedying and competently treating constipation and "faulty elimination" characterized by and associated with symptoms such as biliousness, indigestion, gas pains, headaches, dizziness, pains in the back or chest, stiffness of the joints, swollen feet or ankles, nervousness, insomnia, loss of appetite, or lack of energy.

However, the findings continue, the respondent's preparation has no therapeutic properties in excess of those of a cathartic or laxative, and no purpose other than to assist in the temporary evacuation of the intestinal tract; the use of the respondent's preparation will not serve as a remedy or cure for or affect any tendency to constipation; the symptoms mentioned are not usually typical of any particular group of disorders and are not necessarily due to constipation, and the preparation has no beneficial value other than temporary in overcoming the specific symptoms when they are due to constipation, and no value in treating them when they are due to causes other than constipation.

The Commission order directs the respondent to cease disseminating these representations.

Hygienic Corporation of America and its subsidiaries, Hygienic Company of America and Merrill-Saunders Company, Ltd., all of 5256-58 South Hoover St., Los Angeles, have been ordered to discontinue misrepresentations in the sale of so-called feminine hygiene preparations and appliances.

Also named in the order as a respondent is Harold L. DeBar, of the same Los Angeles address, principal stockholder and director of activities of the corporate respondents, who also is in business under the names of Protex-U-Hygienic Service, American Bureau of Hygiene, and Surete Laboratories.

Commission findings are that the respondents misrepresented the efficacy of their products designated generally as "Protex-U" and "Surete," which consisted substantially of douche powder, ointment, jelly, syringe, applicator, and vaginal diaphragm, sold in sets and separately. It was also found that by misleading use of the fictitious names "American Health Association" and other false representations, the respondents sought to promote sales through women agents, who were designated as "Visiting Nurses" pledged to cooperate in the association's "cause" and in its "aims of more healthful living through public education."

Commission findings are further that the respondents' representations as regards their alleged public health activities were entirely false; that their business was solely commercial, neither their activities nor products having been sponsored or approved by any public health service, as had been implied in their advertising; that their saleswomen were not nurses qualified to advise women customers, and that, contrary to the respondents' representations, their products constituted neither competent preventive of conception nor remedies for women's ailments, nor were they effective prophylactics, or, through failure to reveal that its use is not wholly safe), that the respondents' appliance known as "Health Shield" (vaginal syringe) may be used without injurious effects.

The order also prohibits representations that the respondents are connected with a public health service; employment of the name "American Health Association" or "American Health Association of Washington, D. C." or other name of similar import to describe the respondents or their business; use of the words "Nurse" or "Visiting Nurse" or "Nurse Membership" or terms of similar import to designate the respondents' solicitors or saleswomen, or other representation that they are nurses.

Lady Esther, Ltd., Chicago, cosmetics distributor, has been ordered to discontinue certain misleading representations in advertising "Lady Esther Face Cream."

Commission findings are that the respondent corporation represented this preparation as being capable of penetrating into and below the skin, and of dissolving dirt and waste matter in the pores of the skin, when such were not the facts, and that the respondent made other representations of similar import. The principal effect of the respondent's cream, according to findings, is to cleanse the outer surface of the skin and the exterior openings of the pores. The respondent's cream, the findings continue, does not penetrate the skin, but may, to a limited extent, be temporarily absorbed by the skin and in this way may have a temporary lubricating effect.

The Commission order directs the respondent corporation to cease and desist from such representations concerning penetration of the skin by its preparation, and also to discontinue advertising that its cream will overcome, correct or cure a dry skin or do more in affecting a dry skin than furnish a temporary supply of lubrication; that this cream is as efficacious on an oily skin as on a dry skin, except that it will clean an oily skin at least to the same extent as a dry skin; that use of the cream will prevent or remove wrinkles or facial lines other than those caused by skin dryness, or will remove blackheads or any portion of blackheads except the superficial dirt on the outside surface thereof; that the cream is a solvent of or dissolves dust, soot, dirt, dead skin cells or the various forms of dirt and waste matter that soil the skin, and that the respondent guarantees its cream or the results represented as attainable by its use under the guise of a guarantee or in any other manner of such sort.

Merrill-Saunders Co., Ltd.—See Hygienic Corp. of America.

New York Diesel Institution, Inc., 47 Rector St., Newark, N. J., has been ordered to discontinue certain misleading representations in the sale of courses of study concerning Diesel engines and other trade subjects, conducted wholly or partly by correspondence.

Commission findings are that, contrary to actual accomplishment, the respondent represented that it would make employment available with good pay to students completing its courses, and that it advertised its offer of training as being made only to a limited number of students in any territory, and to persons having special qualifications or training, when in fact all students who could pay the price were accepted.

The respondent, according to findings, also represented that classes including shop training on Diesel engines and machinery to be installed in its buildings would be held in various cities other than Newark, N. J., under competent instructors, when in fact no such training was offered except at Newark.

The Commission further found that students of average ability who intelligently pursued the respondent's courses would need other training to qualify as Diesel engineers, expert operators or skilled workmen on Diesel engines.

Under the Commission order, the respondent is directed to cease and desist from its misleading representations.

The Commission dismissed its complaint in this proceeding as to Henry M. Kramrath, John L. Snider, Everett K. Pangburn,
STIPULATIONS

During the week the Commission has entered into the following stipulations:

**Raye Burns School of Cartooning**—Trading as Raye Burns School of Cartooning, Bernard Singerman, Cleveland, has entered into a stipulation to discontinue certain representations in the sale of his correspondence courses.

The respondent Singerman agrees to discontinue the use in his advertising matter of statements or representations, letters or reproductions of letters purportedly written by the editor or others associated with magazines or publications, the effect of which tends to convey the impression that such publications now buy thousands or any number of cartoons yearly from the Raye Burns School of Cartooning, which in fact such publications have not been in print for some time. The respondent also agrees to discontinue use of letters or reproductions of letters purportedly received by the respondent without solicitation on his part from persons associated with magazines, syndicates, schools, and the like, so as to imply that such publications or concerns habitually call upon the Raye Burns School of Cartooning for the cartoonists they need, or that the school enjoys a prestige in the matter of placing its students with such publications or concerns which it does not have.

Among other representations which the respondent agrees to discontinue are statements tending to convey the idea that anyone, whether talented or not, can achieve success as a cartoonist or readily find lucrative employment, or that students of the respondent's school are widely sought after by editors, publishers or others desiring to purchase cartoons. (2826)

**Enterprise Aluminum Company, Massillon, Ohio,** manufacturer of aluminum kitchen utensils, has entered into a stipulation to discontinue certain representations in the sale of its products. Under its stipulation, the respondent agrees to cease employing the word “Silverglo” or terms of similar import to describe its aluminum products and to discontinue using any like designation containing the word “Silver” with a tendency to create the impression that the durability or value of such articles is enhanced or affected by silver metal contained therein. Such products, the stipulation points out, are neither composed in part of nor finished or affected by silver metal contained therein. Such products, the stipulation points out, are neither composed in part of nor finished with silver, as implied by use of the trade designation “Silverglo.” (2828)

**Equitable Embroidery Company, Inc., 260 Fifth Ave., New York,** agrees to desist from use of the words “Madero Embroidery” or “Madero” as a brand, trade-mark or other sales designation of sheets, pillowcases or other merchandise sold by it; or from use of the word “Madero” or any other semblance of the word “Madero” or any other words of similar implication with reference to any other feature of its products; to discontinue employing the word “Manufacturers” as descriptive of its business, and to cease using any other words of similar implication the effect of which tends to convey the belief that it manufactures the products it sells or owns and operates a plant at Mayaguez, Puerto Rico, or elsewhere, in which its articles are made, when such are not the facts. (2830)

**Gimbels Brothers, Inc., New York,** has entered into a stipulation in which it agrees to cease and desist from certain representations in the sale of rugs.

In its stipulation, the respondent corporation agrees to discontinue use of the words “Oriental Reproduction,” “Oriental Replica,” “Copies of Real Orientals,” “Aristan Reproductions of Orientals,” “Imported Reproductions of Hand-Woven Orientals,” or other use of the words “Reproduction,” “Replica,” or “Copies” or other similar words to imply that the article referred to is a reproduction, replica or duplicate of an original, when such is not a fact, and to cease use of the phrase “American Oriental” or other appellation including the word “Oriental” or other expression indicative of an Oriental type, as descriptive of a rug which does not contain all the inherent properties, qualities and constructive features of a true Oriental rug.

The respondent also agrees to discontinue use of the word “Oriental” or other succinctly Oriental appellation in connection with goods which has in the complaint of bearings were not served upon them, their whereabouts having been unknown. (3785)

**Pow-O-Lin Laboratories—See Herb Juice-Penol Co., Inc.**

**John A. Hertel Company—Two firms engaged in the interstate sale of greeting cards have entered into stipulations to discontinue certain representations in the sale of such products.** The respondents are: Edith M. Schwer, Executrix of the Estate of Charles C. Schwer, Deceased, trading as Charles C. Schwer, 171 Elm St., Westfield, Mass., and John A. Hertel Company, 305 West Adams St., Chicago.

The respondents agree to cease advertising “Free Samples” to prospective salesmen of their products or making any other use of the word “Free” or similar expression in a manner purporting a gift or gratuity only, where any consideration such as payment of money, rendering of services, or otherwise, is required of the person receiving articles of merchandise sent in response to his request for such free samples or other gratuity.

The respondents also stipulate that they will cease delivering any invoiced article of merchandise to a customer or prospective customer without prior notice of the terms under which such article is to be sent and without first obtaining permission to make the shipment. The respondents also agree to cease inducing a customer to order samples or other goods by deceptively concealing the term or terms of any other way imposing a burden upon a customer or prospective customer either to pay for goods received by him or return them when he has not been previously apprised of such conditions. (2824 and 2825)

**McCollum Laboratories, Inc., 1734 South Main St., Gardena, Calif., has entered into a stipulation in which it agrees to discontinue certain representations in the sale of food supplements and medicinal preparations designated “Isodent,” “Isomar,” “Isove,” “Isolax,” “Kelp Tablets,” “Breakfast Granules,” “Affalaffa Tea and Tablets” and “Garlic-Parsley McCollum Tablets.” Among the representations which the respondent agrees to discontinue are: that any of these products supplies to the average customer more important nutritional factors, or that such factors are frequently missing in the average daily menu. **

The respondent further stipulates that it will cease advertising “Kelp Tablets” as being rich in vital minerals or such minerals as being necessary to body nutrition; “Breakfast Granules” as an aid in digestion; “Affalaffa Tea and Tablets” as aiding nature so providing a source of natural alkaline nutriment, as being a valuable internal supplement to creams or powders, or as increasing liquid secretion, and “Garlic-Parsley McCollum Tablets” as being capable of reducing high blood pressure. The respondent

June 14, 1940—4343
also agrees to cease representing that clinical investigation has shown that either garlic or parsley will cause a lowering of blood pressure, or relieve headaches, dizziness or similar symptoms resulting from functional high blood pressure. (02575)

Medical Tea Company of California, Inc., and Otto Wise, an individual trading as Medical Tea Company of California, 307 South Hill St., Los Angeles, in the sale of a medicinal herb tea known as “Cento Tea,” formerly designated “Aesculapius Tea,” agree to cease representing that such product of its particular formula has been used for centuries or any period of time greater than is a fact; that the preparation or any of its ingredients is valuable in treating gall, liver or kidney ailments or in preventing or dissolving kidney stones or gallstones; that the product is a competent and reliable agent for relief of symptoms associated with gall, liver or kidney ailments, or possesses healing or analgesic properties, and other similar representations. The respondents also agree to discontinue advertising that this preparation is not a laxative; that its ingredients are carried to the affected parts; that its every ingredient possesses therapeutic value, and that its hypericum content stimulates the appetite. (02576)

Old Dutch Mills, Inc., 80 Front St., New York, engaged in the roasting, blending, sale and distribution of coffee, has entered into a stipulation in which it agrees to discontinue certain practices in connection with the interstate sale of its product. The respondent stipulates that it will cease employing the words “Mocha and Java” in advertising matter, on containers or in salesmen’s presentations, as descriptive of its “Old Dutch” brand of coffee or other product of similar composition; and will discontinue featuring the words “Mocha” and “Java” in any way which has a tendency to convey the belief to purchasers that a blend of these coffees with other types of coffee is a pure blend of wholly “Mocha and Java” as such term is construed by the trade and consuming public.

Further practices which the respondent agrees to discontinue are the passing off of an inferior blend of coffee as “Mocha and Java” and the naming, in its sales promotional representations or on brands or otherwise, of the minor factors of a blended coffee without first naming also in equally conspicuous type the major factors, all in their order of predominance by bulk; for example, “Santos, Colombian, Mocha and Java.” (02577)

Armand S. Weill Co., Inc., 170 Franklin St., Buffalo, an advertising agency, in connection with its dissemination of advertisements for “Raz-Mah,” a drug, on behalf of Templetons, Inc., Buffalo, agrees to cease representing that “Raz-Mah” is sold by all druggists, and that by use of the preparation asthma sufferers will be almost instantly relieved from wheezy, difficult breathing; hay fever sufferers will get speedy relief from sneezing, itching and excessive watery secretions in the nose and eyes; coughs due to bronchial irritation will be quickly relieved, and bronchial irritations will be prevented from developing into asthma. (2829)

Woods Manufacturing Company, Ltd., Montreal, Canada, in the sale of sleeping bags manufactured at the Ogdensburg plant, agrees to cease use in advertising matter of the words “Eider” or “Arctic,” alone or in connection with the word “Down” as descriptive of the filler content of its products which are not in fact filled with down obtained from the eider duck, and to discontinue use of the words “Eider” or “Arctic” or other words of similar import in any manner tending to convey the impression that the filler of the products is composed of eiderdown, as such term is generally accepted to mean.

The respondent company also stipulates that in connection with the sale, advertising, describing or distributing of its products, it will discontinue employing any statement, pictures or symbols which may tend to convey the impression that the filler of such articles is composed of down obtained from wild or other water fowl, such as are referred to by the statement or represented by the pictures or symbols, when in fact such is not the case. (2827)

FTC CASE CLOSED

The Federal Trade Commission has closed without prejudice its case against Luzier’s, Inc., Kansas City, Mo., which had been charged with unfair representations in the sale of cosmetics. Closing of the case was ordered without prejudice to the Commission’s right to reopen it for further proceeding, should future facts so warrant.
THE WEEK IN WASHINGTON

FCC still "sitting on" Monopoly Committee report. Other matters presently occupying time. Early action expected. (p. 4353.)

FCC gives "green light" to television broadcasting to increase number of stations. Early action expected. (p. 4353.)

NAB to continue effort to secure redefinition of "executive" under Wage and Hour Administration. (p. 4347.)

BMI acquires six additional stations. ASCAP proposal exposed. (p. 4348.)

One hundred thousand radio operators licensed by FCC are required to prove citizenship. (p. 4354.)

Television Rules

Opening television broadcast channels to an increased number of stations in leading cities from coast to coast for the purpose of rendering the utmost in public service on an experimental basis, with adequate safeguard against monopolistic practices, is provided in the new rules and regulations governing television announced today by the Federal Communications Commission.

In conformity with this policy of encouragement to that industry, the Commission tentatively approved 23 applications for television stations in various sections of the country, and announced that it will consider 19 remaining applications and outstanding licenses in the immediate future.

Most of these stations will be permitted to furnish television programs to the public, and it is expected that when the industry has developed uniform transmission standards offering a satisfactory level of performance these standards will be adopted by the Commission as a basis for regular commercial television operation. Meanwhile, every television station licensee will undertake to carry on substantial research and experimentation on the different engineering problems and to assist in the development of television for widespread public service.

With the completion of the projected stations, this country will have far more television broadcast stations than any other nation of the world.

The complete list of applications which the Commis-
TELEVISION RULES
(Continued from page 4345)

All licenses will be on a basis of research and experimentation tending to promote the development of television and to assist the engineers of that industry to reach an agreement upon uniform transmission standards which will permit the early and general commercialization of television. Until accord is reached on this vital point, no charges—either direct or indirect—may be made for the transmission of any type of television program.

In order to put to the fullest possible public use the 18 regular channels (50,000-108,000 and 162,000-294,000 kilocycles) plus any 6,000 kilocycle band above 300,000 kilocycles (excluding 400,000-401,000 kilocycles), made available to television under Commission Order No. 67, the Commission will not, except for extraordinary cause, authorize any one television broadcast station to use more than one channel in the main seven channels constituting Group A (50,000-108,000 kilocycles).

At the same time, the Commission stipulates that no person, directly or indirectly, shall operate or control more than three public programming television stations in this important group of channels, or operate or control more than one such station in the same service area. This, however, does not apply to stations which do not transmit programs for public reception.

The three groups of high-frequency channels assigned to television are:

The 11 channels in Group B (Channels No. 8 to 18 inclusive) and the auxiliary channels in Group C may be assigned to television stations for supplementary purposes as television relay stations.

No mobile or portable television station for direct public service will be licensed at this time.
Announcement shall be made within 2 minutes of the hour and half hour.

4. In making the identification announcement, the call letters shall be given only on the channel of the station identified thereby.

(b) At the time station identification announcements are made, there shall be added the following:

“This is a special television broadcast made by authority of the Federal Communications Commission for experimental purposes.”

Sec. 4.76—Operating requirements.

(a) Each licensee of a television broadcast station shall diligently prosecute its program of research from the time its station is authorized.

(b) Each licensee of a television station will from time to time make such changes in its operations as may be directed by the Commission for the purpose of promoting experimentation and improvement in the art of television broadcasting.

Sec. 4.77—Frequency assignment.

(a) The following groups of channels are allocated for assignment to television broadcast stations licensed experimentally:

<table>
<thead>
<tr>
<th>GROUP A</th>
<th>GROUP B</th>
<th>GROUP C</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

(b) No television broadcast station will be authorized to use more than one channel in Group A except for good cause shown. Both aural and visual carriers with side bands for modulation are authorized but no emission shall result outside the authorized channel.

(c) No person (including all persons under common control) shall, directly or indirectly, own, operate or control more than three television stations on channels in Group A, and no such person shall, directly or indirectly, own, operate or control on channels in Group A more than one television station which would serve in whole or substantial part the same service area as another station operated or controlled by such person. This paragraph shall not apply to stations which do not transmit programs for public reception.

(d) Channels in Groups B and C may be assigned to television stations to serve auxiliary purposes such as television relay stations. No mobile or portable station will be licensed for the purpose of transmitting television programs to the public directly.

Sec. 4.78—Power.

The operating power of a television station shall be adequate for but not in excess of that necessary to carry forward the program of research and in no case in excess of the power specified in its license.

Sec. 4.79—Reports.

(a) A report shall be filed with each application for renewal of station license which shall include a statement of each of the following:

1. Number of hours operated.
2. Full data on research and experimentation conducted including the type of transmitting and studio equipment used and their mode of operation.
3. Data on expense of operation during the period covered.
4. Power employed, field intensity measurements and visual and aural observations and the types of instruments and receivers utilized to determine the service area of station and the efficiency of respective types of transmissions.
5. Estimated degree of public participation in reception, and the results of public observation as to the efficiency of types of transmission.
6. Conclusions, tentative and final.
7. Program for further developments in television broadcasting.
8. All developments and major changes in equipment.
9. Any other pertinent developments.

(b) Special or progress reports shall be submitted from time to time as the Commission shall direct.

Labor

A. F. OF M. CONVENTION

Every resolution directly affecting broadcasting was defeated or referred to the Executive Board at the American Federation of Musicians convention in Indianapolis, Ind., last week.

Outstanding among these were proposals to forbid union members to make records or transcriptions, and to “establish scales for network broadcasting commensurate with the extent of the networks.”

Oscar F. Hild was elected to the Executive Board to succeed James C. Petrillo who was elected president of the union.

WAGE AND HOUR ACT

The National Association of Broadcasters intends to appear at a Wage and Hour Administration hearing on proposals to redefine “executive.” A questionnaire is going out to all stations this week. One hundred per cent response is necessary. If any member does not receive the questionnaire within a few days, he should notify the NAB Labor Relations Department.

COST OF LIVING

The Labor Department reports that the cost of living for lower salaried workers in the larger cities remained practically unchanged during the three months ended March 15, 1940.

The only changes of as much as 1 per cent were reported from Portland, Ore., where it declined 1.1 per cent, and Boston, Mass., and Manchester, N. H., where increases of slightly over 1 per cent were noticed.
BMI Developments

Six more stations have signed subscription and license agreements with BMI, bringing the number of commercial stations who are BMI members to 300. The new stations are:

WBRY—Waterbury, Conn.
WGTC—Greenville, N. C.
WPRO—Providence, R. I.
KFAB—Lincoln, Neb.
KFOR—Lincoln, Neb.
KOIL—Omaha, Neb.

Two other important stations have also been added to the number of those committed to BMI, although their contracts have not yet been received.

Printed forms for new ASCAP license contracts were mailed to broadcasters on June 18th accompanied by a lengthy letter from John G. Paine, ASCAP's General Manager. The terms are essentially those contained in the proposals made in March.

The Paine letter does a fairly smooth job of camouflage. It is spotted with enough bouquets and creeping smilax so that the actual shape of the package wrapped up in it becomes apparent only on close inspection.

Example No. 1:

"And with very few exceptions, not a single individual station in the whole United States will be asked to pay us a larger percentage than they paid us in the past," says Mr. Paine.

Of course under the principle of clearance at the source, the individual stations do not pay directly to ASCAP for use of ASCAP music on network broadcasts. Equally as a matter of course, they would have to pay through the networks. Since the proposed terms would make the networks pay "through the nose," the individual stations which carry any network broadcasts are no better off than if ASCAP had slapped its huge increases onto the stations directly.

By his little quibble ASCAP's Paine dresses his bomb up to look at first glance somewhat like a box of candy. No broadcaster, however, is likely to be sufficiently naive to be taken in by the trick. The only real surprise is that Mr. Paine should have thought it worthwhile trying.

Example No. 2:

"We believe in the open door, and we offer every possible encouragement to budding talent. Our records show an impressive list of new members admitted each year," says Mr. Paine.

This cruel joke seems to please the ASCAP officials hugely. They repeat it often. They have recently made quite a splurge of prizes for music written in colleges. But as a matter of standard practice they encourage budding talent by putting every difficulty in the way of the unknown composer—especially (1) by refusing even to consider an application for membership until a writer has published five numbers without compensation for the performance of it, (2) by the practice of ASCAP publishing houses of refusing even to examine unsolicited manuscripts, (3) by their arbitrary system of distribution of the fees collected which works to the disadvantage of the younger writers, (4) by making it as difficult as they know how for the non-ASCAP composer to have his music played in public.

Their records do not show an impressive list of new members admitted each year when they are compared with those of performing rights societies in other countries where any writer may join by making application. Their records do not show an impressive list of new members even by comparison with BMI. After a quarter of a century ASCAP had only about 1000 writers; in two months BMI had about 40.

Example No. 3:

"Through personal contact with broadcasting stations and advertising agencies . . . we have found that the great majority realized that if there was no ASCAP they would have to create one themselves, at their own expense. Without such a clearing house they would have the problem of clearing rights, ownership, etc., etc.," says Mr. Paine.

If ASCAP were only a clearing house, the statement would be true. If ASCAP were like any other performing rights society in the world, the present situation would not exist.

Example No. 4:

"ASCAP . . . is merely a voluntary association of men and women who write and compose, and publish music. One hundred per cent of every dollar received belongs to them," says Mr. Paine.

All the publicity for the composers—"Justice for Genius"—but fifty per cent of the profit for the publishers.

While 100% belongs to the members, about 30% goes to various expenses, including the Paine. Of the balance a hundred-odd publishers get one-half; a thousand-odd writers get the other half.

Example No. 5:

"I believe, by the way, that it will interest you to know that the use of music is constantly increasing," says Mr. Paine.
It ought to interest Mr. Paine to know that so far as the radio is concerned, the use of music is decreasing. On NBC total time dropped from more than 67% in 1934 to less than 59% in 1938. On CBS programs devoted exclusively to music dropped from 31% in 1932 to 18% in 1939.

That, according to ASCAP arithmetic, calls for an increase of fees.

BMI FEATURE TUNES
June 17-July 1

1. DON'T THE MOON LOOK PRETTY?
2. PRACTICE MAKES PERFECT
3. WE COULD MAKE SUCH BEAUTIFUL MUSIC
4. WHAT GOOD'S THE MOON?
5. HERE IN THE VELVET NIGHT
6. IN THE SILENCE OF THE DAWN

M. E. Tompkins, BMI's General Manager, announces what he considers the strongest evidence yet given of the strength of the support which BMI is receiving from the broadcasting industry. On June 7th a call was issued for 15% of the license fee, to be payable on June 17th. By June 19th 80% of the total amount had been paid in to the bank. "To get 80% without a second call would have been a good record," said Mr. Tompkins. "To get it in two days is a really remarkable demonstration of the solidarity of the industry behind BMI."

Mr. Tompkins reports that he had letters from several stations expressing such enthusiasm over the work and the record of BMI and such confidence in its future that they offered to pay the full year's license fee at this time. That offer was declined with thanks, but the proof of approval was warmly welcomed. "The nature of this response to what BMI is doing," Mr. Tompkins concluded, "stimulates all of us at BMI to our utmost efforts in behalf of the various stations. This shoulder-to-shoulder work means great achievement for our common enterprise."

District Meetings

District 14

Supplementing the account contained in last week's REPORTS the meeting of the 14th District was one of the most enthusiastic yet held. The account of proceedings was given but following is a list of the registrants:

C. E. Arney, Jr., NAB; W. E. Wagstaff, KDYL; Jack Richards, KEUB; Frank Bishop, KFEL; Gene O'Fallon, KFEL; Frank E. Hurt, KFXD; Charles Howell, KFXJ; Rex Howell, KFXJ; Ed Yocum, KGHL; Jack Burnett, KGVO; A. J. Mosby, KGVO; C. G. Phillips, KIDO, Lloyd E. Yoder, KOA; Arch L. Madsen, KOVO; Clifton A. Tolboe, KOVO; K. O. MacPherson, KPFA-KGIR; Henry H. Fletcher, Ruthe A. Fletcher, KSEI; Earl J. Glade, E. J. Broman, W. E. Groves, Lemnox Murdoch, Eugene Pack, Iver Sharp, Glenn Shaw, Judus R. Tribe, Dan H. Vincent, KSL; Sherman T. Wright, KSUR; John E. Gardner, Mrs. John E. Gardner, KTFI; O. P. Soule, KTFI-KSEI; Reed Bullen, KVL; William D. Pyle, KYOD; H. L. McCracken, KVR; Carl Haverlin, BMI; Gerald King, Standard Radio; W. H. Beltz, RCA; S. S. Fox, KDYL; and Frank C. Carman, KUTA.

District 6

Sixth District broadcasters met at the Peabody Hotel in Memphis on Thursday, June 20. Joseph L. Miller, NAB Labor Relations Director, represented headquarters at this meeting.

District 2

The 2nd District will hold its convention at the Sagamore Hotel in Rochester on Saturday, June 22. District Director Wilder anticipates a full attendance.

Sales

"RADIO FOR RETAILERS" DISCUSSED AT NRDGA CONVENTION

The National Retail Dry Goods Association again considered radio advertising in an informal panel-type discussion, at its mid-summer convention which came to a close at the Palmer House, Chicago, June 19. The radio meeting was in the form of a "mock trial," with prominent retailers and radio station men sitting on opposite sides of a jury to discuss the problems of retail radio advertising. The discussion was arranged by Joseph Hanson, Manager, Sales Promotion Division, NRDGA, in cooperation with the NAB Bureau of Radio Advertising.

The subject for decision was: "Can Radio Help the Retailer Fortify for the Forties?" G. R. Schaeffer, Publicity Director, Marshall Field & Company, Chicago, served as judge and chairman for the meeting, with Samuel J. Henry, Jr., of the Bureau of Radio Advertising, acting as prosecutor and master of ceremonies. The jury of expert witnesses for radio and retailers were:

**RADIO**

Charles Caley, Commercial Manager
WMBD, Peoria, Ill. (Foreman)
Ford Billings, Commercial Manager
WOWO, Fort Wayne, Ind.
Edward V. Flanigan, Commercial Manager
WSBD, Toledo, Ohio.

**RETAILERS**

J. M. Ellis, Sales Promotion Manager
G. C. Murphy Stores, McKeesport, Pa. (Foreman)
Maurice Chait, Director of Publicity
P. A. Bergner & Company, Peoria, Ill.
Clarence Zeisel, Sales Promotion Manager
Zeisel Brothers, Elkhart, Ind.

June 21, 1940 — 4349
This was the second radio meeting at an NRDGA convention this year, demonstrating the increasing interest of retailers and department stores in the broadcast medium. A full transcript of the “trial,” covering both pro and con discussion and comments, will be made available to stores and NAB stations later on.

BROADCASTERS COMPLETE PLANS FOR AFA CABARET NIGHT

The Sales Managers’ Division of the National Association of Broadcasters, in cooperation with Chicago member stations and the networks has completed final plans for Broadcasters’ Cabaret Night, to be held Tuesday evening, June 25th, at the 36th Annual Convention of the Advertising Federation of America. The event will take place in the ballroom of the Hotel Sherman, Chicago, where the AFA meets June 23-27.

The following outlines the evening’s entertainment, together with committees in charge, under the active direction of William R. Cline, WLS, Chicago, who is national chairman of the NAB Sales Managers’ Division.

9:00 P. M.
BROADCASTERS' CABARET PARTY
GRAND BALLROOM—HOTEL SHERMAN
Tuesday, June 25, 1940

A gay evening of dancing and radio-stage entertainers furnished by the Columbia Broadcasting System, Mutual Broadcasting System, National Broadcasting Company and Radio Stations WBBM, WENR, WGN, WLS, and WMAQ, Chicago, in co-operation with the National Association of Broadcasters—Sales Managers’ Division.

CBS-WBBM
George Watson, Master of Ceremonies
Bill Bunt’s Sing Orchestra
The Swing Quartet
Dale Evans, Soloist

MUTUAL-WGN
The Three Graces
Tom, Dick and Harry
Bob Trennder, Pianist

NBC-WENR-WMAQ
Bob Brown, Master of Ceremonies
William (Elmer) Short
Escorts and Betty
Vagabonds, Novelty Quartet
Ransom Sherman
Don McNeil
Gerry Moore

STATION WLS
Jack Holden, Master of Ceremonies
Pat Buttram, Winston County Flash
WLS Rangers
Yodeling De Zurik Sisters
Hoosier Hot Shots
Ramblin’ Red Foley

Harry Kogen and his 20-piece radio-dance orchestra.
Dancing 9:00 p. m. to 1:00 a. m.
Furnished by CBS-MBS-NBC.

Compliments Hotel Sherman, Frank Bering, Mgr.
Mrs. Frank Bering (Joan Winters, popular radio actress) presents her famous educated horse, “PETER PAN,” equine star of the movies.

COMMITTEE ON ENTERTAINMENT:
Jules Herbeaux—NBC—WENR—WMAQ, Chairman
Stuart Dawson—CBS—WBBM
Frank Schreiber—MBS—WGN
Bradley R. Eidmann—WAAF
Harold Safford—WLS

COMMITTEE ON INVITATIONS AND RECEPTION:
J. Oren Weaver—CBS—WBBM, Chairman
Frank Schreiber—MBS—WGN
E. C. Carlson—NBC—WENR—WMAQ
Don E. Kelley—WLS
Arthur F. Harre—WAAF

SALES MANAGERS SESSIONS AT AFA

For the business sessions on radio advertising, the NAB Sales Managers’ Division plans a closed meeting Monday morning, June 24, when all sales managers present will meet with NAB and Bureau of Radio Advertising representatives to discuss current industry sales problems. Tuesday, June 25, the meeting will be open to AFA members as well, and questions and answer discussion will be in order, under the chairmanship of William R. Cline. The agenda includes:

The Proposed Unit Plan of Measuring Radio Advertising Volume
Radio’s Obligations to the Consumer
The Significance of BMI to the Radio Advertiser
The Commercial Section of the NAB Code—(Effective October 1, 1940)
What the Bureau of Radio Advertising Means to Advertisers
NAB Department Store Survey

RESULTS FROM RADIO

“Results from Radio,” Vol. 1, No. 7, has been released to all members by the Bureau of Radio Advertising.

The latest trade study is based on the “Cilco Town Crier” program, sponsored daily for five years over WMBD, Peoria, Illinois, by the Central Illinois Light Company. The account recently renewed its contract for the sixth consecutive year.

Member stations who have not ordered their supply of the Bureau’s success stories are requested to do so at once, using the order form which accompanies the No. 7 study.

Promotion

RADIO FESTIVAL

WGY—Schenectady

Schenectady’s Radio Festival Week begins Monday, June 24, and continues through the following Friday. During this period WGY will sponsor “A Get Acquainted Week.” The station will salute the boys and girls, young men and women of the school system and will extend hospitality to visitors.

Build-up for the week is to begin with a special program at 6:30 p. m., Saturday, June 22, with short talks by Mayor Mills TenEyck, Robert Pearc, of General Electric, and Colin Hager, station manager. The Mayor’s Radio Festival Proclamation has been distributed to all pupils in the schools. Air announcements invited listeners to visit the station.

WGY secured the cooperation of the radio set dealers and the servicemen. On special programs will be discussed the care of
radio sets. Leading set dealers will be interviewed by W. J. Purcell and Bernard Cruger. Next Saturday's feature is the "Get Acquainted with the Announcer" theme. Staff announcers will be present with names on lapel to exchange greetings, autographs, etc., with visitors. Overflow visitors are to be welcomed and entertained by the announcers in other studios.

**WCMJ—ASHLAND-HUNTINGTON**

Richard Westerkamp, program director, WCMJ, says that the Radio Festival Week was a huge success for the station and the tri-state area of Ashland, Huntington, and Ironton.

"We sincerely believe," he said, "that our audience is much more conscious of radio, its advantages and the necessity of preserving the democratic right of free speech. Our Festival Week was complete from Monday through Saturday with a special program on the air every night and spot announcements concerning radio service and free speech throughout each day.

"Visitors were invited to inspect our studios and there was a magnificent turnout, a continual stream each day. The Mayors of Ashland and Huntington proclaimed Radio Festival Week."

The opening Monday night featured "outstanding musical talent from the entire area, such as the Lion's Club Quartet. There were talks by the presidents of the Junior Chamber of Commerce of Ashland and of the Huntington Parent-Teachers Associations."

"Radio Station At Work" was on the Tuesday bill-of-fare while Wednesday night had two special programs of an educational nature in connection with the Festival. One was a remote broadcast from the postoffice steps welcoming the Louisville Board of Trade and the other a concert by the Ashland High School Band.

The Thursday night Festival feature was for women only—a style show from Chesapeake, Ohio. Friday night was turned over to the various program services. Saturday's Festival program found the youngsters participating in the weekly "Kiddies Party" which, for the occasion, was extended to an hour.

**WOPI—BRISTOL**

W. A. Wilson, president of WOPI, can always be found pitching for a sound radio promotion. He's in there pitching this time for Radio Festival. Exactly what he's doing, we'll find out during his next visit to headquarters. Luck to you, Mr. Wilson.

**WBT—CHARLOTTE**

"We feel that the week of June 3-8 promoted considerable good will for radio in this community."—William Winter, publicity director, WBT.

Because of early final examinations school authorities suggested that WSOC and WBT delay the essay contest until fall "which we agreed to do."

Both Charlotte radio stations took turns in delivering talks on the "ABC of Radio" before a number of clubs in the city. At the conclusion of each talk, a demonstration was presented showing how electrical transcriptions were made. Portable recording equipment was used and various members of the audience talked into the microphone. On several occasions some of the members led the rest in singing "God Bless America." The recordings were made on 78 r.p.m. discs and the discs were presented to the club.

**WMAQ—CHICAGO**

WMAQ marshalled the students of seventeen Chicago high schools into participation in Radio Festival. Hundreds of essays were entered in the essay contest. A committee selected 17-year-old Harry O'Brien, a senior at Fenger High School, and Eleanor Gaworski, also 17, a senior at Lindblom High School, as essay winners.

The station presented each of the seventeen schools with a portable radio set and the two winners were given substantial checks which they were to use this summer to pay for attending our Festival Week summer school. Mr. O'Brien and Miss Gaworski were presented with their checks during the WMAQ high school studio party, Saturday, June 15, by Judith Waller, educational director, NBC central division. On Saturday, June 22, they are to appear on Club Malinee over the Blue Network.

**WHIO—DAYTON**

"We have received many favorable comments on our Radio Festival programs and announcements. . . . J. M. LeGate, general manager, WHIO.

WHIO's Festival ran from June 2 to 8. The air program was amply supported with 500 line copy insertions in "The Dayton Daily News;" and the radio column also carried the story.

On the 9:30-10:00 p.m. show were featured a WHIOchorus of fourteen girls from the Centerville High School, a fourteen year old Dayton high school boy as soloist, a combination of organ, vibraharp and celeste; songs of the Southland by Little Tom and songs of the West by Lew Wampler and his ridge runners.

Another interesting show was scheduled on June 2, 7:00 to 7:15 p.m. It featured patriotic American music. Four to five 1-minute announcements daily throughout Festival Week stressed the advantages of the American system of broadcasting.

**WSAZ—HUNTINGTON**

A full page in color in "The Herald-Advertiser," Sunday morning, June 16, was used by WSAZ as additional promotion to tell the one hundred thousand residents of the listening area of the highlights of the station's Radio Festival program.

Every night in the week there was a special 30-minute or an hour broadcast with an additional featured program on Monday and Wednesday afternoons. On the latter afternoons H. R. Pinckard delivered an address on "Freedom of Press and Radio." The opener was set for 1:30 p.m. on Monday "Behind the Mike at WSAZ." On this show there were interviews by staff members from the maintenance man to the station manager.

**WJTN—JAMESTOWN**

"We would like to take this opportunity to express our gratitude to the NAB for fostering National Radio Festival Week. We have received many definite indications that it has done a lot of good from a number of angles, and we're looking forward to a repeat performance next year." . . . Marshall B. Shantz, Jr., program director.

**WCAE—PITTSBURGH**

During Radio Festival Week at WCAE the management used the staff orchestra's various programs to project an understanding and appreciation of the American System of Broadcasting. Reports have it that this promotion with the background of music by "The Airmen" was well received throughout the service area. Thank you, Jim Murray, for keeping us posted.

**WFAA PROMOTES CIRCULATION WITH TWO MUSICAL SHOWS PER WEEK**

Every Tuesday and Thursday afternoon for the summer, 4:00-4:15 WFAA, Dallas, is on the air with a program designed to stimulate greater use of portable and auto radios.

These 15-minute shows feature Craig Barton, his orchestra and vocalist, Bert Dodson, and were arranged by Ralph W. Nimmons, program director. The show is labelled "Vacation Varieties."

Here's one of the word pictures introduced after pattering between two characters in the script:

"Ah don't let that happen to you neighbor. Get friend wife one of those handy little pack portables so she can strap it on her back like a papoose. Then, while she does the daily chores she can listen to the trials and tribulations occurring in the eventful story of her favorite radio serial . . . listen to her favorite crooner even with one eye on the clock. I smell a music cue coming up.
stations. For that reason we are mentioning the fact broken in a big way and it is logical to expect that indi¬

motion. copy complete this example of WHEC's newspaper pro¬

portable receivers one sees everywhere, from picnic grounds to

listeners! Summer cottages, resort hotels and increasing thousands
canoes I”

of cars are equipped with radios these days, not to mention the

robust periods of the whole year for radio I

an unusual phenomenon, is one of the healthiest and most

to old-fashioned opinion, is one of the healthiest and most

perseverance and admirable results.

One of his salvos is an illustrated full column in the

Rochester papers which bracketed the problem. Five
two-week outing . . . namely and to wit . . . take along a portable
or an automobile radio. No need to miss your favorite program . . .
the latest bulletins from the war zones . . . or whatever your
listening fancy may dictate. Now just for instance if you were
out in the wide open spaces right now without a radio you might
be able to hear the 'Woodpecker's Song' and while the little red¬
headed rascal can tap out a fair tempo on his own, he just ain't
got the rhythm of the Barton bounce. Craig, illustrate for the
folks what they'd be missing!"

WHEC USES FULL COLUMN ADS TO
PROMOTE AUTO AND PORTABLE
SET LISTENING

Gunnar O. Wiig, general manager, WHEC, continues to
make life interesting for listeners on the Rochester radio
front. He keeps on promotin' summertime listening with
admirable perseverance and admirable results.

One of his salvos is an illustrated full column in the
Rochester papers which bracketed the problem. Five
lines in the display head read: “They Sure DO Listen in
the Summer.”

Then came two paragraphs:

“ 'S Wonderful,” reads:

“ 'It's Downbeat Time alright ... but with a difference. For
even tho' the official unveiling is still a fortnight away, Craig begins
a new summer series of Vacation Varieties today. Brother Barton
and his boys will still be in there pitching with their stellar synco¬
pation . . . Bert Dodson will still be supplying sweet song stylings
... but in addition, there'll be a word or two . . . a warning or
two . . . on how you can get a little more out of that annual
two-week outing . . . namely and to wit . . . take along a portable
or automobile radio. No need to miss your favorite program . . .
the latest bulletins from the war zones . . . or whatever your
listening fancy may dictate. Now just for instance if you were
out in the wide open spaces right now without a radio you might
be able to hear the ‘Woodpecker’s Song’ and while the little red¬
headed rascal can tap out a fair tempo on his own, he just ain’t
got the rhythm of the Barton bounce. Craig, illustrate for the
folks what they’d be missing!”

NAB RESEARCH COMMITTEE MEETING

A meeting of the NAB Research Committee was held in the NAB Headquarters in Washington, Tuesday, June 18th. Mr. William J. Scripps, Chairman of the committee, presided over the meeting with H. M. Beville, Jr., NBC Research Manager, Dr. Frank N. Stanton, CBS Research Director, Theodore C. Streibert, Vice-President of Radio Station WOR, C. E. Arney, Jr., NAB Assistant to the President, Edward M. Kirby, NAB Director of Public Relations and Paul F. Peter, NAB Director of Research, in attendance.

The principal subjects discussed at the meeting were
Station Coverage Measurement Methods, Audience Measurement Methods, the Reporting of Radio Advertising Volume—Unit Measurement, the 1940 Census, Future Estimates of the Number and Distribution of Radio Sets, and Listening Habit Surveys.

The committee voted to hold its next meeting in Wash¬
ington, July 10, 1940.

STATE LEGISLATION

LOUISIANA:
S. 332 (Ott) RACING INFORMATION—Relating to the furn¬
ishing by telephone, telegraph and radio information on race
results.

MEMBERSHIP CAMPAIGN

Five of the ten releases planned for the two months' membership drive have been sent to non-member stations.

The 58 state and area chairmen as well as the District Directors are all functioning effectively. It is gratifying

to report that the first two weeks resulted in the acquisi¬
tion of fifteen new members as follows:

KCRC—Enid, Oklahoma
KIDO—Boise, Idaho
KRIC—Beaumont, Texas
WBNY—Buffalo, New York

4352 — June 21, 1940
Members are urged to make it their especial job to contact the operators of non-member stations and add their effort to secure affiliation with NAB. With the critical national situation now existing and rapidly developing on all fronts, the need for a united radio industry is greater than ever. Every broadcaster in the United States should be an active, militant member of NAB. Let’s all go to work and bring in the remaining stations.

CONVENTION

Plans for the Eighteenth Annual Convention to be held in San Francisco, August 4 to 7, inclusive, are shaping up splendidly. Howard Lane, Director for the 15th District, and other northern California broadcasters who will serve as hosts, are leaving no stones unturned in perfecting the finest possible arrangements.

All hotel reservations thus far received from member stations have been cared for. Lincoln Dellar, KSFO, San Francisco, and chairman of the Housing Committee, this week sent to all members an urgent request for immediate attention to their hotel requirements. He warns that after July 1, it will be “first come, first served” regardless of NAB membership. Members should, even though a bit doubtful about actually attending, make their hotel reservations. Requests for reservations should be sent direct to the St. Francis Hotel.

Arrangements to hold the banquet on Treasure Island, scene of the Golden Gate National Exposition, have been completed. Plans for the entertainment feature are developing in splendid fashion and a riotous performance is promised. It will be something entirely out of the ordinary.

Ralph Brunton, KJBS, San Francisco, who has served as entertainment chairman, has lined up a marvelous evening at the Fair. All registrants at the convention will be admitted as guests to the Folies Bergere, Billy Rose’s Aquacade, and the Cavalcade of America. These are the three outstanding Fair attractions.

In addition, the San Francisco Press Club, through Chairman Brunton, has invited news and special events broadcasters as their guests at a cocktail party in the Press Club rooms on Sunday evening.

These are just a few of the highlights. The program is shaping up nicely and all of those matters that are of primary concern to broadcasters will be given thoughtful and constructive attention.

The Commission

FCC ORDER AMENDED

FCC has announced that paragraph 4(d) of Administrative Order No. 2 has been amended by the addition of the following language:

“Applications for consent to assignment of licenses or for consent to transfer of control of licenses of relay broadcast stations, when the Commission has on a prior date consented to a like assignment or transfer of control of the licensee of the standard broadcast station with which the relay stations are affiliated.”

MONITORING STATION IN MASSACHUSETTS

House of Representatives this week passed S. 2611 authorizing the purchase of a site and the erection of a building in Massachusetts by the FCC for use as a radio monitoring station. Provision is made in the bill for expenditure of $30,000.

The bill which has already passed the Senate is as follows:

“That the Federal Communications Commission be, and it is hereby, authorized to purchase for the United States a suitable site in the State of Massachusetts, provided a suitable site now owned by the Government is not available for the purpose, and cause to be erected thereon, according to plans and specifications to be approved by it, a suitable building or buildings, for use as a radio-monitoring station or to modify or reconstruct existing buildings or facilities on such site for such purpose, and to provide the necessary associated antenna systems, roadways, power, water, and sanitary facilities, including the construction and installation of goniometric apparatus and including necessary outfits, apparatus, and equipment at a total cost of said site, buildings, and equipment of not to exceed $30,000.”

FLY TALKS ON MONOPOLY REPORT

It may be some days before the FCC takes action on the Monopoly Committee’s report made public last week, Chairman James Lawrence Fly of the Commission said at a press conference early this week.

Mr. Fly stated that he had not yet had time to read the report. He expected to leave Washington for a few days at which time he said he hoped to have an opportunity to go over the report.

Chairman Fly told the newsmen that the Commission has several other problems to get out of the way first, including the new FM regulations.

WARNING TO ALL COMMERCIAL RADIO OPERATORS

All classes of commercial radio operators were today formally warned by the Federal Communications Commission to heed the strict letter of the law and international regulations which specifically prohibit superfluous and unnecessary personal chatter by radio. The Commission served notice that it intends to enforce these provisions vigorously and that it will hold station licenses
as well as commercial operators strictly accountable for any violation.

This warning applies to radiotelephone and radio telegraph services both. It augments the Commission notice of June 10 which particularly cautioned ship operators and ship station licensees against transmission of superfluous, unnecessary or unidentified communications. The purpose of this notice is to emphasize the importance of strict compliance with the previous notice and at the same time to call attention specifically that the provisions of statute and treaty prohibiting the transmission of superfluous, unnecessary or unidentified communications apply to all commercial operators as well as those communicating from ship stations.

“The General Radio Regulations (Cairo Revision, 1938) annexed to the International Telecommunications Convention (Madrid, 1932), to which this Government is a party, and the Communications Act of 1934, specifically prohibit the transmission of superfluous, unnecessary or unidentified communications. The Commission intends to uphold vigorously these provisions of law and treaty and will hold all commercial radio operators and ship station licensees strictly accountable for any violations.”

CITIZENSHIP PROOF REQUIRED

Proof of the citizenship of about 100,000 radio operators licensed by the Federal Communications Commission is required under a Commission order announced today. This new requirement applies to amateur as well as commercial operators, and calls upon them to file such proof in the form of affidavits, fingerprints, and photographs before August 15 next.

The Commission, which licenses citizens only for all classes of radio authorizations, has heretofore depended upon the applicant’s own statement as to that fact. It will henceforth require evidence of citizenship on standard forms which the Commission is now sending out as a questionnaire.

The questionnaire, which present operators and future applicants must subscribe to under oath, demands proof of citizenship by birth or naturalization, and also elicits information as to the nationality of immediate relatives, time spent by operator or applicant outside of the United States, and service with this or foreign governments.

No exception to the filing of such evidence is prescribed. However, once the holder of a license has furnished satisfactory identification he will not have to file duplicate papers with subsequent license renewals unless his status as to citizenship undergoes change.

FEDERAL COMMUNICATIONS COMMISSION

FINDING OF FACT

The FCC has announced its Proposed Findings of Fact and Conclusions proposing to affirm the recommendations of Commissioner Payne to revoke the license of station KSAM, Sam Houston Broadcasting Association, Huntsville, Texas. The station’s operating assignment is 1500 kilocycles, 250 watts, daytime only.

The Commission’s conclusions in the proposed findings follow:

1. The respondents, H. G. Webster, Dr. C. N. Shaver and W. Bryan Shaver, co-partners doing business as the Sam Houston Broadcasting Association, in their original application for a construction permit to establish Radiobroadcast Station KSAM at Huntsville, Texas, and the evidence adduced at the hearing on such application, made false and misleading statements and failed to make full disclosure to this Commission of material facts concerning the financing, construction, ownership, management, operation and control of the proposed station. Such acts and conduct on the part of the respondents constitute basis for revocation of the license to operate Station KSAM under Section 312(a) of the Communications Act of 1934, as amended.

2. The respondents, without consent in writing of this Commission, transferred, assigned or otherwise disposed of rights theretofore granted to them by this Commission in the original construction permit and the license to operate Station KSAM to James G. Ulmer and Darrell E. Yates, to whom they had sold and transferred, respectively, a one-half and one-third interest in said station, and to one Harold Scott, to whom they transferred complete authority in the management, operation and control of said station in violation of Section 310(b) of the Communications Act of 1934, as amended, and the Rules and Regulations of the Commission.

3. Subsequent to the grant of the original application and issuance of the license to operate said station the respondents filed with this Commission various applications and reports which failed to disclose material facts concerning the ownership, operation and control of Station KSAM, and did therein make false and misleading statements and representations, which did in fact mislead this Commission concerning the real ownership, operation and control of said station, and also failed to file with the Commission certain contracts and other information affecting and concerning the financing, construction, ownership, operation and control of said station as required by, and in violation of, the Rules and Regulations of the Commission.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following oral arguments are scheduled to be heard before the Commission in broadcast cases during the week beginning Monday, June 24. They are subject to change.

Thursday, June 27

Oral Argument Before the Commission

Report No. B-102:
KTBC—State Capitol Broadcasting Assn., Inc., Austin, Tex.—In re: Revocation of Station License of KTBC.

Report No. B-103:
KNET—John Calvin Welch, William M. Keller and Bonner Frizzell, d/b as Palestine Broadcasting Assn., Palestine, Tex.—In re: Revocation of Station License of KNET.

Report No. B-104:
KRBA—Red Lands Broadcasting Assn. (Ben T. Wilson, Pres.), Lufkin, Tex.—In re: Revocation of Station License of KRBA.

FUTURE HEARINGS

During the past week the Commission has announced the following future oral arguments in broadcast cases. They are subject to change.
APPLICATIONS GRANTED

KFH—Radio Station KFH Co., Wichita, Kans.—Granted construction permit to increase night power from 1 kW to 5 kW and install directional antenna for night use; 1300 kc., 5 kW watts LS, unlimited time (B4-P-2462).

WMAN—George Satterlee, Mansfield, Ohio.—Granted consent to transfer of control of Richland, Inc., licensee of Station WMAN, to Monroe F. Rubin; station operates on 1570 kc., with 250 watts power daytime (B2-TC-226).

WNLC—Thames Broadcasting Corp., New London, Conn.—Granted construction permit to increase power to 250 watts during day and night and add new transmitter; station operates on 1500 kc., unlimited time (B5-ML-980).

KDB—Santa Barbara Broadcasters, Ltd., Santa Barbara, Calif.—Granted modification of license to increase night power from 100 watts to 250 watts; 1500 kc., 250 watts, unlimited time (B5-ML-980).

KFDA—C. S. Gooch, Amarillo, Tex.—Granted consent to transfer of control of Amarillo Broadcasting Corp. (Station KFDA) from C. S. Gooch to J. L. Nunn; station operates on 1500 kc., unlimited time (B2-ALRE-24).

W3XP—Philco Radio & Television Corp., Philadelphia, Pa.—Granted modification of license of television broadcast station W3XP to change frequency from 201000-210000 kc. to 231000-216000 kc., change in location to portable-mobile, and authority to use W3XE as a relay station in conjunction with W3XP; power 15 watts visual only (B2-ALRE-24).

WEKT—St. Petersburg Chamber of Commerce (area of St. Petersburg, Fla.), Portable-Mobile.—Granted consent to voluntary assignment of license of relay broadcast station WEKT from St. Petersburg Chamber of Commerce to the City of St. Petersburg, Fla.; station operates on 35280, 35020, 37620, 39820 kc., 2 watts power (B3-ALRE-24).

The Western Broadcasting Company of Wyoming, Cheyenne, Wyo.—Granted construction permit for a new station to operate on 1370 kc., 250 watts, unlimited time. Exact transmitter site and type of antenna to be determined subject to Commission approval (B5-P-2311).

DESIGNATED FOR HEARING

Ben J. Sallows, Alliance, Nebr.—Application for construction permit for new station to operate on 1210 kc., 100 watts night, 250 watts LS, unlimited time, to be heard in conjunction with the applications of Paul R. Heitmeyer and Frontier Broadcasting Company for new stations in Cheyenne, Wyo.

MISCELLANEOUS

WHBU—Anderson Broadcasting Corp., Anderson, Ind.—Granted license to cover construction permit for installation of new transmitter and changes in antenna; frequency 1210 kc., 100 watts, 250 watts LS, unlimited time (B4-L-1159).

The Associated Broadcasters, Inc., Portable-Mobile (area of San Francisco, Calif.)—Granted construction permit for new relay broadcast station, frequencies 1622, 2058, 2150, 2790 kc., power 15 watts (B5-P-2311).

W3XMC—McNary and Chambers, Washington, D. C.—Granted license to cover construction permit for move of transmitter locally.

W2XWV—Allen B. DuMont Laboratories, Inc., New York, N. Y.—Granted special temporary authority to operate a 50-watt television transmitter on frequencies 6000-63000 kc., at 515 Madison Ave., New York City, for the purpose of conducting field tests, for a period not to exceed thirty days.

KGGF—Hugh J. Powell, Coffeyville, Kans.—Granted special temporary authority to remain silent from 8 to 9:15 p.m., CST, on July 7, 14, 21, and from 2 to 3 p.m., CST, on July 1, 2, 3, 8, 9, 10, 11, 15, 16, 17, 18, 22, 23, 24, and 25, 1940, in order to permit WNAD to broadcast special educational programs; to operate from 7:15 p.m. to 9:15 p.m., CST, on July 4 and 30, and from 8:15 p.m. to 9:15 p.m., CST, on July 31, 1940, in order to permit WNAD to observe the vacation periods at the University.

WNAD—University of Oklahoma, Norman, Okla.—Granted special temporary authority to operate during above periods (provided KGGF remains silent), in order to broadcast educational programs; to remain silent as above in order to observe the vacation periods at the University.

KWK—Thomas Patrick, Inc., St. Louis, Mo.—Granted motion for leave to file amendment to application for construction permit of station KWK requesting different facilities.

WHIP—Hammond-Calumet Broadcasting Corp., Hammond, Ind.—Granted motion for continuance of hearing from June 10, 1940, to an indefinite date, in re application for construction permit to change hours of operation.

KTBB—State Capitol Broadcasting Assn., Inc., Austin, Tex.—Scheduled for oral argument on June 27, 1940, in re proposed findings of fact on revocation of station license (B-102).

KNET—Palestine Broadcasting Assn., Palestine, Tex.—Scheduled for oral argument on June 27, 1940, in re proposed findings of fact on revocation of station license (B-104).

KRBA—Red Lands Broadcasting Assn., Luftkin, Tex.—Scheduled for oral argument on June 27, 1940, in re proposed findings of fact on revocation of station license (B-104).

WMOG—Coastal Broadcast Co., Brunswick, Ga.—Granted license to cover construction permit for new broadcast station, frequency 1500 kc., 100 watts, 250 watts LS, unlimited time (B3-L-1160).

WKEU—Radio Station WKEU, Griffin, Ga.—Granted modification of construction permit which authorized changes in antenna and hours of operation for extension of commencement date from June 4, 1940, to October 4, 1940, and completion date from December 4, 1940, to May 4, 1941; 1500 kc., 100 watts, unlimited time (B3-MP-989).

WAFK—A. Frank Katzenite (area of Miami Beach, Fla.), Portable-Mobile.—Granted modification of construction permit which authorized a new relay broadcast station, broadcast frequency from 1615, 2050, 2190, 2350 kc. to 1622, 2058, 2150, 2790 kc., and extend commencement date from June 11, 1940, to 30 days after date of grant.

WABJ—Pensacola Broadcasting Co., Pensacola, Fla.—Granted special temporary authority to operate ship station WFLT on 1622, 2058, 2150 and 2790 kc., on June 15 and 16, 1940, in order to broadcast the Annual Fishing Rodeo from the Gulf to radio station WCOA.

KTRB—Thomas R. McTammany and Wm. H. Bates, Jr., Modesto, Calif.—Granted special temporary authority to operate from 9 p.m., PST, to the conclusion of the Stanislaus County Hairdressers Association Hair Style Show on June 20, 1940, in order to broadcast the show only.

WPIC—Sharon Herald Broadcasting Co., Sharon, Pa.—Granted special temporary authority to operate from local sunset (June 8 p.m., EST) to midnight, EST, on June 19, 1940, in order to broadcast a special Red Cross subscription drive.

WORL—Broadcasting Service Organization, Inc., Boston, Mass.—Granted special temporary authority to operate from 10 p.m. to 11 p.m., EST, on June 16, 1940, in order to...

1120 Kilocycles
KFSG—Echo Park Evangelistic Asen., Los Angeles, Calif.—Authority to determine operating power by direct measurement of antenna power.

1140 Kilocycles
KVOO—Southwestern Sales Corp., Tulsa, Okla.—Extension of special experimental authority to operate unlimited time, using directional antenna night, period beginning 8-1-40.

1200 Kilocycles
KHAS—The Nebraska Broadcasting Co., Hastings, Nebr.—Modification of construction permit (File No. B4-P-2367) as modified for a new broadcast station, requesting extension of completion date from 7-14-40 to 10-1-40.
WWEA—Hammond-Calumet Broadcasting Corp., Hammond, Ind.—Voluntary assignment of license from Hammond-Calumet Broadcasting Corp. to O. E. Richardson and Fred L. Adair.
WLOG—Clarence H. Frey and Robert O. Greer, Logan, W. Va.—Authority to determine operating power by direct measurement of antenna power.
WLOG—Clarence H. Frey and Robert O. Greer, Logan, W. Va.—License to cover construction permit (B2-P-2340) as modified for a new broadcast station.
KFXX—Frank E. Hurt, Nampa, Idaho.—Construction permit to change frequency from 1200 to 900 kc.; increase power from 250 watts to 1 KW; equipment changes; move transmitter; install new antenna, and request Class II station. Amended to give transmitter site and specify type of antenna.
WSAM—Saginaw Broadcasting Co., Saginaw, Mich.—License to cover construction permit (B2-P-794) as modified for a new broadcast station.
WSAM—Saginaw Broadcasting Co., Saginaw, Mich.—License to determine operating power by direct measurement of antenna power.
WPID—Petersburg Newspaper Corp., Petersburg, Va.—License to cover construction permit (B2-P-1475) as modified for a new broadcast station.
WPID—Petersburg Newspaper Corp., Petersburg, Va.—Authority to determine operating power by direct measurement of antenna power.
WSOC—Radio Station WSOC, Inc., Charlotte, N. C.—Construction permit to install new antenna, move studio and transmitter, and increase power from 100 watts night, 250 watts day, to 250 watts day and night.

1220 Kilocycles
KWSC—State College of Washington, Pullman, Wash.—Authority to install automatic frequency control apparatus.

1260 Kilocycles
WNBNX—Twin State Broadcasting Corp., Keene, N. H.—Modification of construction permit (B1-P-2415) for changes in directional antenna, using both day and night, and move of transmitter and studio, requesting extension of completion date from 6-10-40 to 9-10-40.

1270 Kilocycles
NEW—Cuyahoga Valley Broadcasting Co., Cleveland, Ohio.—Construction permit for a new broadcast station to be operated on 1270 kc., 1 KW, daytime. Amended to request 1000 kc., antenna changes, and to specify transmitter and studio sites.

1310 Kilocycles
WPDF—Flint Broadcasting Co., Flint, Mich.—Construction permit to install new transmitter; install directional antenna for night use, increase power from 100 watts to 1 KW; and change frequency from 1310 to 880 kc., and move transmitter. Amended: Changes in directional antenna for day and night use.
WNYR—Radio Corporation of Annapolis, Annapolis, Md.—Construction permit for a new broadcast station to be operated on 1310 kc., 100 watts, unlimited time, Class IV station. Amended to antenna site and specify transmitter site.
WSGN—The Birmingham News Co., Birmingham, Ala.—License to cover construction permit (B3-P-2558) to install new antenna, increase power, and move transmitter.
WDAK—L. J. Duncan, Leila A. Duncan, Josephine A. Keith, Effie H. Allen, Aubrey Gay, d/b as Valley Broadcasting Co., West Point, Ga.—Modification of construction permit (B3-P-2442) for a new station, requesting approval of transmitter and studio sites at General Tyler Hotel, West Point, Ga., approval of antenna, and install new transmitter.

1370 Kilocycles
WSLB—St. Lawrence Broadcasting Corp., Ozlenburg, N. Y.—Authority to determine operating power by direct measurement of antenna power.
WHKY—Catawba Valley Broadcasting Co., Inc., Hickory, N. C.—Authority to determine operating power by direct measurement of antenna power.
WSVS—Elmer S. Pierce, Principal, Seneca Vocational High School, Buffalo, N. Y.—Modification of construction permit (B1-P-2446) as modified for a new broadcast station to be operated on 1210 kc., 100 watts night, 250 watts day, unlimited time. Amended to omit name of H. L. McCracken from partnership and request 1570 kc., 250 watts, change type of equipment, and specify studio site.
WJHO—Yetta G. Samford, C. S. Shealy, Thos. D. Samford, Jr., J. H. Orr, d/b as Oplinka-Auburn Broadcasting Co., Opelika, Ala.—Authority to determine operating power by direct measurement of antenna power.
WJHO—Yetta G. Samford, C. S. Shealy, Thos. D. Samford, Jr., J. H. Orr, d/b as Oplinka-Auburn Broadcasting Co., Opelika, Ala.—License to cover construction permit (B3-P-2373) as modified for a new broadcast station.
WPRO—Voice of Longview, Longview, Tex.—Modification of construction permit (File No. B3-P-2117) as modified for change in frequency, increase power, unlimited time, move transmitter, new transmitting equipment, installation of directional antenna for night use, requesting extension of completion date from 6-19-40 to 7-19-40.

1390 Kilocycles
WHK—United Broadcasting Co., Cleveland, Ohio.—Extension of special experimental authority to transmit facsimile signals from 1 a. m. to local sunrise using 1 KW power, for period beginning 8-1-40.

1420 Kilocycles
NEW—Pan-American Broadcasting System, Inc., Hollywood, Fla.—Construction permit for a new broadcast station to be operated on 1420 kc., 250 watts, unlimited time. Amended to move location of transmitter (same address).
WKIP—Poughkeepsie Broadcasting Corp., Poughkeepsie, N. Y.—Authority to determine operating power by direct measurement of antenna power.
WKIP—Poughkeepsie Broadcasting Corp., Poughkeepsie, N. Y.—License to cover construction permit (B1-P-2446) as modified for a new broadcast station.

1500 Kilocycles
NEW—Robert V. Lee, Bradenton, Fla.—Construction permit for a new broadcast station to be operated on 1500 kc., 250 watts, unlimited time, Class IV station. Amended to change location of transmitter, and antenna changes.
NEW—Leonard L. Abess, Miami Beach, Fla.—Construction permit for a new broadcast station to be operated on 1500 kc., 250 watts, unlimited time. Requests facilities WKT, contingent on WKAT being granted change in frequency. Amended to give location of transmitter and studio and omit request for facilities of WKAT.
WGTW—J. J. White, tr. as Greenville Broadcasting Co., Greenville, N. C.—Authority to determine operating power by direct measurement of antenna power.
KVOE—The Voice of the Orange Empire, Inc., Ltd., Santa Ana, Calif.—Construction permit to increase power from 100 watts to 250 watts and install new equipment.
WGTW—J. J. White, tr. as Greenville Broadcasting Co., Greenville, N. C.—License to cover construction permit (B3-P-2053) as modified for a new broadcast station.

June 21, 1940 — 4357
1530 Kilocycles

WAKR—Summit Radio Corp., Akron, Ohio.—Modification of con-
struction permit (B2-PSB-14) for a new station, requesting
installation of new transmitter, changes in directional an-
tenna system, using day and night, move transmitter and
extend commencement date to 30 days after grant and com-
pletion date 60 days thereafter.

MISCELLANEOUS

WNBI—National Broadcasting Co., Inc., Bound Brook, N. J.—
Construction permit to change frequencies from 6100, 17780 kc,
to 6100, 11820, 21630 kc., power from 35 to 50 KW,
and make equipment changes.

WRC—National Broadcasting Co., Inc., Bound Brook, N. J.—
Construction permit to change frequencies from 9670, 21630 kc.
to 9760, 17780 kc., power from 35 to 50 KW, and make
equipment changes.

WTKK—WOAX, Inc. Portable-Mobile.—License to cover con-
struction permit (B1-PRY-193) for a new relay broadcast sta-

NEW—Columbia Broadcasting System, Inc., Brentwood, N. Y.—
Construction permit for a new international broadcast sta-
tion to be operated on 50000 watts, 6060, 9500, 21320 kc.
sharing with station WCBX, 11820, 17830 kc. sharing with
station WCBX, 15270 kc. sharing with stations WCBX,
WCX and WLOO, A3 emission.

WCBX—Columbia Broadcasting System, Inc., Brentwood, N. Y.—
Construction permit to increase power from 10 to 50 KW,
install new transmitter, and move transmitter from 5 mile
from Wayne, N. J., to Brentwood, N. Y.

WNBI—National Broadcasting Co., Inc., Bound Brook, N. J.—
Modification of license to add the frequency 11820 kc. to
those already assigned, i.e., 6100 and 17780 kc., and make
equipment changes.

—License to cover construction permit (B1-PHY-78) as
modified for new high frequency broadcast station.

W6XO—Don Lee Broadcasting System, Hollywood, Calif.—
Modification of construction permit (B5-PSB-18) as modi-
fied, requesting change in frequency from 41000-50000 to
50000-50000 kc., and extend commencement and completion
dates from 3-31-40 and 9-30-40 to 60 days after grant and
180 days thereafter.

First Baptist Church, Pontiac, Mich.—Extension of authority to
transmit programs from First Baptist Church at Pontiac,
Mich., to Radio Station CKLW, Windsor, Ontario, Canada,
for period beginning 8-13-40.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competi-
tion in complaints issued against the following firms. The
respondents will be given an opportunity to show cause
why cease and desist orders should not be issued against

American Medicinal Products, Inc.—Misrepresentation in the
sale of a drug preparation recommended for weight reducing, is
alleged in a complaint issued against American Medicinal Products,
Inc., 6630 Santa Monica Boulevard, Los Angeles. The complaint
also names as a respondent Ernest G. Runup, trading under the
names Scientific Laboratories of America and California Sun-
shine Products, Inc., and as an officer of American Medicinal
Products.

It is alleged that in newspaper, periodical and circular advertis-
ing matter the respondents advertised their product “Re-Duce-
Oids” as a cure, remedy, and safe, competent and effective treat-
ment for obesity, when such is not a fact. The complaint alleges
that the product is composed principally of desiccated thyroid,
white pituitary substance, ovarian substance, potassium iodide,
and phenolphthalein; that preparations containing thyroid have
been used to treat certain types of obesity due to endocrine dis-
function, but that, when so used, the patient must be constantly
under specialized medical supervision to avoid serious injury to
health.

The complaint further charges that the respondents disseminated
false advertisements through failure to reveal to purchasers that
use of “Re-Duce-Oids” under conditions prescribed in the ad-
vertisements or under customary or usual conditions may result
in serious injury to health in that the preparation contains the
dangerous drug thyroid. Continued ingestion of thyroid, according
to the complaint, accelerates the rate of metabolism, thereby burn-
ing the body tissues, especially fat tissue, in excess of that which
is normal, and might cause other serious injury to health. It is
further alleged that because of the potassium iodide content, use
of the preparation would be definitely harmful to persons ill of
gout or pulmonary tuberculosis. (4159)

California Sunshine Products, Inc.—See American Medicinal
Products, Inc.

Radio Distributors.—A complaint charging the use of lottery
methods in connection with the sale of radios and other merchan-
dise to ultimate consumers has been issued against Leona Johnson
and Aubrey M. Graff, individually and trading as Radio Distribu-
tors, 30 North Dearborn St., Chicago.

The complaint alleges that the respondents, in connection with
the sale of their merchandise, furnish various devices and mer-
chandise involved, which, if used and carried out as advertised in
a push card bearing 58 feminine names with concealed numbers.
Instructions on the card read, in part: “Nos. 1-39 pay what you
draw. All others $9. None higher.” Purchasers of the name

Reva Company—Misrepresentation of a cosmetic preparation
for the hair and scalp is alleged in a complaint issued against Cecil
Dwight Kitchen, trading as The Reva Company, 4234 Lincoln
Ave., Chicago.

The respondent is alleged to have represented that his prepara-
tion “Reva” is not a hair dye, but that it substitutes or replaces
the pigment in hair necessary to give it color, and that it stimulates
hair growth and restores natural youthful color. The respondent,

Scientific Laboratories of America—See American Medicinal
Products, Inc.

Thyrole Products Company.—Alleging violation of the Federal
Trade Commission Act in the sale of a medicinal preparation
recommended for reducing overweight, a complaint has been issued
against Ralph Weinstock, trading as Thyrole Products Com-
pamy, 34th and Chestnut Sts., Philadelphia.

The complaint alleges that the respondent advertised “O.B.C.
Reducing Capsules”, otherwise known as “O.B.C. Capsules”, as
being a cure or remedy, and a safe, competent and effective treat-
ment for obesity, when such is not a fact.

False advertising is also alleged in a complaint under conditions prescribed in the
advertisements or under customary and usual conditions, might
cause serious and irreparable injury. The respondent’s prepara-
4358 — June 21, 1940
tion, according to the complaint, contains powdered strychnine alkaloid, powdered extract belladonna, aloin, phenolphthalein and thyroid.

The United States District Court, Eastern District of Pennsylvania, on petition of the Commission, recently enjoined the respondent from certain advertising of his preparation pending issuance of the Commission's complaint and final determination of its proceeding. (4160)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

Capital City Candy Company—See Midwest Merchandise Co.

Evans Candy House—See United Candy Company.

Gair Manufacturing Company—Orders have been issued directing two Chicago merchandise distributing organizations and a Philadelphia dealer to discontinue use of lottery methods in the sale of their products to ultimate consumers. The respondents are Frank E. Gairing, individually and trading as Gair Manufacturing Company, 1446 Summerdale Ave., and Robert C. Bundy, individually and trading as Jackson Sales Company, formerly of 53 West Jackson Boulevard, Chicago, and Meyer R. Eisenbrook, individually and trading as Marhar Sales Company, 1322 West Girard Ave., Philadelphia.

The Commission case against Robert C. Bundy, trading as Jackson Sales Company, originally included Belmont Sales Company, a corporation, formerly of 53 West Jackson Boulevard, now dissolved and out of business, and Robert C. Bundy and Mildred Bundy, individually and as officers of Belmont Sales Company. Commission findings are, however, that evidence received does not support the allegations of the complaint against Mildred or Robert C. Bundy as officers of the corporation so that the Commission’s findings and order refer only to the acts and practices of Robert C. Bundy, individually and trading as Jackson Sales Company. The Commission closed without prejudice its case against the dissolved corporation and against Mildred Bundy.

The Commission order directs that Frank E. Gairing, trading as Gair Manufacturing Company, in the sale of watches and other merchandise, and Robert C. Bundy, trading as Jackson Sales Company, in the sale of bedspreads, silverware and other articles, cease and desist in using lottery devices in selling the merchandise by means of a lottery; to cease supplying to or placing in the hands of others assortments of merchandise, either in or out of packages, totaling less than five dollars; to cease and desist in sending merchandise so packed and assembled that sales may be made by means of a lottery; to cease supplying to or placing in the hands of others assortments of merchandise, together with push or pull cards, punch boards or other lottery devices which may be used in selling products to the public; to cease supplying to or placing in the hands of others such lottery devices, either with assortments of merchandise, or separately, which devices may be used in selling merchandise to the public, and to discontinue selling or otherwise distributing of any merchandise by means of a game of chance, gift enterprise, or lottery scheme. (4058-4092)

General American Sales Corp.—See Square Deal Candy Co.

National Sure-Fit Quilting Company, Inc., 40-20 Twenty-second St., Long Island City, N. Y., has been ordered to discontinue misrepresentations in the sale of bed comforters.

Commission findings are that the respondents, local distributors, in advertising the respondent’s comforters, featured the name “Villadown,” tending to mislead buyers into believing that the fabric was made of down. Findings are that the fabric consisted of only 5 per cent down and 95 per cent cotton, but that this was explained only in small lettering in the advertisements.

The Commission order directs the respondent corporation to cease using the term “Villadown” or any other term which includes the word “down” or any colorable simulation of it or any term of similar meaning to describe a quilt, comforter or other similar product the filler of which is not composed wholly of down, the light fluffy undercoating of the waterfowl. The order provides, however, that if such term is employed to describe a filler composed in part of down and in part of materials other than down, the term must be immediately accompanied by a word or words of equal size or conspicuousness designating the substance, fiber or material of which the filler is composed, with designation of each constituent fiber or material in the order of its predominance by weight, beginning with the largest single constituent. (3728)

Square Deal Candy Company—A Los Angeles candy dealer and a Chicago distributor of merchandise have been ordered to discontinue lottery methods in connection with the sale of their products to ultimate consumers. The respondents are Warren Watkins, individually and trading as Square Deal Candy Company, 768 Merchant St., Los Angeles, and General American Sales Corporation and David C. Baskin, its president, 32 West Randolph St., Chicago.

The order against Warren Watkins, trading as Square Deal Candy Company, directs that he cease selling or distributing candy or other merchandise so packed and assembled that sales may be made by means of a lottery. The order directs the respondents in each case to cease supplying to or placing in the hands of others any merchandise, together with push or pull cards, punch boards or other lottery devices which may be used in selling such products to the public; to cease supplying to or placing in the hands of others such lottery devices, either with assortments of merchandise, or separately, which devices may be used in selling articles to the public, and to discontinue selling or otherwise distributing any merchandise by means of a game of chance, gift enterprise, or lottery scheme.

The Commission closed without prejudice its case against Arnold and Faye Simon, who had been named respondents individually and as officers of the corporation in the General American Sales Corporation case. Findings are that the evidence did not support...
the allegations of the complaint as to these two individuals. (3403-3706)

United Candy Company—Two candy distributors, one in Charlotte, N. C., and the other in Atlanta, Ga., have been ordered to discontinue lottery methods in connection with the sale of their products through dealers to ultimate consumers. The respondents are E. T. James, Jr., individually and trading as United Candy Company, 1507 West Trade St., Charlotte, and William C. Evans, individually and trading as Evans Candy House, 309 Marietta St., Atlanta.

The Commission order directs the respondents to cease selling or distributing candy or other merchandise so packed and assembled that sales may be made by means of a lottery; to cease supplying to or placing in the hands of others assortments of candy or other merchandise, together with push or pull cards, punch boards or other lottery devices, which may be used in promoting the sale of such merchandise, together with push or pull cards, punch boards, or other lottery devices, either with assortments of candy or other merchandise, or separately, which devices may be used in selling such articles to the public, and to discontinue selling or otherwise distributing any merchandise by means of a lottery. (4060-4102)

United Factories, Inc.—Prohibiting misrepresentation of a product advertised as a "reconditioner of automotive engines", a cease and desist order has been issued against United Factories, Inc., Kansas City, Mo.

"Micaseal", the respondent corporation's product, was found to have been advertised in a manner tending to mislead purchasers into believing that its use will effect substantial economies in operating automobiles and other accomplishments not justified by the facts.

The Commission order directs the respondent to cease representing that use of "Micaseal" will decrease the oil or gas consumption of a motor, increase engine compression or check excessive oil pumping, or that its use will check excessive carbon formation or add speed, power or smoothness to the operation of old motors. The order also prohibits the representations that use of the preparation will recondition a motor or produce results equal to or comparable with a mechanical reconditioning of an automobile engine, and that nationally known laboratories have made impartial tests of "Micaseal" and have certified that it has merit when used in an automobile engine. (3797)

U. S. Drug & Sales Company—Edward L. Leisering, trading as U. S. Drug & Sales Company, U. S. Drug Laboratories, and U. S. Drug Company, and Gordon Leisering, both of 1534 Lawrence St., Denver, Colo., have been ordered to cease and desist from misrepresentation of medicinal preparations sold and distributed by them.

The Commission finds that the respondents have been engaged in the sale of various medicinal preparations including one advertised as "Man's Pep Tonic" and as "Man's Tonic," and sold as "U. S. Special Tablets," and a preparation advertised as "Man's Pep Tonic (Double Str. Capsule)" and as "Man's Tonic (Double Str. Capsule)," and sold as "Sex Tonic Capsules for Men or Women." The preparations were found also to have been advertised as being safe, competent and reliable tonics; as effective, safe and scientific aphrodisiacs and scientific treatments for strengthening and rejuvenating the glands, and as possessing safe and scientific treatments for strengthening or rejuvenating the glands or sexual organs of men or women; or that the preparations possess any value in the treatment of debility, or that which advertisements fail to reveal that use of the preparations may result in serious or irreparable injury to the health of the user. (4053)

STIPULATIONS

Following stipulations have been entered into by the Commission:

Armoire Products, Inc., 108 North Water St., Milwaukee, in the sale of the "New Art Cleaner," agrees to cease advertising that prospective agents can make profits or earnings in a specified period which exceed average net profits or earnings consistently made in like periods by the respondent's full time salesmen; that no investment is required for one to sell the "New Art Cleaner," and that one will have no competition in such sale. (02580)

Danville Knitting Mills, Inc., also trading as Master Knit Hosiery Mills, Danville, Va., engaged in the manufacture and sale of hosiery products, has agreed to cease and desist from offering its products on its transfers, in its advertising matter, or otherwise, that its "Master Knit Hose," or any product of similar construction or composition, has toes and or heels of linen or is made with linen toe and/or heel, and has toe and or heel of 3-ply construction, or reinforced gore of toe and/or heel. (2838)

Dixie Dale Company—Michael Michalk, trading as Dixie Dale Company, 43 East Ohio St., Chicago, agrees to discontinue representing that "Dixie Dale De Luxe Hair Preparation" will grow hair or speed its growth, stop hair from falling out, give to hair strength or life, make hair softer, and end dandruff troubles. (2836)

Detrola Corporation, 1501 Beard Ave., Detroit, radio and camera manufacturer, has entered into a stipulation in which it agrees to cease advertising that its "Detrola Candid Camera" or other camera having an actual shutter speed of 1/100th of a second, has a shutter speed of 1/200th of a second; or in any other way representing that the shutter speed of a camera which it sells is in excess of the actual speed attained. (2836)

Dixie Dale Company—Michael Michalk, trading as Dixie Dale Company, 43 East Ohio St., Chicago, agrees to discontinue representing that "Dixie Dale De Luxe Hair Preparation" will grow hair or speed its growth, stop hair from falling out, give to hair strength or life, make hair softer, and end dandruff troubles. (2836)

Eagle Mattress Co., Inc.—See R. C. Heller Co., Inc.

Editors & Publishers Service Co.—Charles A. Roberts, doing business as Editors & Publishers Service Co., 25 West Broadway, New York, engaged in selling lists and bulletins containing information relating to slogs, titles and names which have been successful in winning prizes in various competitive contests, agrees to discontinue representing, by unqualified statements such as "You can win" or "You cash in on our knowledge of what it takes to win," or in any other manner, that the reader of the advertisement is assured of winning any contest, cash or prize by reason of buying material composed by, or information furnished by, Editors & Publishers Service Co., or that the material or information furnished will definitely enable one to win, or constitutes more than the assistance of Editors & Publishers Service Co. to the readers in competing for such cash or prizes. (02579)

Ellis Hosiery Mills—Ellis Mills and Marvin T. Reavis, co-partners trading as Ellis Hosiery Mills, Hickory, N. C., manufacturers and distributors of hosiery products, have agreed to desist from certain methods of competition.

English ribbed hose, the stipulation points out, is a distinctive type and quality of hosiery originating in England, manufactured there under a patented process and imported into the United
States, where it has long been favorably known and recognized by the trade and the purchasing public. Later English machines for this type of hosiery were imported into the United States, and are used by some hosiery mills. Similar machines are now also manufactured in America, on which hosiery in simulation of the English rib is made for the domestic market. Among many purchasers there is a preference first for the English made imported product, and second for such product made on machines imported from England. This has in some cases resulted in a false branding of an American machine product as being made on machines imported from England.

Ellis Mills and Marvin T. Reavis, in connection with their sale and distribution of hosiery products, have agreed to cease and desist from the use, on their transfers, brands or other markings, of the words “Genuine 6 x 3 Rib” as descriptive of hose that is not an imitation of English rib, or the words or legend “Made on machines imported from England”; or representing or characterizing any other product in any other way that may import or imply the belief that the hosiery is either of a style and quality known to the trade and public as genuine English rib hose, or is manufactured by English made machines. (2840)

Louis Feuster & Brother, Inc., 333 Seventh Ave., New York, engaged in the sale and distribution of fur garments, has agreed to cease and desist from invoicing or otherwise designating or referring to coats or other articles made or manufactured from the peltries of Chinese lamb as “Blk. Pers.,” “Black Persian Cara-cul,” “Bk. Persian Cara-cul,” “Krimmer Cara-cul,” or other use of the words “Persian” or “Krimmer,” either with or without the explanatory clause “Dyed Lamb.” The respondent corporation has also agreed to desist from representing directly or inferentially, or placing in the hands of others a means to represent, that coats or other articles made or manufactured from Chinese lamb peltries are made or manufactured from the peltries of Persian lambs or Krimmer lambs, or otherwise making representations which convey or tend to convey a misconception as to the character, name, nature, breed or zoological origin of any fur products offered for sale or sold by it. (2833)

Hall Gentry Studios—Maurice W. Teplow, trading as Hall Gentry Studios, 1705 Pacific Ave., Dallas, Tex., has entered into a stipulation to discontinue certain representations in the sale of photographic portraits.

Among representations which the respondent agrees to discontinue are that his regular method of sale is a “special offer,” that the “regular value” of $1 photographs is $5 or any amount in excess of the price customarily charged, and, through advertising literature containing the descriptive language “Goldtone Feather-weight Oil Colored Print” and “Black and White Vignette Etching” or expressions of similar import, that sepia print photographs are “Colored,” and that ordinary black and white photographs are “Vignette Etchings” or etchings of any kind. (2834)

Hamilton Mills—Joseph D. Miller and David L. Davis, co-partners trading as Hamilton Mills, 1450 Broadway, New York, engaged in the sale and distribution of garments designated “Sports-wear,” have agreed to cease and desist from use of the word “Mills” as part of their trade name, and of the words “Mills” and “Manufacturers” as descriptive of their business; and from the use of words of similar implication, the effect of which tends or may tend to convey the belief that they make or manufacture the products sold by them or that they actually own and operate or directly and absolutely control a plant or factory in which such products are made or manufactured. (2832)

R. C. Heller Co., Inc.—A Baltimore and a Boston mattress manufacturer have entered into stipulations to discontinue certain representations in the sale of their products. The respondents are R. C. Heller Company Inc., 34 South Frederick St., Baltimore, and Eagle Mattress Company, Inc., 42 Everett St., Boston.

Each respondent corporation agrees to cease employing designations implying that products sold by it have been designed by or under the supervision of a doctor of medicine. R. C. Heller Company Inc., stipulates that it will cease using the word “guaranteed” or words of similar meaning in connection with sales of mattresses unless accompanied by clear disclosure of exactly what is offered by way of security, as for example, refund of purchase price, and Eagle Mattress Company, Inc., agrees to cease employing any language implying that its products are endorsed or guaranteed by a member of the medical profession. (2835-2841)

Katz Drug Company, 1130 Walnut St., Kansas City, Mo., agrees to cease representing that “Perma Tonic” is a health builder, unless it is explained in direct connection therewith that Perma Tonic of itself does not build health; that the system needs the ingredients contained in the product, and that the preparation is a competent treatment or effective remedy for headaches or biliousness, unless limited to temporary relief of these conditions when they are due to constipation, and for constipation, unless limited to temporary relief. The respondent corporation also agrees that in connection with use of the word “Tonic” as part of the trade name for its product it will insert the word “Gastric” immediately prior thereto. (2855)

Lefton Textile Corporation, 39 West 38th St., New York, has entered into a stipulation in which it agrees to cease certain representations in the interstate sale of ribbons, to cease and desist from invoicing or otherwise designating or describing products not made wholly of silk, and from the use of words of similar import, that coats or other articles made or manufactured from the peltries of Chinese lamb as “Blk. Pers.,” “Black Persian Cara-cul,” “Bk. Persian Cara-cul,” “Krimmer Cara-cul,” or other use of the words “Persian” or “Krimmer,” either with or without the explanatory clause “Dyed Lamb.” The respondent corporation has also agreed to desist from representing directly or inferentially, or placing in the hands of others a means to represent, that coats or other articles made or manufactured from Chinese lamb peltries are made or manufactured from the peltries of Persian lambs or Krimmer lambs, or otherwise making representations which convey or tend to convey a misconception as to the character, name, nature, breed or zoological origin of any fur products offered for sale or sold by it. (2833)

Master Knit Hosiery Mills—See Danville Hosiery Mills, Inc.

O’Dea, Sheldon & Canaday, Inc., 400 Madison Ave., New York, engaged in conducting an advertising agency which disseminates advertisements for a root beer beverage designated “Hires R-J Root Beer” on behalf of The Charles E. Hires Company, Philadelphia, has agreed that it will cease from disseminating or causing to be disseminated any advertisements which represent directly or by implication that Hires R-J Root Beer will preserve the alkaline reserve; that Hires R-J Root Beer has the same alkaline reaction as orange juice and in the same manner aids to preserve the alkaline reserve; that Hires R-J Root Beer will not cause acidity, and that Hires R-J Root Beer is healthful because it is not acid-forming, or is a health protecting beverage, and that it agrees with foods because it is not acid-forming. (2858)

Reliable Radio Company—Louis Jutze, trading as Reliable Radio Company, 7710 South Bishop St., Chicago, agrees to desist from advertising that the “Tee-Nite” crystal radio set is designed to operate in one’s pocket or without ground or aerial connections; that it gives clear reception, implying that reception is obtainable without earphones; that he has sold any number of Tee-Nite radios in excess of the number actually sold; that the instrument’s

June 21, 1940 — 4361
principle of operation is new or different, or that the product is more effective than other types of radios. (02582)

Sunclean Products Company—Roy Quinlan, trading as Sunclean Products Company, 551 Fifth Ave., New York, in the sale of “Safe-Clean Laxatives,” agrees to cease advertising that it is a “wonderful discovery” producing “amazing results,” or that its results are different from those of competing laxatives; that it will end constipation, contains nothing injurious and is not habit-forming; that its use will keep the intestines clean and healthy, and that it has any appreciable effect on the functioning of the liver or kidneys. In his stipulation the respondent admitted, among other things, that a laxative is contraindicated under certain conditions, in which cases this preparation would not be safe for use. (02578)

Mrs. L. H. Tillotson, 95 South State St., Painesville, Ohio, stipulates that she will desist from advertising “Black Drops” as being a “specific” for neuritis of the sciatic nerve, for kidney trouble, or for any other disease, and as being a cure for any sickness or disease. She also agrees to cease representing that the product contains no drugs and is sold by a medical doctor. (02584)

FTC CASE CLOSED

The Federal Trade Commission has closed without prejudice its case against the K. K. Importing Corporation, 45 John St., New York, which was charged with violating the Federal Trade Commission Act in the sale of optical lenses. The respondent company has been dissolved and is no longer in business.

The Commission closed the case without prejudice to its right to reopen it for further proceeding should future facts so warrant.
THE WEEK IN WASHINGTON

Neville Miller, in a special message to all broadcast station executives, gives a detailed analysis of new ASCAP contract.

"ASCAP has refused to negotiate with the industry; behind closed doors it has drawn the terms of surrender, and John Paine urges you to come singly to his office and capitulate," Miller says. (p. 4365)

The radio blank of the Republican platform says that radio should be free as the press. (p. 4363)

NAB convention is set for San Francisco on August 4. The program is near completion. Proposed amendments to the By-Laws are in this issue. (p. 4370)

The NAB Board of Directors expresses the view that political broadcasts should be limited to speakers, interviews, announcements and broadcasts of bona fide political meetings held outside the studios. (p. 4370)

The Board also urges all broadcasting stations carrying foreign language programs to exercise "extreme precaution" to prevent the broadcasting of propaganda "inimical to the interests of the United States." (p. 4371)

The NAB Board meets with the BMI Board in New York and discusses important BMI policy. Samuel R. Rosenbaum, WFIL, resigns from the BMI Board because of the pressure of other business. (p. 4372)

The NAB intends to appear July 25 at a hearing called by the Wage and Hour Administration to consider proposals for redefining the classes of employees exempt from the 42-hour limit on the regular work week. (p. 4372)

The FCC makes an interesting decision involving the "economic injury" question. (p. 4372)

The RMA recommends radio advertising by radio dealers. (p. 4373)

NAB Sales Managers Division entertains 1500 at the Advertising Federation of America convention in Chicago. (p. 4374)

The current series of District meetings comes to a close with meetings in Rochester, Memphis and Los Angeles. (p. 4375)

The FCC issues its FM rules. (p. 4376)

The Commission gets $1,600,000 for "defense" work and announces some of its plans. Chairman Fly says a "defense committee" will be set up. (p. 4380)

Republicans Declare For Radio Freedom

Radio should be as free as the press.
That is the sense of the Republican Party, expressed in its platform adopted June 26 in Philadelphia.

The text of the radio plank:

FREE SPEECH

The principles of a free press and free speech, as established by the Constitution, should apply to the radio. Federal regulation of radio is necessary in view of the natural limitations of wave lengths, but this gives no excuse for censorship. We oppose the use of licensing to establish arbitrary controls. Licenses should be revocable only when, after public hearings, due cause for cancellation is shown.

Adoption of this plank followed an appearance before the convention resolutions committee last week by Neville Miller, John Kennedy, WCHS; Harry Butcher, CBS; Frank M. Russell, NBC, and Russell P. Place, NAB counsel.

The committee will ask the Democratic Party to put a radio plank in its platform at the Chicago convention next month.

The Convention

Just five weeks from next Monday, Neville Miller will drop the gavel for the opening session of the NAB's Eighteenth Annual Convention at the St. Francis Hotel, San Francisco.

The convention is definitely set for the Golden Gate. The Board, meeting last week in New York, decided against any change.

Every member will want to attend. A bang-up busi-
(Continued on page 4364)
ness schedule is being arranged. Pacific Coast broadcasters, elated to play hosts to their Eastern and Mid-Western friends promise a grand time for everyone.

The complete program for the convention, slated to start Sunday, August 4, will be announced in about two weeks.

Meantime, every member should make his plans to be on hand. The NAB promises a convention that should never be forgotten.

HOW ARE YOU GOING?

We know there are a lot of miles between some of you broadcasters and San Francisco. We know, too, that in past years there were a lot of miles between western broadcasters and the places where the conventions were held. These westerners came in goodly numbers and now they are extremely anxious to have their eastern friends in the broadcasting industry see the west, partake of their hospitality and benefit by being at the convention.

Have you made your plans? Through Raymond-Whitcomb, Inc., of Baltimore, we have worked out arrangements for some “all-expense” tours. The routes are alternative and were based upon expressions made by broadcasters in response to a preliminary questionnaire. There are three alternate schedules for the outbound trip.

On the homeward trek, you have five alternatives. The following skeleton outline sets forth the choices. All schedules call for departure from Chicago. One, on Saturday, July 27, and the other two on Sunday, July 28. All will “land” you in San Francisco at 8:00 a.m. on Sunday, August 4, the day the convention opens. You have been sent and, if you desire, will again be provided complete outlines of the routes, services and costs of these tours. Here is the skeleton outline.

**Tour No. 1**

Lv. Chicago Sunday, July 28 — 12:35 p.m.
Ar. San Francisco Sunday, August 4 — 8:00 a.m.
(This tour via Denver, Salt Lake City and Los Angeles)

**Tour No. 2**

Lv. Chicago Sunday, July 28 — 10:30 a.m.
Ar. San Francisco Sunday, August 4 — 8:00 a.m.
(This tour via Colorado Springs, Grand Canyon and Los Angeles)

**Tour No. 3**

Lv. Chicago Saturday, July 27 — 12:35 p.m.
Ar. San Francisco Sunday, August 4 — 8:00 a.m.
(This tour via Denver, Salt Lake City, Cedar City and the North Rim of the Grand Canyon and Los Angeles)

**RETURNING**

Any who desire, may come direct from San Francisco to Chicago leaving on Western Pacific at 9:00 p.m., Thursday, August 8, and arriving in Chicago at 11:55 a.m., Sunday, August 11.

For those who wish to see the Pacific Northwest and visit either Yellowstone National Park or Glacier National Park, the following homeward schedule has been arranged.

Lv. San Francisco Thursday, August 8 — 5:00 p.m.
Ar. Portland Friday, August 9 — 12:30 p.m.
Lv. Portland Friday, August 9 — 11:30 p.m.
Ar. Seattle Saturday, August 10 — 6:45 a.m.

Those who desire to go by way of the Canadian Rockies will leave Seattle, Sunday, August 11, by Canadian Pacific Railway at 9:00 p.m., stop in Victoria, Vancouver, Banff and Lake Louise, and arrive in Chicago, Saturday, August 16, at 2:40 p.m.

Those desiring to return by Yellowstone or Glacier National Parks will have choice of the following alternative schedules:

On Saturday a one day trip to Victoria, B. C., leaving Seattle at 9:00 a.m. and returning at 9:00 p.m. Sunday will be spent in sight-seeing in Seattle, then the alternative tours leave as follows:

1. Leave Seattle, Sunday, August 11, Northern Pacific, 9:45 p.m., by way of Yellowstone National Park, arriving Chicago, Saturday, August 17, 8:45 a.m.
2. Leave Seattle, Sunday, August 11, Chicago Milwaukee and St. Paul Railway, 10:30 p.m., by way of Yellowstone National Park, arriving Chicago, Saturday, August 17, 8:55 a.m.
3. Leave Seattle, Sunday, August 11, Great Northern Railroad, 10:15 p.m., by way of Glacier National Park, arriving Chicago, Friday, August 16, at 8:40 a.m.

Here you have a choice between a two weeks’ and a three weeks’ excursion. The arrangements are de luxe. Your time will be your own, but every consideration has been given to means through which you may be able to make thorough arrangements that will make possible your enjoyment of the scenic attractions of the West.

The Pullman Company, rail carriers and hotels, which have set aside facilities for the groups who go on these tours, must know not later than July 10 what our requirements will be. If you haven’t made your selection of a tour yet, you are requested to do so right away so that you may be included. Remember the deadline for reservations is July 10. You may address communications direct to Raymond-Whitcomb, Inc., Baltimore, or to headquarters office. Let us hear from you.

**STATION PROMOTIONAL MATERIAL**

At past conventions space has been provided for the display by stations of promotional material. In order that plans may be made to effectively handle this matter at the San Francisco convention we sincerely request the management of all stations desiring to make a display of their promotional material at San Francisco to immediately advise headquarters. Give us complete explanation of the type of material you plan to show and the form in which you would like to show it. We are par-
Important to All Broadcast Station Executives:

On Friday, June 21, the Boards of the National Association of Broadcasters, the Independent Radio Network Affiliates and Broadcast Music, Inc., held an all day session in New York. Of the thirty-five persons who make up the joint boards, thirty-three were present, representing all classes of stations and all interests in broadcasting. Without a dissenting vote, a new plan for the future financing of BMI was adopted, and the plan is based on BMI’s permanent organization on a basis which contemplates meeting the economic needs of stations in the small income level, as well as for providing an economic basis for stations in the higher income level.

I know you would have been impressed by the seriousness and optimism of that meeting. The progress of BMI to date clearly demonstrates that we can solve our music problem and the action taken at the meeting indicated the confidence which broadcasters have in BMI. The solution which broadcasters have sought for years is now within our grasp—provided we do not abandon our efforts to create a pool of music and accept the bait dangled before our eyes by ASCAP in the form of the proposed contract supposedly favorable to stations, but which actually is illusory.

Simultaneously with this meeting of broadcasters, ASCAP sent out its proposed form of contract which the joint meeting unanimously found to be disadvantageous to broadcasters, no matter where situated, nor in what income category.

I enclose an analysis of the “single station” license agreement. The basic abuses inherent in ASCAP’s organization and its method of levying charges upon broadcasters are well known, and are not discussed here, as they would exist even if the form of contract was satisfactory. I urge you to study the contract in the light of this analysis.

I call your particular attention to the fact that ASCAP has drawn a one-sided contract for you to sign. ASCAP requires a lot in the way of payment, it guarantees little; ASCAP may cancel the contract, but the broadcaster is bound for five years; there are no provisions for lessening the cost upon failures by ASCAP to deliver, but there are many provisions for levying increased toll upon broadcasters; the percentage of payment is lessened in some cases, but the base is broadened to include not only time sales, but talent costs, line charges, etc.; none of the present abuses are eliminated; the question whether you have the right to make an arrangement is left unanswered, undoubtedly for a purpose; the indemnity clause does not protect the sponsor or the agency; and there are many other interesting features which ASCAP has thought up for “your benefit”.

June 27, 1940.

June 28, 1940 — 4365
More important than the form of the contract, more basic than the question of whether this station or that may obtain a temporary financial saving, is the true underlying problem. The industry's action at this time will determine whether broadcasters can obtain music in a free competitive market, or continue to sign on a dotted line laid before them by a music monopoly.

ASCAP has refused to negotiate with the industry; behind closed doors, it has drawn the terms of surrender, and John Paine urges you to come singly to his office and capitulate.

Very truly yours,

[Signature]

President, National Association of Broadcasters.

ANALYSIS OF "SINGLE STATION" LICENSE AGREEMENT TENDERED TO BROADCASTERS BY ASCAP

The new ASCAP contract will prove, when analyzed, to afford no protection whatsoever to broadcasters. It obligates broadcasters for a period of five years, but it imposes no obligation on ASCAP to furnish any specified body of music at any specified price. In other words the proposed contract will not give any station which was induced to sign it protection for any portion of the term of the contract. The apparent protection which it gives and the apparent rights which it grants are in fact entirely illusory. It is not possible in a brief memorandum to set forth all of the disadvantages of the ASCAP contract, but the following are the chief means by which ASCAP accomplishes the result of binding the station while leaving itself free to do anything it wants.

I—The Broadcaster Who Signs the ASCAP Contract Does Not Know What, if Anything, He Will Be Getting for His Money

Previous contracts between broadcasters and ASCAP have defined the body of music which is licensed, by having ASCAP agree during the term of the contract to maintain for the service of the broadcaster substantially its catalogue of compositions as of the date on which the contract was signed. In other words broadcasters knew what they were getting. The proposed contract omits this provision and substitutes nothing in its place. ASCAP makes no representation as to the extent of the catalogue which it will give you. ASCAP can substantially reduce its catalogue prior to the date on which the broadcaster signs. Publishers and writers may withdraw. Indeed, it is known that important publishing houses have not yet committed themselves to ASCAP for a further term. If these houses do not join ASCAP, broadcasters who sign now will still pay the full amount under the proposed contract.

Not only that, but ASCAP can reduce the repertory even during the term of the contract. ASCAP has committed itself to no agreement to maintain its repertory for your needs. On the contrary, ASCAP has affirmatively stated that it reserves the right to discontinue all of ASCAP's contracts with its foreign affiliated societies, including all of the compositions of Argentine, Belgian, Brazilian, Bulgarian, Czecho-slovakian, Danish, English, Finnish, French, German, Hungarian, Italian, Yugoslavian, Norwegian, Portuguese, Roumanian, Spanish, Swedish and Swiss composers and publishers. ASCAP has always represented that there were 45,000 composers whose works were made available to you through foreign catalogues as against only 1,000 American composers who are members of ASCAP. Yet ASCAP gives itself the right to withdraw all of these musical compositions from the operation of the license with the broadcaster and says that this "shall not affect the license or the compensation payable hereunder." Since ASCAP remits money to foreign societies, it would actually be in ASCAP's interest to reduce its repertory because this would mean that the money which it collected from broadcasters could be divided among even fewer persons than in the past.

In addition to all of these rights to reduce in advance or to diminish during the term of the new contract the body of music which broadcasters think they are getting, ASCAP, for the first time, gives itself the right to assign the contract to any person, firm or corporation or association it wants to assign it to, and provides that the
contract will inure to the benefit of the person to whom the contract is assigned. This means that you may make your contract with ASCAP but that you may find yourself doing business with somebody else, perhaps a person or firm or corporation of no financial responsibility with very limited music rights. In other words, you may make a contract, paying a price that you think ASCAP is entitled to, and then find that you have your contract with some new corporation to whom you would not, in the first instance, have agreed to pay a penny.

To sum up, under these new provisions ASCAP reserves to itself the right to give the broadcaster who signs the contract as much music or as little music as ASCAP pleases. In other words, the broadcaster who signs this contract is “buying a pig in a poke.”

II—ASCAP May Restrict Its Entire Catalogue Without Any Recourse on the Part of the Broadcaster

The provisions in previous contracts with respect to the restriction of musical numbers have been extremely unfavorable to broadcasters. ASCAP publishers have been restricting the use of their compositions as a means of obtaining additional compensation from broadcasters, not by way of cash, but by way of free advertising for motion pictures, theatrical attractions, etc. Under the old contract, at least, the broadcaster had the right to cancel his contract in the event that any musical composition was withdrawn, which meant that the broadcaster could stop his payments if the catalogue became useless to him. ASCAP has found a way to make this bad provision worse.

The proposed contract gives ASCAP the affirmative right to withdraw any thousand numbers that it wishes to restrict. These may be the thousand best numbers, and ASCAP may demand additional payment for their performance. Much worse than this, however, is the situation of broadcasters if more than a thousand numbers are withdrawn. In order to indicate what the provisions of the ASCAP contract really accomplish, let us examine a concrete case.

We will assume that ASCAP restricts 10,000 compositions. The broadcaster then has only one right. He may give sixty days notice of cancellation. During these sixty days he cannot use the 10,000 numbers which constitute the only useful part of the ASCAP repertory. On the fiftieth day ASCAP may reduce the number of restricted compositions to 1,000. The notice then becomes entirely inoperative. A few days later ASCAP can again restrict 10,000 compositions. The broadcaster again has no right other than to give sixty days notice. During these sixty days he cannot use the compositions, and at the end of the sixty days ASCAP can restore the numbers to the repertory for a few days and then begin the performance all over again. This can continue until the broadcaster runs out of postage stamps, and, with the exception of a few intervals of a few days at a time, the broadcaster will continue to pay his full license fee on his entire gross business, but get no real value out of the ASCAP catalogue whatsoever.

III—The Proposed Contract “Freezes” the Broadcaster’s Present Status

The proposed license relates only to “non visual broadcasting” and it specifically excludes any transmission of sound in synchronization or simultaneously with visual images. In other words, television has to be paid for separately, but the broadcaster is not relieved of the obligations of the contract even though it becomes useless to him because television has become commercial within the period of the agreement.

For the first time the new form of license restricts the broadcaster not only to a single enumerated broadcasting station but even to studios specifically enumerated in the contract. Frequency Modulation is not covered by the agreement. A new contract at ASCAP’s own terms is needed for F.M., and nothing in the contract relieves the broadcaster from any payment under the contract which he now is asked to sign. Even the moving of a studio to a new location or the building of a new studio would leave the broadcaster at ASCAP’s mercy, since he has no legal right to originate from such point without ASCAP’s consent.

Moreover, network broadcasting is entirely excluded. This applies to a broadcast program which is simultaneously broadcast over as few as two stations. If two stations simultaneously broadcast an athletic event, a parade or a presidential inauguration, they are not covered by their contracts, and ASCAP can make new and greater demands for the privilege of doing this. Indeed, if a network takes out an ASCAP license, network programs can be carried over the stations even if the station has never signed the single station license agreement. Furthermore, if a broadcasting station which signs this agreement wishes to originate a program which will be heard over any other broadcasting station, the station which has already signed the single station license is required to sign the 7 1/2% network license in the regular form. This applies equally to originations by a station which is a network affiliate for the purpose of putting a program for other stations on the network, or to a temporary hook-up under which a station would wish to make an athletic or similar event available to another station. In other words, the station is making payment purely for individual local origination. If it is apparently paying less, it is certainly getting much less.
IV—ASCAP Has Deprived the Station of All Escapes from the Contract But Has Given Itself Additional “Outs”

Previous contracts have contained provisions under which the broadcaster can cancel his contract if the broadcaster’s license is terminated, cancelled, revoked or suspended, or if radio broadcasting is supported from other sources or operated by other than private interests. This clause has been omitted, and nothing has been substituted in its place. In other words, if the broadcaster loses his license, or if war conditions bring about some drastic change in our industry, the broadcaster, nevertheless, and for the first time, has no right to cancel his contract.

When the shoe is on the other foot, the contract operates quite differently. For instance, if the state or county or city in which the broadcasting station is located passes any law which ASCAP doesn’t like, ASCAP reserves the right to terminate the agreement with the broadcaster. The broadcaster cannot terminate the agreement with ASCAP if any laws are amended by the government. The law to which ASCAP objects may have been something with which the broadcaster had nothing to do. The broadcaster may even have opposed the law. ASCAP, nevertheless, reserves the right forthwith to tear up the broadcaster’s contract in the event of a statutory change distasteful to ASCAP. Under this clause an innocent broadcaster may find himself stopped in the middle of a day’s broadcasting.

V—The ASCAP Tax Is Levied Not Only on Time Sales But on Talent Costs, Line Charges, Etc.

For the first time, “broadcasting facilities” are defined to include all regularly employed personnel, including actors, singers, musicians, etc. The only time that the broadcaster can avoid paying ASCAP a percentage on talent costs is where the talent is not regularly employed, where the talent is actually engaged for the sponsor for a specific program and where the talent is actually paid separately for specific commercial services. This means that all of the money which a broadcaster gets from selling his house band to a sponsor, through furnishing the services of regularly employed announcers, etc., is income on which ASCAP collects its percentage.

Not only does ASCAP collect on talent but also on line charges, etc. This result is accomplished by having the agreement provide that the broadcaster is not required to “account for sums received from religious broadcasts where the amount paid is solely in reimbursement for the cost of lines, wire charges and technical personnel.” There is a further provision that “special line charges, special announcers and extra engineers” may be deducted with respect to “athletic events.” This means that the broadcaster must pay the percentage on all costs of lines, wire charges and technical personnel except religious broadcasts, and must pay his percentage on all extraordinary expenses such as special line charges, special announcers and extra engineers on all programs except athletic events.

Even in the limited cases in which deductions are allowed, they can be made only if the broadcaster has charged the sponsor “the highest rate charged for a similar given period of time.” This means the national rate, so that no deduction may be taken on any program broadcast for a local sponsor. In fact ASCAP must be paid on at least the highest card rate applicable to a similar period of time even if payment is made in some medium other than cash or notes, namely, free rent of a studio located in a hotel for which daily announcements are given, etc.

Indeed, “broadcasting facilities” by express definition includes services and “services” by express definition includes not only wire service and electrical transcriptions but “service of every nature.” This means that the ASCAP tax is levied not only on sale of time, not only on personnel, not only on wire charges, but on every merchandising and other service of any nature whatsoever which a broadcaster may render to an advertiser.

When these factors are weighed, the apparent temporary savings to some broadcasters will, it would appear certain, be greatly reduced.

VI—The Proposed Contract Does Not Cure the Essential Defects of the Existing Contract

Since the last ASCAP contract was drawn abuses have arisen and threats been made, which any new contract, which properly protects broadcasters, should correct. ASCAP fails to correct and, in fact, it perpetuates all of the clauses under which a nullification of the ASCAP contract was threatened. Some of these are:

(a) There was no specific clause in the last ASCAP license giving broadcasters the right to perform “special arrangements” of ASCAP compositions and permitting them to make any written copies of parts for their files. Broadcasters took it for granted (as they had a right to) that a license to perform carried with it the normal rights which would make such license usable. As every broadcaster knows, the right to perform ASCAP compositions precisely as they are printed is not worth anything because every band and every performer adapts the composition to specific needs. To the amazement of broadcasters, ASCAP publishers, since the last contract was executed, have claimed that under the ASCAP license the ASCAP publisher is still free to exact a special charge in any amount the publisher wishes for the right to arrange the musical composition. There is now pending a test suit against a phonograph record company in which
a leading ASCAP publisher makes precisely this claim—the claim that a broadcaster can perform a phonograph record only if the tune has been recorded precisely as printed. The viewpoint so put forward has been supported by ASCAP publishers and writers as a whole and by the special organizations of publishers and writers who are included within ASCAP. ASCAP has refused to oppose these claims of its members but has, indeed, said that ASCAP does not own the right to arrange compositions and has said that it could not grant this right even if it wanted to. Under these circumstances, the proposed ASCAP contract means that broadcasters are buying a law suit and that if the law suit is won, the whole ASCAP contract is robbed of its usefulness. This would not mean that broadcasters could stop paying under the proposed contract. They would have to continue to pay their full percentages, but they would have to pay as much more as the ASCAP members wanted to exact.

(b) When an attempt was recently made to exact special charges from stations for the right to perform phonograph records the music publisher members of ASCAP, through their official organization, Music Publishers' Protective Association, were quick to assert that they were entitled to special compensation from broadcasters from the the performance of phonograph records. A law suit is now pending to determine whether broadcasters must make special payment for the right to perform records. If this law suit should be decided adversely to broadcasters, music publishers would assert under the foregoing “arrangement” claim that they were entitled to a part of the revenue. The proposed contract gives no protection against the making of any such claim.

(c) The present indemnity clause in the ASCAP contract has long been unsatisfactory because it does not protect broadcasters who perform a foreign composition contained in the ASCAP repertory. During the last few years, however, a new abuse has arisen. Persons who have sued for infringement have, in some cases, sued not broadcasters but sponsors and advertising agencies. ASCAP's counsel have consistently taken the position that the ASCAP indemnity protects only the broadcasting station, and they have refused to defend the law suits against the advertising agencies and sponsor or to indemnify agencies and sponsors against damages. This means that the broadcaster has had to assume the defense at the broadcaster's expense or possibly deter a client from using his station. A new contract with ASCAP should provide that not only the broadcaster but his advertising agencies and sponsors are protected if they play a number which ASCAP represents as being in the ASCAP repertory.

THE FOREGOING ANALYSIS DOES NOT AT¬TEMPT TO DISCUSS THE BASIC ABUSES IN¬HERENT IN ASCAP'S ORGANIZATION OR ITS METHOD OF LEVYING CHARGES UPON BROAD¬CASTERS. THESE BASIC DEFECTS WOULD EXIST EVEN IF THE FORM OF CONTRACT HEREN DESCRIBED WERE SATISFACTORY. THIS ANALYSIS SHOULD, THEREFORE, BE CON¬SIDERED AS CONSTITUTING ADDITIONAL REA¬SONS WHY BROADCASTERS SHOULD CARE¬FULLY CONSIDER THEIR COURSE OF ACTION.
you will require. Naturally it may be necessary to make some adjustments to conform all the exhibits to the space available. To every extent possible, however, the wishes of the individual broadcaster will be accommodated. Let us hear from you promptly.

AMENDMENTS TO BY-LAWS

Two proposals to amend the By-Laws of the National Association have been authorized for submission by the Board of Directors.

Article XIII of the By-Laws requires that proposed changes shall be “submitted by mail to the last recorded address of each member at least 30 days before the time of the meeting which is to consider the change”. The meeting to consider the change is the Eighteenth Annual meeting to be held at San Francisco, August 4 to 7, inclusive. This is, therefore, your notice of the following proposed amendment.

That Article VII, Section 1, of the By-Laws be amended to read as follows:

“DIRECTORS:

“Section 1. Number. The business and affairs of the Association shall be managed by and under the direction of a Board of Directors of (twenty-three) twenty-six members, to be selected as hereinafter provided, each of whom shall be an Active Member of the Association or a representative actually engaged in the business of an Active Member.”

That Article VII, Section 2, of the By-Laws be amended to read as follows:

“Section 2. Classification of Directors. There shall be one Director from each District, referred to hereinafter for purposes of convenience as District Directors. There shall be six additional Directors, referred to hereinafter for purposes of convenience as Directors-at-Large, two of whom shall be representative of large stations, two of whom shall be representative of medium stations, and two of whom shall be representative of small stations, operating power to govern these classifications. There shall be three additional Directors, referred to hereinafter for purposes of convenience as Network Directors, one of whom shall be representative of Columbia Broadcasting System, Inc., one of whom shall be representative of Mutual Broadcasting System, Inc., and one of whom shall be representative of National Broadcasting Company, Inc.”

That Article VII, Section 4, of the By-Laws be amended to read as follows:

“Section 4. Nomination of Directors-at-Large and Network Directors. The District Directors shall constitute a Nominating Committee which Committee shall meet in advance of the annual membership meeting and shall nominate two persons for each of the six Directors-at-Large, and two persons for each of the three Network Directors as defined in Section 2 above. Such nominations shall be reported to the membership during the first session of the annual meeting.”

That Article VII, Section 5, of the By-Laws be amended to read as follows:

“Section 5. Election of Directors-at-Large and Network Directors. Election of Directors-at-Large and Network Directors shall proceed as follows:

A. The President shall appoint an Elections Committee of three persons.
B. The Elections Committee shall prepare ballots upon which there shall be arranged the names of the twelve nominees for Directors-at-Large in six groups of two names each, and the names of the six nominees for Network Directors in three groups of two names each.
C. The Elections Committee shall compile a list of Active Members eligible to vote in the elections.
D. The Elections Committee shall distribute ballots.
E. The Elections Committee shall on the second day of the membership meeting announce a time and place for balloting and shall supervise such balloting.
F. Immediately after the conclusion of balloting, the Elections Committee shall proceed to count ballots and announce the results.
G. The nominee receiving the highest number of votes in each of the six groups shall be declared elected.”

That Article VII, Section 6, of the By-Laws be amended to read as follows:

“Section 6. Tenure. All Directors-at-Large and Network Directors shall be elected to hold office until the conclusion of the membership meeting to be held next after their election. District Directors shall assume office at the first meeting of the Board of Directors following the meeting of the membership held after their election and shall hold office until the close of the second annual meeting after assuming office; provided: that District Directors elected at the 1938 annual membership meeting by District 1, District 3, District 5, District 7, District 9, District 11, District 13, District 15 and District 17, shall serve until the close of the 1939 membership meeting and that District Directors elected at the 1938 annual membership meeting by District 2, District 4, District 6, District 8, District 10, District 12, District 14, and District 16, shall serve until the close of the 1940 membership meeting.”

(EXPLANATION: Matter in italics is new; matter in parentheses is to be omitted.)

The second amendment is as follows:

That Article III, Section 2, of the By-Laws be amended by striking therefrom the following: “(licensed within the band 550 to 1600 kilocycles)” and inserting in lieu thereof the following: “the term ‘radio broadcasting’ as used herein is defined as the free dissemination to the general public, by means of electro-magnetic waves, of intelligence and entertainment appealing either to the aural or visual senses or both.”

The section, as amended, will read as follows:

“Article III. Membership and Districts. . . .

Section 2. Active members. Any individual, firm or corporation engaged in the operation of a radio broadcasting station within the United States or its dependencies shall be eligible to Active Membership in the Association to the extent of one membership for each radio broadcasting station which it operates. The term ‘radio broadcasting’ as used herein is defined as the free dissemination to the general public, by means of electro-magnetic waves, of intelligence and entertainment appealing either to the aural or visual senses or both.”

POLITICAL BROADCASTS

Following a thorough discussion of the subject, the Board of Directors, at a meeting held in New York last Saturday, expressed the view that political broadcasts should be limited to speakers, interviews and announcements, and to broadcasts of bona fide political meetings or rallies held outside the studio.

It was the feeling of the Board that stations and networks will find that the best interests of the industry will be served by a broadcasting policy which would bar the following: dramatizations of political issues, either in the form of announcements or programs; studio political “rallies”; audience participation programs such as the
“Man on the Street” type; anonymous, simulated and unidentified voices at any time.

The Board discussed the matter of the sale of time on election day, and came to the conclusion that this is a subject, in some states affected by law, within the decision of the individual broadcaster. They also discussed but took no action on the matter of limitation to not more than one hour in any one evening to any one candidate.

FOREIGN LANGUAGE BROADCASTS

The Board of Directors urges all broadcasting stations carrying foreign language programs “to exercise extreme precautions against the use of their facilities, wittingly or unwittingly, to promote propaganda inimical to the interests of the United States.”

The Board, at a meeting in New York, adopted the following resolution:

“RESOLVED, that the Board of Directors of the National Association of Broadcasters recognizes the importance of preserving freedom of speech and radio, and the necessity of serving the interests of that segment of the listening public which is most effectively reached by broadcasts in foreign languages. During the present period of emergency, stations carrying foreign language broadcasts are urged to exercise extreme precautions against the use of their facilities, wittingly or unwittingly, to promote propaganda inimical to the interests of the United States. Scripts should be carefully scrutinized in advance by station managers, and appropriate measures should be taken to guard against deviation from approved scripts.”

In connection with the resolution, Neville Miller issued the following statement:

“The Board, mindful of the traditions of free speech and free radio, and of the value of foreign language broadcasting to reach important groups of citizens, urgently recommends to all stations carrying foreign languages that in advance of their presentation,

“(1) All scripts in foreign languages be carefully read and appraised in the light of American national defense;

“(2) After the station’s approval of such scripts, adequate and capable linguists in whom complete confidence may be reposed, shall be utilized to supervise active presentation on the air to prevent possible ad lib insertions or deviations from the scripts;

“(3) A complete file of continuity and script of all foreign language broadcasts should be kept.

“The Board further is of the opinion that the licensees of broadcasting stations operating in the foreign language field are capable of handling this problem intelligently and voluntarily, and their service to national defense, both potential and actual, in maintaining intimate contact and understanding with foreign language groups should be maintained.”

BMI Developments

Two more stations are welcomed to the list of BMI subscribers and licensees:

KVOD—Denver, Colorado.
WGR—New Albany, Indiana

On June 21 there was a joint meeting of the BMI board of directors with the NAB directors and representatives of IRNA and NIB at the Waldorf-Astoria Hotel in New York. The meeting was devoted to a consideration of various BMI matters and resulted in a unanimous expression of approval of the BMI work to date and of the general project of financing the expanded activities of BMI. Details of the expansion project were left to the judgment of the BMI board.

Trade papers have recently published stories about the proposed acquisition by BMI of the Robbins, Feist, and Miller catalogues (all controlled by Metro-Goldwyn-Mayer Pictures, Inc.) at a sum in excess of $4,000,000. It has been common knowledge on Tin Pan Alley that BMI representatives have been carrying on negotiations with representatives of these and other ASCAP music publishers. No negotiations have been consummated or deals concluded with any music publishing houses, other than those already announced, and BMI members can be assured that authoritative statements will be given to members of BMI through the usual channels at least as soon as to the press, in the event that BMI concludes outstanding catalogue acquisitions with any publishing houses either within or without ASCAP.

At the Waldorf meeting BMI officers received further strong confirmation of the desire of BMI subscribers for an increased amount of BMI and other non-ASCAP music in transcribed form. M. E. Tompkins, BMI’s General Manager, gave assurances that transcriptions would be made available to meet this demand. For this purpose he is inviting representatives of the various transcription companies to meet with him in the near future. At this meeting plans and arrangements will be made so that the transcription industry, in cooperation with BMI, may furnish an ample supply of music in recorded form suited to the needs of all stations.

One ASCAP official excused the delay in issuing the proposed license contracts on the ground that every time the committee met to approve the release of the contracts they got some new ideas about them.

On that point broadcasters seem to be, for once, in the same position as ASCAP officials. Now that the contracts have been released, every time a broadcaster looks at them he can think of new things to say—most of them unprintable.

Among the six or eight hundred manuscripts that BMI’s editors receive each week there are some choice items which the public will probably never see. Some sort of prize for originality must be awarded to the ambitious writer who submitted a manuscript which proved to be the music of “The Star-Spangled Banner” decorated with new words. A Rand-McNally atlas might be a fitting prize for another writer who had the palms of Hawaii waving against the blue skies of Tahiti. And certainly a consolation prize ought to go to the songbird who sang, “I’m Only An Egg In A Love Nest.”

June 28, 1940 — 4371
Samuel R. Rosenbaum, WFIL, resigned with regret last week as a BMI director. Mr. Rosenbaum notified Neville Miller that the pressure of other business matters in Philadelphia made it impossible for him to attend board meetings regularly, and that he thought he should make way for someone who could. The board elected Paul W. Morency, WTIC, to succeed Mr. Rosenbaum.

**Legal**

**"ECONOMIC INJURY"**

Broadcasters interested in the “economic injury” question will read with interest the FCC’s summary of its decision in an Erie, Pa., case:

Congress intent would be nullified and Supreme Court declaration concerning the desirable effects of competition would be meaningless if the FCC were required to deny a radio station entry into the field merely because it would have an adverse effect on an existing station, declares the Commission in denying a petition for a rehearing filed by WLEU Broadcasting Company, Erie, Pa., on the Commission’s grant of a construction permit to the Presque Isle Broadcasting Co., for a new station at that place. To quote from the Commission’s decision:

“It is a direct contradiction of the proposition that free competition is the basic principle of the American system of broadcasting to contend that the Commission is under a duty to consider the effect which competition may have upon the ability of an existing licensee to continue to serve the public. It is implicit in the idea of free competition that public interest cannot possibly be adversely affected by the failure of an existing station to survive due to increased competition, but can follow unless the new station’s competitive efforts enable it to render a superior public service.

“The Supreme Court has made it perfectly clear that ‘Congress intended to leave competition in the field of broadcasting where it found it’ and to permit ‘a licensee to survive or succumb according to his ability to make his programs attractive to the public.’ A licensee is not entitled to be protected from competition and the Commission is under no duty to make findings on the effect of such competition on the licensee.’ The Commission notes a vital distinction between the situation where an applicant is not financially qualified and the case where the applicant is so qualified, but points out that the petitioner does not allege that this applicant is not financially qualified but bases its complaint on the possible effect of competitive effort. The statute does not require the Commission to consider the latter factor but makes success or failure in the broadcasting business depend solely on a licensee’s “ability to make his programs attractive to the public.” WLEU, the only broadcast station in Erie at the present time, operates on 1420 kilocycles with 250 watts, unlimited time. It devotes approximately 40 per cent of its time to NBC Blue Network programs. The Presque Isle Broadcasting Co., which received a construction permit March 13, proposes a local program service. There are 73 churches, 25 charitable organizations, 30 educational institutions, and more than 100 civic or social organizations in Erie. The Presque Isle Broadcasting Co. proposes to operate on 1500 kilocycles with 250 watts day and 100 watts night.

Russell P. Place, NAB counsel, made the following comment:

In the Saunders Brothers decision the Supreme Court, in addition to the quotation given by the Commission, said: “We hold that resulting economic injury to a rival station is not in and of itself, and apart from considerations of public convenience, interest or necessity, an element the Commission must weigh and as to which it must make findings in passing on an application for a broadcast license.”
The Court went on, however, to make the following observations:

"This is not to say that the question of competition between a proposed station and one operating under an existing license is to be entirely disregarded by the Commission, and, indeed, the Commission's practice shows that it does not disregard that question. It may have a vital and important bearing upon the ability of the applicant adequately to serve his public; it may indicate that both stations,—the existing and the proposed,—will go under with the result that a portion of the listening public will be left without adequate service; it may indicate that, by a division of the field, both stations will be compelled to render inadequate service. These matters, however, are distinct from the consideration that, if a license be granted, competition between the licensee and any other existing station may cause economic loss to the latter."

It would therefore appear that the second sentence quoted above from the Commission's decision may indicate a lack of appreciation of all that the Court said in the Saunders Brothers decision. The Commission's statement that "It is implicit in the idea of free competition that public interest cannot possibly be adversely affected by the failure of an existing station to survive due to increased competition, because this result cannot follow unless the new station's competitive efforts enable it to render a superior public service" overlooks the views of the Supreme Court that it is possible for both stations to go under and that a division of the field may compel both stations to render inadequate public service.

**LIBEL LAW UNCONSTITUTIONAL**

On June 21, Judge Shields of the Circuit Court for Duval County, Florida, held that the Florida radio defamation statute, Chapter 19616, Acts of 1939, is unconstitutional. In denying the defendant Florida Broadcasting Company's motion to dismiss the declarations in the three companion libel cases of Boyd, Haimowitz and Nooney vs. Brown Whately and Florida Broadcasting Company, Judge Shields said:

"1. By said motion to dismiss, which raises the same defense to plaintiff's declaration as the 25th ground of said Florida Broadcasting Company's demurrer, said Company moved the Court to dismiss it from this cause because, 'By the express terms of Chapter 19616 Laws of Florida, which was in full effect and operation when the alleged libelous statements were published or uttered by plaintiff Brown Whately in a radio broadcast over the broadcasting station owned and operated by this defendant, this defendant is not liable for any damages for any defamatory or libelous statements so published or uttered.

"It appears that the practical effect of the Act relied on would be to prohibit the recovery from a Radio Broadcasting Company of any damages of any kind, including actual or compensatory damages, for any libelous statement which might be uttered as part of a radio broadcast from its station.

"The Act clearly violates the spirit and the letter of Sections 1, 4, 12 and 13 of the Declaration or Rights or the Constitution of Florida which provide: That all men are equal before the law and have certain inalienable rights, among which are those of enjoying life and liberty, acquiring, possessing and protecting property; that all Courts in this State shall be open, so that every person may have full right to the cure of his own cause; that no person shall be deprived of life, liberty, or property without due process of law; that every person may freely speak and write his sentiments on all subjects, being responsible for the abuse of that right. It is, therefore, the opinion of the Court that said Act is unconstitutional and void, and that said motion to dismiss should be, and the same is hereby denied."

On other points, Judge Shields ruled with the defendants and sustained their demurrers. These cases will be appealed to the Supreme Court of Florida in due course.

The Florida statute is as follows:

"The owner, lessee, licensee or operator of a radio broadcasting station, and the agents or employees of any such owner, lessee, licensee or operator, shall not be liable for any damages for any defamatory or libelous statements published or uttered in or as a part of a radio broadcast, by one other than such owner, lessee, licensee or operator, or agent or employee thereof, unless the said owner, lessee, licensee and operators or agent or employee affirmatively declares that such statements are made for and in behalf of such owner, lessee, licensee or operator of such radio station or its agent or employee."**

"LEGALLY QUALIFIED" CANDIDATES

Members desiring information as to whether or not political candidates are legally qualified in their State should communicate with the Legal Department.

**BBC REBROADCASTS**

The NAB has been advised by Gerald Cock of the British Broadcasting Corporation, 620 Fifth Avenue, New York, that any station wishing to rebroadcast BBC direct from Europe should communicate with him.

---

**Promotion**

**RMA RECOMMENDS RADIO ADVERTISING BY DEALERS**

The RMA is on record with its members on the matter of broadcasting. Definite recommendations are made. The text of RMA's communication to members, as received by Arthur Stringer, appears below.

The idea behind the letter is to give assistance to NAB member stations in the solicitation of cooperative advertising from radio distributors and dealers.

A copy of General Electric's folio of spot broadcasting announcements, featuring its 1941 Golden Tone radio line, has just come off the press. One of the first copies has been received at headquarters. The announcements are exceptionally well done and will deliver.

Announcements of other radio manufacturers are undoubtedly in process of production or distribution.

Remember, the key man in securing broadcast business in the field is not at the factory. He is in your territory and is waiting to be sold.

Receiver spot business is getting better each year. 1940-41 should make a record.

Aside from station income, there is another reason for getting set accounts on the air. They help in building better circulation. The owner of a new set listens longer than the owner of a worn out receiver. Reception is also better.

When reallocation comes, about 2 million sets will become obsolete so far as being able to get the entire spectrum from 550-1600 kilocycles.

Most all of the sets, if not all, to be sold this year will be able to get all standard stations after the change,
though of course the new push button sets will have to be reset.

Several stations have already reported signing radio business. Nathan Lord, WAVE, Louisville, is one. The account is Philco Sales & Service, Philco distributors.

The RMA letter to members reads:

"Action by RMA members, especially large companies, is recommended by the RMA Board of Directors for further cooperation in the joint radio promotion campaign of the National Association of Broadcasters and RMA.

"The broadcasters of NAB, local stations as well as networks, have been and now are giving splendid service to the radio industry with many special programs, spot announcements, promotion features and other activities—all aiding manufacturers, distributors and dealers to sell more radio sets and also increase the unit of sale.

"Local broadcasters desire to be placed at least on an equal basis of competition with newspapers, in respect to the cooperative advertising allowances of manufacturers to their distributors and dealers. The RMA committee in the joint promotion campaign, and also our officers and directors who have held conferences with the NAB, agree that we should assist local stations to solicit part of the cooperative advertising allowances of distributors and dealers. This can be accomplished if RMA members will supply to their distributors advertising material, such as forms of spot announcements, continuity, etc., similar to the advertising material furnished to distributors for newspaper use. This is recommended so that local broadcast stations may better solicit such local advertising from radio distributors and dealers.

"Also it would be effective if you would send your distributors a letter reiterating your company's faith in the power of radio broadcast advertising, especially for replacement sales. Such a letter might well point out the close community of interest existing between radio distributors and dealers and the local broadcast stations, together with the necessity of their working closer together for their mutual interests. Such an expression would be in accordance with the views expressed by members of the RMA committee and RMA Board of Directors who were appointed to work out the joint national campaign of industry cooperation with NAB. If you will send your distributors (or so interest your advertising agency) samples of the suggested distributor-dealer spot announcements, continuity, etc., and suggest their use on broadcasting stations, it would be most helpful.

"It is now desired that RMA members demonstrate to NAB and its members that they are doing their part by encouraging their distributors and dealers to place cooperative advertising with local stations. The broadcasters are helping your sales. Please do your part to help them."

RADIO FESTIVAL

STATION MANAGERS:

Please mail your Radio Festival prize winning essays to headquarters. So as not to disbar late contestants, the time to receive essays is hereby extended to July 15, 1940.

FRIENDLY VIRGINIANS:

Virgini ans are friendly folks, just how friendly was evident during National Radio Festival week in Richmond. How they feel on this subject is seen from the broadcast of Walter R. Bishop, director of public relations, WRVA, in welcoming to the airwaves the new radio station, WPID, Petersburg:

"Sometimes our contemporaries," said Mr. Bishop, "are designated as our 'competitors' in the field of broadcasting. We always think of them as our 'neighbors,' and as we salute WPID, our new neighbor, this evening, we express the sincere hope that our future relations may merit for us both the title of 'good neighbors.'

"It seems appropriate that during the week which has been set aside as National Radio Festival Week, this station should make its debut and take its place among the 800 broadcasting establishments of the nation at a time when the public is invited to become better acquainted with the American system of broadcasting, operating under the plan of private competition in contrast to the European system, controlled by governments which formulate policies and supervise selection of the material which is broadcast under the system of giving the listeners what these governments think they should hear, rather than what the listener may prefer. WRVA welcomes WPID as we share together the responsibility of serving an audience deserving the best, and we know that this new station will assist in upholding the traditions of the American system of broadcasting."

Mr. Bishop, as other Virginia broadcasters, is especially gratified over the action of Gov. James H. Price in officially proclaiming National Radio Festival Week in Virginia.

"We consider this a recognition of broadcasting," he said, "since the Governor does not issue these proclamations upon every request."

LISTENING POSTS:

WGAR broadcasts Radio Newsreel, 5:45—6:00 p.m., Thursdays and Saturdays, in behalf of Fleetwing Corp., whose gasoline service stations dot the landscape in Cleveland and elsewhere.

The unusual thing about this news show is that each gas station turns on a powerful set to broadcast the programs—always to a crowd. According to Carl George, WGAR program manager, Fleetwing is receiving much additional public approval on account of the establishment of listening posts at their service stations.

GAS STATIONS HELP:

This year, it is observed, that a great many more gasoline service stations throughout the United States, than last year, are selling auto radio sets. It is realized that this activity by others has added hundreds of thousands of additional listening hours.

SPECIAL TOURS:

WSPD is increasing its public prestige in Toledo through the promotion of a series of all expense-personally conducted tours to the New York World's Fair.

As outlined by Russell Gohring, program manager, the $39 cost covers round trip rail fare, meals in dining car, room at hotel with bath and radio (two in room), all breakfasts, transfer, sightseeing trips, from departure Saturday night to return on Wednesday morning. The only extras are for three luncheons and Monday dinner.

ON THE AIR:

WDZ's program manager, Hank Fisher, Tuscola, Ill., is using his 1,000 watts to good advantage this summer to increase the use of auto and portable sets. Referring to NAB's May 29 mailing, he says:

"These announcements have already been placed on our schedule and will be run until their completion. If WDZ may be of any assistance to you in the future, please don't fail to call on us."

BROADCASTERS' CABARET PARTY HUGE SUCCESS

More than 1,500 members and guests of the Advertising Federation of America enjoyed a three-hour radio program they couldn't have bought Tuesday, June 25, when the NAB Sales Managers' Division presented its Broadcasters' Cabaret Party in the Grand Ballroom of the Hotel Sherman, Chicago, at the 36th Annual AFA Convention.

Featuring twenty separate acts with over fifty well-known radio entertainers contributed by Chicago members and the networks, the gala affair was the NAB Sales Managers' salute to the AFA and affiliated advertising clubs throughout the country. A twenty-piece orchestra
provided jointly by CBS-MBS-NBC played for dancing from 8:30 to 1 a.m., and, judging from attendance and enthusiasm shown, the Radio Party was a huge success. Planned to accommodate 850, the ballroom was packed by 9 p.m. Additional tables were hastily set up in the halls and lobbies of the hotel and later arrivals overflowed into the balconies. At midnight, when the last radio act had been presented and dancing had resumed, there was still not a table to be had.

In charge of the affair and largely responsible for its success were William R. Cline, Commercial Manager of WLS, Chicago, who is national chairman of the Sales Managers’ Division, and his committee of Chicago broadcasters headed by Jules Herbubeaux, NBC, and J. Oren Weaver, CBS. Harold Safford, WLS Program Director, and his assistant, Al Boyd, handled production on the show and kept the large and varied cast moving smoothly.

A souvenir program, including pictures of the talent and brief, pertinent facts on radio as an advertising medium, was presented to everyone attending the show. NAB members who would like a copy of the program should write to Samuel J. Henry, Jr., NAB Bureau of Radio Advertising. Also representing NAB at the party were Ed Kirby, Public Relations Director, and Carl Haverlin, BMI Stations Relations Director. In addition to the AFA Board of Directors, invited convention speakers and their guests totaling over one hundred, many prominent advertising and agency executives, as well as broadcasters, were present.

Sales Managers Meet at AFA

The business sessions of the NAB Sales Managers’ Division, held June 24 and 25 in conjunction with the 36th Annual AFA Convention, drew a representative audience of sales managers and AFA members. The meetings were held under the chairmanship of William R. Cline, WLS, Chicago, who is national chairman of the Sales Managers’ Division.

More than twenty-five NAB Sales Managers met Monday morning and afternoon in a closed business session to discuss current industry sales problems. The commercial men urgently recommended the immediate adoption of a complete “Media Records” for radio, along the lines of the proposed unit plan for measuring radio advertising volume. At the open meeting Tuesday morning, more than forty were present, including agency time buyers, station and network representatives and members of the trade press. They heard Carl Haverlin, BMI Station Relations Director, in an interesting presentation of current BMI developments and their significance to advertisers. NAB was represented at the business sessions by Samuel J. Henry, Jr., NAB Bureau of Radio Advertising, and Ed Kirby, who discussed the commercial section of the NAB Code, paid political broadcasts and other developments.
and areas. They pledged themselves as Directors, to

done by the membership chairmen in the various states

solicit non-member stations. We are sending out weekly
every member will make it a part of his daily duty to

increased activity in behalf of new members and called

—formally takes its place in the ranks of recognized

personal cooperation is earnestly requested.

The drive to obtain at least fifty new members by
convention time is on. This goal can be reached if
every member will make it a part of his daily duty to
solicit non-member stations. We are sending out weekly
releases from headquarters which have aroused the
interest of many non-member stations and should be
increasingly effective. To get the desired result, your
personal cooperation is earnestly requested.

The public is assured of a reasonable amount of FM
program service initially by the Commission requiring
a daily, except Sunday, minimum operating schedule of
at least three hours during the day and three hours at
night. FM stations are further obligated to devote at
least one hour each day and one hour each night to
programs not duplicated simultaneously in the same area,
which means programs distinct from standard broadcast.
The latter provision is intended to demonstrate the full
fidelity of the FM system.

Since facsimile makes its commercial debut under FM
auspices, the Commission may now grant authority to
a high frequency broadcast station for the multiplex
transmission of facsimile and aural broadcast programs,
provided the facsimile transmission is incidental to the
aural broadcast and does not reduce the quality of the
aural program or the frequency swing required for the
transmission of FM or bring about interference on ad-

djacent channels.

In carrying out the principles set forth in the Com-
mision’s recent report following enthusiastic praise for
FM at the frequency modulation hearing, the band of
frequencies extending from 43,000 to 50,000 kilocycles
is apportioned for service areas in the following manner:

For cities or towns with a total population of less than 25,000
exclusive of adjacent rural areas, these channels are assigned:
48,900; 49,100; 49,300; 49,500; 49,700 and 49,900. This class
of station will have a service area not to exceed 500 square miles
except where definite need for a greater area is shown and no
objectionable interference will result.

To serve populations of 25,000 or more within areas of less than
3000 square miles, these channels are assigned: 44,500; 44,700;
44,900; 45,100; 45,300; 45,500; 45,700; 45,900; 46,100; 46,300;
46,500; 46,700; 46,900; 47,100; 47,300; 47,500; 47,700; 47,900;
48,100; 48,300; 48,500 and 48,700. In this class, the applicant
must specify a service area which shall comprise either a metro-

copolitan district, a city, or a particular district having common
cultural, economic, geographical or other characteristics to justify
service to the area as a unit.

For areas in excess of 3,000 square miles, the channel assignments
are: 43,100; 43,300; 43,500; 43,700; 43,900; 44,100, and 44,300.
Here the applicant can serve two or more large cities or metro-
politan districts and a large adjacent rural area; or, in exceptional
cases, one city or metropolitan district and a large adjacent rural
area.

One channel only will be assigned to a station. To
avoid possibility of objectionable interference, FM sta-
tions serving the same area will not be assigned adjacent
channels.

To safeguard the public against monopoly, no person
or group can, directly or indirectly, control more than
one FM station in the same area. Likewise, no person
or group may control more than one such station, except
upon showing that such operation would foster competi-
tion or will provide a high-frequency broadcasting service
distinct and separate from existing services, and that
such operation would not concentrate control in a manner
inconsistent with public interest, convenience, or neces-
sity. In this connection, the Commission declares that

FM Rules

Frequency modulation—now popularly known as FM
—formally takes its place in the ranks of recognized
commercial broadcasting as a result of initial rules govern-
ing regular program service of this type, the FCC
announced this week. This new service will be known
as “high frequency broadcast” to distinguish it from
standard broadcast.

Rapid development of FM stations throughout the
nation is expedited by Commission action in apportioning
frequencies and otherwise stipulating operation of FM
so as to make such broadcast available to as many
American homes as possible. Under the rules just ap-
proved, FM facilities are, in effect, available to every
community in the land.

Important in these rules is the requirement that the
program service shall embody presentation particularly
adapted to the high fidelity quality of this new method
of broadcast. This, with its staticless qualities, assures
the listening public an improved type of service.

Unlike standard (amplitude modulation) broadcast
stations, FM stations will be licensed to serve a specified
area in square miles. In places where one or more FM
stations are located, their radius of service will be made
as comparable as possible. Such parity of service is
feasible because FM is not subject to objectionable
interference as in the case of the older long distance type
of broadcasting.

WTNJ—Trenton, New Jersey

4376 — June 28, 1940
control of more than six stations by the same person or persons under common control is inconsistent with the public interest.

The Commission will not authorize the installation of a transmitter having a maximum rated power more than twice the operating power of the station. In employing transcriptions, methods of making announcements and other routine, high frequency stations will be governed largely by the same rules which apply to standard broadcast stations.

The rules announced today cover the basic principles believed necessary by the Commission to give FM a proper start commercially. They will be supplemented by Standards of Good Engineering Practice for High Frequency Broadcast Stations, to be made available next week, together with a chart to be used for determining the signal range of this type of station. The new application forms for high frequency stations will likewise be available shortly.

As previously announced, applications will not be considered until the engineering standards and the new forms are ready. Thereafter, as soon as applications are received, the Commission will act on them promptly. Practical operation and progress of FM will undoubtedly result in changes to these rules and standards from time to time. Meanwhile, the Commission insures both public and industry an orderly development of high frequency broadcast stations by requiring proof of performance by FM stations within one year from the date of inauguration of this type of service.

FEDERAL COMMUNICATIONS COMMISSION
WASHINGTON, D. C.
June 22, 1940.

The existing rules governing standard broadcast stations, and the new rules governing high frequency broadcast stations are to be combined in Part 3 of the Commission's rules, which will be entitled "Rules Governing Standard and High Frequency Broadcast Stations."

Subpart A of the rules, applicable only to standard broadcast stations comprises existing rules 3.1 to 3.66 inclusive. Subpart C, containing general rules applicable both to standard and high frequency broadcast stations, will comprise existing rules 3.67 to 3.104 inclusive. Subpart B, comprising the new rules governing high frequency broadcast stations is as follows:

SUB-PART B. RULES GOVERNING HIGH FREQUENCY BROADCAST STATIONS

Definitions

Sec. 3.201 High frequency broadcast station. The term "high frequency broadcast station" means a station licensed primarily for the transmission of radiotelephone emissions intended to be received by the general public and operated on a channel in the High Frequency broadcast band.

Sec. 3.202 High frequency broadcast band. The term "high frequency broadcast band" means the band of frequencies extending from 43,000 to 50,000 kilocycles, both inclusive.

Sec. 3.203 Frequency Modulation. The term "frequency modulation" means a system of modulation of a radio signal in which the frequency of the carrier wave is varied in accordance with the signal to be transmitted while the amplitude of the carrier remains constant.

Sec. 3.204 Center Frequency. The term "center frequency" means the frequency of the carrier wave with no modulation. (With modulation the instantaneous operating frequency swings above and below the center frequency. The operating frequency with no modulation shall be the center frequency within the frequency tolerance.)

Sec. 3.205 High Frequency broadcast channel. The term "high frequency broadcast channel" means a band of frequencies 200 kilocycles wide and is designated by its center frequency. Channels for high frequency broadcast stations begin at 43,100 kilocycles and continue in successive steps of 200 kilocycles to and including the frequency 49,900 kilocycles.

Sec. 3.206 Service area. The term "service area" of a high frequency broadcast station means the area in which the signal is not subject to objectionable interference or objectionable fading. (High frequency broadcast stations are considered to have only one service area; for determination of such area see Standards of Good Engineering Practice for High Frequency Broadcast Stations.)

Sec. 3.207 Antenna Field Gain. The term "antenna field gain" of a high frequency broadcast antenna means the ratio of the effective free space field intensity produced at one mile in the horizontal plane expressed in millivolts per meter for 1 kilowatt output power to 137.6.

Sec. 3.208 Free Space Field Intensity. The term "free space field intensity" means the field intensity that would exist at a point in the absence of waves reflected from the earth or other reflecting objects.

Sec. 3.209 Frequency swing. The term "frequency swing" is used only with respect to frequency modulation and means the instantaneous departure of the carrier frequency from the center frequency resulting from modulation.

Sec. 3.210 Multiple transmission. The term "multiple transmission" means the simultaneous transmission of two or more signals by means of a common carrier wave. (Multiple transmission as applied to high frequency broadcast stations means the transmission of facsimile or other aural signals in addition to the regular broadcast channels.)

Sec. 3.211 Percentage Modulation. The term "percentage modulation" with respect to frequency modulation means the ratio of the actual frequency swing to the frequency swing required for 100 percent modulation expressed in percentage. (For high frequency broadcast stations, a frequency swing of 75 kilocycles is standard for 100 percent modulation.)

Sec. 3.212 Experimental period. The term "experimental period" means that period of time between 12 midnight and sunrise. This period may be used for experimental purposes in testing and maintaining apparatus by the owner of any high frequency broadcast station on its assigned frequency and with its authorized power, provided no interference is caused to other stations maintaining a regular operating schedule within such period.

Sec. 3.213 Main studio. The term "main studio" means, as to any station, the studio from which the majority of its programs originate, and from which a majority of its station announcements are made of programs originating at remote points.

Allocation of Facilities

Sec. 3.221 Basis of Licensing High Frequency Broadcast Stations. High frequency broadcast stations shall be licensed to serve a specified area in square miles. The contour bounding the service area and the radii of the contour shall be determined in accordance with the Standards of Good Engineering Practice for High Frequency Broadcast Stations.

Sec. 3.222 Area Served. (a) High frequency broadcast stations shall be licensed to serve areas having characteristics falling within the provisions of subparagraphs (a), (b), or (c) of Sec. 3.225 hereof. The Commission, in considering applications for high frequency broadcast stations, will establish service areas.

Sec. 3.223 Time of Operation. All high frequency broadcast stations shall be licensed for unlimited time operation.

Sec. 3.224 Showing Required. Authorization for a new high frequency broadcast station must be made available not less than two months before announcement of its operation.
frequency broadcast station or increase in facilities of an existing station will be issued only after a satisfactory showing has been made in regard to the following matters:

(a) That the area and population which the applicant proposes to serve has the characteristics of an area described in subparagraphs (a), (b), or (c) of Sec. 3.225 hereof. The application shall be accompanied by a full analysis of the basis upon which the area as set forth in the application was determined. No application for construction permission for a new station or change of service area will be accepted unless a definite site, full details of the proposed antenna, and a suitable map showing the expected service area are furnished with the application. (See Standards of Good Engineering Practice for High Frequency Broadcast Stations.)

(b) Where a service area has been established in which one or more existing high frequency broadcast stations are in operation, that the contours of any new station proposed to serve such area will compare with those of the existing station or stations as nearly as possible, so that the service area already established should be modified.

(c) That objectionable interference will not be caused to existing stations or that if interference will be caused the need for the proposed service outweigh the need for the service which will be lost by reason of such interference.

(d) That the proposed station will not suffer interference to such an extent that its service would be reduced to an unsatisfactory degree. (For determining objectionable interference see Standards of Good Engineering Practice for High Frequency Broadcast Stations.)

(e) That the technical equipment proposed, the location of the transmitter, and other technical phases of operation comply with the regulations governing the same, and the requirements of good engineering practice. (See technical regulations herein and Standards of Good Engineering Practice for High Frequency Broadcast Stations.)

(f) That there is a need for the proposed program service in the area to be served.

(g) That the applicant is financially qualified to construct and operate the proposed station; and, if the proposed station is to serve substantially the same area as an existing station, that applicant will be able to compete effectively with the existing station or stations.

(h) That the program service will include a portion of programs particularly adapted to a service utilizing the full fidelity and capability of the system, as set forth in the Standards of Good Engineering Practice for High Frequency Broadcast Stations.

(i) That the proposed assignment will tend to effect a fair, efficient, and equitable distribution of radio service among the several states and communities.

(j) That the applicant is legally qualified, is of good character, and possesses other qualifications sufficient to provide a satisfactory public service.

(k) That the facilities sought are subject to assignment as requested under existing international agreements and the Rules and Regulations of the Commission.

(l) That the public interest, convenience, and necessity will be served through the operation under the proposed assignment. Sec. 3.225 Channel Assignments. The channels set forth below with the indicated center frequencies are available for high frequency broadcast stations:

(a) (1) Applicants for licenses to serve cities or towns having a total population of less than 25,000 (approximate) (exclusive of subdivisions of cities or metropolitan districts having such common cultural, economic, geographical, or other characteristics as to justify service to the area as a unit.

(b) (1) Applicants for licenses to serve areas in excess of 3,000 square miles shall apply for one of the following channel assignments:

<table>
<thead>
<tr>
<th>Channel Assignments</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>43100</td>
<td>44100</td>
</tr>
<tr>
<td>43500</td>
<td>44500</td>
</tr>
<tr>
<td>43700</td>
<td>44300</td>
</tr>
</tbody>
</table>

The application shall specify a service area which shall comprise (i) either a metropolitan district, (ii) a city, (iii) an area which may comprise one or more towns or communities or subdivisions of cities or metropolitan districts having such common cultural, economic, geographical, or other characteristics as to justify service to the area as a unit.

(c) (1) Applicants for licenses to serve areas in excess of 3,000 square miles shall apply for one of the following channel assignments:

<table>
<thead>
<tr>
<th>Channel Assignments</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>43100</td>
<td>44100</td>
</tr>
<tr>
<td>43500</td>
<td>44500</td>
</tr>
<tr>
<td>43700</td>
<td>44300</td>
</tr>
</tbody>
</table>

The applications shall specify a service area which shall comprise two or more large cities or metropolitan districts and a large adjacent rural area; or, in exceptional cases, one city or metropolitan district and a large adjacent rural area.

(d) High frequency broadcast stations shall use frequency modulation exclusively.

(e) Stations serving all or a substantial part of the same area will not be assigned adjacent channels.

(f) One channel only will be assigned to a station.

Sec. 3.226 Facsimile broadcasting and multiplex transmission. The Commission may grant authority to a high frequency broadcast station for the multiplex transmission of facsimile and aural broadcast programs provided the facsimile transmission is incidental to the aural broadcast and does not either reduce the quality of or the frequency swing required for the transmission of the aural program. The frequency swing for the modulation of the aural program should be maintained at 75 kc. and the facsimile signal added thereto. No transmission outside the authorized band of 200 kc. shall result from such multiplex operation nor shall interference to other stations operating on adjacent channels be caused by the transmission of multiplex signals. Such an authorization may be granted on an experimental basis in accordance with Section 3.32, sub-part A.

Sec. 3.227 Proof of performance required. Within one year of the date of first regular operation of a high frequency broadcast station, continuous field intensity records along several radials shall be submitted to the Commission which will establish the actual field contours, and from which operating constants required to deliver service to the area specified in the license are determined. The Commission may grant extensions of time upon showing of reasonable need therefor.

Sec. 3.228 Multiple Ownership. (a) No person (including all persons under common control) shall, directly or indirectly, own, operate, or control more than one high frequency broadcast station that would serve substantially the same service area as another high frequency broadcast station owned, operated, or controlled by such person.

(b) No person (including all persons under common control) shall, directly or indirectly, own, operate, or control more than one high frequency broadcast station, except upon a showing (1) that such ownership, operation, or control would foster competition among high frequency broadcast stations or provide a high frequency broadcasting service distinct and separate from existing services, and (2) that such ownership, operation, or control would not result in the concentration of control of high frequency broadcasting facilities in a manner inconsistent with public interest, convenience, or necessity; provided, however, that the Commission will consider the ownership, operation, or control of more than six high frequency broadcast stations to constitute the concentration of control of high frequency broadcasting facilities in a manner inconsistent with public interest, convenience, or necessity.

Sec. 3.229 Normal license period. All high frequency broadcast station licenses will be issued so as to expire at the hour of 3 a.m., Eastern Standard Time, on June 28, 1940, and will be issued for a normal license period of one year, expiring as follows:

(a) For stations operating on the frequencies 48900, 49100, 49300, 49500, 49700, and 49900, April 1.

(b) For stations operating on the frequencies 44900, 44700, 44900, 45100, 45300, 45500, 45700, 45900, 46100, 46300, and 46500, May 1.

The word "control" as used herein is not limited to majority stock ownership but includes actual working control in whatever manner exercised.
C. For stations operating on the frequencies 46700, 46900, 47100, 47300, 47500, 47700, 47900, 48100, 48300, 48500, and 48700, on any frequency of the band 25,300-26,900 kilocycles for the use of High Frequency Broadcast Stations.

D. For stations operating on the frequencies 43100, 43300, 43500, 43700, 43900, 44100, and 44300, July 1.

EQUIPMENT

Sec. 3.241 Maximum power rating. The Commission will not authorize the installation of a transmitter having a maximum rated power more than twice the operating power of the station. Sec. 3.242 Maximum rated carrier power; how determined. (a) The maximum rated carrier power of a standard transmitter shall be determined by the manufacturer's rating of the equipment.

(b) The maximum rated carrier power of a composite transmitter shall be determined by the sum of the applicable commercial ratings of the vacuum tubes employed in each stage of the transmitter.

Sec. 3.243 Frequency monitor. The licensee of each high frequency broadcast station shall have in operation at the transmitter a frequency monitor independent of the frequency control of the transmitter. It shall have a stability of 20 parts per million. For detailed requirements thereof see Standards of Good Engineering Practice for High Frequency Broadcast Stations.

Sec. 3.244 Modulation Monitor. The licensee of each high frequency broadcast station shall have in operation at the transmitter an approved modulation monitor. For detailed requirements thereof see Standards of Good Engineering Practice for High Frequency Broadcast Stations.

Sec. 3.245 Required transmitter performance. (a) The external performance of high frequency broadcast transmitters shall be within the minimum requirements prescribed by the Commission contained in the Standards of Good Engineering Practice for High Frequency Broadcast Stations.

(b) The transmitter center frequency shall be controlled directly by automatic means which do not depend on inductances and capacities for inherent stability.

(c) The transmitter shall be wired and shielded in accordance with good engineering practice and shall be provided with safety features in accordance with the specifications of article 810 of the current National Electrical Code as approved by the American Standards Association.

Sec. 3.246 Indicating Instruments. The direct plate circuit current and voltage shall be measured by instruments having an acceptable accuracy. (See Standards of Good Engineering Practice for High Frequency Broadcast Stations.)

Sec. 3.247 Auxiliary and Duplicate Transmitters. See Sections 3.63 and 3.64 for provisions governing the use of auxiliary and duplicate transmitters at high frequency broadcast stations.

Sec. 3.248 Changes in equipment and antenna system. Licensees of high frequency broadcast stations shall observe the following provisions with regard to changes in equipment and antenna system:

(a) No changes in equipment shall be made:

1. That would result in the emission of signals outside of the authorized channel.

2. That would result in the external performance of the transmitter being in disagreement with that prescribed in the Standards of Good Engineering Practice for High Frequency Broadcast Stations.

(b) Specific authority, upon filing a request therefor, is required for a change in service area or for any of the following changes:

1. Changes involving an increase in the maximum power rating of the transmitter.

2. A replacement of the transmitter as a whole.

3. Change in the location of the transmitter antenna.

4. Change in antenna system, including transmission line, which would result in a measurable change in service which would affect the determination of the operating power by the direct method. If any change is made in the antenna system or any change made which may affect the antenna system, the method of determining operating power shall be changed immediately to the indirect method.

5. Change in location of main studio to outside of the borders of the city, state, district, territory, or possession.

6. Change in the power delivered to the antenna.

7. Change in the indicating instruments installed to measure the antenna current or transmission line, direct plate circuit voltage and the direct current of the last radio stage, except by instruments of the same type, maximum scale reading and accuracy.

3 Changes in the location of the main studio except as provided for in subsection (b) 5.

(d) Other changes, except as above provided for in this section or in Standards of Good Engineering Practice for High Frequency Broadcast Stations, may be made at any time without the authority of the Commission, provided that the Commission shall be promptly notified thereof, and such changes shall be shown in the next application for renewal of license.

Sec. 3.251 Operating power; how determined. The operating power, and the requirements for maintenance thereof, of each high frequency broadcast station shall be determined by the Standards of Good Engineering Practice for High Frequency Broadcast Stations.

Sec. 3.252 Modulation. (a) The percentage of modulation of all stations shall be maintained as high as possible consistent with good quality of transmission and good broadcast practice and in no case less than 85 percent on peaks of frequent recurrence during any selection which normally is transmitted at the highest level of the program under consideration.

Sec. 3.253 Frequency tolerance. The operating frequency without modulation of each broadcast station shall be maintained within 2000 cycles of the assigned center frequency.

Operation

Sec. 3.261 Minimum operating schedule; service. (a) Except Sundays, the licensee of each high frequency broadcast station shall maintain a regular daily operating schedule which shall consist of at least three hours of operation during the period 6 a.m. to 6 p.m., local standard time and three hours of operation during the period 6 p.m. to midnight, local standard time. In an emergency, however, when due to causes beyond the control of the licensee, it becomes impossible to continue operating, the station may cease operation for a period not to exceed ten days, provided that the Commission and the Inspector in Charge of the radio district in which the station is located shall be notified in writing immediately after the emergency develops.

(b) Such stations shall devote a minimum of one hour each day during the period 6 a.m. to 6 p.m., and one hour each day during the period 6 p.m. to midnight, the programs not duplicated simultaneously as primary service in the same area by any standard broadcast station or by any high frequency broadcast station. During said one hour periods, a service utilizing the full fidelity capability of the system, as set forth in the Standards of Good Engineering Practice for High Frequency Broadcast Stations, shall be rendered. However, the Commission may, upon request accompanied by a showing of reasons therefor, grant exemption from the foregoing requirements, in whole or in part, for periods not in excess of three months.

In addition to the above requirements, the Commission will consider, in determining whether public interest, convenience, and necessity has been or will be served by the operation of the station, the extent to which the station has made or will make use of the facility to develop a distinct and separate service from that otherwise available in the service area.

FEDERAL COMMUNICATIONS COMMISSION
Washington, D. C.

Notice Concerning High Frequency Broadcast Stations

In connection with the revised rules and regulations governing High Frequency Broadcast Stations, which place FM (frequency modulation) on a commercial basis, the Commission will, at an early date, repeal Sections 4.111 through 4.117 of its rules which have heretofore prohibited, in part, the experimental operation of such stations.

Section 4.114 of the rules to be repealed allocates frequencies in the band 25,300-26,900 kilocycles for the use of High Frequency Broadcast Stations, and there are outstanding licenses issued on an experimental basis, subject to cancellation, for the operation of stations using these bands. The Commission contemplates that these frequencies will be made available, by revision of rules to be promulgated shortly, for Developmental Broadcast Stations covered by the provisions of Sections 4.151-4.157 of the rules.

1 See Appendix No. 3, Part 1.

June 28, 1940 — 4379
Thereafter, the Commission does not contemplate the granting of any application for the use of frequencies in the 25,300-26,900 band for experimentation looking to the establishment of any commercial domestic broadcasting service. Existing stations in this band may apply for modification of licenses to permit continued operation on their present frequency assignments under the classification of Developmental Broadcast Stations, or they may apply, under the provisions of the new rules covering High Frequency Broadcast Stations, for licenses authorizing commercial operation on the frequencies 43,000 kilocycles and above now assigned for such service.

The Commission

FCC EXPANDING FIELD FORCE FOR DEFENSE EMERGENCY

Effective policing of communications under the coordinated national defense program necessitates the Federal Communications Commission moving to augment its field force with additional fixed monitoring stations as well as new bases of operation for mobile units. Under this expansion program, which begins immediately, several hundred inspectors and other experts will be employed. President Roosevelt has allocated $1,600,000 from his $132,000,000 "blank check" defense fund for this purpose.

The additional force is needed to maintain a comprehensive 24-hour surveillance of all communication channels, inclusive of broadcast and other radio transmission. Present radio monitoring facilities will be supplemented with ten primary long-range direction-finder stations. These stations determine the bearings of unauthorized or otherwise suspicious communications. The mobile equipment, which includes direction finding apparatus, traces the origin of such transmissions.

In addition to increased monitoring duties, the field division will be required to watch radiotelegraph and radiotelephone circuits for superfluous signals, record same, and translate foreign language broadcast material. It must also make certain of the citizenship of several hundred thousand persons now charged with the responsibility of communications, as well as of their immediate families. This figure covers about 100,000 licensed radio operators, including amateurs; a like number of cable and wire operators, and other employees such as those of broadcast and other radio stations. It is necessary to know more about the private communications employees who daily handle official dispatches and other Government messages.

Another emergency task will be to guard against the possible misuse of electrical apparatus, including diathermy devices (now employed in many thousand offices of physicians), as transmitters in a manner which might jeopardize the nation's security. Still another undertaking will be to keep tab on possible use of transmitters which have been manufactured but not sold or licensed for authorized communication purposes.

The Commission now operates seven monitoring stations, in various parts of the country, which are largely devoted to making routine measurements of frequencies and determining the quality of emissions, as well as spotting interference. In the course of such work, they observe unlicensed operation incidentally. However, these monitoring stations as now manned and equipped could not cope with the additional work contemplated.

Congress recently authorized a new monitoring station for Massachusetts, but this is to relocate and improve the existing one. The new bases for mobile operation are being established at strategic points throughout the United States and its possessions.

Routine functions of the field division, which now numbers less than 200 persons, embrace inspection of all classes of stations licensed by the Commission, and the issuance of licenses; investigation of complaints of interference and illegal operation; conducting field strength surveys and analyzing signal characteristics; inspecting ship and other marine radio stations, and general regulatory supervision.

During the last fiscal year the Commission investigated more than one thousand complaints of unlicensed operation, and the number of cases pressing for investigation is growing under the present situation. Experience gained in past investigation of unlicensed stations, particularly in the use of the ultra high frequencies, has demonstrated the advantage of an inter-radio communication system for the purpose of synchronizing operations and exchanging intelligence. The prospective new primary monitoring stations and mobile units will be equipped with transmitters and receivers so as to be able to more quickly run down unlawful operation.

Since the Commission is under Civil Service, the additional personnel will come from those rolls.

NEW "DEFENSE COMMITTEE"

A Defense Communications Committee is going to be set up by the Government, it was announced Monday by FCC Chairman James Lawrence Fly at his press conference. Mr. Fly was not disposed to go into the details of the Committee or its objectives. Mr. Fly said that the Committee would undoubtedly be set up "pretty soon."

When asked for specific purposes of the setup of the Committee, Mr. Fly said that "it seemed pretty obvious." However, he stated that he was not prepared at that time to discuss specific features. On being pressed by the newsmen he said that he didn't feel that he could be expected at the present time to tell of any specific plans. He intimated that these plans would be taken up from time to time with the broadcast and other interested industries. The industries, he said, would cooperate with the Committee and the plans might not be confidential later. He was asked if the new Committee would coop-
erate with the National Defense Committee and Mr. Fly replied that no doubt it would.

It was intimated during the course of the conference that the new Defense Committee will consist of Government officials, including the FCC, Army, Navy, State and Treasury departments.

Neville Miller, Harry Butcher, CBS; Theodore Streibert, MBS, and Frank M. Russell, NBC, conferred with Chairman Fly this week about these matters.

**WCBD PETITIONS DENIED**

There is no statutory or other requirement that the FCC withhold action on a broadcast application, which it deems in the public interest, in order to consider such application on a comparable basis with some pending application. So the Commission stated in denying a petition filed by Station WCBD, Chicago, for rehearing of the grant, on May 8, of application by the Evangelical Lutheran Synod for modification of license for its Station KFUO, Clayton, Mo., to change frequency from 550 kilocycles to 830 kilocycles, with 1 kilowatt power to local sunset at Denver, and a petition for return of KFUO's subsequent application to increase power to 5 kW as a Class II station.

Station WCBD is scheduled for hearing on its application to change its frequency from 1080 kilocycles to 830 kilocycles, with 5 kilowatts power daytime. In denying WCBD's first petition, the Commission commented:

"Before petitioner's application can be denied, it must be afforded an opportunity to be heard on any grounds which we have for denying the application, and if the only basis for denying petitioner's application is the superiority of the service rendered or possessed by Evangelical Lutheran Synod (KFUO), petitioner will have ample opportunity to show that its operation as proposed will better serve the public interest than will the operation of KFUO as authorized by the instant grant. The grant herein to KFUO does not preclude the Commission at a later date from taking any action which it may find will serve the public interest."

**BROWN CONFIRMATION DELAYED**

The term of Col. Thad H. Brown as a member of the FCC expires on June 30. Owing to the Congressional recess, the Senate will not be able to take action on his nomination for reappointment before that time. Congress returns from its recess on July 1 and it is assumed that action will be taken shortly thereafter.

**FROM THE FCC MAIL BAG**

A Trenton, N. J., man is under the mistaken notion that records of all broadcast programs are filed with the Commission. It is suggested that he write to the particular station which broadcasts the particular program in which he is interested.

Likewise, a Brooklyn, N. Y., man is informed that the Commission does not require a broadcast station to file an indemnity bond to cover possible damages sustained by sponsors. Nor can the Commission help a Norfolk, Va., individual collect a $1,000 prize which he claims is due him from a certain network sponsored program.

It suggests that a Philadelphia non-baseball radio fan squawk direct to the local station which he takes to task for cancelling network programs in order to broadcast baseball scores.

A New Yorker complains to the Commission that he is being made the victim of "heat and death rays," and seems to hold radio transmissions indirectly responsible. The Commission is unable to offer help, but a doctor might.

While appreciating the patriotic motive, the Commission can only file the letter of a South Ozone Park, N. Y., man urging the Commission to require the playing of the national anthem by all broadcast stations upon going on or off the air.

**ADMINISTRATIVE ORDER NO. 3**

At a recent meeting FCC adopted Administrative Order No. 3 as follows:

*It Is Ordered, That, whenever the Chairman or Acting Chairman of the Commission shall determine a quorum of the Commission is not present, he is authorized to place the following provisions in effect for the period during which such absence or inability to act may continue:*

1. There is hereby assigned and referred to a Board consisting of all members of the Commission present and able to act, all work, business, or functions of the Federal Communications Commission arising under the Communications Act of 1934, as amended, except that portion of the work, business, or functions of the Federal Communications Commission assigned and referred to the respective Boards and individual Commissioners as provided in Administrative Order No. 2, as amended; *Provided, however, that this authority shall not extend to investigations instituted upon the Commission's own motion or, without consent of the parties thereto, to contested proceedings involving the taking of testimony at public hearings, or to investigations specifically required by the Communications Act of 1934, as amended.*

2. The Board created by sub-paragraph (1) acting by a majority thereof, shall have power and authority to hear and determine, order, certify, report, or otherwise act as to any of said work, business, or functions so assigned or referred to it, and in respect thereof shall have all the jurisdiction and powers conferred by law upon the Commission, and be subject to the same duties and obligations. Any order, decision, or report made or other action taken by said Board in respect of any matters so assigned or referred shall have the same force and effect, and may be made, evidenced and enforced in the same manner as if made, or taken by the Commission.

3. Any party affected by any order, decision or report of said Board may file a petition for rehearing by the Commission, as provided by Section 1.271 of the Commission's Rules of Practice and Procedure, and every such petition shall be passed upon by the Commission.

This Order shall become effective on the 1st day of July, 1940.

**BROADCAST MEASUREMENTS**

During the month of May, FCC experts measured 708 broadcast stations with 120 not measured.

Six hundred and fifty-six stations showed a maximum deviation within 0-10 cycles; 47 stations a deviation within 11-25 cycles; 5 stations a deviation within 26-50 cycles; no stations with a deviation over 20 cycles; and one station showing a deviation over 50 cycles.

**ADMINISTRATIVE ORDER AMENDED**

FCC has amended Paragraph 4(d) of Administrative Order No. 2 by adding the following language after the phrase, "applications for relay broadcast stations":

"Applications for consent to assignment of licenses or for consent to transfer of control of licensees of relay broadcast stations, when the Commission has on a prior date consented to a like assignment or transfer of control of the licensee of the standard broadcast station with which the relay stations are affiliated."

June 28, 1940 — 4381
MONITOR STATION

President Roosevelt on Tuesday signed the bill authorizing the expenditure of $30,000 by the FCC to establish a monitoring station in Massachusetts.

REMOVAL OF WREN DENIED

Holding that showing of need is related to the protection of listeners and not solely to the protection of private interests, the FCC has announced proposed denial of the application of radio broadcast station WREN, at Lawrence, Kans., to move its transmitter from a point near Tonganoxie to Kansas, that State, and to establish its main studio in Kansas City, Mo.

"The primary purpose of removal of WREN to Kansas City is to obtain a larger population coverage of Kansas City and its environs in order to increase its advertising revenues and serve as a more effective outlet of the Blue Network," comments the Commission in its Proposed Findings of Fact and Conclusions (No. B-99). "If the transmitter is moved as proposed in the application, station WREN would deliver satisfactory service throughout the Kansas City metropolitan area, but its service to Lawrence and other small communities in Kansas would be less satisfactory, and some rural portions of the present service area would be entirely deprived of service."

The Commission points out that the Kansas City metropolitan area is already served by at least six stations.

"The essence of the applicant's proposal, therefore, is to move its transmitter to a large metropolitan area, which already receives service from an ample number of stations, from a semi-rural area where the existing service is relatively inadequate." Concludes the Commission:

"In view of the loss or diminution of broadcast service to the area therefore served, it is incumbent upon a station proposing such a change to establish a greater need for additional broadcast service in the new area proposed to be served than may exist in the area previously served. The question of need is an important consideration under such circumstances in order that certain areas may not, by a too liberal assignment of frequencies, have the benefit of an unduly large proportion of the limited broadcast channels available to the prejudice of other districts. (F. W. Meyer, Docket No. 5074, decided November 15, 1939.) It is true that the Commission stated in the F. W. Mayer case that the showing of a public need for additional broadcast facilities is not an essential prerequisite to support the grant of an application for a new station. However, this principle is not applicable in a case such as the present where an existing station proposes to change its location, and the respective interests of different communities and areas are, therefore, involved."

"The showing made by the applicant in support of the proposed change was predicated upon two factors: First that the applicant operates on a regional frequency and should, therefore, be regarded as a station established to serve the metropolitan district of Kansas City primarily; and second, that the increase in coverage which would result from the removal of its station to the Kansas City area would make the station a more effective outlet for the Blue Network programs of the National Broadcasting Company. In so far as the first factor is concerned, it does not follow from the fact that a station is assigned a regional frequency that it must serve a metropolitan district regardless of other considerations which may be involved. The classification of stations under the Commission's rules and standards of engineering practice is purely for the administrative convenience of the Commission in allocating frequencies and is not a source of any right in licensees or applicants. Indeed, the simple answer to WREN's claim is that the applicant, having once asked the Commission to assign a regional station to the City of Lawrence, now takes the curiously inconsistent position that, by reason of that very assignment, this station should now be assigned to Kansas City. In so far as the second factor is concerned, this is related more to the private interests of the applicant and the National Broadcasting Company than it is to the interests of the communities involved. The mere fact that the applicant hopes financially by moving from a small city to a large city is not a controlling consideration in determining whether public interest, convenience, or necessity would be served by permitting such a change."

"Although an increase in the population served by WREN would result from its proposed change of site, this is not, in the instant case, sufficient to support a finding that public interest, convenience or necessity would be served by a grant of the application. The listeners who would gain such service at night are already served by six or more other stations, and the applicant has failed to make a showing concerning the present service to areas which would gain daytime service. Certain areas in Kansas which now receive service from WREN will lose such service and a number of communities, including Lawrence would be served with an inferior signal. As far as the record shows, these areas now receive service from only two stations other than WREN."

"Notwithstanding the fact that the areas which would lose service or obtain an inferior (and in some instances an unsatisfactory) signal, are smaller in population than the areas which would gain a service or obtain a better signal from WREN, the Commission is unable to find, from the evidence submitted, that the detriments to the former areas are overweighed by the proposed benefits to the latter areas, or, that the proposed change is responsive to any need which is substantial enough to outweigh this consideration. It is, therefore, unable to conclude that public interest, convenience or necessity would be served by a grant of the application of WREN."

No change was requested in the station's operating assignment on 1220 kilocycles with power of 1 kilowatt night and 5 kilowatts until local sunset, sharing time with Station KFKU, University of Kansas, also at Lawrence. Hearing on the application was held in May, 1939. The Commission's proposed findings deny the applicant's motion of March, 1940, to strike out issues relating to the need for additional service in the proposed service area, and further opines that "inasmuch as the elimination of the remaining issues can accomplish no useful purpose in view of this denial, the motion is dismissed insofar as it requests elimination of such other issues."

STATIONS SOLVE INTERFERENCE

Four unrelated radio stations in various parts of the country wanted to increase their respective power of transmission. To do this involved mutual interference. So, through the medium of the Federal Communications Commission, they worked out a directional antenna system that will enable them to cover more territory yet, at the same time, not "collide" with one another's transmissions.

The result of this get-together was climaxed when the Commission authorized construction permits as follows:

WAAT, Bremer Broadcasting Corp., Jersey City, N. J., to move transmitter to Kearney, N. J., increase power from 500 watts to 1 kilowatt, and increase hours of operation from daytime to unlimited time. WAAT operates on 940 kilocycles.

WAVE, Inc., Louisville, Ky., to move transmitter to near Jeffersvillle, Ind., and increase power from 1 kilowatt to 5 kilowatts. WAVE operates on 940 kilocycles.
FEDERAL COMMUNICATIONS
COMMISSION DOCKET

Following broadcast hearings are scheduled before the Commission for the week beginning Monday, July 1. They are subject to change.

Monday, July 1

NEW—Anthracite Broadcasting Co., Inc., Scranton, Pa.—C. P., 1370 kc., 250 watts, unlimited time.

Tuesday, July 2

NEW—The Kaw Valley Broadcasting Co., Inc., Topeka, Kans.—C. P., 1500 kc., 250 watts, unlimited time.

FUTURE HEARINGS

Following future broadcast hearings and oral arguments have been scheduled before the Commission. They are subject to change.

July 18

Oral Argument Before the Commission

Report No. B-407:
NEW—The Mayflower Broadcasting Corp., Boston, Mass.—C. P., 1110 kc., 500 watts, 1 KW LS, unlimited time (requests facilities of WAAB).
WAAB—The Yankee Network, Inc., Boston, Mass.—Renewal of license, 1110 kc., 1 KW, unlimited time; and auxiliary, 1410 kc., 500 watts, 1 KW LS. Time: Auxiliary purposes only.

August 5

NEW—Hobart Stephenson, Milton Edze, Edgar J. Korsmeyer, d/b as Stephenson, Edge & Korsmeyer, Jacksonville, Ill.—C. P., 1150 kc., 250 watts, daytime.
NEW—Helen J. Walton and Walter Bellatti, Jacksonville, Ill.—C. P., 1150 kc., 250 watts, daytime.

FEDERAL COMMUNICATIONS
COMMISSION ACTION

APPLICATIONS GRANTED

WAAT—Bremer Broadcasting Corp., Jersey City, N. J.—Granted construction permit to install new transmitter; increase power and hours of operation from 500 watts, daytime, to 6 p.m., to 1 KW unlimited time; install directional antenna for night use; and move transmitter from Jersey City to Kearney, N. J.; station operates on 940 kc. (B1-P-2704).
WAVE—WAVE, Inc., Louisville, Ky.—Granted construction permit to increase power from 1 KW to 5 KW, on 940 kc.; install new transmitter and move transmitter site from Louisville to near Jeffersonville, Ind., and install directional antenna for day and night use (B2-P-2531).
WCSH—Congress Square Hotel, Portland, Me.—Granted construction permit to increase power from 1 KW night and 2 1/2 kwatts day, to 5 KW, on 940 kc., and install directional antenna for day and night use (B1-P-2531).
WDAY—WDAY, Inc., Fargo, N. Dak.—Granted construction permit to increase night power from 1 KW to 5 KW, on 940 kc., and install directional antenna for night use (B4-P-2530).

Textile Broadcasting Co., Greenville, S. C.—Granted construction permit for new broadcast station to operate on 1900 kc., 250 watts, unlimited (B3-P-2738).
WJW—WJW, Inc., Akron, Ohio.—Granted consent to transfer of control of WJW, Inc., licensee of Station WJW, Akron, Ohio, and relay stations WEX and WEN, from William F. Jones, Ruth Rubin and Edward S. Sheek to William M. O'Neill; 1210 kc., 250 watts day and night, unlimited (B2-TC-222).
WVAE—Hammond-Calumet Broadcasting Corp., Hammond, Ind.—Granted consent to assignment of license of Station WVAE from Hammond-Calumet Broadcasting Corp. to O. E. Richardson and Fred L. Adair; 1230 kc., 100 watts day and night, unlimited time day, shares WFMN night (B4-AL-272).
KGBX—Springfield Broadcasting Co., Springfield, Mo.—Granted construction permit to install new transmitter, increase power from 500 watts to 5 KW, and make changes in directional antenna for night use; 1230 kc., unlimited time (B4-P-2510).
WFMB—Radio Station WFMB, Indianapolis, Ind.—Granted modification of license to increase night power from 1 KW to 5 KW, using directional antenna at night; 1230 kc., 5 KW day and night, unlimited time (B4-ML-354).
Herald Publishing Co., Albany, Ga.—Granted construction permit for new Class III-B broadcast station, frequency 1230 kc., 1 KW, daytime only (B3-P-2774).
MSB Broadcasting Co., Omaha, Nebr.—Granted construction permit for new Class IV broadcast station, frequency 1410 kc., 250 watts, unlimited time; exact transmitter and studio sites to be determined with Commission's approval (B4-P-2697).
KABR—Aberdeen Broadcast Co., Aberdeen, S. Dak.—Granted construction permit to install new transmitter, make changes in directional antenna (for night use), and increase power from 500 watts, 1 KW LS, to 5 KW day and night (B4-P-2625).
WHK—United Broadcasting Co., Cleveland, Ohio.—Granted construction permit to increase night power to 5 KW and install directional antenna for night use; 1390 kc., 5 KW day and night, unlimited time (B2-P-2670).
KLRA—Arkansas Broadcasting Co., Little Rock, Ark.—Granted construction permit to increase night power to 5 KW and install directional antenna for night use; 1390 kc., 5 KW day and night, unlimited time (B3-P-2573).
Khub—M. L. Medley, Cookeville, Tenn.—Granted consent to voluntary assignment of the construction permit for station WHUB from M. L. Medley to WHUB, Inc.; 1370 kc., 250 watts, unlimited time (B3-AP-31).
WNEL—Juan Piza, San Juan, P. R.—Granted construction permit to make changes in transmitting equipment; change antenna; increase power from 1 KW night, 2 1/2 KW day, to 5 KW day and night, unlimited time (B2-P-2625).

DESIGNATED FOR HEARING

Greenville Broadcasting Co., Greenville, S. C.—Application for construction permit for new broadcast station, Class IV, to operate on 1390 kc., 250 watts day and night, unlimited time (B3-P-2807).

RENEWAL OF LICENSES

KTHS—Hot Springs Chamber of Commerce, Hot Springs, Ark.—Present license extended on a temporary basis for a period of 30 days.
KOY—Salt River Valley Broadcasting Co., Phoenix, Ariz.—Grant renewal of license to continue operation for the period ending October 1, 1940.
KGBU—Alaska Radio & Service Co., Inc., Ketchikan, Alaska.—Present license further extended upon a temporary basis only, for the period ending August 1, 1940, pending determination upon application for renewal.
KMA—May Broadcasting Co., Shenandoah, Iowa.—Present license further extended upon a temporary basis only, for the period ending August 1, 1940, pending determination upon application for renewal.
KTW—The First Presbyterian Church of Seattle, Seattle, Wash.—Present license further extended upon a temporary basis only, for the period ending August 1, 1940, pending determination upon application for renewal.

June 28, 1940 — 4383
W2XBU—National Broadcasting Co., Inc., New York, N. Y.—Grant of license to operate for temporary basis only, for the period ending August 1, 1940, pending determination upon application for renewal.

KFAR—Midnight Sun Broadcasting Co., Fairbanks, Alaska.—Grant of license to cover construction permit for new broadcast station, for approval of transmitter site, approval of antenna, installation of new transmitter, and move of studio; 500 watts, day, 1840 kc., of construction permit for new station, for approval of antenna system (B2-P-2770).

WGST & Auxiliary—Georgia School of Technology, Atlanta, Ga.—Grant of license to cover application for renewal.

W9XK—State University of Iowa, Iowa City, Iowa.—Grant of license to cover construction permit for new broadcast station, for approval of antenna, installation of new transmitter (File No. Bl-PVB-54), on 288 mc. (channels 18 and 19), at Franklin Field, measurement of antenna input (Bl-Z-414).

W9XSP—Star-Times Publishing Co., St. Louis, Mo.—Grant of license to cover application for renewal.

KXO—E. R. Irey, F. M. Bowles, El Centro, Calif.—Grant of license to cover construction permit for increase in power from 250 watts to 1 KW; change in frequency to 1840 kc.; change in hours of operation from 6 a.m. to 6:30 p. m., EST, for a period not to exceed 30 days, in order to broadcast United States Army recruiting publicity.

The Mayflower Broadcasting Corp., Boston, Mass., and WAAU—The Yankee Network, Inc., Boston, Mass.—Denied petition for rehearing in re application of The Mayflower Broadcasting Corp., for a new broadcast station to operate on 1410 kc., with power of 500 watts night and 1 kw day, unlimited time, requesting the facilities now assigned to Station WAAU, and the application of The Yankee Network, Inc., for renewal of license of Station WAAU for main and auxiliary transmitters (B-107).

WAAT—Bremer Broadcasting Corp., Jersey City, N. J.—Grant of special temporary authority to operate for 30 days, from 11 a.m. to 5:45 p. m. (B5-P-1497). For installation of new transmitter, erect a new antenna, move transmitter site locally, and increase power from 1 KW to 5 KW, and retired application to closed files.

WLEU—WLEU Broadcasting Co., Erie, Pa.—Grant of license to cover application for renewal.

KTRB—Thomas R. McTammany and William H. Bates, Jr., Modesto, Calif.—Grant of special temporary authority to operate from 7:30 p.m. to midnight, PST, on July 4, 1940, in order to broadcast events incident to the Fourth of July celebration in Modesto.

The Mayflower Broadcasting Corp., Boston, Mass., and WAAU—The Yankee Network, Inc., Boston, Mass.—Denied petition for rehearing in re application of The Mayflower Broadcasting Corp., for a new broadcast station to operate on 1410 kc., with power of 500 watts night and 1 kw day, unlimited time, requesting the facilities now assigned to Station WAAU, and the application of The Yankee Network, Inc., for renewal of license of Station WAAU for main and auxiliary transmitters (B-107).

WAAU—The Yankee Network, Inc., Boston, Mass.—Grant of license to cover application for renewal.

KGB—Don Lee Broadcasting System, San Diego, Calif.—Grant of license to cover construction permit for new broadcast station, frequency 1290 kc., 250 watts, day, unlimited time, pending determination upon application for renewal.

KOBQ—KOBQ Broadcasting Co., Sioux City, Iowa.—Grant of license to cover construction permit for new broadcast station on frequencies listed in Group A and Group D, Section 4, 23, power 10 watts, in order to relay broadcast program in connection with the Missouri River celebration to Radio Station KTRI on June 26 or 27, 1940.

W2XBU—National Broadcasting Co., Inc., New York, N. Y.—Grant of license to cover construction permit for new broadcast station on frequencies listed in Group A and Group D, Section 4, 23, power 10 watts, in order to relay broadcast program in connection with the Missouri River celebration to Radio Station KTRI on June 26 or 27, 1940.

KFRO—Voice of Longview, Longview, Tex.—Grant of license to cover construction permit for increase in power from 250 watts to 1 KW; change in frequency to 1340 kc.; change in hours of operation from daytime to unlimited; move transmitter; and install new equipment and directional antenna for night use, for extension of completion date from June 15, 1940, to July 19, 1940 (B3-MP-991).

WEAU—Central Broadcasting Co., Eau Claire, Wis.—Grant of special temporary authority to operate for limited time for the period beginning June 24, 1940, to the conclusion of the Republican National Convention, and from July 15, 1940, to the conclusion of the Democratic National Convention, in order to broadcast programs covering said conventions only.

WQDM—E. J. Regan and F. Arthur Bostwick, d/b as Regan and Bostwick, St. Albans, Vt.—Grant of special temporary authority to operate from 7:45 p. m. to midnight, EST, for the period June 24, 1940, to not later than June 29, 1940, in order to broadcast the proceedings of the Republican National Convention.

KTRB—Thomas R. McTammany and William H. Bates, Jr., Modesto, Calif.—Grant of special temporary authority to operate from 7:30 p.m. to the conclusion of the public meeting of the Stanislaus County Peace Officers Association, in order to broadcast events incident to the Fourth of July celebration in Modesto.

The Mayflower Broadcasting Corp., Boston, Mass., and WAAU—The Yankee Network, Inc., Boston, Mass.—Denied petition for rehearing on July 18, 1940, the proposed findings of fact in re application of The Mayflower Broadcasting Corp., for a new broadcast station to operate on 1410 kc., with power of 500 watts night and 1 kw day, unlimited time, requesting the facilities now assigned to Station WAAU, and the application of The Yankee Network, Inc., for renewal of license of Station WAAU for main and auxiliary transmitters (B-107).

WAATT—Bremer Broadcasting Corp., Jersey City, N. J.—Grant of special temporary authority to relay broadcast United States Army recruiting publicity.

The Kaw Valley Broadcasting Co., Topeka, Kans.—Grant of special temporary authority to operate a new station in Topeka to operate unlimited time, with power of 250 watts, on the frequency 1500 kc., which was designated for hearing on March 29, 1940.

KGB—Don Lee Broadcasting System, San Diego, Calif.—Grant of license to cover construction permit for new broadcast station, frequency 1190 kc., 250 watts, day only; exact site of transmitter and studio locations to be determined subject to Commission’s approval; also antenna system (B2-P-2770).

WENR—National Broadcasting Co., Inc., Chicago, Ill.—Grant of license to cover construction permit for new broadcast station, for main and auxiliary transmitters, for opening of 500 watts night and 1 KW day, limited time, requesting the facilities now assigned to Station WAAU, and the application of The Yankee Network, Inc., for renewal of license of Station WAAU for main and auxiliary transmitters (B-107).

WAAT—Bremer Broadcasting Corp., Jersey City, N. J.—Grant of license to cover construction permit for new broadcast station, frequency 1190 kc., 250 watts, day only; exact site of transmitter and studio locations to be determined subject to Commission’s approval; also antenna system (B2-P-2770).

WENR—National Broadcasting Co., Inc., Chicago, Ill.—Grant of license to cover construction permit for new broadcast station, for main and auxiliary transmitters, for opening of 500 watts night and 1 KW day, limited time, requesting the facilities now assigned to Station WAAU, and the application of The Yankee Network, Inc., for renewal of license of Station WAAU for main and auxiliary transmitters (B-107).

KOBQ—KOBQ Broadcasting Co., Sioux City, Iowa.—Grant of license to cover construction permit for new broadcast station on frequencies listed in Group A and Group D, Section 4, 23, power 10 watts, in order to relay broadcast program in connection with the Annual Military Show of the Illinois National Guard.

WKST—WKST, Inc., New Castle, Pa.—Grant of special temporary authority to operate from 8 p. m. to 9 p. m. EST, on July 1, 1940, in order to broadcast Americanization Day program.

Everett L. Dillard, tr/as Commercial Radio Equipment Co., Kansas City, Mo.—Grant of special temporary authority to operate high frequency broadcast station W9XA on frequency 26300 kc., using maximum power of 1000 watts, special emission (frequency modulation), in cooperation with the license of high frequency broadcast station W2XLI, for a period not to exceed 30 days, to conduct and determine the extent of mutual skywave interference existing between two stations operating with 1 KW on 26300 kc., employing frequency modulation, and to determine to what field strength contour of the desired station the interfering station whose transmissions are received via skywave will interfere with program reception of the desired station in its own coverage area.

KDTH—Telegraph Herald, Dubuque, Iowa.—Grant of license to cover construction permit for new broadcast station, frequency 1340 kc., 500 watts, daytime (B4-MP-987).
NEW—William H. Amesbury, Minneapolis, Minn.—Construction permit for a new broadcast station to be operated on 630 kc., 500 watts, unlimited time, directional antenna for day and night use. Amended to increase power from 500 watts to 1 KW, and make changes in directional antenna.

720 Kilocycles

WGN—WGN, Inc., Chicago, Ill.—Extension of special experimental authority for transmission of facsimile signals 1 to 6 a.m., CST, using 50 KW, for period 8-1-40 to 2-1-41. Amended to change time of transmission from 1 a.m. to local sunrise, CST.

890 Kilocycles

WBAA—Purdue University, W. Lafayette, Ind.—Construction permit to install new transmitter; make changes in antenna (directional antenna night use); change hours from specified to unlimited time; increase power from 500 watts night, 1 KW day, to 1 KW night, 5 KW day, and move transmitter. Amended to request Class III-B station.

920 Kilocycles

WSPA—Spantburg Advertising Co., Spartanburg, S. C.—Construction permit to install directional antenna for night use, change time from daytime to unlimited, using 1 KW power, and move transmitter. Request Class III-B station.

950 Kilocycles

WTRY—Troy Broadcasting Co., Inc., Troy, N. Y.—Authority to determine operating power by direct measurement of antenna power.

1010 Kilocycles

WHN—Marcus Loew Booking Agency, New York, N. Y.—Construction permit to install new transmitter and directional antenna for day and night use; change frequency from 1010 to 1050 kc.; increase power from 1 KW night, 5 KW day, to 50 KW; and move transmitter. Class II, under terms North American Agreement.

1120 Kilocycles

WTAW—Agricultural & Mechanical College of Texas, College Station, Tex.—Modification of license to change specified hours from: Daily except Sunday, 11:25 a.m. to 12 noon; Sunday, 8:30 to 9:30 a.m.; Friday, 4:30 to 5:30 p.m.; to daily except Sunday, 11:30 a.m. to 12:30 p.m.; Saturday only, 2:30 to 5:30 p.m.; 3 to 6 p.m. daily except Saturday February through September and 2:30 to 5:30 daily except Saturday October through January. Amended to request time daily except Sunday from 7:30 to 9:30 a.m. and 11:30 to 12:30.* (Contingent on KTBC's license being revoked.)

KRKD—Radio Broadcasters, Inc., Los Angeles, Calif.—Authority to determine operating power by direct measurement of antenna power.

1210 Kilocycles

KFOR—Cornbelt Broadcasting Corp., Lincoln, Nebr.—Modification of construction permit (B4-P-2537) for changes in equipment, requesting extension of completion date from 6-23-40 to 12-23-40.

WINN—Kentucky Broadcasting Corp., Louisville, Ky.—License to cover construction permit (B2-P-1809) as modified for a new broadcast station.

WINN—Kentucky Broadcasting Corp., Louisville, Ky.—Authority to determine operating power by direct measurement of antenna power.

1240 Kilocycles

KTFI—Radio Broadcasting Corp., Twin Falls, Idaho.—Authority to determine operating power by direct measurement of antenna power.

1300 Kilocycles

WLOL—Independent Merchants Broadcasting Co., Minneapolis, Minn.—License to cover construction permit (B4-P-2482) as modified for a new broadcast station.

* In addition to above hours.

June 28, 1940 — 4385
1310 Kilocycles

WLOL—Independent Merchants Broadcasting Co., Minneapolis, Minn.—Authority to determine operating power by direct measurement of antenna power.

1370 Kilocycles

KROC—Southern Minnesota Broadcasting Co., Rochester, Minn.—Authority to determine operating power by direct measurement of antenna power.

KTOH—Garden Island Publishing Co., Ltd., Lihue, Hawaii.—Construction permit to move transmitter and install new antenna.

NEW—Butler Radio, Inc., Tyler, Tex.—Construction permit for a new broadcast station to be operated on 1370 kc., 250 watts, unlimited time.

1420 Kilocycles

WLAP—American Broadcasting Corp. of Ky., Lexington, Ky.—Construction permit to move transmitter and install new antenna.

WHDL—WHDL, Inc., Olean, N. Y.—Authority to determine operating power by direct measurement of antenna power.

WMSL—Tennessee Valley Broadcasting Co., Inc., Decatur, Ala.—Authority to make changes in automatic frequency control equipment.

1480 Kilocycles

WKBW—Buffalo Broadcasting Corp., Buffalo, N. Y.—Construction permit to install new transmitter and directional antenna for day and night use; increase power from 5 to 50 KW; move transmitter. Request Class I-B station.

1500 Kilocycles

NEW—James Freeman Holmes, Valdosta, Ga.—Construction permit for a new broadcast station to be operated on 1500 kc., 100 watts night, 250 watts day, unlimited time. Requests Class IV station.

KYSM—F. B. Clements & Co., a co-partnership composed of F. Braden Clements, Clara D. Clements and C. C. Clements, d/b as Southern Minnesota Supply Co., Mankato, Minn.—Construction permit to change frequency from 1500 to 910 kc.;* increase power from 250 watts to 1 KW; install new equipment and directional antenna for night use. Requests Class II station.*

KTOH—Garden Island Publishing Co., Ltd., Lihue, Hawaii.—License to cover construction permit (B-MP-917) for increase in power.

MISCELLANEOUS

W9XG—Purdue University, West Lafayette, Ind.—Construction permit to request frequency channel 66000-72000 kc., for visual and aural power * 3000 watts visual, 750 watts aural, emission A3 and A5; changes in equipment. (* 3000 watts peak power.) FORM 316. Requests Class I television broadcast station.

NEW—South Carolina Broadcasting Co., Inc., Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 1622, 2058, 2150, 2250 kc., 25 watts, emission A-3, portable-mobile, area Charleston, S. C.

W6XVH—WHNS, Inc., Columbus, Ohio.—License to cover construction permit (B2-PH8-239) to install new equipment.

W2XOR—Bamberger Broadcasting Service, Inc., Carteret, N. J.—Construction permit to install new transmitter, antenna changes, and move transmitter from Carteret, N. J., to New York, N. Y.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

American Lead Pencil Company—Six corporations constituting practically all of the manufacturers of rubber erasers in the United States have been served with a complaint alleging a combination and agreement to fix and maintain prices, terms and bids in connection with their sale of such products. The respondents are American Lead Pencil Company, Hoboken, N. J.; Eagle Pencil Company, Inc., New York; Joseph Dixon Crucible Company, Jersey City, N. J.; Eberhard Faber Pencil Company, Inc., Brooklyn, and Weldon Roberts Rubber Company and A. W. Faber, Inc., both of Newark, N. J.

It is alleged that, prior to November, 1935, the respondents entered into an agreement to fix and maintain, and that they have fixed and maintained, the prices at which their product is sold, and the uniform terms and conditions governing such sales, and that they agreed to submit and have submitted, directly and through their agents, uniform and identical bids on their product when requests were made for such bids.

The complaint points out that many firms and corporations and Federal, State and Municipal Governments, because of the substantial quantity of rubber erasers used, purchase them through invitations for bids, and that from these bids are selected the members of the rubber eraser industry from whom purchases will be made for given times or in stated quantities.

The complaint alleges that the effect of the respondents' practices has been to monopolize for them the business of manufacturing and selling rubber erasers; to unreasonably lessen, eliminate and restrain competition in this field in interstate commerce, and to deprive the public of advantages of price, service and other considerations which it would otherwise receive. (4170)

Art Display Company—See United Sales Co.

Augusta Knitting Corporation—Misrepresentation of the fiber content of ladies' knitted undergarments is alleged in a complaint issued against Augusta Knitting Corporation, Utica, N. Y.

According to the complaint the respondent misleadingly represented that its knitted undergarments are composed entirely of silk and wool in the proportion of 50 per cent silk and 50 per cent wool, when in truth they have a cotton content ranging from 45 to 57 per cent.

The respondent further allegedly represented that its garments have longer wearing qualities than those of its competitors, when such is not a fact.

The complaint continues that the respondent fails to disclose by appropriate brands or tags attached to its garments all of the fiber constituents from which they are made, and fails to disclose the existence of cotton as a substantial constituent of such garments. (4162)

Joseph Dixon Crucible Co.—See American Lead Pencil Co.

Eberhard Faber Pencil Co.—See American Lead Pencil Co.
Elgin Razor Corporation—Charging unfair practices through the unauthorized use of well-known trade names a complaint has been issued against a group of Chicago manufacturing corporations, which have operated, in cooperation with Henry T. Schiff in the sale of radios, cameras, talking machines, electric sunlamps, clocks, razors and lighters, and electric and other novelties. The complaint also names as respondents various officers of the corporations, several of whom are relatives of the respondent Henry T. Schiff. Corporate respondents in the case are Elgin Razor Corporation, Underground Laboratories, Inc., Underground Industries, Inc., Match King, Inc., The American SuperCraft Corporation, Paris Bead & Novelty House, Inc., The Keen Manufacturing Company, Inc., The Monarch Manufacturing Company, and The American Camera Corporation.

Individual respondents are Henry T. Schiff, president and director of all but three of the corporations, and Frances R. Schiff, his wife; Benjamin A. Schiff, his brother; Robert M. Schiff, his son; William J. Gaiter, his son-in-law; Jack Gaiter, his son-in-law’s daughter; William Balser, brother of Jack Gaiter and associated with him in business; Harry C. Feinberg, Robert D. Schoenbrod and Arnold F. Shapiro, Max Bressler and his wife, Ruth Bressler, Ralph Keroi, Albert I. Leight, Albert J. Tarson, Ed Cohen and G. T. Bunker, all of Chicago and all of whom are or have been officers, directors, or agents of one or more of the respondent corporations.

It is alleged that the various respondents have conspired and cooperated in a scheme to deceive the public and compete unfairly with other manufacturers and dealers by falsely representing the prices, quality, production, and manufacture of their products as being superior to others, and by using as corporate and trade names and as marks and brands affixed to their products such well and favorably known names as "Elgin," "Underwood," "Remington" and "Hamilton.

The complaint charges that, among other things, the respondents advertised "Elgin Electric Shavers" and "candid type cameras" using the name "Elgin Laboratories," also an "Underwood Electric Dry Shaver" in connection with the corporate name "Underwood Industries, Inc.," and a "Hamilton Electric Shaver." The complaint further charges that the respondents’ representations were false and misleading in that their products were not made or sold by corporations, firms or individuals identified in the public mind by the names Elgin, Underwood, Remington and Hamilton; the so-called reduced or special prices advertised were the usual or regular prices; the cameras advertised were not such as could properly be described as "candid," and the respondents did not own, operate or control a properly equipped laboratory, supervised and managed by scientifically trained persons.

The respondent Henry T. Schiff, according to the complaint, has places of business at 711 West Lake St., 429 South Ashland Blvd., 305 West Adams St., 207 East Ohio St., and at other addresses in Chicago and in other cities unknown to the Federal Trade Commission, his connection with which is not revealed to the public.

The addresses of these corporations and companies are unknown to the Commission, the complaint continues, and the Commission has been informed that all of them have been engaged in practices similar to those alleged in its complaint. (4169)

A. W. Faber, Inc.—See American Lead Pencil Co.

L. Hoffman—Louis Hoffman, trading as L. Hoffman, 459 Broadway, New York, was charged, in a complaint, with the dissemination of certain fraudulent representations in the sale of desk pads and other office accessories.

According to the complaint, the respondent, by the use of terms such as "Flexideal Call Finish Leather," "Genuine Top Grain Leather" and "Genuine Top Grain Furniture Leather," that genuine top grain leather is used in his desk pads, and by such words as "Grecian Gold Tooled Border" and "Genuine Grecian Gold Tooled Border," that genuine gold leaf is used and applied on the border of his product, when in fact the respondents’ desk pads are not composed of top grain leather and in most instances the borders are made of imitation gold, and gold leaf is not used in the process.

It is further charged that the respondent published a pictorial presentation of various styles of desk pads as being offered for sale by him, in which case he did not sell products of the design depicted and such illustrations, in some instances, were those of a competitor’s higher-priced desk pad superior both in design and material. The complaint also alleges that the respondent advertised his business as having been established in 1888, when such is not a fact. (4165)

Magnetic Ray Company—Alleging violation of the Federal Trade Commission Act in the sale of an electrical device for treating various ailments, a complaint has been issued against Frank B. Moran, trading as Magnetic Ray Company and as Magnetic Ray Clinic, 2032 Main St., Dallas, Texas.

It is alleged that the respondent represented that use of his device, "Magnetic Ray," provides a cure, remedy or safe, scientific, competent and effective treatment for more than 35 ailments, including rheumatism, eczema, diabetes, arthritis, asthma, constipation, hemorrhoids, varicose veins, high and low blood pressure, paralysis, headaches, and neuralgia, when such are not the facts.

The respondent further allegedly represented that his device far exceeds electricity, light, heat, X-rays, radiant rays, violet and ultra-violet rays in therapeutic value, when according to the complaint, the heat produced by his device is approximately equal to that produced by a 40-watt bulb, and would therefore be of no therapeutic value nor be comparable to X-ray, radium rays, or violet and ultra-violet rays.

Further allegations made by the respondent are that use of his device stimulates a normal and healthful functioning of the various organs and glands of the body; equalizes circulation of the blood; relieves pain and muscular and nervous tension, and stimulates a rapid increase in the oxidation and elimination of accumulated poisons, thereby removing the condition of auto-toxemia, when such are not the facts. (4164)

National Retail Liquor Package Stores Assn., Inc.—Complaint has been issued charging the National Retail Liquor Package Stores Association, Inc., New York, and its officers, directors and members, including 29 State or sectional retail dealers’ trade associations, with operating at different times in combination in the sale of an electrical device for treating various ailments, a complaint has been issued against Frank B. Moran, trading as Magnetic Ray Company and as Magnetic Ray Clinic, 2032 Main St., Dallas, Texas.

It is alleged that the respondent represented that use of his device, "Magnetic Ray," provides a cure, remedy or safe, scientific, competent and effective treatment for more than 35 ailments, including rheumatism, eczema, diabetes, arthritis, asthma, constipation, hemorrhoids, varicose veins, high and low blood pressure, paralysis, headaches, and neuralgia, when such are not the facts. (4165)

National Retail Liquor Package Stores Assn., Inc.—Complaint has been issued charging the National Retail Liquor Package Stores Association, Inc., New York, and its officers, directors and members, including 29 State or sectional retail dealers’ trade associations, with operating at different times in combination in the resale of liquors, in violation of the Federal Trade Commission Act.

State or sectional association member respondents are: Greater New York Licensed Liquor Stores Association, New York City; Baltimore Maryland Liquor Dealers Association, Baltimore, Maryland; Beatty Brother’s Liquor Dealers Association, Bronx, New York City; Federated Retail Liquor Dealers of Kings County, Brooklyn; Long Island Wine and Liquor Dealers Association, Jamaica, Long Island, New York; Capitol District Liquor Stores Association, Inc., Albany, New York; New York City Liquor Dealers Association, Brooklyn; Suffolk County Liquor Dealers Association, Whidbey, New York; New Jersey Retail Liquor Package Stores Association, Inc., New York; New Jersey Liquor Dealers Association, Paterson, New Jersey; and Massachusetts Federation of Retail Package Stores Association, Boston.

Rhode Island Retail Liquor Dealers Association, Providence, R. I.; Connecticut Retail Liquor Package Stores Association, Hartford, Conn.; Baltimore Retail Liquor Dealers Association, Baltimore, Md.; Indiana Retail Liquor Dealers Association, Indianapolis, Ind.; Atlanta Retail Liquor Package Stores Association, Atlanta; Retail Liquor Dealers Association of Louisiana, New Orleans, Louisiana; Arkansas Retail Liquor Dealers Association, Little Rock, Ark.; St. Louis Retail Liquor Package Stores Association, St. Louis, Missouri; and Illinois Retail Liquor Package Stores Association, Chicago.

Wisconsin Retail Liquor Dealers Association, Milwaukee; Minnesota Council of Wine and Spirits Merchants, Inc., Minneapolis;
Colorado Package Liquor Association, Denver, and South Dakota Retail Liquor Dealers Association, Sioux Falls, S. D.

It is alleged that the various respondents, in seeking to make their combination effective, performed by agreement among themselves the following practices: fixed and maintained uniform prices for their resale of wines, spirits and liquors, under threat of boycott, fixed the prices at which manufacturers and importers shall sell such products and the prices at which both wholesalers and the respondents shall resell; under threat of boycott, compelled and sought to compel manufacturers and importers to sell in States having "Fair Trade" acts, only under resale price maintenance contracts, and at prices and differentials fixed by the respondents, and in like manner compelled manufacturers, importers and wholesalers not to sell to retailers who resell at prices less than those fixed by the respondent national association members and fixed by State "Fair Trade" resale price maintenance contracts.

The complaint further alleges that the various respondents, in seeking to make their combination effective, by agreement among themselves and under threat of boycott, have compelled and sought to compel manufacturers, importers and wholesalers not to sell to retailers who resell at prices lower than those fixed by the respondent national association members; to grant to members of the association uniform discounts and allowances, and to institute and prosecute suits against retailers for reselling at prices less than those fixed by the respondents, and in like manner compelled manufacturers, importers and wholesalers, those retailers reselling below the fixed prices; have demanded, under threat of boycott, that such manufacturers, importers and wholesalers refuse to further supply such price-cutting retailers, and have attempted to bring about the revocation or suspension of the licenses of retailers who resell at prices lower than those fixed by the members of the national associations.

Among alleged results of the respondents' practices are prevention of price competition, increase of prices to the public, and creation of a monopoly in the respondents. (4168)

**Perfect Manufacturing Company**—Misrepresentation of a mechanical device sold for attachment to radio receiving sets is alleged in a complaint issued against The Perfect Manufacturing Company, trading as R. E. Engineers, Madison Road, Cincinnati.

According to the complaint, the respondent represented that its device "Add-A-Tube" will give longer life to radio tubes, will improve radio reception, will make it possible to receive radio broadcasts from domestic and foreign stations which could not be received without use of this device, and will bring the user's radio up to date. These statements are not true.

It is further alleged that the respondent advertised that use of its device will give radio the tone, sharpness of selectivity and the static-free reception found in the most expensive radio sets on the market, will improve reception on every type of radio receiving set, will give the user's radio automatic volume control and guarantee clear local and long-distance reception, and will make an old radio receiving set as efficient as modern sets, when actually it will not accomplish all the results claimed.

Through the use of the name "Add-A-Tube," the complaint continues, implies that its device, when attached to a radio receiving set, gives the set an additional tube, when such is not a fact. (4163)

**Smoke Conditioner Company**—Misrepresentation of the sale of a cigarette holder designated as "Smoke Conditioner" is alleged in a complaint issued against Henry M. Salisbury and Frank R. Johnson, trading as Smoke Conditioner Company, 254 West 31st St., St. Louis, Mo.

It is alleged that the respondents represented directly or by implication that their "Smoke Conditioner" embodies entirely new and revolutionary principles in cigarette holders; that it never has a bad odor or taste; that it prevents nicotine and irritating substances in a cigarette from reaching the smoker, and that its use promotes health by eliminating all deleterious substances from the tobacco smoke, when such are not the facts.

The complaint points out that use of the respondent's holder eliminates only a small percentage of nicotine and other deleterious substances present in tobacco. (4166)

**St. Joseph School of Flying**—Misrepresentation in the sale of a correspondence course in aviation is alleged in a complaint issued against Leon Hood, trading as St. Joseph School of Flying, St. Joseph, Mo.

According to the complaint, the respondent misleadingly implied in his advertising that he and his school are connected with or are representative of the United States Government, and that they have been commissioned or authorized by the Government to give instruction to and train civilian pilots; that the correspondence course is given free; that students completing the course may obtain substantial deductions in the cost of actual flying instruction by virtue of a discount, and that such discount will be allowed by many other aviation schools; that the instruction offered is recognized and endorsed by other aviation schools, and that the respondent's school is officially connected with the municipal airport at St. Joseph, Mo., when such are not the true facts.

Further alleged misleading representations of the respondent are that the school is equipped with offices, shops, equipment, classrooms and personnel for the giving of resident instruction in the scientific and practical features of aviation; that the home study course offered is of such extent and character as to give students a full and complete knowledge of the principles of aviation and comprises complete ground training, and that only picked students of the correspondence course will be permitted to take actual flying instruction, when such are not the facts. (4167)

**United Art Display Co.**—See United Sales Co.

**United Art Display & Sales Co.**—See United Sales Co.

**United Display Company**—See United Sales Co.

**United Sales Company**—Alleging violation of the Federal Trade Commission Act in the sale of photographic enlargements and frames, a complaint has been issued against Max Cohen, trading variously as United Sales Company, United Art Display and Sales Company, Art Display Company, United Art Display Company, and United Display Company, 4042 South Broadway Place, Los Angeles.

It is alleged that the respondent's crews of initial contact salesmen, who are deceptively represented as "operating under the sanction of the United States Supreme Court," make house-to-house canvasses ostensibly to obtain photographs, usually of children, for enlargement, one-half of the price of which is required as deposit at the time the order is taken. These salesmen allegedly represent that the photographs of children are to be sold for advertising purposes to manufacturers of children's products; that there is a large demand for such pictures, and that, in order to obtain acceptable pictures, the respondent is also conducting a contest in which valuable prizes are awarded.

It is alleged that in their sales talks the initial solicitors carefully avoid any reference to frames for the pictures; that the enlargements made by the respondent are of such peculiar shape that frames to fit them can be obtained only from the respondent at the prices exacted, and that after the enlargements have been made, the original pictures and enlargements thereof are sent by the respondent to other salesmen called "proof passers," who deliver them to the customers, collect the unpaid balance and seek to sell frames for the pictures. The complaint points out that the sale of enlargements is merely incidental to the respondent's plan of operation studiously devised for selling frames, and that if a customer refuses to purchase a frame or pay for one after it has been ordered, the respondent in many instances refuses to deliver the original treasured family photograph borrowed from the customer until a frame is ordered or a balance claimed on a frame is paid in full. (4161)

**Weldon Roberts Rubber Co.**—See American Lead Pencil Co.

**CEASE AND DESIST ORDERS**

Commission has issued the following cease and desist orders:

**Ace Auto Supply Co.**—See Perfect Recondition Spark Plug Co.
Bauer & Black—See Kendall Company.

Henry Bergman—Misrepresentations in the sale of instruments advertised as useful for locating gold and silver, a booklet known as “Jacob’s Rod,” and other articles, are prohibited in an order to cease and desist issued against Henry Bergman, 2004 Milton Ave., Springfield, Mo.

The order, among other things, directs that the respondent cease and desist from representing that his treasure locating instrument has any value in searching for hidden treasure; that a person reading the “Jacob’s Rod” booklet will be enabled to ascertain his psychic powers, make his own goldometer, or locate hidden treasure, or that there is any basis, in fact, for the statement that the directions given in this booklet were practiced by Jacob or any other ancient patriarch. (4026)

Crown Distributing Company—Los Angeles distributor of radios, cameras, and pen and pencil sets, and a Minnesota dealer in drugs, cosmetics, foods and household novelties, were ordered to discontinue the use of lottery methods in connection with the sale of their products to ultimate consumers. The respondents are Marvin Alan Koolish, trading as Crown Distributing Company and Crown Sales Company, 8742 Holloway Drive, Los Angeles, and Frank Spors, trading as Spors Company, Le Center, Minn.

The orders direct the respondents to cease supplying others with merchandise together with lottery devices which may be used in selling such products to the public; to cease supplying or placing in the hands of others such lottery devices, either with assortments of merchandise, or separately, which devices may have any value in searching for hidden treasure; that the preparation penetrates the skin or makes hands shades whiter or lighter, or that it is more economical or effective in use than competitive hand lotions. (3894)

Perfect Recondition Spark Plug Co.—Peter Sanders and Harry Sanders, trading as The Perfect Recondition Spark Plug Company, 1133-39 Bedford Ave., Brooklyn, and Samuel Sanders, trading as Ace Auto Supply Company, 161 B Ave., New York, have been ordered to discontinue certain representations in the sale of used and reconditioned spark plugs.

Findings of the Commission are that the respondents sold spark plugs bearing the brand names “Champion” and “AC” without disclosure that such articles were used or defective and had been repaired and reconditioned. The order prohibits the respondents from selling any spark plug which has been used and thereafter reconditioned in any manner unless the words “used,” “second-hand,” “reconditioned,” or some other similar words, have been permanently stamped or fixed on each of the plugs in a color in contrast to the surface to which the word is applied and of a size and in such location as to be clearly legible to the purchasers after the plug shall have been installed, and unless there has been plainly printed or marked on the containers of the plugs a notice that they are used, second-hand or reconditioned. (3392)

Rulo Company—Norman D. Loughlin, Volney T. James and Page H. Lamoreaux, trading as Rulo Company and the Rulo Corporation, Los Angeles, were ordered to discontinue further misleading representations in the sale of an automotive device known as “Rulo Automatic Injector” and an automotive lubricant, “Rulo Energy Fluid,” which had been sold by them prior to January 1, 1938.

The order directs the respondents to cease representing that the use of their device and fluid will effect substantial economies in the operation of an automobile through the lessening of gasoline and oil consumption; will substantially increase the power and compression of the automobile motor; will remove carbon from the motor and prevent carbon formation, or will substantially lessen engine friction and attendant engine wear.

The respondents were further ordered to discontinue representations that use of “Rulo Automatic Injector” and “Rulo Energy Fluid” will eliminate the necessity of grinding the valves, prevent valves from sticking, and can seat valves; will prevent the motor from knocking; will produce first grade or ethyl gasoline performance with gasoline of a lower grade, or will prolong the life of the motor and cause it to operate smoother.

The order also directs the respondents to cease representing that “Rulo Energy Fluid” is scientifically made from a secret formula; that its use removes hard carbon; that it is a perfect heat-resistant lubricant, or that it assures perfect upper cylinder lubrication even when the motor is cold and started. The Commission dismissed its case against L. E. Ruppe, Bernal H. Dyas and Ruth C. Hemstreet, who had been named respondents in the complaint. (3761)

Westminster Tire Corporation, 601 West 26th St., New York, engaged in the sale of pneumatic automobile and truck tires, has been ordered to cease and desist from certain representations concerning its products.

The Commission finds that the respondent has made representations concerning the character and quality of its products by means of letters, blotters, signs and price lists, and by means of tire wrappings, markings, insignia and brands appearing on tires, circulated and distributed to dealers located in various States, among which are the placing, fixing or molding into the sidewalls of tires and upon the tire wrappings, encasing the tires, the designation “V-7” in addition to the respondent’s name and the size and type of tire.

The Commission finds that such tires are of four-ply bead to bead construction with double breaker strips, white sidewalls, extra material and tread stock, giving them a net weight considerably in excess of the corresponding weight of the first line four-ply tires marketed by other manufacturers and distributors. The Commission also finds that the respondent, because of the unusual character of construction, has made no express declaration as to the ply construction of the tires, and therefore has not
Zonite Products Corporation has been ordered to cease and desist from certain misleading representations concerning the products of its competitors.

Zonite Products Corporation, with offices in the Chrysler Building, New York, and its manufacturing plant in New Brunswick, N. J., through its Larvex Division is engaged in the manufacture of a liquid moth repellent designated "Larvex," for spraying on clothing, upholstered furniture, rugs and other non-washable fabrics, together with a powder also designated as "Larvex," which, when mixed with water as directed is recommended as a rinse for blankets, sweaters, and other washable fabrics. The preparations are designed to protect such articles from the ravages of moths.

The Commission finds that in advertisements published in magazines and other printed matter circulated throughout the States, the respondent has represented, among other things, that:

"If you, too, want sure protection against moth damage, don't take chances with moth balls, chests, and other make-shift ways. Too much is at stake."

"It is not enough to try with insecticides, bug-killers, moth balls, cedar chests, and tarbags with obnoxious odors, to drive away or kill the flying moth. When you see the flying moth it is too late—she has already laid eggs in your woolen things—and old-fashioned methods don't baffle the hungry moth-worms which hatch from the eggs."

By means of these representations, the Commission finds, the respondent has represented that moth balls, cedar oil, tar and various other competitive products fail to give adequate protection against moth damage, and thereby unfairly disparages many of the respondent's competitors and their respective products. The Commission finds that such representations are misleading and deceptive, as there are many such competitive products which, when properly used, will protect fabrics against moth damage.

The respondent is ordered to cease and desist from representations that moth balls, cedar oil, tar and other products containing pyrethrum, naphthalene or paradichloro-benzene will not protect fabrics and garments from damage by moth worms or larvae.

STIPULATIONS

During the week the Commission has entered into the following stipulations:

Jack Barnett Furs, Inc., 214 West 29th St., New York, agreed to cease disseminating invoices or other descriptive literature which fail to disclose clearly that the garments designated are manufactured from dyed furs or peltries.

Esther's Shop, Inc., 1225 F St., N. W., and Esther Beyda, trading as Beyda's Linen Shop, 1118 F St., N. W., both of Washington, D. C., have entered into stipulations in which they agreed to discontinue certain representations in the sale of linens and lace.

The Esther Shop, Inc., agreed to cease using the words "Fine Tuscany," "Hand-Made Tuscany" or words of similar meaning, and Beyda's Linen Shop agreed to discontinue use of the words "Tuscany Lace," "Guaranteed Handmade Tuscany Lace," "Tuscany Lace Cloth." or similar words, with or without the explanation that the products are described as having been actually made in Tuscany of linen thread.

Beyda's Linen Shop also stipulated that it will cease using the word "Guaranteed" or any other words of similar meaning in its advertising unless clear disclosure is made of exactly what is offered by way of security, as for example, refund of purchase price.

Eveknit Hosiery Mills, Bay City, Mich., agrees to discontinue employing the designations: "Genuine Crepe" or "Crepe" as descriptive of a hose or other product which, due to its construction, cannot properly be labeled "Crepe." The respondent corporation also stipulates that it will cease advertising, branding or selling any product composed in whole or in part of rayon unless complete disclosure of the fiber and other content is made by clearly designating each constituent fiber in the order of its predominance by weight, and by giving the percentage of any fiber present in less than a substantial amount, or in any case less than 5 per cent.

Frank & Seder, Eleventh & Market Sts., Philadelphia, agreed to discontinue use of the term "All Wool" as descriptive of a garment which is not composed entirely of wool. They further agreed to cease representing the concealment of the true fiber content or failure to make full and nondeceptive disclosure in its advertising or other trade indicia of the fiber content of articles purporting to be wool, such fibers to be stated in the order of their predominance by weight, and any fibers present in less than a substantial amount, or in any case less than 5 per cent.

It was also stipulated that Frank & Seder will cease selling or offering for sale any woolen or rayon-woven product, or designating it by the unqualified terms "Silk" or "Silk Crepe." when such article contains any metallic weighting, without full and nondeceptive disclosure of the presence of such metallic weighting, together with its proportion, designated in tags, brands, invoices, and all advertising matter.

International Laboratories, Inc., Rochester, N. Y., has entered into stipulation in which it agrees to cease representing that "Dare's Mentha-Pepsin" is a competent treatment or effective remedy for stomach ailments; that any given amount of it will quickly and nondeceptively designate each constituent fiber in the order of its predominance by weight, and by giving the percentage of any fiber which is present in less than a substantial amount, or in any case less than 5 per cent. It also agrees to discontinue use of the word "Pepsin" alone or with other words, to designate any preparation not containing sufficient pepsin as an active ingredient to possess therapeutic value because of it.

Kallman & Morris, Inc., 530 Seventh Ave., New York, agreed to discontinue use of the words "Reproduced by Kalmour" or either use of the word "Reproduced" or of any word which imports that the article is a replica or duplicate of an original as descriptive of dresses which are not in fact true reproductions in all particulars of the types named. The respondent corporation also stipulated that it will cease using, or placing in the hands of
others the means to use, pictorial or other representations of dresses which do not accurately or definitely depict the garments offered for sale, or otherwise representing such garments in any way which tends to convey the impression that such dresses are of a value greater than that indicated by their prices, or that dresses actually sold or offered for sale are identical with or of a quality equal to the garments so depicted. (2852)

Kanner Dress Company, Inc., 1350 Broadway, New York, in the sale of dresses agrees to cease using the words “Crepe,” “French Crepe,” “Cinderella Crepe,” “Acetate Crepe,” “Silk Garments,” “Silk Weaves,” or any other word signifying pure silk to designate any fabric or product not composed wholly of unweighted silk. The stipulation provides that if the word “Crepe” or similar word is used to designate the description of the type of construction only, of a fabric or product made of rayon, then such word shall be immediately accompanied by the word “Rayon” in letters equally conspicuous; for example, “Rayon Crepe,” “Acetate Rayon Crepe.” Other practices which the respondent agrees to discontinue agree are use of the words “Acetate,” “Celanese” or other trade term, alone or in combination with other words, as descriptive of the rayon content of garments, fabrics or material, unless immediately accompanied in equally conspicuous type by the word “Rayon”; selling or offering any product made of rayon without clearly disclosing in all printed matter such rayon content, and use of the word “Guaranteed” unless clear disclosure is made of exactly what is offered by way of security, as for example, refund of purchase price. (2842)

H. M. Kolbe Company, Inc., 48 Leonard St., New York, in the sale of woven fabrics or cloth, stipulates that it will desist from using the descriptive designations “Part Linen,” “Part Linen Suiting,” or “A Part Linen Fabric” for its “Sagamore” suitings or any other cloth or fabric of similar composition, and from naming or in any way featuring a minor constituent fiber of a mixed fabric offered for sale and sold without first naming also, as a part of such descriptive statement and with equal conspicuousness, the major constituent fibers, all in the order of their predominance by weight. The stipulation points out that the fiber content of the woven fabrics or cloth invoiced and designated by the respondent corporation consisted of cotton and flax, of which the flax or linen content constituted a minor portion. (2845)

Mollin Company—Sally Lindner, Sybil Moses and Jean Tanner, trading as Mollin Company, St. Paul, Minn., have entered into a stipulation in which they agreed to discontinue certain representations in the sale of home permanent wave outfits. The respondents agreed to cease representing that by the use of their “Glamour Permanent Wave” outfit, a permanent wave may be accomplished which will last for six months in every instance, or regardless of the type or kind of hair treated; using the phrase “reconditions the hair,” or any similar statement, so as to convey the belief to purchasers that their outfit will restore old, worn or faded hair to its original condition, or using the word “free” as descriptive of their shampoo and wave set, when in fact such items are not given free or as a gratuity but are a part of the outfit and their cost is included in the price charged. It was further stipulated that the respondents will discontinue use of the words “New York” or “Hollywood” in connection with the words “Millady Hair Specialist” on the box container of the tablet, as so as to imply that they are engaged in business in either of such localities.

The respondents also agreed to cease employing the words “Manfacturers’” or any similar word, when they do not make the items of which their wave sets are composed and do not actually own, operate or control the plant where such articles are manufactured. (2855)

Ome Daiber, Inc., trading as Royal Feather Quilt Company, 2407 First Ave., Seattle, in the sale of feather quilts and comforters, agrees to cease representing by use of expressions such as “Pre-Season Clearance,” “Big Seasonal Reduction,” “How I Can Save Money on Pre-Season Sale,” or otherwise, that its regular method of sale is a special offer; or, directly or inferentially, that a special price is offered when the regular price is charged, or that some advantage in quality is offered when there is none. The respondent also agrees to discontinue statements such as “While They Last,” or “Prompt Action Will Save You 40%” or other representations that an offer or purported offer is open for a limited time so long as any orders received after the expiration of the time limitation, implied or otherwise, are accepted and filled. (2850)

Peter Paul, Inc.—See Platt-Forbes, Inc.

Plickgan Labrofaets, Inc., 250 East 43rd St., New York, in the sale of “Allay,” agreed to cease representing through the use of such expressions as “pain banisher,” “get rid of pain,” “insure freedom from pain,” “drives away pain,” “kills pain,” or in any other manner, that its product terminates pain or has any effect on pain in excess of affording temporary relief; that it is safe for use, or that it affords a new method for relieving pain. The respondent further agreed to discontinue representations that “Allay” has any efficacy in preventing the development of colds, or is an effective remedy for colds, or that it acts or commences to act in two seconds after the tablets are taken. This stipulation supersedes and modifies one accepted by the Commission from the respondent corporation concerning the same product in October, 1937. (01906)

Platt-Forbes, Inc., 386 Fourth Ave., New York, an advertising agency, and Peter Paul, Inc., Naugatuck, Conn., dealer in chewing gum, have entered into stipulations in which each agreed to discontinue certain representations.

Platt-Forbes, Inc., advertising on behalf of Peter Paul, Inc., agreed to cease advertising that use of “Ten Crown Charcoal Gum” will make or help make teeth white or otherwise alter their inherent color except to the extent that it may do so through the removal of certain enamel film or debris from the teeth. Peter Paul, Inc., also stipulated that it will discontinue such representations in the sale of its chewing gum. (02589-02588)

Radio City Thrift Shop—See Ritz Thrift Shop, Inc.

Ritz Thrift Shop, Inc., and Aaron Kaye and June Jacobs, copartners trading as Radio City Thrift Shop, 153 West 57th St., New York, stipulated that they will cease making representations implying that their second-hand fur garments, or any appreciable proportion of them, are left with them for sale by society women or the ultra-rich, are purchased from society women or the ultra-rich or estates, or otherwise misrepresenting the source of such second-hand garments. The respondents also agreed to cease advertising and spécifying in any way the use of second-hand furs or other used goods merchandise, unless the advertisements clearly indicate that such items offered for sale are used or second-hand. (2843)

Rose Manufacturing Company, 37th and Filbert Sta., Philadelphia, stipulated that it will cease representing that its spray, “Tri-Open,” for plants and flowers, will kill, protect against or repel all insects generally; that it will control, or give complete protection against, all fungus diseases, or give complete plant protection, or that use of this spray will make the plant immune to all insects or diseases. The respondents further agreed to cease advertising that use of the spray; that it is the most successful and revolutionary discovery ever made in the history of rose culture, or that it is the first definite mildew and black-spot control combined with an insecticide. (02586)

Royal Feather Quilt Company—See Ome Daiber, Inc.

John Shillito Company, Cincinnati, has entered into a stipulation in which it agrees to cease and desist from certain representations in the sale of rugs.

By this stipulation, the respondent agrees to discontinue use of the words “Chinese,” “Persian,” “Oriental,” “Kashmir,” “Mandahays,” “Bagdad,” “Baristan,” “Persiatana,” “India” or other distinctively Oriental names as descriptive of rugs which are not made in the countries or localities designated with all the essential characteristics and qualities of such rugs, and the use of the words “Persian Reproductions,” “Oriental Reproductions” or other use...
of the word “Reproduction” or of any similar word which signifies that the article to which such word applies is a replica or duplicate of an original, as descriptive of rugs which are not true counter-parts or reconstructions in all particulars of the types named.

The respondent also agrees to cease using the words “Persian,” “Chinese,” “Oriental,” “Kashmir,” “Mandalays,” “Bagdad,” “Baristán,” “Persiatana,” “India,” or other distinctively Oriental appellation in connection with any rug which does not contain all the inherent qualities and properties of an Oriental rug; unless, if properly used to describe the design or pattern only, such words of Oriental appellation shall be immediately accompanied by a word such as “Design” or “Pattern” printed in equally conspicuous type, so as to indicate clearly that only the form delineated on the surface of the rug is a likeness of the type named; for example, “Persian Design,” “Chinese Pattern.”

The respondent corporation further agrees to discontinue use of the word “Guaranteed” unless clear disclosure is made of exactly what is offered by way of security; as for example, refund of purchase price. (2851)

Vermont Hosiery and Machinery Company, Northfield, Vt., agrees to cease using the phrase “100% Virgin Wool Face” alone or in connection with other words as descriptive of hosiery the face of which is not composed wholly of virgin wool. The stipulation provides that if parts of the hosiery, as the top, leg and sole, are faced with wool, but the heel and toe are not so faced, the words “Wool Face” are used properly to describe the facing of the top, leg and sole, such words shall be accompanied by other words clearly indicating that the hosiery is not faced throughout with wool. The respondent corporation also stipulates that it will cease employing the word “Lisle” as descriptive of lining of hosiery with lisle, and the word “Shrinkless” or other words of similar implication, suggesting that the hosiery is proof against shrinkage. (2849)

FTC CLOSES CASE

Federal Trade Commission has closed without prejudice its case against Frosted Products Equipment Company, Inc., 43 East 20th St., New York, which had been charged with the use of lottery methods in the sale of its products to ultimate consumers.

It appearing that the business of the respondent corporation has been entirely discontinued, the Commission closed its case without prejudice to its right to reopen it for further proceeding, should future facts so warrant.
Fly, Johnson at NAB Convention

Plans for the most important NAB convention in the twenty-year history of radio were rapidly being completed this week as announcement is made that FCC Chairman, James Lawrence Fly, and Assistant Secretary of War, Louis Johnson will address the industry.

This will be the first appearance of Chairman Fly before an NAB convention and his remarks are looked forward to with the highest degree of interest. Mr. Johnson, making one of the most important government pronouncements on the subject, will speak on the national emergency and its possible effect on the American system of broadcasting.

Coming at a time when there will be less than five months in which plans can be perfected to free broadcasters from the yoke of the ASCAP monopoly, the convention will open at the St. Francis Hotel in San Francisco, August 4 and continue through August 7.

Urging that every station be represented, Neville Miller this week declared:

"The problems which radio faced in the past pale in comparison with those it faces in 1940. We are in an emergency period. New problems, technical, social and commercial confront us. We are setting up a convention program designed to make this a well-informed industry, to give opportunity for all views to be expressed, evaluated and compared before final formal action is taken. What is done at San Francisco this August will shape the course of broadcasting for possibly years ahead. Every member owes it to himself to have a voice in determining the decisions which must be made."

A comprehensive report on BMI and a full review of the NAB Code are features of an agenda which includes analyses of the labor situation, the A. F. of M., wages and hours, a full review of FM, reports covering legislative matters and the relations of the industry with government and advertisers.

Outstanding in the commercial phase of the convention will be the introduction of the Bureau of Radio Advertising's plan for an industry measurement of the volume of radio advertising by cities and by classification of account. This has been a service long in demand by agency time buyers. A contingent of space buyers from New York and Chicago are already making plans to be present. Advertising executives on the West Coast will also be present. They will be invited to take part in round-table discussions with the Bureau and the Sales Managers' group, to review common problems of commercial broadcasting.

Of wide public and industry interest will be a panel discussion on the problems of special events broadcasting, with particular reference to coverage of the war and the handling of (Continued on page 4394)
political broadcasting, to be presided over by Mark Ethridge, WHAS. Taking part in the discussion will be Paul White, director of special events of CBS; Abe Schechter, director of special events of NBC; Van C. Newkirk, in charge of special events for KHJ-Mutual on the Coast, and Herb Hollister of KFBI.

"While the tone of the convention is one of dead earnestness—and for this we make no apologies, because the times demand it," Mr. Miller continued in his statement this week, "there will be opportunities for fraternizing with fellow members and friends in the agency and business world who will be with us. One night we will be guests of the Exposition on Treasure Island. The banquet entertainment this year will be both unique and pertinent."

In conjunction with the convention there will be meetings of the independent and IRNA groups and FM broadcasters. The Board of Directors will hold its annual meeting on August 4. On the same day, the Code Compliance Committee will be in session to receive recommendations from members.

HOTEL RESERVATIONS

Lincoln Dellar, KSFO, San Francisco, chairman of the convention housing committee, reports the influx of many hotel reservation requests. Those who have not done so, should immediately get their bid for hotel accommodations on file. All communications should be addressed to the St. Francis Hotel. Even though you may desire accommodations at some other San Francisco hotel, all requests clear through the St. Francis. If you don't want to communicate direct, send your requests here to headquarters and we will attend to them for you. Either way we suggest your early attention to this matter, first, that you may get the kind of accommodation you desire and, second, that we may have some means of measuring the possible attendance.

AUTO CARAVAN

A southern broadcaster suggests that broadcasters who are going to the San Francisco convention by auto-mobile meet in Albuquerque, New Mexico, on July 25 and proceed as a group, visiting Boulder Dam, the Grand Canyon and other points of interest en route. After the convention, he suggests that the caravan return via the northern route, including points in the Pacific Northwest and Yellowstone Park. Those interested should contact headquarters immediately for details.

BRING A TOPCOAT

A word about wearing apparel. We don't want to convey the idea that San Francisco is a cold town. It will be far from it in warmth of welcome during the NAB convention. Nevertheless, the breezes that blow through Golden Gate and over Treasure Island, as well as up Market Street and around Union Square, are sometimes a bit sharp and chilly. We suggest a light topcoat for both the ladies and the men.

We are doing everything we can to plan for your comfort and entertainment, as well as for a worthwhile business session. We want you to be comfortable from the standpoint of raiment, so hence, this word of warning.

PETRILLO REMOVES NAME BANDS FROM NBC, COLUMBIA

NBC and CBS lost their name-band sustaining programs during the past week, by order of James C. Petrillo, new president of the American Federation of Musicians. The order affecting NBC was issued Friday, June 28, while the CBS bands went off the air Monday, July 1.

The NBC order was issued because Station KSTP, St. Paul, has refused to sign a contract with the St. Paul local stipulating that the station will spend for a staff orchestra the same amount annually as was spent under the agreement which expired last January 17. For the last two weeks, KSTP's union musicians have been on strike, and the union has refused to permit local remotes. The strike followed prolonged negotiations on a compromise proposal by the station.

The CBS order followed a strike at WRVA, Richmond, Va., where the station likewise refused to sign a renewal of the old "quota," even though it was paying a staff orchestra at a rate exceeding the old quota. Remotes were withdrawn in Richmond, too.

Before withdrawing the name bands, the A. F. of M. asked the networks to quit furnishing this sustaining music to the two stations. This request was refused.
SCHEDULE THIS BROADCAST NOW!

On the eve of the NAB Convention, August 3, the San Francisco and New York World's Fairs will join together in a brilliant radio program to convey the thanks of listeners to the broadcasters of the country for outstanding public service rendered. At special ceremonies held on both Fair grounds, to be witnessed by distinguished men and women from all walks of life, plaques will be unveiled in dedication to the freedom of American radio.

The names of those appearing on this special broadcast will read like a star-studded roster of all the famous personalities who have made radio history in the past twenty years. It is hoped that the President will find time from his arduous duties to unveil the plaques by remote control.

The broadcast will be carried by all three major networks. NAB is authorized to invite non-network stations to join the broadcast. This can be done by securing approval and arranging for lines with the nearest network affiliate.

The time of the broadcast is 8 to 9, Eastern Daylight Savings Time.

The date—Saturday, August 3.

Please schedule this program now. NAB feels this will be one of the outstanding broadcasts of all time. Every station should participate in this industry-wide tribute.

WAGE AND HOUR ACT

Only 226 stations had answered the special Wage and Hour questionnaire by Wednesday of this week. This 29 per cent response is not large enough to build a good case for redefinition of "executive"—which the NAB intends to ask for. Redefinition would remove any limit on the hours of chief engineers, program directors and other executives. If any member has not received the questionnaire, he should notify the NAB Labor Relations Department.

The Wage and Hour Administration announced that the state labor departments of Connecticut and Minnesota would take over inspection for violations of the Wage and Hour law. North Carolina's state labor department has been handling inspection there for some months.

Promotion

WSB SUGGESTS AUTO RADIOS IN ATLANTA JOURNAL COPY

A 420 line ad in The Atlanta Journal of Sunday, June 23, was devoted to the broadcasting industry's campaign to add extra hours of daily listening via auto radio. It was prepared under the direction of WSB's Manager, J. Leonard Reinsch. The primary display read:

DRIVING'S MORE FUN
—When Radio Entertainment Is at Your Finger-Tips!

At the left of this display were the call letters, WSB, "The Voice of the South," spotted in an illustration of a couple listening while they ride. Below was the following copy:

"Breezing along on a sunny afternoon or gliding away 'neath the stars of a balmy summer night—nothing adds quite so much to riding pleasure as an automobile radio! You don't have to miss a single one of your favorite shows! "If you haven't a set in your car, now is a good time to buy one. Many good auto radios are on the market at reasonable prices, and you can buy your choice on liberal terms. See your dealer!"

"WHY I WANT A PORTABLE SET," CONTEST OVER NBC-BLUE

Another circulation building program for the industry is a current promotion, "Why I Want a Portable Radio Set," over the NBC-Blue network. The contest is incorporated in "Alma Kitchell's Brief Case." It has been running since June and it closes July 12. Miss Kitchell's evening show, month after month, continues to promote an appreciation for the American program service. By so doing it is having a substantial influence in solidifying the idea that the American system of broadcasting is the best for the United States.

PARTICIPATION IN RADIO FESTIVAL OPENS PROMOTION CHANNELS

Regarding Radio Festival Howard Lane, Manager, KFBK, Sacramento, Calif., says:

"Radio Festival Week in Sacramento was a terrific success and opened new avenues of promotion for us that we intend..."
to utilize throughout the year. Our work in the schools met with such widespread approval of school authorities that an extensive schedule of cooperative school broadcasts entirely different from what we have done in the past has already been tentatively outlined to start this fall.

"The programs which we put on in the school assemblies themselves met with such enthusiasm that we have already received requests from a number of schools as far as one hundred miles from Sacramento requesting similar visits."

"HAT IN RING" REVISED

"Is Your Hat In the Ring?" the NAB handbook of suggestions to political candidates on how to write and deliver the radio talk, has been revised and brought up to date for use in the current campaign.

It is available to member stations at nominal cost. Copies and prices will be forwarded stations next week.

The booklet has been used extensively by both the Republican and the Democratic parties throughout the country. It contains practical information designed to show candidates how to make more effective use of radio. It is available to member stations at nominal cost. Copies and prices will be forwarded stations next week.

The booklet has been used extensively by both the Republican and the Democratic parties throughout the country. It contains practical information designed to show candidates how to make more effective use of radio. It is a goodwill builder, also, between stations and candidates. NAB feels that each station should place a copy of "Is Your Hat In the Ring?" in the hands of every candidate.

COMMERCIAL SECTION OF CODE EFFECTIVE OCTOBER 1

In conformity with instructions of the Code Compliance Committee, Ed Kirby, Committee Secretary, sent out the following letter to agencies and advertisers to remind them that the time limitations in the commercial section of the Code become fully effective as of October 1, 1940. The letter accompanied a special booklet in which the commercial section of the Code is printed, together with the AAAA-ANA copy code:

DEAR MR.

RE: NAB Code—Time Limitations and Acceptability of Accounts

The Code Committee has asked me to remind you that the commercial section of the NAB Code becomes fully effective in all copy as of October 1, 1940.

For your convenience, this part of the Code has been separately printed in the enclosed booklet. Here also you will find the copy code of the AAAA and that of the ANA, which were jointly issued a few years ago.

The underlying purposes of the Code and the mutuality of commercial interests found therein between advertisers and broadcasters is, we believe, fully explained in the foreword by Edgar Bill, chairman of the Code Compliance Committee.

In this period of social and economic transition, we know that you will welcome this development as a wise and timely move beneficial to both consumers and to advertisers alike.

The Committee will indeed be pleased to answer any inquiry, or to receive the benefit of any suggestions or comment you may care to make.

With every good wish, I am

Sincerely yours,

(Signed) Ed Kirby, Secretary, Code Compliance Committee.

In order that member stations may inform local and regional accounts, Headquarters is sending to each member 100 copies of the booklet. The national field is being handled directly from NAB.

In a statement to transcription makers, the Committee recommended the following:

Recommendation for Transcriptions

Transcription makers will note that there is a forty-five-second extra time allowance for a fifteen-minute daytime commercial over the two minutes and thirty seconds limitation on a nighttime fifteen-minute commercial.

Because it is impossible in most instances to know whether a transcription is to be played during the day or night, it is the Committee's recommendation that commercial copy be prepared within the nighttime limitation, and that an extra forty-five seconds be given over to theme music. Thus, when the program is played on daylight spots, the local announcer can step in over the theme to take advantage of the extra forty-five-second daytime allowance with additional copy.

COST-PER-INQUIRY

Presumably basing their approach on the fallacy that summer slumps make radio stations doubly receptive to percentage propositions, six concerns chose the month of June to canvass a large list of stations with cost-per-inquiry and other unorthodox deals. The unusual number of these proposals referred for action direct to NAB Headquarters by members is encouraging in two ways.

It proves the percentage boys have guessed wrong again, in asking radio to revert to the dark ages of advertising, and it demonstrates that radio neither needs nor welcomes this kind of business, summer or winter. As far as could be learned, reputable broadcasters were unanimous in their opposition to the contingent deals proposed by the following concerns:

Dave Minor Publishing Company, Chicago, Ill.
H & H Corporation (antacid Tablets), Minneapolis, Minn.
Insurance Policy Service Company, Cincinnati, Ohio
Starkist Company (Toothpaste), San Antonio, Texas
Sure-Grip Laboratories, Chicago, Ill.

Every one of these concerns seeks to promote a product which is admirably suited to radio advertising, and the Bureau of Radio Advertising has invited them to give serious consideration to a regular campaign at card rates.

While the cost-per-inquiry market was active, as above indicated, free offers were quiet, none being reported to NAB during June.

NEWSPAPERS TO FM

The current issue of Editor & Publisher editorially urges small-town newspapers to get in their applications for FM stations. The editorial:
Members of the Inland Daily Press Association recently heard an enlightening discussion of the possibilities of radio transmission by frequency modulation. This page has referred often to this technical advance in broadcasting, and it reminds its newspaper-reader again that the new development may mean much to newspapers large and small.

We understand that applications for licenses to broadcast with FM transmitters are being received by the Federal Communications Commission and that these applications will be considered on and after Jan. 1, 1941. It is stated also that commercial broadcasting by FM may be approved as of that date.

This method permits broadcasting with remarkable fidelity of reproduction by ultra short wave over short ranges. Its original cost is said to be two-thirds of present installation cost and its maintenance also promises to be cheaper. That may let small city newspapers in for a new and disturbing form of competition, if possible competitors get their applications filed before the newspapers act. Newspapers can present a more meritorious case for the rendition of public service by radio than any other commercial interest, but it must not be forgotten that priority of application often carries weight in official circles.

Unless the small city newspapers want to be left at the post now as their metropolitan brethren (with some important exceptions) were with pioneer broadcasting, immediate action is important.

NEW MEMBERS

Since the meeting of the Board of Directors on June 21, when 17 stations were approved for membership, five additional applications have been received, bringing the total membership to 451. The new stations are WCOS, Columbia, South Carolina; KVOE, Santa Ana, California; KUJ, Walla Walla, Washington; KRLC, Lewiston, Idaho; and WCNW, Brooklyn, New York.

STATE LEGISLATION

Louisiana:

H. 971 (Watson) (Substitute for H. 778) Race Track Information—Relating to information pertaining to any race track.

FCC APPROVES TRANSMITTER LOG DRAWN UP BY NAB

The NAB is sending to its members an FCC-approved "sample transmitter log" and instructions for using it. This was prepared by Lynne C. Smeby, Director of Engineering, with the cooperation of Andrew D. Ring, Assistant Chief Engineer of the FCC, for the purpose of assisting stations in complying with the transmitter log requirements of the FCC. The log was submitted to the FCC on May 31, 1940, for its consideration. Following is the letter of transmittal:

May 31, 1940.

Mr. T. J. Slowie, Secretary
Federal Communications Commission
Washington, D. C.

Dear Mr. Slowie:

There is attached a sample transmitter log, "instructions for using NAB sample transmitter log" and a sample transmitter log, filled out for a full day's record of a broadcast station. These have been prepared for the purpose of aiding stations in complying with Rule 3.90 (b) of the revised Rules and Regulations Governing Broadcast Stations, issued by the Federal Communications Commission last August.

In the work of preparing the sample transmitter log, our Director of Engineering had the counsel and advice of Mr. Ring, of the Commission's Engineering Department. NAB is grateful for the splendid aid and assistance rendered by Mr. Ring.

We ask you to submit the Sample Transmitter Log to the Commission to ascertain whether it complies with the requirements of Section 3.90 (b) of the Rules. We do not seek to establish a standard form since the Transmitter log can serve a station beyond Commission requirements by the inclusion of additional data.

In mailing this recommendation to stations, we would like to be able to say that the Commission is in accord, that the log fulfills the requirements and thus renders the maximum value to the Commission and the industry.

Should there be any questions concerning the Sample Transmitter Log, we will be glad to answer them.

Very sincerely yours,

(Signed) C. E. Arney, Jr.
Assistant to the President.

The FCC on June 27, 1940, replied as follows:

June 27, 1940.

National Association of Broadcasters
1626 K Street, N. W.,
Washington, D. C.

Gentlemen:

This is in reply to your letter of May 31, 1940, submitting for Commission study a proposed "sample transmitter log and instructions for using NAB sample transmitter log."

The Commission has determined that the log form submitted makes provision for keeping the necessary log entries as required by the rules governing standard broadcast stations, and that the instructions submitted for keeping the log are appropriate under these same rules.

When the sample log sheets and instructions are circulated to the members of the association, the Commission would appreciate receiving a sufficient number of copies (thirty or forty) for distribution to the Inspectors in Charge of the Commission's field offices. Incidentally, it may be that they have not received copies of the sample program log and instructions which would also be beneficial in resolving some misunderstandings which may have arisen with reference to these logs.

Very truly yours,

(Signed) T. J. Slowie,
Secretary.

IRE CONVENTION

The Fifteenth Annual Convention of the Institute of Radio Engineers was attended by 1,007 people at Boston June 27, 28, 29. The convention agenda included topics of current interest, mainly television and frequency modulation. The subject of greatest current interest was FM and a number of interesting papers on the subject were climaxed by a 50-mile trip to Paxton where the convention members were the guests of John Shepard III, of the Yankee Network, at a buffet supper and an inspection of WIXOJ. Paul de Mars, Technical Director of the Yankee Network, and his staff explained the operation of the 50 KW FM transmitting station. Other interesting inspection trips were made to Hygrade Sylvania, U. S. Coast Guard Air Base, Harvard and MIT laboratories, WBZ and General Radio Company.

July 5, 1940 — 4397
The final step to permit launching the new FM (frequency modulation) system of radio broadcasting on a commercial basis has been taken by the FCC in approving “Standards of Good Engineering Practice Concerning High Frequency Broadcast Stations” and a new application blank to accommodate FM broadcasters on their new basis. The new standards, which remove FM from its heretofore limited experimental use, govern the technical phases of the prospective commercial service, and embrace operation, interference, equipment, etc., and provide a chart for computing the signal range on the frequencies 43,000 to 50,000 kilocycles now assigned to FM. These standards bear the same relation to frequency modulation service that existing standards do for amplitude modulation on the lower frequencies.

The new application (Form 319) may now be used by all individuals and groups interested in applying for FM facilities on a commercial basis, including the nearly 150 parties whose applications for FM facilities on an experimental basis were returned to permit their filing for commercial use. The new form is similar to Form 301 used for amplitude modulation broadcast applications, but revised to apply to FM service particularly.

This completes the official acts necessary to give FM full recognition. Rules applicable to FM were announced last week, about a month after the Commission decided, on the basis of hearing held in March, that commercialization is in the public interest.

Since FM is now on a standard basis, call letters henceforth issued to its commercial stations will consist of four letters to distinguish them from the combination of letters and numerals used to identify experimental stations.

Copies of the standards of good engineering practice for high frequency stations are available at the FCC.

FROM THE FCC MAIL BAG

Individually disgruntled radio fans still deluge the Federal Communications Commission with their particular complaint about this or that radio program. Few well-known programs—or artists—escape mention at one time or another in such letters. As constantly reiterated, the Commission has no authority to censor individual programs or performers. Some idea of the type of squawks in which the Commission lacks jurisdiction may be gleaned from recent “pan” mail:

Various letters object to the air utterances by Col. Charles A. Lindbergh, Hanford McNider, Frank Gannett, Judge John A. Matthews, Earl Browder, and others.

A New Yorker wants the radio team of Burns and Allen barred from the air because he doesn’t find some of their jokes funny. A Californian doesn’t agree with H. V. Kaltenborn’s news interpretations.

Another Californian resents certain airy statement by Jack Benny.

On the other hand, a New Yorker voices indignation at a Fred Allen wisecrack.

And at least one Californian doesn’t write highly of Bob Hope. Also, one Californian’s ears do not seem attuned appreciably to Cab Calloway’s music.

One of Walter Winchell’s fellow New Yorkers is irked by a statement by the former. An Oklahoman would like to see young ears closed to “Stella Dallas.”

A Connecticut man feels that he has been personally stung by “The Green Hornet” series. A Philadelphian doesn’t think “Great Plays” are that.”

“Abe Lincoln of Illinois.”

Another resident of that city is dismayed by “This Amazing America.”

A Philadelphian doesn’t think “What’s My Name” brings criticism over the name of a New York listener.

A New Yorker didn’t relish the network presentation of “Abe Lincoln of Illinois.”

Another resident of that city is dismayed by “This Amazing America.”

A Philadelphian doesn’t think “Great Plays” are that.”

A Pennsylvania man would like to have “Confidentially Yours” publicly censured.

A Tennessean is aroused by the “Court of Missing Heirs” program.

“Stop Me If You’ve Heard This One” didn’t stop a Philadelphian from writing in about it.

The “Dr. I.Q.” programs prompts a Californian to ask some questions of his own.

“Information Please” registers objection from one New Yorker.

Even the “National Farm and Home Hour” brought a critical letter from Pennsylvania.

Incidentally, by way of timely note, several Chicago letters protest advertising fireworks over the radio.

FCC JULY WORK

FCC has announced that the work, business and functions of the Commission for the month of July have been assigned as follows:

Commissioner Walker: Designated to determine, order, certify, report or otherwise act upon all applications or requests for special temporary standard broadcast authorizations.

Commissioner Thompson: Designated to hear and determine, order, certify, report or otherwise act upon; (a) except as otherwise ordered by the Commission, all motions, petitions or matters in cases designated for formal hearing, including motions for further hearing, excepting motions and petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission and those requesting change or modification of a final order made by the Commission provided, however, that such matters shall be handled in accordance with the provisions of Sections 1.251 and 1.256, inclusive, of the Commission’s Rules of Practice and Procedure; (b) the designation pursuant to the provisions of Sections 1.231 to 1.232 of the Commission’s Rules of Practice and Procedure of officers, other than Commissioners, to preside at hearings.
FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following oral arguments are scheduled to be heard before the Commission in broadcast cases during the week beginning Monday, July 8. They are subject to change.

**Thursday, July 11**

Oral Argument Before the Commission

Report No. B-92:

NEW—Bellingham Broadcasting Co., Inc., Bellingham, Wash.—Report No. B-92:

KVOS—KVOS, Inc., Bellingham, Wash.—Renewal of license, week beginning Monday, July 8. They are subject to change.

FUTURE HEARINGS

During the past week the Commission has announced the following future broadcast hearings and oral arguments. They are subject to change.

**July 25**

Oral Argument Before the Commission

Report No. B-107:

NEW—The Mayflower Broadcasting Corp., Boston, Mass.—Renewal of license, 1200 kc., 250 watts, unlimited time.

**August 12**

WPAY—Chester A. Thompson (Transferor), The Brush-Moore Newspapers, Inc. (Transferee), Portsmouth, Ohio.—Transfer of control of corporation, 1370 kc., 100 watts, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

There was no regular meeting early this week because of the holiday. It is expected that a meeting will be held later this week.

**MISCELLANEOUS**

Capital Broadcasting Co., Washington, D. C.—Granted motion to amend application for new station so as to request authorization to construct 100-watt booster station and to specify sites for both broadcast and booster stations. Applicant requests construction permit for 1420 kc., 250 watts, unlimited time.

Anthracite Broadcasting Co., Inc., Scranton, Pa.—Denied motion for postponement of hearing now scheduled for July 1, for a period of 30 days. Exceptions to ruling noted by counsel for petitioner.

God's Bible School and College, Cincinnati, Ohio.—Granted petition to accept late appearance in re application for new international station to operate on 11710, 21610 kc., 60 KW, A3 emission, share time on 11710 kc., unlimited time on 21610 kc.

KRKO—Lee E. Mudgett and Everett Broadcasting Co., Inc., Everett, Wash.—Granted motion for additional time of 15 days within which to file exceptions due July 9, in re application of KRKO for renewal and voluntary assignment of license, and construction permit to move transmitter, change hours of operation to unlimited and increase power from 50 watts to 100 watts, 250 watts LS, on 1370 kc.

WCBD—WCBD, Inc., Chicago, Ill.—Granted petition to amend application for modification of license to change frequency from 1080 to 830 kc., and from sharing time with WMIB to daytime, so as to request different facilities.

KHAS—The Nebraska Broadcasting Co., Hastings, Nebr.—Granted modification of construction permit as modified for a new station, to extend completion date from July 14, 1940, to October 1, 1940; frequency 1290 kc., power 250 watts, unlimited time (B4-MP-994).

WINN—Kentucky Broadcasting Corp., Louisville, Ky.—Granted license to cover construction permit as modified for new broadcast station, frequency 1310 kc., 100 watts, 250 watts LS, unlimited time (B2-Z-423). Also granted authority to determine operating power by direct measurement of antenna input (B2-Z-423).

KFDY—South Dakota State College, Brookings, S. Dak.—Granted special temporary authority to remain silent on July 4 in order to observe holiday (B4-S-645).

WLOG—Clarence H. Frey and Robert O. Greer, Logan, W. Va.—Granted special temporary authority to operate from 7:45 to 9 p.m., EST, on July 8, in order to broadcast an address by Homer L. Chaillaux, National American Director of American Legion.

W10XMC—McNary & Chambers, Washington, D. C.—Granted special temporary authority to use Composite CT, 100-watt transmitter on 1190 kc., for the period ending July 25, in order to make tests of possible transmitter sites and propagation characteristics in this area on this frequency to more accurately determine the results of operation of the proposed station to be operated in the area of Schenectady, pending action on formal application for a developmental broadcast station.

KBPS—Benson Polytechnic School, Portland, Ore.—Granted extension of special temporary authority to remain silent for the period August 1 to September 9, in order to observe regular school vacation (B5-S-84).

WINS—Heardt Radio, Inc., New York City.—Granted special temporary authority to operate from 9:15 p.m. to midnight, EST, on July 9, instead of July 11 as authorized on June 8, in order to broadcast the All-Star Boxing Show for the benefit of the New York City Milk Fund (B1-S-211).

WBNX—WBNX Broadcasting Co., New York City.—Granted license to cover construction permit (B1-P-2238) as modified, authorizing change in direction of antenna system, increase in power to 1 KW, and make changes in equipment; 1350 kc., shares with WAWZ (B1-L-1179). Also granted authority to determine operating power by direct measurement of antenna input (B1-Z-416).

WMBS—Peoria Broadcasting Co., Peoria, Ill.—Granted modification of license to change name of license from Peoria Broadcasting Co. to WMBS Broadcasting Co., 1440 kc., 1 KW, 5 KW LS, unlimited time (B-4-ML-1006).

WLOG—Independent Merchants Broadcasting Co., Minneapolis, Minn.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-426).

KRKD—Radio Broadcasters, Inc., Los Angeles, Calif.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-426).

WTRY—Troy Broadcasting Co., Troy, N. Y.—Granted authority to determine operating power by direct measurement of antenna power (B1-L-1179).

WLOG—Independent Merchants Broadcasting Co., Minneapolis, Minn.—Granted license to cover construction permit (B4-P-2482) as modified, authorizing a new station to operate on 1300 kc., 1 KW, unlimited time, DA day and night (B4-L-1173).

WPR—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—Granted authority to cover construction permit (B-P-1941) as modified, authorizing noise in frequency from 1370 to 1380 kc., shares with Wstell and WLOG, for the period ending July 25, in order to broadcast an address by Homer L. Chaillaux, National American Director of American Legion.

**Federal Communications Commission**

Wednesday, July 5, 1940 — 4399
780 kc., increase in power from 100 watts night, 250 watts day, to 1 KW night, 2½ KW day, and change in hours of operation from specified to unlimited time; make changes in equipment and antenna and move transmitter location (B1-L-1147). Also granted authority to determine operating power by direct measurement of antenna input (B-Z-409).

WLAC—WLAC Broadcasting Service, Nashville, Tenn.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-428).

KMO—Carl E. Haymond Tacoma, Wash.—Granted special temporary authority to rebroadcast programs to be received from Amateur Stations W8USA and W8RTW, for the period June 29, 1940, to not later than July 14, 1940, in connection with the Eleventh National Soaring Contest.

KMO—Carl E. Haymond Tacoma, Wash.—Granted special temporary authority to rebroadcast signals to be received from an Army airplane operating on Army frequency 1490 kc., on July 4, 1940, in connection with a National Defense broadcast to be released on the Mutual Network.

W2XOY—General Electric Co., Schenectady, N. Y.—Granted extension of special temporary authority to relay through high frequency station W2XOY the frequency modulated programs of high frequency station W2XMM, from July 1, 1940, to not later than July 30, 1940.

W2XOY—General Electric Co., Schenectady, N. Y.—Granted extension of special temporary authority to relay through high frequency station W2XOY the frequency modulated programs of high frequency station W2XMM, from July 1, 1940, to not later than July 14, 1940, in connection with a National Defense broadcast to be released on the Mutual Network.

W2XOY—General Electric Co., Schenectady, N. Y.—Granted extension of special temporary authority to relay through high frequency station W2XOY the frequency modulated programs of high frequency station W2XMM, from July 1, 1940, to not later than July 14, 1940, in connection with a National Defense broadcast to be released on the Mutual Network.

APPLICATIONS FILED AT FCC

550 Kilocycles

NEW—The Constitution Broadcasting Co., Atlanta, Ga.—Construction permit for new broadcast station to be operated on 550 kc., 1 KW night, 5 KW daytime, unlimited hours of operation, directional antenna for night use, Class III-B.

WGR—Buffalo Broadcasting Corp., Buffalo, N. Y.—Construction permit to make changes in transmitting equipment and increase power from 10 KW to 50 KW, Class I-B, directional antenna day and night.

590 Kilocycles

KVOA—Arizona Broadcasting Co., Inc., Tucson, Ariz.—Construction permit to change frequency from 1260 kc. to 550 kc., install directional antenna for day and night use, Class III-B.

860 Kilocycles

880 Kilocycles

KRRV—Red River Valley Broadcasting Corp., Sherman, Tex.—License to cover construction permit (B3-P-2228) as modified to change in frequency, increase in power, change hours of operation, move transmitter, new equipment, and install directional antenna.

KRRV—Red River Valley Broadcasting Corp., Sherman, Tex.—License to cover construction permit (B3-P-2228) as modified to change in frequency, increase in power, change hours of operation, move transmitter, new equipment, and install directional antenna.

920 Kilocycles

NEW—Seaboard Broadcasting Corp., Tampa, Fla.—Construction permit to erect a new broadcast station to be operated on 920 kc., 500 watts night, 1 KW daytime, unlimited time, Class III-B. Amended to change studio location.

940 Kilocycles

NEW—Park Cities Broadcasting Corp., Dallas, Tex.—Construction permit to erect a new broadcast station to be operated on 910 kc., 500 watts, unlimited time, Class III-B. Amended to make changes in antenna and specify transmitter site as south of Cadiz St. Bridge, Dallas, Texas.

970 Kilocycles

KJR—Fisher's Blend Station, Inc., Seattle, Wash.—Construction permit to make changes in equipment and increase power from 5 KW to 10 KW. Amended to make changes in equipment, install directional antenna for day and night use, and request Class I-B.

1020 Kilocycles

KLYW—Westinghouse Electric and Manufacturing Co., Philadelphia, Pa.—Construction permit to make changes in transmitting equipment and increase power from 10 KW to 50 KW, Class I-B, directional antenna day and night.

1040 Kilocycles

KRLD—KRLD Radio Corp., Dallas, Tex.—License to cover special experimental authorization for unlimited hours of operation and changes in directional antenna system.

KRLD—KRLD Radio Corp., Dallas, Tex.—Authority to determine operating power by direct measurement of antenna power.

1120 Kilocycles

KWSN—Heast Radio, Inc., Milwaukee, Wis.—Construction permit to install new transmitter, directional antenna for day and night use; move transmitter and increase power from 250 watts night, 1 KW daytime, to 1 KW night, 5 KW daytime. Amended to request 5 KW day and night.

1180 Kilocycles

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Modification of construction permit (B5-P-1783) which authorized changes in equipment and increase in power, requesting further changes in transmitting equipment.

1200 Kilocycles

KWOO—Hiawathaland Broadcasting Co., Sault Ste. Marie, Mich.—Authority to determine operating power by direct measurement of antenna power.

NEW—The Maryland Broadcasting Co., Baltimore, Md.—Construction permit for a new broadcast station to be operated on 1210 kc., 250 watts, unlimited time, Class IV. Amended to request the frequency of 1200 kc. instead of 1210 kc.

1210 Kilocycles

WOCB—Harriett M. Alleman and Helen W. MacLellan, d/b as Cape Cod Broadcasting Co., near Hyannis, Mass.—Granted permission to make changes in transmitting equipment and antenna and move transmitter from Sweethome Road, Tonawanda, N. Y., to Lake Shore Road, Township of Hamburg, N. Y.

1250 Kilocycles

KWWJ—KWWJ Broadcast Co., Inc., Portland, Ore.—Grant of construction permit to operate on 1210 kc., unlimited time, and resume operation from 9 p. m. to 3 a.m., PST, for the period August 1, 1940, to not later than October 1, 1940.

1310 Kilocycles

KWFC—Clyde E. Wilson and Howard A. Shuman, d/b as Hot Springs Broadcasting Co., Hot Springs, Ark.—License to
cover construction permit (B3-P-2380) as modified for new broadcast station.

NEW—Inter-City Advertising Company, Charlotte, N. C.—Construction permit to erect a new broadcast station to be operated on 1310 kc., 250 watts, unlimited time.

1330 Kilocycles

WKAT—A. Frank Katzentine, Miami Beach, Fla.—Modification of construction permit (B3-P-2781) which authorized change in frequency, increase in power, new equipment and antenna, requesting approval of antenna and transmitter site at 1759 N. Bay Road, Miami Beach, Fla.

1340 Kilocycles

WFNC—W. C. Ewing and Harry Layman, d/b as Cumberland Broadcasting Co., Fayetteville, N. C.—License to cover construction permit (B3-P-1926) as modified for a new broadcast station.

WFNC—W. C. Ewing and Harry Layman, d/b as Cumberland Broadcasting Co., Fayetteville, N. C.—Authority to determine operating power by direct measurement of antenna power.

NEW—Edward J. Doyle, Rochester, N. Y.—Construction permit for new broadcast station to be operated on 1340 kc., 1 KW, unlimited time. Amended re antenna changes and specify transmitter site at west side of Stanton Lane, south of Titus Road, Irondequoit, N. Y.

1350 Kilocycles

WBNX—WBNX Broadcasting Co., Inc., New York, N. Y.—License to cover construction permit (B1-P-2238) as modified for equipment changes, increase in power, and changes in directional antenna.

WBNX—WBNX Broadcasting Co., Inc., New York, N. Y.—Authority to determine operating power by direct measurement of antenna power.

1420 Kilocycles

WFPG—Neptune Broadcasting Corp., Atlantic City, N. J.—Modification of construction permit (B1-P-2333) for a new broadcast station requesting approval of new transmitter, vertical antenna, and transmitter and studio site at Virginia Avenue and Boardwalk, Atlantic City, N. J.

NEW—Harbenito Broadcasting Co., Harlingen, Tex.—Construction permit to erect a new broadcast station to be operated on 1350 kc., 250 watts, unlimited time. Amended to request 1420 kc., instead of 1350 kc.

1450 Kilocycles

WAGA—Liberty Broadcasting Corp., Atlanta, Ga.—Modification of license to increase power from 500 watts night, 1 KW daytime, to 1 KW day and night.

1460 Kilocycles

KSTP—KSTP, Inc., St. Paul, Minn.—Modification of construction permit (B4-P-1828) as modified for move of transmitter, install new equipment, directional antenna, increase power, requesting extension of required date of completion from 7-8-40 to 9-8-40.

1500 Kilocycles

WMOG—Coastal Broadcasting Co., Brunswick, Ga.—Consent to transfer of control of corporation from Alma W. King to Arthur Lucas and William K. Jenkins, 75 shares.

NEW—Caribbean Broadcasting Association, Inc., San Juan, P. R.—Construction permit to erect a new broadcast station to be operated on 1500 kc., 250 watts, unlimited time. Amended to request the facilities of WSSJ.

1550 Kilocycles

WQXR—Interstate Broadcasting Co., Inc., New York, N. Y.—Modification of construction permit (B1-PSB-13) as modified for installation of new equipment, move transmitter, and increase power, requesting changes in antenna system and transmitter.

MISCELLANEOUS

WRUW—World Wide Broadcasting Corp., Boston, Mass.—Construction permit to make changes in equipment and increase power from 20 KW to 50 KW.

NEW—Burns Avenue Baptist Church, Detroit, Mich.—Authority to transit programs to Station CKLW, Windsor, Ontario, Canada, from Detroit, Mich.

KAQV—Central States Broadcasting Co., Portable-Mobile in area of Omaha, Nebr.—License to cover construction permit for new relay broadcast station (B4-PRY-208).

WEHH—Columbia Broadcasting System, Inc., Portable-Mobile in area of New York, N. Y.—License to cover construction permit (B1-PRE-281) as modified for changes in equipment and reduction in power of relay broadcast station.

NEW—Hughes Productions Division of Hughes Tool Co., Los Angeles, Calif.—Construction permit for new television station to be operated on 66000-72000 kc., 10000 watts, A-3 and A-5 emission. Amended re antenna.

NEW—Hughes Productions Division of Hughes Tool Co., San Francisco, Calif.—Construction permit for new television station to be operated on 66000-72000 kc., 10000 watts, A-3 and A-5 emission. Amended re antenna.

NEW—Helen Townsley, Portable-Mobile, area of Great Bend, Kans.—Construction permit for new relay broadcast station to be operated on 1622, 2058, 2150, 2790 kc., 100 watts, A-3 emission. Amended to request 75 watts power instead of 100 watts.

KEHS—WDAY, Inc., Portable-Mobile, area of Farzo. N. Dak.—License to cover construction permit (B4-PRE-345) for a new relay broadcast station.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Inter-State Ribbon & Carbon Corporation, 2202-2210 Superior Ave., East Cleveland, Ohio, is charged in a complaint with the dissemination of certain misrepresentations in the sale of typewriter ribbons and carbon paper.

According to the complaint, the respondent represented that it manufactures the typewriter ribbons and carbon paper sold by it, and that it owns, operates and controls a factory in which its products are made, when such are not the facts.

The respondent corporation is further alleged to have represented that it has been in existence for 35 years when, according to the complaint, it was organized in 1938. Typewriter ribbons allegedly designated by the respondent as "Silk" and "Silk-Lyk" are not composed of silk, but are made entirely of cotton, the complaint continues. (4171)

Parkersburg Rig & Reel Co.—Alleging illegal acquisition of the outstanding capital stock of competing corporations, a complaint has been issued against The Parkersburg Rig and Reel Company, Parkersburg, W. Va.

Violation of Section 7 of the Clayton Act occurred, it is alleged, when the respondent corporation in 1939 acquired the capital stock of its competitors, The Oil Country Specialties Manufacturing Company and Atlas Engineering Works, Inc., both of Coffeyville, Kans. At that time, the complaint continues, the Parkersburg corporation had total stated assets of more than $4,000,000 and the acquired companies in excess of $1,800,000.

Effects of the acquisitions were alleged to be a substantial lessening of competition between the acquired and the acquiring corporations, restraint of interstate commerce in oil and gas well...
machinery and equipment, and a tendency to create monopoly. (4172)

STIPULATIONS

Following stipulations have been entered into by the Commission:

Bauer Thermometer Co.—Engaged in the importation and sale of weather recording instruments, Max Bauer, trading as Bauer Thermometer Company, 322 West 31st St., New York, has entered into a stipulation to discontinue certain representations.

The stipulation points out that the respondent marketed certain barometers containing imported German mechanisms but with the dials branded “Made in U.S.A.” and certain other barometers with imported German mechanisms on which the word “Germany” had been obliterated not as a result of an ordinary process of assembly or manufacture but by means of painting out the word “Germany” where it otherwise would have appeared.

In the sale of such barometers or other instruments having movements or mechanisms of foreign origin, the respondent, under his stipulation, agrees to cease representing, by use of the term “Made in U.S.A.”, or any other term indicative of American manufacture, that such barometers or other instruments are wholly of American manufacture, and to discontinue causing the brands or marks on imported barometer movements or other parts which indicate their foreign origin or manufacture, to be removed, erased or concealed so as to deceive ultimate purchasers, unless the removal, erasure or concealment is necessary to the further manufacture or processing of such products. (2858)

Chicago Lock Company, 2024 North Racine Ave., Chicago, entered into a stipulation in which it agreed to discontinue certain representations in the sale and distribution of its “Ace” lock.

The respondent agreed to cease representing its lock as being “Thief-Proof” or using such words in a manner tending to convey the belief to purchasers that the lock is proof against the acts of thieves or will withstand indefinitely all attempts to defeat it through the keyhole by picking or through the use of special keys, tools or other devices.

The respondent further agreed to discontinue using the phrase “Defies Duplication” as descriptive of the lock key so as to imply that the key will completely withstand duplication, when in fact such duplication, though it may be difficult, is not impossible. (2854)

A. C. Child & Sons Mercantile Co.—A stipulation to discontinue certain representations in the sale of a rat killing preparation from A. J. Child & Sons Mercantile Company, 800 Chouteau Ave., St. Louis, has been accepted.

The respondent agreed to discontinue representing that its product, “Black Cat Rat and Mouse Killer,” will drive rats outdoors to die, unless it is explained in an equally conscious manner that their burrows and habitats must be outdoors before it will do so. The respondent further agreed to cease using the word “Mouse” as a part of the trade name for the product, or from otherwise representing that it will kill mice. (02591)

C. A. Mauk Lumber Company, 530 Gardner Building, Toledo, agreed to cease representing that its wood stain, “Meta-Kote,” is a metal, a liquid metal coating, or a metal in liquid form; forms a solid film of metal, an armor of metal protection, a tough dense armor of rust-proof metal, or a metallic finish for old, worn-out shingles or any other surface; provides an “impenetrable shield” to the attacks of time or the elements, or is an effective coating for years or for any period of time in excess of that for which comparable shingle stains on the market afford such protection. It was also stipulated by the respondent that it will cease representing that “Meta-Kote” brings to the home beauty that lasts through generations or for any other exaggerated or unreasonable extent of time; has not the slightest resemblance to paint, stain or varnish, or that it is not in fact a stain colored with pigment and having a varnish-like vehicle. (2856)

Spiegel, Inc., 1061 West 35th St., Chicago, agreed to discontinue use of the word “washable” as descriptive of those of its wall-papers which are not in fact washable without resultant discoloration or damage, and to cease employing the word “washable” in any way, the effect of which may tend to convey the belief to purchasers that the products so referred to can be washed when in fact such washing results in discoloration or damage. The respondent further stipulated that it will cease using the word “colorfast,” or any similar word, as descriptive of its wallpaper, the colors of which are not in fact unfadeable, and will desist from using such word in any way so as to imply that the colors of the products so referred to will not fade, change or be altered when exposed to light. (2857)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

Retonga Medicine Company, 161 Spring St., N. W., Atlanta, Ga., was ordered to discontinue certain representations in the sale and distribution of a medicinal preparation, “Retonga.”

The order prohibits the respondent from representing that its preparation is a cure or remedy for, diseases or disorders characterized by such symptoms or conditions as nervousness, indigestion, headaches, sluggishness, pains, toxic poisoning, dirrhizus, muscular aches and pains, insomnia, biliousness, underrnourishment, loss of weight, or lack of strength; that it possesses any value in the treatment of these symptoms and conditions in excess of the temporary relief furnished by a mild laxative or gastric tonic; that when such symptoms or conditions are due to or caused by constipation or lack of appetite, or that its preparation has therapeutic value in the treatment of constipation in excess of providing temporary relief.

Further representations prohibited under the order are that “Retonga” relieves the body of toxic poisons or cleanses the system; that it has any beneficial effect or therapeutic value in the treatment of kidney or bladder disorders; that it renews or restores the strength or health or has any therapeutic properties with respect to building health or strength in excess of stimulating the appetite. (3949)

Aurine Company, Inc., 3635 West Cermak Road, Chicago, has been ordered to cease and desist from certain misleading representations in the sale of its medicinal preparation “Ourine.”

The order prohibits the respondent from representing its lock as being “Thief-Proof” or using such words in a manner tending to convey the belief to purchasers that the lock is proof against the acts of thieves or will withstand indefinitely all attempts to defeat it through the keyhole by picking or through the use of special keys, tools or other devices.

The order further requires the respondent to discontinue advertising that “Ourine” is a cure, remedy or competent or effective treatment for deafness or partial deafness; that the product possesses any therapeutic value in excess of such aid as it may render in softening coagulated wax in the ear, and that the respondent makes refunds to dissatisfied purchasers when in fact it does not maintain a definite policy of making such refunds.

Commission findings are that the respondent’s preparation is neither a cure or remedy nor a competent or effective treatment for deafness or partial deafness; that the product possesses any therapeutic value in excess of such aid as it may render in softening coagulated wax in the ear, and that the respondent makes refunds to dissatisfied purchasers when in fact it does not maintain a definite policy of making such refunds.

The respondents are Charles L. Klapp, trading as The Cardinal Co., and as The Cardinal Company of St. Louis, 406 Market St., St. Louis, distributor of “Femalade Tablets”; and “Femalade Liquid”; Michael S. Chiolak, trading as Tone Company, 64 West Randolph St., Chicago, distributor of “Silver Label Formula No. 6” and “Gold Label Formula No. 8”, both known also as “Tone Periodic Compound”, and William W. Kelso, trading as Northwestern Products Company and as Northwestern Health Clinic, 611 1/2 Union St., Seattle, distributor of “Periodic Relief Pills”.

The Commission orders direct the respondents to cease and desist from advertising their preparations as constituting cures, remedies or competent or effective treatments for delayed menstruation. The St. Louis respondent, in the sale of “Femalade Tablets”, and the other respondents, in the sale of their prepara—
Adwell Sales Co., 180 West Adams St., Chicago, distributor of statuettes; Morton Cohen, trading as Lee-Moore & Co., and as fishing tackle, cameras, pen and pencil sets, billfolds and wood fuzes, trading as The Novelty Home Furnisher, 53 West Jackson their products, to ultimate consumers. The respondents are Jack dealers from using lottery methods in connection with the sale of the vegetable fiber was not the vegetable matter known and supply to or placing in the hands of others, punch boards, push general public. The other respondents were ordered to discontinue supplying merchandise, either together with lottery devices or separately, and supply to or placing in the hands of others assortments of gift enterprise. The Akron Corporation was directed to cease public may be made by means of a lottery, game of chance, or merchandise so packed and assembled that sales to the general might be used in selling or distributing such merchandise to the public.

John-Manville Corporation and John-Manville Sales Corporation, New York, in the distribution of an insulating material now known as "Rock Cork", have been ordered to cease and desist from using the terms "entirely mineral", "mineral composition", "mineral in composition", "mineral—not vegetable", or any other words of similar import to describe a product not in fact entirely mineral in composition. Commission findings are that the respondent's product was composed of approximately 88 per cent mineral matter and 12 per cent vegetable matter, and that the vegetable fiber was not the vegetable matter known and properly designated as cork. (3899)

Novelly Home Furnisher—Orders were issued prohibiting five dealers from using lottery methods in connection with the sale of their products, to ultimate consumers. The respondents are Jack Purees, trading as The Novelty Home Furnisher, 53 West Jackson Boulevard, Chicago, dealer in clocks, coffee makers, silverware, cameras and lamps; Sam Guttman, trading as Standard Sales Co., 2366 Milwaukee Ave., Chicago, dealer in radios, clocks, watches, fishing tackle, cameras, pen and pencil sets, billfolds and wood statuettes; Morton Cohen, trading as Lee-Moore & Co., and as Adwell Sales Co., 180 West Adams St., Chicago, distributor of radios, knives, cigar lighters and other articles; Oak Lane Candy Company, York, Pa., distributor of candy and peanuts, and Great Buckeye Candies, Inc., 567 East South St., Akron, Ohio, dealer in candy. The respondents were ordered to cease selling or distributing merchandise so packed and assembled that sales to the general public may be made by means of a lottery, game of chance, or gift enterprise. The Akron Corporation was directed to cease supplying to or placing in the hands of others assortments of merchandise, either together with lottery devices or separately, and the other respondents were ordered to discontinue supplying merchandise together with lottery devices, which devices respectively, may be used in selling or distributing such merchandise to the general public.

The York and Chicago dealers were further ordered to cease supplying to or placing in the hands of others, punch boards, push or pull cards, or other lottery devices, either with assortments of merchandise or separately, which devices may be used in selling or distributing any merchandise to the public.

Morton Cohen, trading as Lee-Moore & Co., and as Adwell Sales Co., was also ordered to discontinue representing any specified sum of money as possible earnings or profits of salesmen for any stated period which is not a true representation of the net earnings or profits made during such period by a substantial number of his active salesmen under normal conditions. (4023, 3990, 3938, 4099 and 4015)

Paramount Institute—D. Victor Wallace, trading as Paramount Institute, 1095 Market St., San Francisco, was ordered to discontinue certain misrepresentations in connection with the sale of correspondence courses designed to prepare students for United States Civil Service examinations. Under the order, the respondent is to cease representing, among other things, that he has opportunity for contact with the United States Civil Service Commission which is not available to any member of the public; that he has advance or "inside" information concerning civil service examinations; that he offers any preparation for civil service examinations other than a coaching service, or that he is a civil service specialist. The order also directs that he cease misrepresenting the prospects for obtaining civil service positions and such features of the Government service as salaries, working hours, age limits, promotion, and annual leave.

The respondent was further ordered to discontinue using the term "Institute" as part of his trade or corporate name or as descriptive of his business, and to discontinue representing that his general business or sales methods are approved by the Federal Trade Commission or conform to its rules or regulations, or representing that the regular price charged for his courses is a special or reduced price. Commission findings are that the respondent offers no basic or thorough instruction in any subject; that his method of instruction consists merely of mailing out previously prepared matter and the grading of papers by means of a key or prepared answer sheets; and that his school is not an institution of learning in any accurate sense. (4009)

Popular Publications, Inc., 205 East 42nd St., New York, has been ordered to discontinue certain representations in the sale of rings. Findings of the Commission are that the respondent represented that the stones contained in the rings sold by it as "Lucky Birthstone Rings" are the real birthstones, such as garnet, amethyst and aquamarine, when in truth they are imitations of such stones. Under the order, the respondent is to cease representing, directly or by implication, that the rings sold by it are set with precious or semi-precious stones identified as the birthstones for the respective months of the year. (4077)
THE WEEK IN WASHINGTON

The complete NAB convention program—a program no broadcaster can afford to miss—is published in this issue. (p. 4406.)

James Lawrence Fly, FCC chairman, says there is no need for the broadcasting industry to be alarmed about any defense plans. (p. 4408.)

Two BMI tunes make the “most often played” lists in the trade press. (p. 4407.)

A. F. of M. difficulties at Stations KSTP and WRVA are ironed out, and network name bands returned to the air. (p. 4408.)

Wage and Hour Administration says transmitter caretakers are covered by the Act. (p. 4408.)

All stations are urged to promote radio at state and county fairs this summer. (p. 4410.)

FCC rules affecting operators are tightened up. (p. 4411.)

The Research Committee meets in Washington and outlines a plan for unit measurement of broadcast advertising volume, to be presented to the Board of Directors at San Francisco. (p. 4411.)

Convention Program Complete

Dr. Frank Kingdon, nationally known social leader and executive director of the Citizenship Educational Service has been added to the list of the distinguished speakers who will bring important messages to the eighteenth annual convention of the NAB (August 4-7).

In addition, James L. Fly, chairman of the FCC, making his first appearance before an industry-wide meeting, and Louis Johnson, Assistant Secretary of War, scheduled to speak on the possible effects of the national emergency on radio, have also definitely been scheduled to address the San Francisco convention described last week by Neville Miller, NAB president, as the “most important meeting of the industry in its twenty-year history.” The complete convention program appears on another page.

A former college president, Dr. Kingdon was drafted to his present post when outstanding religious, civic, labor and fraternal groups undertook to bring together their common aims of uniting the American people in an awakened appreciation of the basic ideals underlying the Constitution and the Bill of Rights. Such outstanding groups as the Boy Scouts of America, the Catholic Youth Organization, the American Federation of Labor, the DAR, the Jewish Welfare Board, the Knights of Columbus, Federal Council of the Churches of Christ in America, the Elks, and others listed below, are the sponsoring groups of the Citizenship Educational Service.

In light of the national defense program and the increasing social responsibility which station managers must assume, as problems of propaganda and so-called Fifth Column activities become more complex, Dr. Kingdon has been asked to draw upon his own and the experience of those affiliated groups to bring the industry a backlog of usable information. Recognized as one of the country’s ablest speakers, his address is looked forward to as one of the highlights of the convention.

Following is the list of organizations affiliated with the Citizenship Educational Service:

American Federation of Labor
American Friends Service Committee
American Jewish Committee
Benevolent and Protective Order of Elks
Boys’ Clubs of America
Boy Scouts of America
Camp Fire Girls
Catholic Charities
Catholic Youth Organization
Daughters of the American Revolution
Federal Council of Churches of Christ in America

Merritt E. Tompkins, General Manager, BMI
Carl Haverlin, Stations Relations Director, BMI

12:30 p.m. Luncheon Colonial Ball Room
Hon. Louis Johnson, Assistant Secretary of War, Speaker
“Sponsors of National Defense”

2:15 p.m. Business Session Colonial Ball Room
NAB Sales Managers Division Meeting—William Cline (WLS), Presiding
2:15 p.m. “The Unit Plan of Volume Measurement—A Broadcaster's Views”—William Scripps, Chairman, NAB Research Committee
2:30 p.m. Report on “The Unit Plan of Volume Measurement”—Paul F. Peter, NAB Director of Research
2:45 p.m. Roundtable on Unit Plan of Volume Measurement
Representative of ANA
Representative of AAAA
Representative of NRDGA
Representative of Sales Managers
3:15 p. m.  General Discussion — Unit Plan of Volume Measurement
3:45 p. m.  Vote on Unit Plan of Volume Measurement
3:50 p. m.  Audimeter Audience Measurement—A. C. Neilson, A. C. Neilson Co.
6:30 p. m.  Meeting New Board of Directors
7:30 p. m.  Television
   Talk on Television — Ted Smith, RCA
   Talk on Television—Harry Lubcke, Director of Television, Don Lee Broadcasting System
   Television Demonstration
   Roundtable Discussion on Television

Wednesday, August 7
8:30 a. m.  Breakfast Sessions — NAB Places of meetings to be announced
   Staff Directors, Presiding to be announced
   Engineering Roundtable—Lynne C. Smeby, Presiding
   Bureau of Radio Advertising—Edward M. Kirby and Paul F. Peter, Presiding
   Law Roundtable — Russell P. Place, Presiding
   Labor and Wages and Hours Roundtable — Joseph L. Miller, Presiding
10:00 a. m.  Business Session
   Colonial Ball Room
   Edgar Bill (WMBD), Chairman, NAB Code Compliance Committee, Presiding
   Dr. Frank Kingdon
   Special Events Broadcasting —Mark Ethridge (WHAS), Presiding
   Herbert Hollister, General Manager, KFBI, Wichita, Kansas
   A. A. Schecter, Director of News and Special Events, NBC
   Paul W. White, Director of Public Affairs, CBS
12:30 p. m.  Luncheon
   (No official luncheon but we have agreed to cooperate with INS by making the Colonial Ball Room available for the luncheon they are tendering to the delegates)
2:15 p. m.  FM Broadcasting
   FM—John Shepard, President, FM, Inc., Presiding
   (Two speakers to be selected: one on FM Equipment and one on Practical Aspects of FM Broadcasting.)
   FM Demonstration
   Roundtable discussion on FM
4:00 p. m.  FM, Inc., Executive Session
   Place to be announced
4:30 p. m.  Reports of Committees
   Unfinished Business
8:00 p. m.  Annual Banquet
   California Ball Room
   Treasure Island

N. Y. NEWS SENDS RADIO EDITOR TO CONVENTION

The New York News appreciates the importance of the forthcoming NAB convention. The paper is sending Ben Gross, its radio editor, to San Francisco to give its readers complete coverage. Other eastern papers are considering sending special correspondents, also.

BMI DEVELOPMENTS

BMI FEATURE TUNES
July 15-July 22

1. THE SAME OLD STORY
2. PRACTICE MAKES PERFECT
3. THAT'S FOR ME
4. FOOEY ON YOU
5. DON'T THE MOON LOOK PRETTY?

Record it in your history books that BMI began to publish music during the first week of April, 1940, and that three months later, to wit, during the first week of July, 1940, two BMI songs were on the lists of the music most often played over the air. Here in the Velvet Night and We Could Make Such Beautiful Music are No. 13 and No. 19 respectively on the “sheet” in Variety for July 10, 1940, and the same two appear in the list published by the New York Enquirer.

Theme song of the new Lifebuoy program, The Adventures of Mr. Meek, is Watching and Waiting by Elliott Jacoby. It will be published by BMI. The program began on July 10, will be heard every Wednesday at 7:30 p. m., EDST, with a repeat for the West, and is being carried by CBS on a 68-station hook-up.

The composer is appearing on the program with his own band. He is one of the country's best known arrangers and has already turned out the orchestrations for several BMI numbers.

Another new song which BMI will publish was written by Ernest Gold, Beasley Smith, and Hank Fort. The name of Ernest Gold has already appeared on BMI music. Beasley Smith is a staff musician at WSM in Nashville, Tennessee. And Hank Fort is—attractive young Mrs. Eleanor Fort of Nashville. When she was asked why she used the name "Hank," she allowed as how she had on some occasions been regarded by some people as being somewhat of a tomboy. Her song is Somethin' Grand. BMI thinks Hank is, too, and she feels the same way.
Chairman Fly told the reporters that he has done everything in a substantial informal way in connection with the setting up of the proposed new Communications Defense Committee in cooperation with the various interested departments. There is a general agreement on the plan he said, and no issues have arisen. Mr. Fly said that there are no outstanding problems regarding the setting up of this Committee and the personnel has been tentatively agreed upon and no difficulties have been encountered in this connection.

**NAME BANDS BACK**

A. F. of M. difficulties at Stations KSTP, St. Paul, and WRVA, Richmond, Va., were settled this week, and the network name bands returned to the air. The union had ordered the name bands not to broadcast because, the union maintained, KSTP and WRVA were not spending their "quotas" for staff musicians.

**TRANSMITTER CARETAKERS**

Transmitter caretakers are covered by the Wage and Hour Act, and must be paid a minimum of 30 cents an hour with time and one-half for overtime above 42 hours a week. The following exchange of correspondence will be of interest:

July 2, 1940

Mr. Milton Denbo, Chief Opinion Attorney
Wage and Hour Division
U. S. Department of Labor
Washington, D. C.

Dear Mr. Denbo:

A western broadcaster poses this question:

We employ a yard man whose sole duty during the spring, summer and autumn months is to cut and water the huge lawn and terraces, take care of the flowers, shrubs, trees and do general horticultural work at our transmitter site. He works more than forty-two hours a week during these months. During the winter we could easily dispense with his services but, because he has a wife and two small children we keep him on the payroll and create little odd jobs around the transmitter to keep him busy a few hours each day. Both he and we would like to pay him a constant salary the year around, but, because he has a wife and two small children we keep him on the payroll and create little odd jobs around the transmitter to keep him busy a few hours each day. Both he and we would like to pay him a constant salary the year around, but we are forced to pay him overtime during the summer months, we cannot afford to pay him during the winter. Is he exempt from the Act as an agricultural or domestic worker during these months when his sole duty is caring for flowers, etc.?

Because nearly every radio station in the country has an employee with similar duties, the entire industry would be grateful for your opinion.

Sincerely yours,

Joseph L. Miller.
Director of Labor Relations.
LABOR BOARD ORDER IN WFBM CASE

The National Labor Relations Board has announced an order requiring Indianapolis Power & Light Company, Indianapolis, Indiana, owner of Station WFBM, to cease discouraging membership in the CIO's United Utility Workers Organizing Committee and the AFL's Associated Broadcast Technicians' unit of the International Brotherhood of Electrical Workers, or in any other labor union. The company was also required to cease encouraging membership or in any manner supporting or assisting Indianapolis Power & Light Employees' Protective Association.

Finding that the company had practiced discriminations against members of the nationally affiliated organizations, the Board ordered the company to reinstate with back pay Sidney Collier and Thomas Elberg and to give back pay losses to Russell Rennaker.

(Rennaker is not an organizer for the ABT.)

The Board dismissed allegations that the company had discriminated against three other employees, had engaged in surveillance of union meetings, or had interfered with the formation of the Association.

Prior to 1937, the Board said, no labor organization existed among the company's employees. In March of that year Rennaker and a fellow employee called a meeting for the purpose of discussing organization among the employees of radio station WFBM. In May 1937 the CIO began its organization among the generating plant employees. The Association, which had a prior birth, began to take a prominent role among the company's employees following the CIO's activities.

The Board found that on the day preceding the meeting called by Rennaker for employees of WFBM, the company notified each of them of an increase in pay. The Board held that the raise in wages "plainly was intended ... to express employer opposition to and forestall a series of joint action which the respondent (power company) feared would result in collective action in the formation of a labor organization at the station."

It continued: "The Board and the courts (2nd and 9th C.C.A.) repeatedly have recognized as intimidatory in its effect upon employees in the exercise of rights guaranteed by the Act and as violative of the statute, the grant of a wage increase by the employer under circumstances calculated to and which does disclose to employees the employer's hostility to organization or to other concerted activity protected by the Act."

Although the radio station employees at that time were not members of a labor organization, the Board, after citing the Act's guarantee of the right to engage in concerted activities for mutual aid and protection, stated:

"Of this provision we have observed that employer conduct which discourages employees from engaging in concerted activities for purposes of collective bargaining or mutual aid or protection, where no labor organization exists, also 'has the effect of discouraging the formation of and membership in a labor organization, which is the customary instrument utilized by employees to achieve collective bargaining.'"

The Board found that Rennaker was dismissed from WFBM on January 15, 1938, having been employed for four years as an operator and ranking third in seniority among the company's seven other operators. After an examination of the evidence, the Board ruled that Rennaker was not discharged for business conditions, pointing out that four months later one employee was transferred from another department to perform operational work and that some time later an additional worker was hired. Also, the Board ruled that the company departed from its seniority policy and its policy of preferring married to unmarried workers in laying off employees. Considered in the light of the entire record, the Board said that Rennaker was discharged because of his undertaking to form a local of the ABT and that the company thereby violated the Act.

The company contended that it dismissed Collier and Elberg from its generating plant at Harding Street because of a decline in energy consumption. Although the Board found that the company did experience a decline in consumption, it ruled that these two employees were single out for lay-off, in violation of their seniority rights, because of their interest in organization. The Board found that they were dismissed by the company on January 6 in furtherance of the same anti-union policy which had resulted in Rennaker's discharge. It said that the record revealed that the employees' willingness to assume direction of organization and more especially their participation in a wage request and their positions as officers in the UWOC were the determining factors which resulted in their being selected rather than other employees of lesser seniority for dismissal.

The Board considered evidence relating to the alleged union discriminations of Roy Payton, Harry Wilkins, and Dewey Logsdon and agreed with the finding of Trial Examiner Horace A. Ruckel that they did not present cases of union discrimination.

FREE SPEECH

Two federal circuit courts of appeals have held recently that an employer may freely discuss with his employees the question of whether they should join a labor union, so long as the employer exercises no interference, restraint or coercion.

In the case of Midland Steel Products Company vs. NLRB, the Sixth Circuit Court said, in part:

"But neither statement of fact nor expression of opinion by the employer is prohibited by the statute (Wagner Act), and if they were, the statute would contravene the free speech provision of the First Amendment ... Unless the right of free speech is enjoyed by employers as well as by employees, the guaranty of the first amendment is futile, for it is fundamental that the basic rights guaranteed by the Constitution belong equally to every person. The use of influence amounting to interference, restraint or coercion plainly is illegal ... But where no such element exists, the employer is not precluded from conversing with employees about labor questions."

In the case of Continental Box Company vs. NLRB, the Fifth Circuit Court said, in part:

"The constitutional right of free speech in regard to labor matters is just as clearly a right of employers as of employees, and if the act purported to take away this right, it could not stand. But the enforced statute has not undertaken at all to interfere with or limit the right of free speech. All that the statute prohibits is domination, interference and support. The
employer has the right to have and to express a preference for one union over another so long as that expression is the mere expression of opinion in the exercise of free speech, and is not the use of economic power to coerce, compel or buy the support of the employees for or against a particular labor organization."

The issue of free speech and the Wagner Act has yet to come before the Supreme Court. Until it is finally determined, employers should be cautious in talking to employees about labor union questions.

**Promotion**

### STATIONS SHOULD PROMOTE RADIO AT STATE AND COUNTY FAIRS

Institutional promotion for radio is to have a prominent part in the activities which many stations are planning for state and county fair participation.

Stations with a long history of successful fair exhibitions seldom fail to tie-in institutional promotion along with station exploitation.

This year it is especially desirable that such a policy be continued by "old timers" and adopted by newer fair participants.

It is suggested that in promoting station services and program excellence, definite attention be given to the inclusion of promotion for the American System of Broadcasting; and particularly the fact that American radio is free—without dictator—and must remain free.

Among the many fair-minded stations are: WLS, WSYR and WDAY.

Bill Cline, commercial manager, explained the details of WLS' coverage of three state fairs, during a visit here this week.

Arnold F. Schoen, service director, has prepared plans for participation of WSYR, Syracuse, in the New York State Fair.

Bill Dean, publicity and promotion director, plans to make WDAY activities an outstanding feature of the famous Red River Valley Fair.

Bill Dean, publicity and promotion director, plans to make WDAY activities an outstanding feature of the famous Red River Valley Fair.

**WGY PROMOTION**

Kolin Hager, manager, WGY, Schenectady, deftly handled the American System of Broadcasting in his talk over the station at 7:45 p. m., Sunday, June 24. This is a subject which needs continuous interpretation for the citizenry at large. Mr. Hager's talk follows:

"The National Association of Broadcasters—a countrywide organization of the more important broadcasting stations—has set aside this week in June as a Radio Get-Acquainted period. In cities throughout the nation, listeners have been invited to learn more about the organizations providing them with broadcasts of information and entertainment.

"WGY as one of the pioneer stations of America joins in this Radio Festival which tonight is officially proclaimed to our listeners near and far by the Honorable Mills Ten Eyck, Mayor of Schenectady."

"Many people are inclined to regard radio broadcasting as something distinctive to this terrifying twentieth century in which we find ourselves. In truth, only radio is new. Broadcasting—or the spreading of information in all directions—is of great antiquity. "Ours is the one nation in all the world with a system of broadcasting which must stand or fall by the extent to which it wins the approbation of the listening audience. Here indeed is the only radio system which has the operating philosophy of 'What does the audience want—what can we bring to our listeners in news, religion, entertainment, culture—the great pageant of history in the making—to make lives more full, information more complete?' "Through this medium we listen at will without fee or license, hinting not of restraint, and the effect of radio broadcasting on the thinking of men and women is ever-widening. Our course at WGY has been toward maintaining a democracy of the air. So that this ideal may stand out as a goal, every effort is made to keep abreast of the ever-changing tastes of the radio audience. Radio has never dealt in an ivory tower. It is of the people, by the people, for the people.

"Radio must ever continue to serve the masses as well as the classes. It can never survive or justify its existence on any other basis. And so during this week in particular we welcome you—especially those who have not yet visited our studios—to come to the station and become better acquainted with us and what we're endeavoring to accomplish.

"Looking forward we must contemplate the changes that come to all men and to all nations as the future unfolds. It is WGY's hope in behalf of the General Electric Company and the National Broadcasting Company that we may continue to be a means through which a democracy of the air may be maintained and ever-expanded to serve the people of America."

**"IS YOUR HAT IN THE RING?" MAILED NEXT WEEK**

Sample copies of the 1940 edition of "Is Your Hat In the Ring?" will be mailed to member stations next week. This is the booklet which has taught microphone technique to hundreds of political speakers in every state in the Union. It incorporates new FCC rules governing broad-
casts by candidates for public office, dated June 24, 1940.
The price is 4¢ per copy, postage extra. Order from headquarters.

Sales

STATIONS SHOULD SEND IN DEPARTMENT STORE QUESTIONNAIRE TODAY

The Research Department has received 225 returns from the questionnaire mailed to all commercial stations May 15, 1940. Those stations which have not returned the Department Store questionnaire are urged to do so. Without complete data on the subject, it is not possible to prepare the cooperative study of Department Store use of radio NAB and the National Retail Dry Goods Association are undertaking.

Forty-one of the stations reporting do not currently have Department Store business. More than a hundred others have only a negligible amount. All of these replies have been most helpful in outlining the sales problems confronting stations. They constitute as valuable a part of the study as the answers from stations currently having such substantial business.

Whether stations currently have Department Store business or not, they should return the questionnaire to the Research Department. The NAB can’t help stations get Department Store business without receiving completed questionnaires.

Engineering

RULES AFFECTING OPERATORS TIGHTENED

New rules to strengthen and make more definite certain prohibitions with respect to conduct of commercial and amateur radio operators were approved this week by the FCC, effective immediately.

Under authority contained in the Communications Act, the Commission amended its “Rules Governing Amateur Radio Stations and Operators” as follows:

Sec. 12.28 Obscenity, indecency, profanity. No licensed radio operator or other person shall transmit communications containing obscene, indecent, or profane words, language, or meaning.

Sec. 12.81 False signals. No licensed radio operator shall transmit false or deceptive signals or communications by radio, or any call letter or signal which has not been assigned by proper authority to the radio station he is operating.

Sec. 12.82 Unidentified communications. No licensed radio operator shall transmit unidentified radio communications or signals.

Sec. 12.29 Interference. No licensed radio operator shall willfully or maliciously interfere with or cause interference to any radio communication or signal.

Sec. 12.30 Damage to apparatus. No licensed radio operator shall willfully damage, or cause or permit to be damaged, any radio apparatus or installation in any licensed radio station.

Sec. 12.50 Fraudulent licenses. No licensed radio operator or other person shall obtain or attempt to obtain, or assist another to obtain or attempt to obtain, an operator license by fraudulent means.

Likewise, the Commission supplemented its “Rules Governing Commercial Radio Operators” with:

Sec. 13.64 Obedience to lawful orders. All licensed radio operators shall obey and carry out the lawful orders of the master or person lawfully in charge of the ship or aircraft on which they are employed.

Sec. 13.65 Damage to apparatus. No licensed radio operator shall willfully damage, or cause or permit to be damaged, any radio apparatus or installation in any licensed radio station.

Sec. 13.66 Unnecessary, unidentified, or superfluous communications. No licensed radio operator shall transmit unnecessary, unidentified, or superfluous radio communications or signals.

Sec. 13.67 Obscenity, indecency, profanity. No licensed radio operator or other person shall transmit communications containing obscene, indecent, or profane words, language, or meaning.

Sec. 13.68 False signals. No licensed radio operator shall transmit false or deceptive signals or communications by radio, or any call letter or signal which has not been assigned by proper authority to the radio station he is operating.

Sec. 13.69 Interference. No licensed radio operator shall willfully or maliciously interfere with or cause interference to any radio communication or signal.

Sec. 13.70 Fraudulent licenses. No licensed radio operator or other person shall obtain or attempt to obtain, or assist another to obtain or attempt to obtain, an operator’s license by fraudulent means.

Under these provisions the Commission clarifies its authority to prosecute as well as suspend licenses in cases of violation.

STRUCTURE ERECTION NOTICE

The Civil Aeronautics Authority has issued a regulation requiring advance notice from a person engaged in the construction or alteration of any structure within 3 miles of the nearest boundary of any landing area along or within 10 miles of a civil airway which will exceed one-fiftieth in height the distance to the nearest boundary of the landing area. Full details of the regulations can be obtained by writing to the Civil Aeronautics Authority, Washington, D. C., asking for regulations serial number 76.

Miscellaneous

NAB RESEARCH COMMITTEE

A meeting of the NAB Research Committee was held in the NAB Headquarters in Washington, Wednesday, July 10th. Mr. William J. Scripps, Chairman of the Committee, presided over the meeting with H. M. Beville, Jr., NBC Research Manager, James D. Shouse, Vice President of Radio Stations WLW-WSAI, Dr. Frank N. Stanton, CBS Research Director, Neville Miller, NAB President, C. E. Arney, NAB Assistant to the President, and Paul F. Peter, NAB Director of Research, in attendance. Mr.
William R. Cline, Sales Manager of Radio Station WLS, Chairman of the NAB Sales Manager's Committee, attended the meeting as a guest.

The committee completed discussion of plans for a Unit Measurement of Broadcast Advertising Volume and outlined the report to be presented to the NAB Board of Directors, and, subject to its approval, to the San Francisco Convention in August. Other subjects discussed included the work of the Bureau of Radio Advertising and the place of research in its activity, the proposal of publishing survey results of a basic industry nature by the Bureau, and possible NAB participation in future industry research.

The committee voted to hold its next meeting in San Francisco, August 4th, 1940.

INCREASED POPULARITY FOR U. S. SHORT WAVE IN SOUTH AMERICA

Increasing popularity in Latin America of radio programs originating in the United States is indicated in consular reports reaching the Department of Commerce from the Latin American countries, according to John H. Payne, Chief, Electrical Division.

While it is frequently reported that reception in certain of the countries is not good, due to adverse atmospheric conditions or technical limitations, the excellent quality of the programs is commented upon in most of the communications.

Mr. Payne said that transmission of radio programs to Latin America is considered of mutual benefit, since it makes available in that region many of the high quality programs heard in the United States and at the same time is a medium through which the Latin American public is informed of our customs, culture and endeavors.

News reports emanating from American short-wave broadcasting stations have probably acted as the greatest single factor in enhancing the popularity of American broadcasts among Latin American listeners. Mr. Payne believes, too, that emphasis on entertainment value which characterizes American broadcasts also contributes greatly to their popularity.

Publication in newspapers and other periodicals in Latin America of schedules of short-wave radio programs originating in the United States and beamed directly on Latin America is being effected by the Department of Commerce in close cooperation with the Department of State, the Radio Manufacturers Association and the radio broadcasting industry. Mr. Payne indicated that a greater volume of sort-wave programs is put on the air by American broadcasters than in any foreign country.

Weekly schedules of forthcoming radio programs, especially prepared or selected on the basis of known preferences of radio listeners in Latin America and frequently presented in the languages most widely understood in that area, are distributed in Latin American countries through the Foreign Offices of the United States Government.

At the present time, 7 companies operating 11 short-wave radio stations located in New York, N. Y., Schenectady, N. Y., Boston, Mass., Philadelphia, Pa., Pittsburgh, Pa., Cincinnati, Ohio, and San Francisco, Calif., are transmitting these programs daily to Latin America.

1940 CENSUS

The Bureau of the Census, Department of Commerce, is currently releasing preliminary 1940 population figures on cities of 25,000 or more population. The figures they are now releasing are counts made by their district supervisors in the field and are subject to change when the final tabulation of the Census is made in Washington.

Through July 6th, the Census Bureau has reported preliminary population figures on 129 cities of more than 25,000 population in 1940. The total population of these 129 cities increased from 19,629,749 to 20,479,786, or 4.3% between 1930 and 1940, compared with an increase of 20.5% between 1920 and 1930. Of the 129 cities, 99 have gained population and 30 have lost in the last 10 years, whereas, between 1920 and 1930, 119 gained and only 10 cities lost population.

MUNICIPAL GOVERNMENT PROGRAMS

The Educational Radio Script Exchange, U. S. Office of Education, has available 15 thirty-minute scripts dealing with the operation of municipal government, which might interest broadcasters.

The scripts are for dramatizations of the work of municipal government departments—fire, police, and others—which could be adapted to local conditions.

Their use might go a long way toward promoting good will between radio stations and municipal government officials, as well as providing excellent educational programs for the listening public.

The Commission

HEITMEYER AND FRONTIER CASES

The FCC on July 11 announced decisions with respect to docket cases involving construction of new radio broadcast stations at Cheyenne, Wyo.

It denied motion of Paul R. Heitmeyer to grant without further hearing his application for a construction permit but complied with his alternative request that his application be dismissed. At the same time, the Commission granted the petition of the Frontier Broadcasting Company to reconsider Commission action in remanding its
application for hearing and granted the same without further hearing.

In doing so it authorized the Frontier Company to operate on 1420 kilocycles, with power of 100 watts night, 250 watts until local sunset, unlimited time of operation, subject to condition that permittee file within a period of two months an application for modification of construction permit specifying the exact transmitter location and antenna system proposed to be installed.

Decisions and orders, prepared pursuant to Commission action of July 5, were made public today. With reference to the Heitmeyer case (Docket No. 3161), which had been previously involved in litigation, the Commission commented:

"The necessity of obtaining current information after a time interval such as that occurring between the original filing and consideration of the instant application and the present date is readily demonstrated by reference to certain contractual arrangements upon which the applicant relied to show financial ability at the time of his hearing in October, 1935. The applicant at that time proposed to finance the new station from a loan of $40,000 which he had obtained from A. L. Glsman and which he had agreed to repay within five years with interest at 6%, in default of which Glsman was to become owner of certain stock in various corporations which were to be organized. This contract will expire within a few months by its terms, if it has not already been terminated by the makers. In any event, the Commission does not have information as to the present status of the contract of October 1935, or with respect to the applicant's financial status at this date.

"The Commission considers that the information which it requested, but which is refused by the applicant, is necessary to further consideration of the application, the only alternative is to dismiss the application as prayed for by the applicant."

In granting the Frontier application the Commission observed:

"The service which the applicant proposes to establish is designed to meet the local needs and interests of Cheyenne and its surrounding area. A permit was recently granted for construction of a station in Cheyenne but as yet this city does not have a radio broadcast station although it is the capital of Wyoming and one of the State's largest communities.

"The equipment applicant proposes to install conforms to standards established by regulation and may be expected to provide efficient service from a technical standpoint. Operation of the proposed station upon the frequency specified by the applicant will not cause objectionable interference to any other station.

"The Commission finds, upon further consideration of the application of Frontier Broadcasting Company in connection with the supplemental information which has been submitted, that the applicant is legally, technically, and financially qualified to construct and operate the proposed station; and that the granting of a construction permit therefor will serve public interest, convenience, and necessity."

847 STATIONS

The FCC issued operating licenses to eight stations and granted eleven permits for the construction of new stations during the month of June, 1940. A comparative table by months follows:

FEDERAL COMMUNICATIONS COMMISSION

FINAL ORDER

FCC has announced adoption of an order granting the application of Joe W. Engel for a new station in Chattanooga, Tenn., to operate on the frequency 1370 kilocycles, with 250 watts, unlimited time, upon condition that permittee shall file an application for modification of construction permit specifying exact transmitter location within two months after effective date of order.

PROPOSED FINDING OF FACT

FCC has also announced its proposed findings of fact and conclusions, proposing to affirm the recommendations of Commissioner Payne to revoke the license of the East Texas Broadcasting Company (KGKB), Tyler, Texas, operating on 1500 kilocycles, with 250 watts, unlimited time.

Upon consideration of all the facts of record, the Commission finds that the East Texas Broadcasting Company, licensee of station KGKB, had, on some date unknown to the Commission during the year 1936, delegated the operation and management of the station to one James G. Ulmer. By virtue of such action the company voluntarily transferred the rights theretofore granted to it by terms of the license issued by this Commission, without its consent in writing for such transfer or assignment, in violation of the provisions of the Communications Act of 1934, as amended.

East Texas Broadcasting Company, licensee of station KGKB, did therefore violate the provisions of the license heretofore issued to it for the operation of said station, and the revocation order entered in this matter on February 13, 1940, is affirmed.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following broadcast oral arguments are scheduled before the Commission for the week beginning Monday, July 15. They are subject to change.

Thursday, July 18

Oral Argument Before the Commission

Report No. B-107:

NEW—The Mayflower Broadcasting Corp., Boston, Mass.—C. P., 1410 kc., 500 watts, 1 KW LS, unlimited time (requests facilities of WAAB).
FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KVI—Laura M. Doernbecher, Executrix of the Estate of Edward M. Doernbecher, Tacoma, Wash.—Granted consent to voluntary transfer of control of Puget Sound Broadcasting Co., licensee of Broadcast Station KVI, Tacoma, Wash., from Laura M. Doernbecher, Executrix of the Estate of Edward M. Doernbecher (deceased), to Laura M. Doernbecher; 570 kc., 5 KW day and night, unlimited time (B5-TC-230).

WSUN—City of St. Petersburg, Fla., St. Petersburg, Fla.—Granted construction permit to increase night power from 1 KW to 2 KW and make changes in directional antenna system; 620 kc., 5 KW day specified hours.

WFIA—Florida West Coast Broadcasting Co., Inc., Tampa, Fla.—Granted construction permit to make changes in directional antenna and increase power from 1 KW night, 5 KW day, to 5 KW day and night, directional antenna night; frequency 620 kc., specified hours (B3-P-2715).

KWFT—Wichita Broadcasting Co., Wichita, Kans.—Granted construction permit to install new transmitter, directional antenna, and increase power from 250 watts night, 1 KW day, to 1 KW night, 5 KW day; frequency 620 kc., unlimited time (B3-T(r-221).

KQW—Pacific Agricultural Foundation, Ltd., San Jose, Calif.—Granted modification of license to increase night power to 5 KW, using present directional antenna day and night; 5 KW day; 1010 kc., unlimited time (B3-ML-907).

WMFR—Wayne M. Nelson, High Point, N. C.—Granted consent to voluntary transfer of control of Radio Station WMFR, Inc., licensee of Station WMFR, from Wayne M. Nelson to James E. Lambeth; 1200 kc., 250 watts day and night, unlimited time (B3-TC-221).

WCHN—Mrs. Marcia Arrington, Charlottesville, Va.—Granted motion for extension of time within which to file exceptions, brief and request for oral argument in re application for construction permit to install directional antenna for day and night use and move transmitter to southwest of Kansas City, Kan., and studio to Kansas City, Mo.; granted additional 30 days (B4-P-2272).

WQXR—Interstate Broadcasting Co., Inc., New York, N. Y.—Granted modification of construction permit as modified for increase in power from 1 KW to 5 KW, installation of new equipment, and move of transmitter, for installation of new transmitter and changes in antenna system (B1-MP-996).

WFPG—Neptune Broadcasting Corp., Atlantic City, N. J.—Granted modification of construction permit for new broadcast station, for approval of new transmitter, vertical antenna and approval of studio and transmitter site at Virginia Avenue and Boardwalk, Atlantic City; 1120 kc., power 100 watts, 250 watts day, unlimited time (B1-MP-1001).

WNEW—Wodaam Corp., New Rochelle, N. Y.—Granted license to cover construction permit as modified for new station, frequency 1200 kc., power 100 watts, daytime operation (B2-P-2575).

WEN—Kokomo Broadcasting Co., Kokomo, Ind.—Deferred application for construction permit for new Class IV broadcast station to operate on 1420 kc., 250 watts, unlimited time, pending indefinite (B4-P-2842).

Anthracite Broadcasting Co., Inc., Scranton, Pa.—Granted motion to dismiss without prejudice the application for construction permit for new station to operate on 1370 kc., 250 watts night, 250 watts LS, unlimited time (B3-P-2749).

WLBI—State of Wisconsin, Dept. of Agriculture, Stevens Point, Wis.—Granted application for construction permit to operate on 1210 kc., 1250 kc., 1420 kc., 1610 kc., and 1810 kc., 1200 kc., 250 watts day and night, unlimited time (B3-P-2749).

WLOG—Clarence H. Frey and Robert O. Greer, Logan, W. Va.—Granted license to cover construction permit as modified for new station, frequency 1200 kc., power 100 watts, daytime operation (B2-L-1157). Also granted authority to determine operating power by direct measurement of antenna input (B2-Z-404).

WQXR—Interstate Broadcasting Co., Inc., New York, N. Y.—Granted modification of construction permit as modified for increase in power from 1 KW to 5 KW, installation of new equipment, and move of transmitter, for installation of new transmitter and changes in antenna system (B1-MP-996).

WFPG—Neptune Broadcasting Corp., Atlantic City, N. J.—Granted modification of construction permit for new broadcast station, for approval of new transmitter, vertical antenna and approval of studio and transmitter site at Virginia Avenue and Boardwalk, Atlantic City; 1120 kc., power 100 watts, 250 watts day, unlimited time (B1-MP-1001).

WNEW—Wodaam Corp., New Rochelle, N. Y.—Granted license to cover construction permit for installation of auxiliary transmitter, using 1 KW power for emergency use only; 1250 kc., 1 KW power (B1-L-1181).
Also granted authority to determine operating power by direct measurement of antenna input (B3-Z-433).

KGEK—Elmer G. Becher, Sterling, Colo.—Granted special temporary authority to operate from 10:30 a.m. to 11:30 a.m., MST, on July 12, 13, 16, 19, 23, 26, 30, and August 2, 1940, in order to broadcast a Women's Program on the Air, provided that such programs contain no other announcements or advertising of any kind (B5-S-120).

KFRO—Voice of Longview, Longview, Tex.—Granted special temporary authority to operate with power of 250 watts from 7:30 a.m. to 10:30 p.m., CST, to the conclusion of political rallies on July 11, 12, 13, 15, 16, 17, 18, 19, 20, and 22, 1940, in order to broadcast rallies only (B3-S-838).

KUSD—University of South Dakota, Vermillion, S. Dak.—Grant to Special temporary authority to remain silent from August 1, 1940, to not later than September 25, 1940, in order to observe the University summer vacation (B4-S-651).

Pierce Marine Corp., Youngstown, N. Y.—Denied as in case of equipment and increase in power from 10 to 50 KW, for 30 days, pending filing and action on application for modification of construction permit to increase power to 500 watts night, from unlimited time to a minimum of eight hours daily and move transmitter, in order to permit KFRU to move transmitter and studio, new antenna, and increase in power.

KUSD—University of South Dakota, Vermillion, S. Dak.—Granted

Applications Filed at FCC

640 Kilocycles

WGAN—Portland Broadcasting System, Inc., Portland, Maine.—Construction permit to install new transmitter; changes in directional antenna for use at night; change frequency from 610 to 560 kc.; increase power from 500 watts to 5 KW; change hours of operation from limited to unlimited time. Class III-A station.

NEW—Batavia Broadcasting Corp., Batavia, N. Y.—Construction permit for a new broadcast station to be operated on 610 kc., 250 watts, daytime. Class II.

660 Kilocycles

WEAF—National Broadcasting Co., Inc., New York, N. Y.—Modification of construction permit (B1-P-2339) as modified for move of transmitter and installation of directional antenna, requesting further changes in equipment.

740 Kilocycles

WHB—Granite State Broadcasting Corp., Portsmouth, N. H.—License to cover construction permit (B1-P-2457) as modified for new transmitter, move of transmitter and studio, new antenna, and increase in power.

890 Kilocycles

WMMN—Monongahela Valley Broadcasting Co., Fairmont, W. Va.—Construction permit to increase power from 1 KW night, 5 KW day, to 5 KW day and night, and make changes in directional antenna for night use.

930 Kilocycles

WBR—Birmingham Broadcasting Co., Inc., Birmingham, Ala.—Construction permit to install directional antenna for night use, increase power from 1 KW night, 5 KW day, to 5 KW day and night, and move transmitter. Amended to omit request for increase in power and installation of directional antenna.

940 Kilocycles

WICA—WICA, Inc., Ashtabula, Ohio.—License to cover construction permit (B2-P-2857) to make changes in transmitting equipment and increase power from 500 watts to 1 KW.

950 Kilocycles

WTRY—Troy Broadcasting Co., Inc., Troy, N. Y.—Construction permit to install directional antenna for day and night use, change hours of operation from daytime to unlimited time, using 1 KW power day and night. Request Class III-B station.

1020 Kilocycles

KWY—Westinghouse Electric & Manufacturing Co., Philadelphia, Pa.—Authority to make changes in automatic frequency control unit.

1040 Kilocycles

WKL—WKL Radio Corp., Dallas, Tex.—Extension of special experimental authority to operate unlimited time, simultaneous WTIC, for period 8-1-40 to 10-1-40.

1060 Kilocycles

WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn.—Modification of license to change frequency from 1060 to 1040 kc. and hours of operation from S-WBAL to unlimited time, employing directional antenna from sunset at Dallas, Tex.

WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn.—Authority to determine operating power by direct measurement of antenna power.

1140 Kilocycles

WAPI—Alabama Polytechnic Institute, University of Alabama, Alabama College (Board of Control of Radio Broadcasting Station WAPI), Birmingham, Ala.—Extension of special experimental authorization to operate unlimited time, directional antenna after sunset at Tuscaloosa, Ala., for period 8-1-40 to 8-1-41.
1200 Kilocycles
WCBT—J. Winfield Crew, Jr., Roanoke Rapids, N. C.—Modification of construction permit (B3-P-2647) for approval of transmitter and studio sites at E. 10th Street extended, near Roanoke Rapids, N. C., approval of antenna, and change type of transmitter.

WSAM—Saginaw Broadcasting Co., Saginaw, Mich.—Modification of license to change power from 100 watts night, 250 watts day, to 250 watts day and night.

1210 Kilocycles
NEW—Wilkes-Barre Broadcasting Corp., Wilkes-Barre, Pa.—Construction permit for a new broadcast station to be operated on 1210 kc., 250 watts, unlimited time. Class IV. Requests facilities of Station WBAX.

NEW—Central Willamette Broadcasting Co., Albany, Ore.—Construction permit for a new broadcast station to be operated on 1210 kc., 250 watts, unlimited time. Class IV station.

WHIZ—WALR Broadcasting Corp., Zanesville, Ohio.—License to cover construction permit (B2-MP-837) for a new transmitter, increase in power, and move of studio.

WCOV—Capital Broadcasting Co., Inc., Montgomery, Ala.—Authority to determine operating power by direct measurement of antenna power.

WSNJ—Eastern States Broadcasting Corp., Bridgeton, N. J.—Construction permit for a new Class IV station to be operated on 1210 kc., 100 watts-250 watts day and night, unlimited time, to be synchronized with Station WSNJ.

WJAS—Pittsburgh Radio Supply House, Pittsburgh, Pa.—Construction permit to increase power to 1 KW night, 5 KW day, to 5 KW day and night, and install directional antenna for night use. Class III-A station.

1310 Kilocycles
WLBJ—The Bowling Green Broadcasting Co., Bowling Green, Ky.—License to cover construction permit (B2-P-2194) as modified for new broadcast station.

WRAW—Reading Broadcasting Co., Reading, Pa.—License to cover construction permit (B2-P-2153) for new transmitter and increase in power.

KWLW—Lakeland Broadcasting Co., Willmar, Minn.—Modification of construction permit (B4-P-2370) for new broadcast station, requesting installation of new transmitter, antenna changes, approval of transmitter site at Willmar, Minn., and studio site at Carlson Block, 204 4th Street, W., Willmar, Minn. Class IV station.

KGFW—Central Nebraska Broadcasting Corp., Kearney, Nebr.—Authority to transfer control of corporation from Kenneth Dryden, Edith McKeen and Dora Brown to Lloyd C. Thomas, 280 shares common stock.

KFCF—Clyde E. Wilson and Howard A. Shuman, d/b as Hot Springs Broadcasting Co., Hot Springs, Ark.—Authority to determine operating power by direct measurement of antenna power.

WLB—The Bowling Green Broadcasting Co., Bowling Green, Ky.—Authority to determine operating power by direct measurement of antenna power.

1340 Kilocycles
WSPD—The Fort Industry Co., Toledo, Ohio.—Modification of construction permit (B2-P-2470) for increase in power, and install directional antenna for night use, extend completion date from 7-27-40 to 9-1-40.

1350 Kilocycles
WMBG—Havens and Martin, Inc., Richmond, Va.—Modification of license to increase power from 1 KW night, 5 KW day to 5 KW day and night, using directional antenna day and night.

1370 Kilocycles
WAFG—John T. Hubbard, Julian C. Smith & Fred C. Moseley, d/b as Dothan Broadcasting Co., Dothan, Ala.—Voluntary assignment of license and construction permit (B3-P-2829) from John T. Hubbard, Julian C. Smith & Fred C. Moseley, d/b as Dothan Broadcasting Co. to John T. Hubbard, Julian C. Smith, Fred C. Moseley & Horace Hall, d/b as Dothan Broadcasting Co.

KYAN—J. Cecil Bott, Matilda Lannen & Nettie Bott, d/b as The Western Broadcasting Co. of Wyoming, Cheyenne, Wyo.—Modification of construction permit (B5-P-2331) for approval of vertical antenna and transmitter site at Huger & 5th Streets, Cheyenne, Wyoming.

WGNY—WGNY Broadcasting Co., Inc., Newburgh, N. Y.—Construction permit to install new transmitter, change frequency from 1220 to 1370 kc., change hours of operation from daytime to unlimited time, using 250 watts.

WHKY—Catawba Valley Broadcasting Co., Inc., Hickory, N. C.—License to cover construction permit (B3-P-2346) as modified, for new broadcast station.

WARM—Union Broadcasting Co., Scranton, Pa.—Authority to determine operating power by direct measurement of antenna power.

WARM—Union Broadcasting Co., Scranton, Pa.—License to cover construction permit (B2-P-2366) as modified for a new broadcast station.

1380 Kilocycles
WING—WSMK, Inc., Dayton, Ohio.—Authority to transfer control of corporation from Stanley M. Krohn, Jr., to Charles Sawyer, 408 shares common stock.

1420 Kilocycles

W2XUP—Bamberger Broadcasting Service, Inc., New York, N. Y.—Construction permit to move transmitter from 1450 Broadway to 444 Madison Ave., N. Y., N. Y.

Given an opportunity to show cause why cease and desist action against the following firms. The respondents will be

Commodities.

Such as candy, paints, petroleum products, shortening, margarine, organizing a combination and conspiracy to monopolize trade and

American and foreign corporations; that prior to the agreement, American Lecithin Company, Inc., and the Glidden, Archer-Daniels-Midland and Ross & Rowe corporations and (3) that the parties to the agreement made misleading representations to purchasers concerning lecithin products. In cases where in fact such threats were in many instances unwarranted by the facts. (4173)

Crook-Wallace Company—Harry F. Crook and Gretchen Crook, trading as Crook-Wallace Co., 415 North Second St., Vincennes, Ind., distributors of candy and confectionary products, are alleged to have supplied others with push cards involving a lot or chance feature for use in the sale of various assortments of their candy. (4176)

Zenith Radio Corporation, 6001 West Dickens St., Chicago, was charged in a complaint with misleadingly advertising the number of tubes contained in its radio receiving sets and the power and capacity of such sets for foreign reception. The complaint alleges that the respondent has advertised, among other things:

"Zenith Short-Wave Radios are guaranteed to bring in Europe, South America, or the Orient every day or your money back!"

"Positively the greatest 1940 Zenith values ever offered ten-tube superheterodyne eleven-tube superheterodyne radio console with eight tubes * * * the amazing new 1940 eighteen-tube Zenith long distance radio * * * six-tube tubes! Push buttons! Long and short-wave * * six-tube heterodyne with wave magnet aerial, two-button Radiogram."

These representations and others made by the respondent, it is charged in the complaint, are misleading, for in truth the Zenith radio sets are not equipped with six, eight, ten or eleven active, necessary, fully functioning tubes, but contain one or two, or more ballast non-functioning, or tuning beacon tubes, or rectifier tubes which do not serve as amplifying, detecting, or oscillating tubes and do not perform any recognized and customary function of a radio receiving tube in the detection, amplification and reception of radio signals.

Contrary to the respondent's representations, the complaint continues, Zenith radio sets equipped with such tubes will not bring in broadcasts from London, Paris, Berlin, Moscow, Rome, and other points in Europe and from South America and the Orient in sufficient volume, free from static, to be distinctly heard at all times and under all conditions. (4174)
CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

Danson Laboratories—Dan M. Thompson, formerly trading as Danson Laboratories and as Thompson Laboratories, 32 North State St., Chicago, has been ordered to discontinue misrepresentations in the sale of "Danson Formula," which he had advertised as a cure for alcoholism. Findings of the Commission are that the active ingredient of "Danson Formula"—crataegus hirsuta—is of value only as a sedative for quelling nerves, and will not produce results claimed by the respondent.

The order directs the respondent to cease advertising that his preparation is a cure, remedy or effective treatment for alcoholism or the liquor habit in excess of its value as a nerve sedative, or that it will counteract the desire for liquor, or relieve the craving for alcoholic stimulation.

The respondent Thompson was further ordered to cease using the word "Laboratories" or any similar word, to describe his business, or representing in any manner that he owns or operates a laboratory. (3752)

Fellom Publishing Company—Trading as Fellom Publishing Company, Roy Fellom, 637 New Call Building, San Francisco, publisher of the magazine "Pacific Road Builder and Engineering Review," has been ordered to discontinue misleading representations in connection with the sale of advertising space in that publication.

Commission findings are that the respondent, in furnishing data for the information of prospective advertisers, overstated the volume of the magazine's circulation, giving an erroneous idea of its value as an advertising medium based on possible results and also of the correctness of the prices charged for advertising space therein based on the extent of such circulation.

The Commission order directs that the respondent Fellom cease representing that his magazine circulates only among equipment buyers and has no substantial circulation among non-buyers of equipment; that a survey has been made of the equipment buyers in the area in which the magazine principally circulates, unless an accurate and dependable survey of such buyers has in fact been made by some qualified agency, and that through its medium the magazine's advertisers reach substantially all of the road building and other heavy equipment buyers located in the area in which the paper principally circulates.

Further prohibited by the Commission order are representations that the respondent's magazine is circulated among 93 per cent of the equipment buyers located in its principal circulation area or among 98 per cent of such buyers based on volume purchases, or any over-statement of the percentage or number of such buyers reached by the magazine or of the amount of average monthly net paid circulation or average monthly distribution of the magazine. (3960)

May's Cut Rate Drug Company—Drug companies in Clarksburg and Charleston, W. Va., and McKeesport, Pa., have been ordered to discontinue false advertisements of a drug preparation the use of which under usual conditions may be injurious to health. The respondents are May's Cut Rate Drug Company, 109 South Fourth St., Clarksburg, W. Va.; May's Cut Rate Drug Company of Charleston. 911 Quarrer St., Charleston, W. Va., and Pittsburgh Cut Rate Drug Company, 329 Fifth Ave., McKeesport, Pa.

Commission findings are that the respondents advertised as a complete, safe and effective treatment for delayed menstruation, a preparation designated as "Genuine Mayco English Crown Female Capsules for Delayed Periods," described further as "Genuine Mayco English Crown Female Capsules, Double Strength." This preparation was also designated as "MAYCO" by the Charleston and Clarksburg dealers. "The respondent's preparation, the findings continue, contains the drugs apiol green, ergotin, oil of savin and aloin in quantities sufficient to cause serious and irreparable injury to health if used under the conditions prescribed in the advertisements or under customary or usual conditions.

Upon petition of the Federal Trade Commission, each of the respondent companies recently was restrained by a United States District Court from further advertisement of this preparation pending issuance and final disposition of the cases under the Federal Trade Commission Act.

Under the orders, the respondents are to cease advertising that their product is a safe, competent and effective preparation for use in the treatment of delayed menstruation, or that it is a cure or remedy for delayed menstruation. The orders further forbid advertisements which fail to reveal that the use of the respondents' preparation may result in serious and irreversible injury to health. (4152-4153-4154)

Mayos Products Company—George D. Moorman and Roy C. Stockbridge, trading as Mayos Products Company and as M. P. Company, at 3 West Bathmont—clarksburg, clarksburg, were ordered to cease advertising that "Mayos Periodic Compound" is a cure, remedy or competent treatment for delayed or painful menstruation, or that it is safe or harmless. Advertisements which fail to reveal that use of the respondents' preparation may result in serious and irreversible injury to the health of the user, are also prohibited by the Commission's order. (4147)

M. P. Company—See Mayos Products Company.

Monticello Drug Company. Riverside Viaduct, Jacksonville, Fla., was ordered to cease and desist from representing that its preparations will check, cure or stop colds; constitute a complete treatment for colds, whether taken or administered singly or in conjunction with each other; will cure malaria, or are the speediest remedies known for colds, malaria, chills and fever, or bilious fever due to malaria. The order also forbids representations that the respondent's preparations are commonly prescribed by doctors. (3455)

Murine Company, Inc., 660-678 North Wabash Ave., Chicago, was ordered to cease advertising that "Murine" is a cure, remedy or effective treatment for eye strain, or possesses any therapeutic value with respect to eye strain in excess of furnishing relief from irritation and eye discomfort. The order further prohibits representations that "Murine" will prevent or ward off eye strain due to driving, attendance at movies, reading, sewing, or other excessive uses of the eyes. Representations that use of the respondent's preparation will prevent irritation of the eyes due to exposure to dust, sun, or light glare, or possesses any therapeutic value with respect to irritation of the eyes in excess of furnishing relief from such irritation, were also ordered discontinued. (4076)

National Folio Service—George W. Haylings, trading as National Folio Service, 1071 West 30th St., Los Angeles, has been ordered to discontinue misrepresentations in the sale and distribution of books and pamphlets containing treatises purporting to disclose and portray unusual business opportunities.

Commission findings are that the respondent advertised his treatises as presenting business opportunities of exceptional merit offering prospects of high earnings with little effort. Among other things, according to findings, the respondent advertised his "Treatise No. 2" as a workable 'business plan' that tells you how the originator earned a remarkable wage 'every month' the year round, no slack seasons."

Under the order, the respondent is directed to cease representing as earnings or profits from the operation of the businesses described in his treatises, any amounts in excess of those which have been obtained, or that the respondent issues any supplements or new any plan or business which is not such in fact.

The Commission's order further prohibits representations by the respondent that the businesses described in his treatises involve no peddling or house-to-house canvassing, when in fact such activities are required; that the formulas involved in the planning or businesses described in the treatises possess any substantial value, or that such formulas are owned exclusively by him; that he is able to grant purchasers any rights with respect to the operation of such businesses in any specific territory; that the period of life within which his treatises or business plans may be obtained is limited, or that the respondent issues any supplements to the treatises. (4008)
Napp's Longlife Hosiery—Irving Napp, trading as Napp's Longlife Hosiery, 107 West 37th St., New York, has been ordered to discontinue certain misleading representations in the sale of its hosiery.

Under the order, the respondent is directed to cease representing that the hosiery he sells is snag-proof or run-proof; or of a grade or quality different from or superior to its true grade or quality, or that it will outwear all other competitive hosiery.

Further representations directed to be discontinued are that the respondent's hosiery is guaranteed to be satisfactory to the purchaser, or that the respondent will make prompt adjustment or refund for any hosiery which is not satisfactory to the user or which does not wear as represented, when he has not in fact established, and does not maintain a definite policy and practice of fulfilling such guarantee and making such adjustment or refund.

The respondent also is directed to cease representing that hosiery he sells is guaranteed against runs or holes for any specified period of time, or that he will supply new hosiery to the purchaser without cost if runs or holes develop within such period, when in fact the respondent does not maintain a definite policy of fulfilling such guarantee. (3875)

Al Viola Products—Garey Carr, trading as Al Viola Products, 1225 Keniston Ave., Los Angeles, has been ordered to discontinue certain misrepresentations in the sale of a preparation for tightening dental plates.

Under the order, the respondent is directed to cease representing, directly or through inference, that, except in unusual and exceptional cases where the condition of the mouth is favorable to the use of such method, the use of his preparation, "Al Viola Dental Plate Tightener and Reliner," constitutes a competent or effective method for tightening dental plates, supplies an improved fit for such plates, or accomplishes satisfactory results.

The order further forbids representations that the respondent's preparation may be applied effectively by anyone other than an expert, or that its satisfactory use requires no expert assistance. (4045)

Betty Wells Cosmetic Company—An order has been issued directing Betty Wells Fowler, trading as Betty Wells Cosmetic Company, Capitola, Calif., to discontinue misrepresentations of the effectiveness of preparations for the skin known as "Tissuefane" and "Tissuefane Preparatory Oil."

"Tissuefane," according to the order, is not to be represented as being capable of nourishing the skin, building tissue, strengthening facial muscles, removing lines, pimples or crow's feet, as being made wholly of fruit and vegetable products, as being an innovation in the cosmetics field, a cleansing agent, a skin tonic or as being healing to the skin or possessing beneficial value for treating acne.

The order further directs that "Tissuefane" is not to be represented as capable of removing blackheads or of having any effect thereon in excess of removing superficial dirt on their surface; of rejuvenating, preserving, stimulating or beautifying the skin except to the extent that the preparation may temporarily stimulate the skin; of reducing or cleaning the pores in excess of removing superficial dirt from pore openings; of increasing circulation and blood supply or having any effect thereon in excess of slightly and temporarily stimulating the blood in the portions of the body to which the preparation is applied.

"Tissuefane Preparatory Oil," according to the order, is not to be advertised as being capable of nourishing or feeding the skin or pores, or of making the skin soft other than temporarily, or of preventing or removing wrinkles or lines from the face other than such lines as may be caused solely by dryness of the skin. (3538)

**STIPULATIONS**

During the week the Commission has entered into the following stipulations:

**Atlas Shirt Company, Inc.,** 200 Fifth Ave., New York, stipulated that it will discontinue representing that the material used in making its products has a tested strength far in excess of Government specifications for airplane cloth, and will discontinue representing or implying that the tensile strength of the cloth of which its products are made is in excess of that of the cloth used in the manufacture of airplanes by the Federal Government, or that its hosiery is guaranteed against runs or holes for any specified period of time, or that it will outwear all other competitive hosiery.

Further representations directed to be discontinued are that the respondent's hosiery is guaranteed to be satisfactory to the purchaser, or that the respondent will make prompt adjustment or refund for any hosiery which is not satisfactory to the user or which does not wear as represented, when he has not in fact established, and does not maintain a definite policy and practice of fulfilling such guarantee and making such adjustment or refund.

The respondent also is directed to cease representing that hosiery he sells is guaranteed against runs or holes for any specified period of time, or that he will supply new hosiery to the purchaser without cost if runs or holes develop within such period, when in fact the respondent does not maintain a definite policy of fulfilling such guarantee. (3875)

**Al Viola Products**—Garey Carr, trading as Al Viola Products, 1225 Keniston Ave., Los Angeles, has been ordered to discontinue certain misrepresentations in the sale of a preparation for tightening dental plates.

Under the order, the respondent is directed to cease representing, directly or through inference, that, except in unusual and exceptional cases where the condition of the mouth is favorable to the use of such method, the use of his preparation, "Al Viola Dental Plate Tightener and Reliner," constitutes a competent or effective method for tightening dental plates, supplies an improved fit for such plates, or accomplishes satisfactory results.

The order further forbids representations that the respondent's preparation may be applied effectively by anyone other than an expert, or that its satisfactory use requires no expert assistance. (4045)

**Betty Wells Cosmetic Company**—An order has been issued directing Betty Wells Fowler, trading as Betty Wells Cosmetic Company, Capitola, Calif., to discontinue misrepresentations of the effectiveness of preparations for the skin known as "Tissuefane" and "Tissuefane Preparatory Oil."

"Tissuefane," according to the order, is not to be represented as being capable of nourishing the skin, building tissue, strengthening facial muscles, removing lines, pimples or crow's feet, as being made wholly of fruit and vegetable products, as being an innovation in the cosmetics field, a cleansing agent, a skin tonic or as being healing to the skin or possessing beneficial value for treating acne.

The order further directs that "Tissuefane" is not to be represented as capable of removing blackheads or of having any effect thereon in excess of removing superficial dirt on their surface; of rejuvenating, preserving, stimulating or beautifying the skin except to the extent that the preparation may temporarily stimulate the skin; of reducing or cleaning the pores in excess of removing superficial dirt from pore openings; of increasing circulation and blood supply or having any effect thereon in excess of slightly and temporarily stimulating the blood in the portions of the body to which the preparation is applied.

"Tissuefane Preparatory Oil," according to the order, is not to be advertised as being capable of nourishing or feeding the skin or pores, or of making the skin soft other than temporarily, or of preventing or removing wrinkles or lines from the face other than such lines as may be caused solely by dryness of the skin. (3538)

**STIPULATIONS**

During the week the Commission has entered into the following stipulations:

**Atlas Shirt Company, Inc.,** 200 Fifth Ave., New York, stipulated that it will discontinue representing that the material used in making its products has a tested strength far in excess of Government specifications for airplane cloth, and will discontinue representing or implying that the tensile strength of the cloth of which its products are made is in excess of that of the cloth used in the manufacture of airplanes by the Federal Government, or that its hosiery is guaranteed against runs or holes for any specified period of time, or that it will outwear all other competitive hosiery.

Further representations directed to be discontinued are that the respondent's hosiery is guaranteed to be satisfactory to the purchaser, or that the respondent will make prompt adjustment or refund for any hosiery which is not satisfactory to the user or which does not wear as represented, when he has not in fact established, and does not maintain a definite policy and practice of fulfilling such guarantee and making such adjustment or refund.

The respondent also is directed to cease representing that hosiery he sells is guaranteed against runs or holes for any specified period of time, or that he will supply new hosiery to the purchaser without cost if runs or holes develop within such period, when in fact the respondent does not maintain a definite policy of fulfilling such guarantee. (3875)
Harry L. Katzman. 174 Lincoln St., Boston, has entered into a stipulation in which he agrees to cease employing certain representations in the interstate sale of infants' shoes.

According to the stipulation, the respondent agrees to discontinue use of the words "Dr. Katzman Health Shoes" or "Health" in marking, branding or otherwise designating his products, so as to convey the belief to purchasers that the shoes are in accordance with design or under the supervision of a physician or doctor of medicine or that they contain special scientific, health or orthopedic features resulting from medical determination or services. (2866)

Kirkman & Son, Inc.—See Colgate-Palmolive-Peet Company.

Maddock & Miller, Inc., 129 Fifth Ave., New York, agrees to cease designating earthenware products or products which are other than true chinaware as "Maddock's Vitrified Hotelware," "Vitrified Blue Willow," or "Vitrified Wakefield," and to discontinue employing the word "Vitrified" or similar descriptive designations as applied to semi-vitrified products in any manner tending to convey the impression that such products are chinaware. The stipulation recites that in the trade the word "vitrified" is associated with chinaware and the terms "semi-vitrified" or "semi-vitrified" with earthenware. (2861)

Mercantile Paper Corporation. 1750 Wrightwood Ave., Chicago, stipulates that it will discontinue using the word "Manufacturers" as descriptive of its business and will cease stamping, branding or otherwise marking a certificate or any form of certification as "box maker" on boxes or containers not actually made by it; or otherwise, by assertion or implication, representing that it is the manufacturer thereof, or that any statement bearing the name of the corporation is the certified statement of the maker of such box or container. The stipulation points out that the respondent corporation is a jobber and not a manufacturer. (2865)

Julius Nelson Corporation. 247 West 38th St., New York, dealer in fabric garments, agreed to discontinue use of the term "Fur-Fabric" as descriptive of garments manufactured from fabrics composed of wool, cotton or any fibers other than fur, and of the word "Fur," or any other representations either alone or in connection with the word "Fur," in the knowledge of the purchasing public that such garments are made from the fur or pelties of fur bearing animals or are composed of a fabric made of fur. Under terms of the stipulation, the respondent will also cease advertising, selling or distributing garments composed of fibers other than fur under any representations or conditions of deceptive concealment whereby purchasers may be misled into buying such garments in the belief that they are composed of fur. (2862)

New Method Manufacturing Company.—In a stipulation entered into, Wright G. Scroxton, trading as New Method Manufacturing Company, Bradford, Pa., agreed to discontinue use of the word "Self Starting Lighter," either alone or in connection with the word "All," or with any other words, so as to imply that such products are composed wholly of wool, and from use of the word "Wool," either alone or in connection with the word "All," or with any other words, as such products are composed in substantial part of wool and in part of fibers other than wool, and the word "Wool" is used to properly describe such wool content, then in that case, the word "Wool" shall be immediately accompanied by some other word or words printed in equally conspicuous type and which accurately describe each other constituent fiber or material of which the products are composed in the order of its predominance by weight, beginning with the largest single constituent. (2864)

Schless-Harwood Company, Inc. 2 West 46th St., New York, agreed to cease representing that the diamonds and diamond rings which it sells are perfect and flawless and that the diamonds are of the Federal Trade Commission, or that they meet or conform to the "Federal Trade Commission Standard." The respondent corporation also stipulates that it will cease employing the name "Federal Trade Commission" in its advertising, on its tags or in any way which may imply that the Commission has examined and approved the articles designated. The stipulation points out that the use of such forms and tags was a deceptive act and practice insofar as the wording thereof indicated or implied that the Federal Trade Commission had in some way examined and approved the diamonds referred to, contrary to fact. (2864)

J. Schueier Company, Inc. 31 Beach St., Boston, manufacturer of neckwear and gentlemen's ties, agreed to discontinue use of the words "Hand Loom" as descriptive of products manufactured from material not made on hand looms, and of the words "Hand Loom," either alone or in connection with the word "Reproductions" or with any other words, the effect of which may tend to convey the belief to purchasers that the products referred to are made of hand-loomed material.

The respondent further agreed to cease from use of the words "All Wool" as descriptive of products which are required wholly of wool, and from use of the word "Wool," either alone or in connection with the word "All," or with any other words, so as to imply that such products are composed wholly of wool, when such is not the fact. The stipulation provides that if the products are composed in substantial part of wool and in part of fibers other than wool, the word "Wool" is used to properly describe such wool content, then in that case, the word "Wool" shall be immediately accompanied by some other word or words printed in equally conspicuous type and which accurately describe each other constituent fiber or material of which the products are composed in the order of their predominance by weight, beginning with the largest single constituent.

Terms of the stipulation also specify that the respondent will cease representing in any way products composed in part of rayon without clearly disclosing the fact that the products are composed in part of rayon together with other named constituent fibers, each of such fibers to be listed in the order of its predominance by weight, beginning with the largest single constituent. (2859)

Tennessee Coal, Iron & Railroad Company, Birmingham, Ala., manufacturer of iron and steel, including the by-product "basic slag," entered into a stipulation in which it agreed to discontinue certain representations.

The respondent agreed to desist from claims that its basic slag is always as good as superphosphate and frequently better; serves as well as acid phosphate for fertilizing purposes, or that its lime content makes it superior to superphosphate for winter legumes or other products. The respondent further agreed to cease implying that quotations from scientific authorities on basic slag are applicable to its basic slag product when such quotations are in fact based upon other products.

Further representations or implications which the respondent agreed to discontinue are that lime makes available the potash in the rock, that it is a deodorant in the sense that it destroys offensive odors of other substances. The respondent further stipulated that it will cease representing that the use of its product will not ring or result in the formation of a "ring" when it is applied only to a spot to be cleaned or removed, or that the "most inexperienced" or unskilled person can successfully apply the product to fabrics without a resultant "ring" formation. (2866)

Lighters requires no time or effort; that exclusive territory is assigned to or may be reserved by prospective agents, when such is not a fact, or that his representatives make profits in excess of the maximum profit permitted the agent, unless it is disclosed that in fact such representatives must purchase a minimum quantity of lighters before such profit is made. (0561)

Schless-Harwood Company, Inc., 2 West 46th St., New York, agreed to cease representing that the diamonds and diamond rings which it sells are perfect and flawless and that the diamonds are of the Federal Trade Commission, or that they meet or conform to the "Federal Trade Commission Standard." The respondent corporation also stipulates that it will cease employing the name "Federal Trade Commission" in its advertising, on its tags or in any way which may imply that the Commission has examined and approved the articles designated. The stipulation points out that the use of such forms and tags was a deceptive act and practice insofar as the wording thereof indicated or implied that the Federal Trade Commission had in some way examined and approved the diamonds referred to, contrary to fact. (2864)
products, and will discontinue representing that basic slag "carries its own complete supply of all elements," produces thin, smooth skinned fruit, improves the quality or increases the yield of citrus or other fruits, or that basic slag makes pecans or other nuts fill out or produces a superior quality. (2870)

United States Truss Company—A stipulation has been accepted from United States Truss Company, Fourth and Sycamore Sts., Cincinnati, in which it agrees to discontinue certain representations in the sale of its "Richfal Abdominal Support."

The respondent agrees to cease using any statement or representation which directly asserts or implies that the use of its device will have the effect of causing one to "reduce without exercise," will enable the user to "keep thin without dieting" or will otherwise result in the loss of excess fat. (2863)

FTC CASE CLOSED

The Federal Trade Commission has closed its case against Rogers Imports, Inc., 9-11 East 38th St., New York, without prejudice to its right to resume proceedings should the facts so warrant. The respondent had been charged with violating the Federal Trade Commission Act in the sale of smokers' articles and supplies.

The Commission permitted the respondent to file a substitute answer to its complaint and to enter into a stipulation as to the facts and an agreement to cease and desist from the practices charged in the complaint.

Under the stipulation, the respondent agrees to discontinue selling in interstate commerce any imported article or object of commerce upon which the markings of the country or origin have been obscured or obliterated, or which otherwise are not clearly and distinctly marked to show the country of origin.
THE WEEK IN WASHINGTON

More details of what promises to be the NAB's best convention are published in this issue. No broadcaster can afford to miss it. (p. 4423.)

Both Democrats and Republicans are now on record for keeping radio as free as the press. (p. 4425.)

An array of talent and prominent American leaders seldom, if ever equalled, has been lined up for the World's Fairs broadcast August 3. (p. 4426.)

The NAB has published a new pamphlet about ASCAP. Niles Trammell succeeds Lenox Lohr on the BMI Board. A new formula for BMI license fees is announced. (p. 4428.)

NAB's suggestions for improvement of FCC procedure are filed with the Attorney-General's Committee on Administrative Procedure. (p. 4429.)

The Labor Board orders an election at Station KXOK, St. Louis. (p. 4429.)

James Lawrence Fly, FCC Chairman, states that the Commission is hard at work on the re-allocation problem. (p. 4429.)

Important television developments are announced by the FCC. (p. 4430.)

The Convention

Plans for what promises to be the most interesting and vital membership meeting in the eighteen years of NAB history are about completed.

FM Broadcasting

John Shepard, III, has arranged for Wednesday afternoon's FM session a most interesting program. Special authorization from the Communications Commission was secured for the installation of a FM broadcasting station to make possible complete demonstration. Programming for the demonstration is being arranged through the active cooperation of KSFO, San Francisco. In addition to the demonstration, both REL and other FM equipment concerns are preparing interesting and instructive demonstration headquarters.

Paul de Mars, Vice President in Charge of Engineering of the Yankee Network, will discuss "Practical FM Broadcasting" and the session will consist largely of a question period open to participation by all delegates.

Television

Two of the foremost television engineers, Ted Smith and Harry R. Lubcke, will be the speakers on the Television program at the NAB Convention at San Francisco, Tuesday, August 6 at 7:30 p.m.

The television session will be couched in non-technical terms.

Ted Smith will deliver a talk entitled "Apparatus Requirements for Television Stations." Smith graduated from Stevens Tech and joined the Technical and Test Department of RCA in 1925. His television experience has been continuous at RCA and dates from 1928. In 1937 he was made Manager of Television Transmission Sales. He has held this position ever since. Smith was in charge of establishing Station W2XBS in 1929, RCA's first television station.

Smith's talk will deal with equipment requirements for a television station and he will point out the differences and similarities between standard broadcast equipment and television equipment. He also will discuss film projection, remote broadcasts, relaying, estimates on television coverage and television transmitting antennas and how they are used. (Continued on page 4424)
THE CONVENTION (Continued from page 4422)

Harry R. Lubcke's subject will be "Television Station Operation and Telecast Pickups." A graduate of the University of California in 1929, Lubcke, since November, 1930, has served as Director of Television of the Don Lee Broadcasting System at Los Angeles. His talk will draw heavily on the rich practical experience the Don Lee System has had since 1931 on operating television station W6XAO. This station has operated some 6,000 hours to telecast about 2,800 programs by means of films, studio pick-ups and remote pick-ups.

Lubcke's talk will deal with the role of equipment, personnel and rehearsals in accomplishing smooth telecast productions covering an adequate schedule at minimum cost for a typical telecasting station. He will discuss presentations originating in the studio, from film or from on-the-spot locations remote from the main station. Public reception and reaction to television will also be covered.

These two men, Smith who has had 12 years experience with television equipment, and Lubcke who has had charge of 6,000 hours of actual telecasting, insure a well rounded non-technical program.

Drewry Added to Program

The name of Dr. John E. Drewry, director of the University of Georgia School of Journalism, has been added to those who will bring important messages to the convention.

Dr. Drewry will make an announcement concerning the new Peabody Awards for Public Service Broadcasting, which the Peabody Foundation last spring set up to be administered by the Georgia School of Journalism, under the supervision of a board of directors composed of outstanding Americans chosen from all walks of public life. It is the intent of the Peabody Foundation, through these awards, to contribute to the elevation and public appreciation of broadcasting in much the same way the Pulitzer prizes have done for the newspapers.

Standing Committee Meetings

There will be a meeting of the Code Compliance Committee in the Hotel St. Francis, San Francisco, Sunday, August 4, at 5 p.m., to give members an opportunity to submit their ideas and recommendations relative to the Code.

Meanwhile, should any member desire to bring a subject to the attention of the Committee prior to the convention, he may do so by writing the Committee, care of NAB Headquarters.

In addition, the Sales Managers Steering Committee will meet at 1 p.m., the Research Committee at 1 p.m. Broadcasters interested in the work of any of these Committees will be welcome to attend.

Luncheon Sessions

The two official luncheons on Monday and Tuesday, as well as the INS luncheon on Wednesday, hold great interest. At the Monday luncheon, James Lawrence Fly, Chairman of the FCC, will speak upon "Radio Faces the Future"; and on Tuesday, Hon. Louis Johnson, Assistant Secretary of War, has chosen as his topic "Sponsors of National Defense." Both of these talks will be broadcast on nation-wide hookups. This should give you some idea of their importance. In addition to the set discussions, each of these gentlemen will have some off the record remarks to make for broadcasters' ears only.

The INS luncheon on Wednesday is an invitational affair and the program will consist entirely of hilarious entertainment features.

Broadcast Music

The Broadcast Music session on Tuesday morning will be of transcendent interest to all broadcasters. Neville Miller, Sydney Kaye, Merritt Tompkins and Carl Haverlin will reveal some startling information.

Sales Managers

The Sales Managers Division is making careful plans for its session on Tuesday afternoon and the topic "Unit Plan of Volume Measurement" is certain to arouse interesting discussion.

Displays

In addition to the general displays which will reveal NAB membership and organization information and BMI charts and graphs, the station promotional display is assuming shape. Incidentally, managers who are planning to display station promotional material at the convention are advised to ship for arrival not later than Wednesday, July 31. To expedite delivery shipments should be directed to Arthur Stringer, NAB Convention, Hotel St. Francis, San Francisco. Every attempt will be made to follow the instructions given by the individual broadcaster but you are asked to make your instructions specific.

All material will be mounted by us without cost but
we cannot assume the charges for hand lettering or similar work. This will be billed at cost if specified in your layout.

Entertainment

Kenneth Jones and Ed Kirby are quite mysterious about the show, "Greener Pastures," which is to be the entertainment feature at the banquet. From all indications it is going to be "a colossal."

Then, of course, on Monday night we are all going to the Fair to be guests at Billy Rose's Aquacade, Follies Bergere and America-Cavalcade of a Nation.

Here's a convention that no broadcaster can afford to miss. From a business standpoint it is vital. Advance reservations indicate large attendance but there is plenty of room in the hotels of San Francisco to accommodate all who desire to come.

Speakers to Be Broadcast

The following convention speeches have been scheduled for broadcast:

- **Monday, August 5, 5:30 to 6 P. M., EST (1:30-2 P. M., Pacific Time),** Chairman James L. Fly, over CBS and MBS.
- **Tuesday, August 6, 5 to 5:30 P. M., EST (1-2:30 P. M., Pacific Time),** Assistant Secretary of War Louis Johnson, over MBS and NBC.

Democrats Join Republicans In Favoring Free Radio

Both the Democrats and Republicans are now on record as favoring radio as free as the press. The Democratic platform, adopted Wednesday night, included the following plank:

**RADIO**

Radio has become an integral part of the democratically accepted doctrine of freedom of speech, press, assembly and religion. We urge such legislative steps as may be required to afford the same protection from censorship that is now afforded the press under the Constitution of the United States.

An NAB committee including Neville Miller, John Kennedy, WCHS, and Harry Butcher, CBS, appeared before the Democratic Platform Committee in Chicago this week.

Following adoption of the Republican radio plank, the Buffalo News printed the following editorial:

Free Communication

Free speech, free press and free communication generally have been so long enjoyed in this country that they were regarded rather casually until recently. Citizens recognized that these rights were essential to democratic government but they were inclined to overlook the part they play in everyday life. As a blanket of silence has fallen over large areas in Europe and as governments have used radio and other means of communication for propaganda, Americans have come to realize how important these rights are for an ordered existence. It is necessary to know what is happening in a country to be able to anticipate its needs, to be able to plan for carrying on business or commerce with it. This free communication of information from one border of this country to another has been one of the factors in building its economic and political greatness.

President Roosevelt rightly included freedom of information among his five corollary essentials to peace in his recent press conference discussion. He said that right meant not only freedom of the press but also of all channels through which information moves. America must receive news of what is happening in all parts of the country and the rest of the world, he said.

It seems idealistic now to hope for an early restoration of this freedom in the greater part of the world, but there are steps to be taken to safeguard it in this country. For instance, under the existing radio licensing system broadcasters have felt insecure in their right to freedom of communication without governmental interference. There is need for legislation to protect them more fully in their rights. On this point the Republican party has gone on record in its platform as follows:

"Federal regulation of radio is necessary in view of the natural limitations of wave lengths, but this gives no excuse for censorship. We oppose the use of licensing to establish arbitrary controls. Licenses should be revocable only when, after public hearings, due cause for cancellation is shown."

Protection should be given against the first tentative governmental interferences for they can lead to greater abuses in the future. The issue affects not only the broadcasters. It is one that touches closely the general welfare.

Promotion

**IMPORTANT NOTICE!**

Innovation For Station Break on World's Fairs Broadcast August 3

(Over CBS, NBC, MBS, 8-9 P.M., Eastern Daylight Saving Time. Non-network stations may carry the broadcast through arrangement for lines with the nearest network affiliated station.)

A departure from the usual routine station break during an hour's program will be inaugurated on this special NAB-World's Fairs broadcast, as follows:

(At approximately 8:40 EDST): Network announcer: This is the American system of broadcasting.

Station announcer: Of which Station XYZ, the voice of — is proud to be a part.

Full details of this outstanding feature available to every station in the industry are given on the following page.
Rapidly completing plans for an impressive dedication to the freedom of American radio, the Golden Gate Exposition in San Francisco and the New York World's Fair of 1940 announce that the following famous radio personalities will take part in the one hour program to be broadcast on the eve of the NAB Convention, August 3, 8-9 p. m., Eastern Daylight Saving Time, by all three major networks and non-network stations which tie in with nearest network affiliated line:

Rudy Vallee, Major Bowes, Kate Smith, Lowell Thomas, James Melton, Francia White, the Revelers, Gertrude Berg, Colonel Stoopnagle, Phil Cook, Lanny Ross, H. V. Kaltenborn, Tommy Riggs, Graham MacNamee, Ted Husing, and Dorothy Gordon. This list, by no means complete, will be enlarged by addition of radio stars from the West Coast whom the Fair is inviting. The musical portion of the New York program will be handled by three conductors, Frank Black, Howard Barlow and Alfred Wallenstein.

It was also announced that Norman Corwin will write and produce a dramatic sketch along the lines of his "Seems Radio Is Here to Stay," which was written in 1939 in connection with the NAB Open House Week.

An outstanding feature of the program will be the performance for the first time of a dramatic patriotic tone poem written by Carl Haverlin of BMI, and scored by Paul Nordoff, protege of Leopold Stokowski, whom BMI has retained for the purpose. Its tentative title is "More Perfect Union." This will be followed by the simultaneous singing by thousands of school children assembled on the fair grounds in both New York and San Francisco of familiar patriotic hymns whose voices will be intermixed to show the national unity achieved through a free system of American radio.

Distinguished men and women from all walks of public life will be assembled on the fair grounds for the ceremony of unveiling the plaques symbolic of free American radio. The plaques have been designed by Anton Refregier of New York around the line from Walt Whitman, "The liberties of the people will be preserved so long as there are tongues to speak and ears to hear." It is expected that President Roosevelt will from Washington press the button unveiling the plaques in New York and San Francisco simultaneously. Neville Miller, NAB president, will accept the plaques in the name of the broadcasting industry.

Among those who will take part in a brief symposium showing the contributions radio has made to the educational, religious, cultural and social life of the nation, will be James L. Fly, chairman of the FCC; Dr. John W. Studebaker, U. S. Commissioner of Education; Mrs. Harold V. Milligan, president of the National Council of Women and radio chairman of the General Federation of Women's Clubs; Roger Baldwin, director, the American Civil Liberties Union. This group will be augmented by an outstanding Catholic, Protestant and Jewish clergyman. It is anticipated that William Green, president of the A. F. of L., will represent labor.

Ed Kirby, who has been cooperating with both fairs in coordinating details, has given the following digest of plans for the information of members:

Digest of Plans for
BROADCASTING'S DAY AT THE NEW YORK WORLD'S FAIR
(San Francisco-Golden Gate Plans in the Making)
(August 3)

General Plan

1. August 3 is officially named as "Broadcasting's Day at the Fair".

2. Advertisers who have exhibits on the fairgrounds and who have investments in radio personalities are being asked by fair officials to invite these personalities to come to their exhibits and act as host for short intervals throughout the day. Thus, Major Bowes would go to Chrysler, Jessica Dragnette to the Ford Building, James Melton to the A. T. & T. Building, etc., a desirable move from the standpoint of the advertiser, the Fair, and radio, achieving goodwill all the way around.

3. Throughout the day, local New York radio stations will make several pick-ups from the fairgrounds. These broadcasts will be limited to routine remotes, or special events, but in no case will the special event touch on the theme of the special program to be broadcast nationally dealing with freedom of radio.

Special Ceremonies

1. Because of the importance of the occasion and the widespread interest of the public in the event and in the presence of famous radio stars to be on hand with distinguished men and women from all walks of life, the Fair's Special Events Department is at work lining up important outdoor meetings, such as religious, school children, women's clubs, fraternal, American legion, etc. The theme of these meetings will be patriotic in character, tying in with the central theme of the broadcast: "freedom of radio, an essential of the American democracy".

2. Marching units, bands, boy scout and girl scout troops, youth groups and patriotic societies are being invited to appear en masse.

Pre-Broadcast Pageant

1. The Court of Peace will be the scene of the outdoor pageant and the locale of the broadcast and dedication of the plaque. It is being especially decorated for the occasion.

2. Approximately one hour before the national broadcast, the bands, marching units, and various groups will march into the Court of Peace, bands playing and banners flying, to witness, with the general public, an outdoor pageant which is being especially created for Broadcasting's Day, dramatizing the radio freedom theme.

3. The pageant will conclude about five minutes before the broadcast begins. The crowds will then witness and hear the broadcast in the same location.

Publicity

1. A joint release from both Fairs was issued last Monday. A series of releases from this week on.

2. The publicity departments of the major networks will follow through with collateral publicity.

3. NAB will send out round-up stories asking cooperation of member stations' publicity people.

Follow-Up

1. Newsreel cameramen will be on the spot to shoot most newsworthy shots of unveiling, distinguished people present.

2. A pictorial brochure memorializing the occasion and the statements made will be designed for the record.

Promotion by Transportation Companies

1. The World's Fair traffic people have arranged with the eastern railroads and bus lines for special excursions and rates to bring...
in the largest possible crowd for the occasion. Dodgers and hand
bills will be distributed throughout terminals week after next.

**Invitation to Special Guests**

1. New York has sent out an engraved invitation to several hundred people, presidents and officers of leading organizations such as the General Federation of Women's Clubs, National Council of Catholic Men, Federal Council of the Churches of Christ in America, the Federal Communications Commission, members of Congress interested in the communication field, etc., William Green, Sidney Hillman, and representatives of other groups.

2. A list of these organizations and their national officers located in the west and Pacific Coast area will be invited by San Francisco, for a similar move. Upon receipt of RSVP's, Fair sends out two admissions to the grounds, and two tickets to guest area in the Court of Peace.

3. Because of the presence of so many distinguished people representing so many diverse walks of life, such as education, religion, labor, etc., the Fair's special events department is utilizing their presence by building around them group meetings and ceremonies, elsewhere, during the day.

**Digest of the Broadcast**

Broadcast scheduled for 8-9 P. M., EDT, carried by CBS, MBS, NBC, offered all non-network stations who may hook in nearest affiliated station line.

Production under direction of William S. Rainey, former NBC production chief, retained by NAB to coordinate job for the Fair. West Coast production under Charles Vanda, CBS. Midwest under William Bacher, MBS.

First 40 minutes of hour show will be a continuous unfolding of the wonders of American radio in a somewhat Whitmanesque poetic verse and musical treatment, divided up, roughly, into a prologue, a fast-moving montage incorporating the voices of as many radio stars as possible, into specially written drama by Norman Corwin, concluding with the last scene of Maxwell Anderson's "Valley Forge," with Washington's closing lines: "This liberty will look easy by and by when nobody dies to get it."

At the forty-minute mark the station identification will be handled as follows:

**Network announcer:** This is the American system of broadcasting...

**Local announcer:** Of which station XYZ, the voice of Middletown, is proud to be a part.

From the inspirational, dramatic note the program moves into the ceremonies at the two Worlds Fairs. Harvey Gibson of New York, and Marshall Gill of San Francisco, will speak to and with each other, briefly indicating the new spirit of national unity symbolized as the two competing fairs join together by radio in dedicating its freedom to the service of the American democracy.

A symposium discussion follows, pointing out the contributions of the American system of radio has made to the nation, with no more than one minute allotted. The group will represent a cross section of American life, such as labor—William Green; education—Dr. John W. Studebaker; women and children—Mrs. Salidee Orr Dunbar, president of the General Federation of Women's Clubs; and/or Mrs. Harold V. Milligan, chairman, Radio Council on Children's Programs; religion—Archbishop Mitty, of San Francisco, Rabbi Wise, Dr. Buttrick, Federal Council of the Churches of Christ in America; the press—John S. McCarrons, president of Associated Press; government—Chairman James L. Fly; free speech—Roger Baldwin, American Civil Liberties Union.

They will not be introduced separately; they will introduce the next speaker, after each has concluded. Pick-ups from New York, San Francisco and Washington.

And then, the unveiling of the plaques by, it is expected, President Roosevelt, from Washington, with possibly a brief laudatory message. Acceptance by Neville Miller, from San Francisco, on behalf of the industry.

The program concludes with the dramatic rendition of a new song which has been especially written for the occasion by Carl Haverlin. BMI, and musically scored by Paul Nordoff, prestige of Leopold Stokouski, retained by BMI for the purposes similar in format to "Ballad of Americans," it contains some of the most stirring verse ever set to music. It is a patriotic narration for soloists and mixed choruses, dramatizing the individual liberties enjoyed by the American citizen and the need of holding on to those liberties and freedoms handed down.

The program closes as the thousands of people and school children on the fair grounds in San Francisco and New York join in the singing of a familiar patriotic song such as "America." Voices from the West Coast and the East Coast will be intermixed by the engineer, to dramatize the unity in the nation which has been created and which shall be preserved through a free system of radio.

A word about the radio montage: We are lining up the participation of well-known radio figures of the past and present, starting back with Amos 'n Andy and Harry Reser (the old Cliquot Program), and winding up with those who have just recently become famous through the approval of the radio audience.

(Names of those already agreeing to appear are printed above.) Fifteen to twenty seconds will be allowed each personality, the idea being that none will attempt to do a number, but merely enough to register identification, to recapture in the mind of the listener the pleasant memories of radio enjoyment of long ago, down through the years.

These stars will be picked from the fair grounds in San Francisco and New York, and from whatever other points, such as Hollywood or Chicago, where they might be available for a network feed.

A new music score is being designed in such a way that a fragment of any theme can be included just before the program levels off to drop down so the star can speak.

The Golden Gate Exposition has indicated that the San Francisco Symphony is available for this broadcast.

**Newspaper Billboard Ad**

Because this broadcast will be outstanding and so important to the whole industry, we are asking that stations in the various cities get together and work out a pool to defray the cost of a newspaper ad listing the names of the stars and a line or two about the event. A complete list will be sent out next week.

**WJTN PROMOTES SUMMER LISTENING**

Summertime listening in Jamestown, N. Y., and environs is mounting this season because of the aggressive promotion of station WJTN. Broadcasting and newspaper ads are being used. Typical of the latter is the following 100 lines by 2 columns, just received from Promotion Manager A. E. Spokes:

"On a Simmery Summery Day..."

"Sunning on the Beach"
"Sailing on the Lake"
"Sitting in Your Home"

"Yes, people everywhere take time out in the good old summertime to LISTEN TO THE RADIO... Vacation time is radio time...

"AND FOR THE BEST IN RADIO ENTERTAINMENT
KEEP YOUR DIAL SET AT 1210."

**IF LETTER NOT RECEIVED—WRITE**

Plans for the LISTEN BEFORE YOU VOTE promotion were mailed to members on July 18. The special envelope contained five sections:

1—Letter of transmittal
2—Non-political letters approving theme
3—Some promotion suggestions
4—Sample poster
5—Order blank

If this letter has not been received by July 25, please notify Arthur Stringer at headquarters and a duplicate will be sent.

Listen Before You Vote was approved by the board of directors early in the year.
NEW PAMPHLET ABOUT ASCAP READY FOR DISTRIBUTION

"Let's Stick to the Record" is the title of a fifteen-page compilation of questions and answers in explanation of the current dispute between the National Association of Broadcasters and the American Society of Composers, Authors and Publishers.

Based upon facts and court records, it is a well documented exposé of ASCAP, going behind its slogan "Justice for Genius" to show the inner workings of the Society, its frustration of new creative talent, its monopolistic hold on radio broadcasters, its effect upon the employment of musicians, its discrimination in favor of the inner circle crowd whereby in one year the 175 highest ranking ASCAP authors and composers divided $1,890,000, while 175 authors and composers in the lower ASCAP classifications received only a total of $3,000.

These and many more illuminating facts are revealed in NAB's new publication "Let's Stick to the Record". Copies are being mailed stations over the weekend. Additional copies are being sent to newspaper and radio editors and others who are targets for ASCAP's propaganda who should be in full possession of the facts. The cooperation of stations is requested to further spread the information just now off the press.

BMI DEVELOPMENTS

NEW PAMPHLET ABOUT ASCAP READY FOR DISTRIBUTION

"Let's Stick to the Record" is the title of a fifteen-page compilation of questions and answers in explanation of the current dispute between the National Association of Broadcasters and the American Society of Composers, Authors and Publishers.

Based upon facts and court records, it is a well documented exposé of ASCAP, going behind its slogan "Justice for Genius" to show the inner workings of the Society, its frustration of new creative talent, its monopolistic hold on radio broadcasters, its effect upon the employment of musicians, its discrimination in favor of the inner circle crowd whereby in one year the 175 highest ranking ASCAP authors and composers divided $1,890,000, while 175 authors and composers in the lower ASCAP classifications received only a total of $3,000.

These and many more illuminating facts are revealed in NAB's new publication "Let's Stick to the Record". Copies are being mailed stations over the weekend. Additional copies are being sent to newspaper and radio editors and others who are targets for ASCAP's propaganda who should be in full possession of the facts. The cooperation of stations is requested to further spread the information just now off the press.

At a meeting of the Board of Directors of Broadcast Music, Inc., on July 16th, Niles Trammell, new President of NBC, was unanimously elected to the board to fill the vacancy caused by the resignation of Major Lenox R. Lohr. Mr. Trammell was present and, following his election, participated in the meeting.

The resignation of Major Lohr was occasioned by his previous resignation from the presidency of NBC. It was accepted by the BMI board with expressions of regret and with thanks for Major Lohr's services to the music company.

The board adopted a new formula for license fees to go into effect at the end of the initial license period. The new fees are based on a sliding scale which will reduce the payments to be made by stations in the lower income categories. The networks will pay the regular rates on their managed and operated, and owned and operated stations, the rates to be computed on the amounts which would be paid by the networks to these stations if they were independently owned and operated. The networks in addition will make other payments on network revenue from sale of time, deducting station payments. Full details of the plan will be announced at a later date.

Following the meeting of the Board it was also announced that transcriptions of fifty compositions will be distributed to all BMI licensees free of charge within the next week. Plans have been laid for making 450 additional selections available to BMI subscribers without charge before the end of the year. Details of the plan with regard to transcriptions will be given at the NAB convention in San Francisco in August.

In the report as to the progress of BMI which was presented to the Board names of additional subscribers were announced, bringing the total to 311. It was also stated that the first call on subscribers for an amount in excess of $150,000 had met with practically a 100% response after the sending of a single letter and statement. Officials reported over 95% of the money already paid into the bank.

The following letter from the officers of NIB will be read with interest by all broadcasters:

500 Edmondts Building, Washington, D.C.
July 16, 1940

SPECIAL COPYRIGHT NOTICE

TO ALL INDEPENDENT RADIO STATIONS:

Last February, the radio industry commenced the operation of BMI (Broadcast Music, Inc.), established offices, studios, etc., in New York and now are providing members with music.

The subscription agreements made it difficult, if not impossible, for many small broadcasters to participate. But independent radio stations now have the opportunity to receive the services and benefits of the industry-owned music supply at a reasonable and fair cost.

Harold A. LaFont, President, Lloyd C. Thomas, Secretary-Treasurer, and Andrew W. Bennett, General Counsel of NIB (National Independent Broadcasters), for months have argued with BMI officials the inability of independent stations to participate in BMI under existing agreements—that the proposed license fee in their opinion was excessive insofar as it applied to small stations.

These discussions culminated in a meeting at New York July 10 of the above mentioned officials of NIB and officials of BMI, at which meeting BMI proposed a graduated scale of license fees which in our opinion meets our objections, since it provides a more equitable basis for determining such fees. This scale of fees will be announced by BMI, and we suggest that you give it deliberate and careful consideration, in the light of your own particular needs, before making any contractual commitments for future music.

The ANNUAL MEETING of the NIB will be held at the St. Francis Hotel in San Francisco at 2:00 p.m., Monday, August 5. At this meeting, a full discussion of the copyright situation insofar as it affects the independent radio stations and other ques-
tions will be discussed. We believe it is imperative that you attend and urge that you make every effort to do so.

NATIONAL INDEPENDENT BROADCASTERS,
HAROLD A. LAFOUNT, President.
LLOYD C. THOMAS, Secretary-Treasurer,
ANDREW W. BENNETT, General Counsel

On the list of most-played tunes, printed in the New York Enquirer, four BMI numbers appear this week: We Could Make Such Beautiful Music, Same Old Story, Practice Makes Perfect and Here in the Velvet Night. No other publisher has more than three numbers on the list. In Variety also Beautiful Music appears for the second week in succession.

Last Monday ASCAP called together the radio and music editors and feature writers of New York’s newspapers and magazines and released to them a number of sandwiches, cocktails, and statements as to ASCAP’s position. It is said that the sandwiches and cocktails were very well received.

LEGAL

ADMINISTRATION PROCEDURE

NAB Counsel, Russell P. Place, with the approval of the Board of Directors, has filed with the Attorney-General’s Committee on Administrative Procedure a statement of NAB’s suggestions for improvement of FCC procedure. The statement filed endorses that of the Federal Communications Bar Association Executive Committee with the following three exceptions:

1. With respect to hearings before promulgation of regulations or standards and requirements which have the force and effect of regulations, we feel that the Commission should be encouraged to express its principles and policies in formal regulations and that no procedural obstacles to its doing so ought to be imposed.

2. In order to avoid the constitutional question of a case or controversy we are inclined to favor limiting the forum for judicial review of rules and regulations to the U. S. District Court for the District of Columbia.

3. In all quasi-judicial proceedings before the FCC we believe that there should be an opportunity for facts to be judicially found by an independent examiner or some independent quasi-judicial or judicial tribunal. Some such separation of the powers of the Commission as recommended by the President’s Committee on Administrative Management at page 41 of its report would be an acceptable solution. In particular, in those cases which involve revocation of or failure to renew broadcast licenses, and where the licensee’s entire business is at stake, we urge that there be provided a separate judicial determination of the facts as well as of the law.

FEDERAL LEGISLATION

H. R. 10205 (Bland, D., Va.) COMMUNICATIONS ACT—To amend section 4 (f) of the Communications Act of 1934, as amended, to provide for extra compensation for overtime of inspectors in charge and radio inspectors of the Field Division of the Engineering Department of the Federal Communications Commission. Referred to the Committee on Merchant Marine and Fisheries.

LABOR

LABOR BOARD ELECTION AT KXOK

The National Labor Relations Board today announced that a collective bargaining election would be held within 30 days among the staff and free-lance actors, singers, and announcers, employed by Star-Times Publishing Company at Station KXOK, St. Louis, to determine whether or not they desire to be represented by American Federation of Radio Artists.

At the Board’s hearing there was introduced into evidence an analysis made by the Acting Regional Director showing that the union holds application for membership signed by a substantial number of the company’s employees at Station KXOK in the unit alleged in the petition to be appropriate for the purposes of collective bargaining. At the hearing the parties stipulated that the company had declined to recognize the union as the exclusive representative of its employees in this unit until such time as the union was certified as such representative by the Board.

At the hearing it was agreed by the union and the company that a unit consisting of actors, singers, and announcers employed by the company at Station KXOK, excluding microphone entertainers known as “hillbillies,” was appropriate for the purposes of collective bargaining. The company and the union further agreed that the unit thus defined included the regular staff employees of the station in the program department, and, in addition, free-lance actors, singers, and announcers employed by the station for particular performances.

Miscellaneous

J. Lindsay Nunn, WLAP, writes: “Winston L. Clark is not associated with Radio Station WLAP in any way, nor has he been associated with this station or any of the Nunn interests for nearly two years.”

FLY SAYS FCC WORKING ON HAVANA REALLOCATIONS

James Lawrence Fly, Chairman of the FCC, stated at a press conference on Monday that while the Commission itself has done nothing up to this time in connection with the North American regional broadcasting reallocations that engineers of the Commission are hard
at work on the problem and have been for sometime. He stated that the staff has gotten along very well with its work and has even prepared a list of proposed changes which have not yet been referred to the Commission.

Chairman Fly stated that while the Commission has received a communication from Neville Miller, President of NAB, requesting representation of the industry on the proposed Communications Defense Committee that no action has been taken to this time, although there has been some discussion of it. Mr. Fly said that the appointment of the proposed Committee now rests entirely with the White House. The announcement of it, he said, is probably a question of timing. If any difficulty had arisen, he said, he probably would have been notified.

TELEVISION DEVELOPMENTS

The FCC says that television experimentation tending to develop uniform transmission standards of acceptable technical quality, plus equipment tests and training of technicians, in addition to experimental programs which the public may enjoy, are assured by the National Broadcasting Company, through its station W2XBS at New York, and the Don Lee Broadcasting System, through W6XAO at Los Angeles and a proposed station to be located in San Francisco.

Besides confirming its previous tentative approval of construction of the San Francisco station, the FCC authorizes the other stations mentioned to use the new television channel No. 1 (50,000-56,000 kilocycles). This is in conformity with the Commission’s announcement of June 18 encouraging the widespread distribution of experimental facilities to promote advancement of television.

Stations W2XBS and W6XAO operated on the former television channel No. 1 (44,000-50,000 kilocycles) which, on May 22, was removed from the television band. The Commission’s approval of the use of the new television channel No. 1 was conditioned upon showing of acceptable programs of research and development.

National Broadcasting Company reported that its New York station will continue to use the RMA standard but will increase the number of frame lines from 441 to 507. In collaboration with RCA, it will review the various types of transmission standards under laboratory conditions and, if necessary, undertake full scale field testing. Change in polarization of W2XBS transmission would interfere with reception by receivers in the area served, since antennas there are for horizontal polarized signals. However, polarization studies will be conducted by RCA subsidiaries. NBC hopes to make the necessary equipment changes for utilizing the new channel during the summer when audience interest is at a minimum. The work will require about two months.

Both Don Lee stations will experiment with television transmission using 525 lines, 30 frames interlaced, or 441 lines, 30 frames interlaced, and possibly television signals of other composition. These stations will make tests to determine the effect of the different power supply systems on reception of television images, and propagation characteristics and signal-to-noise ratios will be compared with vertical and horizontal polarization. Studies will also be made of co-channel interference between the Los Angeles and San Francisco stations.

Station W2XBS operates with 12 kilowatt visual and 15 kilowatt aural power, and W6XAO with 100 watts visual power and 150 watts aural power. The proposed San Francisco station will use 1 kilowatt visual and aural power.

In following through its promise of May 28th that it stands ready to confer with the television industry and otherwise assist in working out television’s remaining problems, the FCC is cooperating in the organization of a National Television Systems Committee to function under the auspices of the Radio Manufacturers Association. Such a committee, it feels, should be of value in the advancement of television to a satisfactory level of performance that will insure a general and widespread public service.

The Commission recently paved the way for an increased number of television stations throughout the country with a view to crystallizing their experimentation with different systems into a uniform standard upon which commercialized visual broadcasting may be safely launched. A previous television hearing had revealed a serious conflict of engineering opinion upon the question of standards among the representatives of various responsible elements in the industry engaged in important research and experimental work.

Because of the inadequacy of the various suggested standards, the new group will explore existing television systems with a view to developing and formulating standards that will be acceptable to the industry as a whole in expediting establishment of a single well-founded national system—one which has promise of ultimately giving this country more television stations and receivers than all other nations combined, with resultant benefits to manufacturers, dealers, and broadcasters, as well as the public.

This project, though sponsored by the Radio Manufacturers Association, will operate independently and represent the majority opinion of the industry. Members will be appointed by James S. Knowlson, newly-elected president of the association, subject to the approval of that association’s executive committee. However, membership will not be limited to the association; it will embrace representatives of companies broadly interested and experienced in the television field, also representatives of national technical organizations desirous
of seeing television launched on a firm footing, as well as individual experts.

Chairman James Lawrence Fly of the FCC welcomes organization of the committee as affording "a splendid opportunity for the cooperation of industry and government in the solution of a problem which is of such timely concern to the public and to business."

INCREASE BROADCAST COVERAGE THROUGH MUTUAL ARRANGEMENT

Another example of mutual cooperation by widely-separated broadcasting stations to improve public service is reflected in action today by the FCC in granting construction permits to WCHS at Charleston, W. Va.; WDBO at Orlando, Fla., and WIBW at Topeka, Kans., to increase night power to 5 kilowatts. The three stations operate on 580 kilocycles. By working out directional antenna systems they are able to greatly increase their respective coverage with a minimum of interference to one another.

WCHS, licensed to the Charleston Broadcasting Company, has heretofore operated with 500 watts night and 5 kilowatts day, while WDBO, Orlando Broadcasting Company, Inc., and WIBW, Topeka Broadcasting Association, Inc., have operated with 1 kilowatt night and 5 kilowatts day.

REHEARING IN ATLANTIC CITY BROADCAST CASE DENIED

The FCC denied a petition of the Press-Union Publishing Co., licensee of radio station WBAB at Atlantic City, N. J., for rehearing of the Commission's action in issuing a construction permit to the Neptune Broadcasting Corp. for a new station at that place to operate on 1420 kilocycles with 100 watts power night and 250 watts until local sunset. Station WBAB operates on 1200 kilocycles with 250 watts power, unlimited time.

These frequencies are sufficiently separated so that both may be used there without interference to the other. Press-Union Publishing Co. previously failed to show that its interest would be adversely affected by grant of Neptune application. Nor did the Press-Union's subsequent petition assert otherwise, but argued that there is no need for two local stations in Atlantic City, and that the service of Neptune would duplicate to a large extent the program service rendered by WBAB. Concludes the Commission:

"Although petitioner, in his petition for rehearing, does not assert that it will be aggrieved or adversely affected by the operation of the proposed station, we have carefully considered the grounds urged by petitioner for a reversal of our decision of May 22. Upon considering these grounds, we find they are without merit."

ADDITIONS TO LEGAL STAFF

The FCC announces the following additions to its legal staff:

Lucien Hilmer, who was in charge of the New York office of the Senate Interstate Commerce Committee in its railroad investigation, to be special counsel.

David Lloyd, formerly assistant chief counsel of the Senate civil liberties committee, to be special counsel in charge of an investigation unit within the Law Department.

Oscar Schachter, from the Wages and Hours Division of the Department of Labor, to be an associate attorney.

Leo Resnick, from the field legal staff of the Public Works Administration, to be associate attorney.

Marcus Cohn, graduate of the University of Oklahoma, University of Chicago Law School and Harvard Law School, to be associate attorney.

Philip Elman, at present law clerk to Circuit Judge Calvert Magruder of the First Circuit, to be assistant attorney.

FCC HAS TEMPORARY POSITIONS FOR RADIO OPERATORS

A Civil Service examination is open now for radio operator positions in the FCC. In view of the emergency, the FCC is prepared to accept applications from licensed commercial operators and amateurs for appointment as radio operators in the field service, with the understanding that those selected will be given temporary employment for ninety days and examined during that time by the Civil Service Commission. The temporary employees who pass the Civil Service examination, and are reached in the order of their standing on the eligible list, will receive indefinite probationary appointment on a temporary basis as the present emergency may justify.

Applicants receiving appointments must defray the expense of travel to the city or town designated by the Commission as their headquarters. The Commission reserves the right to make transfers from time to time according to the best interests of the service. A few positions will be available outside the Continental United States to operators who pass the Civil Service examination. Those who are willing to accept appointment in Alaska, Hawaii, and Puerto Rico should indicate their order of preference. Order of preference may also be shown for regions within the Continental United States, as, for example, "West Coast," "Southeast," etc.

Temporary appointees are also required to pass a physical examination which is conducted at U. S. Public Health stations throughout the United States.

Operators will be required to travel in Commission field cars on official business, and when operating outside of the limits of their headquarters station will be paid five dollars per diem for subsistence.

 Operators in the Commission's service are required to stand a rotating watch which involves work on Saturday afternoons, Sundays and holidays.

Persons holding radiotelegraph first class licenses will be appointed to fill positions at $1300 per annum and those holding radiotelegraph second class licenses at $1620 per annum.

Amateur licensees desiring to file applications for positions as operators in the Commission's field service must possess the following qualifications:

(a) Must be at least 21 years of age and not over 55 unless they have veterans' preference.

(b) Must hold an amateur operator's license for a continuous period of at least five years prior to making application for employment.

(c) Must demonstrate in a Commission field office their ability to transmit and receive plain English text in the International Morse Code at the rate of 20 words per minute.

The salary for amateurs who qualify for appointment is $1620 per annum. A deduction of 3½ percent is made from all salaries toward retirement, but this is returned if the employee leaves the government service before retirement.

Applications should be submitted on U. S. Civil Service Application Form 8 to the Secretary, Federal Communications Commission, Washington, D. C. Complete information must also be

July 19, 1940 — 4431
filed with respect to citizenship and fingerprints under Federal Communications Commission Order No. 75.

Further information relative to these positions may be obtained by writing to the Federal Communications Commission or to the U. S. Civil Service Commission, Washington, D. C.

FCC ORDER REVISED

Administrative Order No. 2 of the FCC has been revised to give more latitude for the handling cases at the Commission during the vacation period. The revised Order No. 2 is as follows:

Under the authority of the Communications Act of 1934, as amended, IT IS ORDERED, That Administrative Order No. 2, adopted July 12, 1939, as amended, be and the same is hereby further amended to provide as follows:

IT IS ORDERED: That there be and there is hereby assigned and referred to the respective boards and individual Commissioners herein after designated for action thereon, that portion of the work, business or functions of the Federal Communications Commission hereinafter specified:

(1) (A) The Secretary of the Commission is hereby designated to determine, order, certify, report or otherwise act upon:

(a) all applications for operator licenses or renewals thereof; and

(b) all applications for amateur and ship stations or renewals thereof; and

(c) all applications for aircraft station licenses or renewals thereof where the applicant is or has been the holder of a station license within the preceding year;

(2) The Chief Engineer of the Commission is hereby designated to determine and act upon all applications and requests and to make appropriate order in letter form for the signature of the Secretary of the Commission in the following matters:

(a) temporary operation without specified items of equipment, or with temporary, substitute or auxiliary equipment;

(1) operation without an approved frequency monitor;

(2) operation without an approved modulation monitor;

(3) operation without a thermometer in automatic temperature control chamber;

(4) operation without a antenna ammeter, plate voltmeter or plate ammeter;

(5) with substitute ammeter, plate voltmeter or plate ammeter;

(6) with temporary antenna system;

(7) with auxiliary transmitter as main transmitter;

(b) operation with new or modified equipment pending repair of existing equipment, or pending receipt and action upon a formal application;

(c) where formal application is not required, application for new or modified equipment or antenna system;

(d) all applications for painting and lighting antenna towers where formal application is not required;

(e) operation to determine power by direct method during program test period;

(f) relocation of transmitter in same building;

(g) operation with reduced power or time under Sections 3.57 and 3.71;

(h) approval of types of equipment as to compliance with outstanding rules and standards;

(i) all authorizations for equipment and program tests, or extensions thereof, where it appears that compliance has been had with the terms of the construction permit;

(j) denial of requests for equipment and program tests where specifications of construction permit have not been met;

(k) withdrawal of any order or certificate of construction permit where subsequent to the issuance of the original construction permit it appears that the terms of the construction permit have not been met;

(l) extensions of time within which to comply with technical requirements specified in authorizations, orders and rules or releases of the Commission;

(m) representations of compliance with technical requirements specified in authorizations, orders, rules or releases (except formal applications);

(n) operation with licensed, new or modified equipment at a temporary location with a temporary antenna system in case of emergency when, due to causes beyond the control of the licensee, it become impossible to continue operating at the licensed location;

(o) all authorizations for special operation necessary to facilitate equipment, program and service tests or to comply with technical requirements specified in authorizations, orders, rules or releases.

(3) The Chief Accountant of the Commission is hereby designated to determine, order, certify, report or otherwise act upon:

(a) administration, interpretation and application of regulations promulgated by the Commission pursuant to Section 220 of the Act, relating to accounts, records, and memoranda to be kept by carriers subject to the jurisdiction of the Commission;

(b) applications for extensions of time in which to file annual, monthly, and special reports required by the Commission pursuant to Section 219 of the Act;

(c) administration, interpretation and application of orders or rules of practice and procedure promulgated by the Commission relating to financial and statistical data of stations in the broadcast service and broadcast networks or chains, including applications for extensions of time in which to file financial and statistical statements and reports;

(d) all matters arising in connection with the administration of tariff regulations promulgated by the Commission pursuant to Section 203 of the Act, and in connection with the administration of this section in so far as it relates to the modification of requirements thereof or made pursuant thereto, as authorized in particular instances by subsection (b) thereof, and to the rejection of tariffs as authorized by subsection (d) thereof;

and, where appropriate in carrying out the foregoing, to make orders in letter form for the signature of the Secretary of the Commission.

(4) A board, to be called "the Administrative Board," consisting of the General Counsel, Chief Engineer, Chief Accountant, and Secretary of the Commission is hereby designated to determine, order, certify, report or otherwise act upon the following matters:
of the standard broadcast station with which the relay stations are affiliated; and requests for authorization to rebroadcast under the provisions of Section 3.94 of the Rules and Regulations;
(c) upon all applications or requests for special temporary authorization other than those falling under paragraphs (1), (2), (3) or (5) of this Order;
(f) all applications or requests for emergency and renewal exemptions from the provisions of Section 352(b) of the Act;
(g) upon all uncontested proceedings involved in:
(1) the issuance of certificates of convenience and necessity and the authorization of temporary or emergency wire service, as provided in Section 214 of the Act;
(2) applications from existing licensees for instruments of authorization for the Fixed Public or Fixed Public Press radio services, except applications involving (1) new points of communication, (2) changes in transmitter location other than local in character, (3) assignment of additional frequencies, or (4) involving change of policy by the Commission or the establishment of a new type of service;
(h) upon requests for inspection of records under the provisions of Section 15(c) of the Commission's Rules of Practice and Procedure;
Actions taken by the Board shall be reported in writing each week to the Commission at its regular meeting.
(5) All applications or requests for special temporary standard broadcast authorizations shall be referred to the Administrative Board which shall make appropriate recommendation thereon and refer the same to a Commissioner to be named by subsequent supplements to this Order, who is hereby designated to determine, order, report or otherwise act upon all such applications or requests in accordance with established policies of the Commission.
(6) A Commissioner, to be named by subsequent supplements to this Order, is hereby designated to hear and determine, order, certify, report or otherwise act upon;
(a) except as otherwise ordered by the Commission, all motions, petitions, and requests designated for formal hearing, including motions for further hearing, excepting motions and petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission, and those requesting change or modification of a final order made by the Commission; provided, however, that such matters shall be handled in accordance with the provisions of Sections 1.251 to 1.256, inclusive, of the Commissions Rules of Practice and Procedure; provided further that when one or more members of the Commission have been designated to preside at a hearing such Commissioner or Commissioners shall be authorized and empowered to fix the time and place such hearing shall be held; and such motions, petitions, or matters arising in connection with such hearing shall be heard by the Commissioner or Commissioners designated to preside, subject to the provisions of Sections 1.232, 1.252, 1.254, 1.255, and 1.256 of the Rules of Practice and Procedure; provided further that in the absence of the individual Commissioner designated to preside at a hearing, or his inability to act or pass upon such preliminary matters, they shall be referred to the presiding officer of the Motions Docket.
(b) the designation pursuant to the provisions of Sections 1.231 to 1.232 of the Commission's Rules of Practice and Procedure of officers, other than Commissioners, to preside at hearings.
(7) Any party affected by any order, decision, or report of any individual, board, or individual Commissioner, to whom authority is delegated under the provisions hereof, may file a petition for rehearing, as provided by Section 1.231 of the Commission's Rules of Practice and Procedure, before the Commission, and every such petition shall be passed upon by the Commission.

FROM THE FCC MAIL BAG

A New Yorker inquires "whether a company operating a commercial radio station is under a duty to quote rates for time not sold and to sell such time if its rates are met." Under the Communications Act a radio broadcast station is expressly declared not to be a common carrier. Accordingly, except the provision which relates to candidates for public office explained in our information release of March 11, a radio broadcast station is under no obligation to quote rates or sell time. Hence a radio broadcast station is unlike some other classes of radio stations— notably radiotelegraph and radiotelephone—which have the status of common carriers and are required to furnish service in accordance with tariffs filed with the Commission.

With reference to reallocation of frequencies under the North American Regional Broadcast Agreement, the Commission is unable to advise about prospective individual changes pending working out of the reallocation plan in its entirety. Full publicity will be given frequency shifts at that time. Meanwhile, it is not necessary for a station to make application for such change in frequency.

Although the Commission can not, as a rule, interfere in local interference problems, so many residents of Demison, Ohio, complained about serious interference to local radio reception that the Commission has asked the Ohio Power Co. to cooperate in remedying the local situation.

A West Virginian wants to obtain a transcript of a certain radio broadcast. Station licensees are not required under law to furnish program transcripts to the public, nor is the Commission empowered by law to secure copies thereof for individuals.

A Pennsylvanian who complains about interruption of programs for station identification, the Commission points out that whereas such announcements are normally required on the hour and half hour, these may be dispensed with if they would interrupt a single consecutive speech, play, religious service, symphony concert or operatic rendition.

A Chicago woman objects to a program broadcast by a Dr. Brinkley. The program emanated from a Mexican station, over which the Commission has no jurisdiction.

Since the Commission lacks jurisdiction in the matter, it suggests to her a Palm Beach woman who submitted to independent stations and networks a prayer that she wants to be broadcast twice daily throughout the United States.

In response to a query from Chicago, the Commission advises that there is no rule or regulation pertaining to the solicitation of funds over the air, and that the matter is one within the discretion of station management.

The Commission is likewise without authority to take remedial action with respect to the following complaints:
A Brooklyn, N. Y., man is irked because a network substituted an afternoon baseball game for Mother's Day gifts rather than flowers.
A Bronx, N. Y., individual would bar the radio to minority groups.
A Lynn, Mass., florist dislikes radio advice to purchase hosiery for Mother's Day gifts rather than flowers.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following oral arguments are scheduled before the Commission during the week ending Monday, July 22. They are subject to change.

Thursday, July 25

Oral Argument Before the Commission
Report No. B-107:
NEW—The Mayflower Broadcasting Corp., Boston, Mass.—C. P., 1110 kc., 500 watts, 1 KW LS, unlimited time (requests facilities of WAAAB).
WAAAB—The Yankee Network, Inc., Boston, Mass.—Renewal of license. 1110 kc., 1 KW, unlimited time; and auxiliary, 1110 kc., 500 watts, 1 KW LS. Time: Auxiliary purposes only.

FUTURE HEARINGS

During the past week the Commission has announced the following future broadcast hearings and oral arguments. They are subject to change.
**August 1**

**Oral Argument Before the Commission**

Report No. B-108:

**KSAM**—Sam Houston Broadcasting Assn., H. G. Webster, President, Huntsville, Tex.—In re: Revocation of Station License of KSAM.

**October 14**

**WJAG**—The Norfolk Daily News, Norfolk, Nebr.—C. P., 770 kc., 1 KW, daytime. Present assignment: 1080 kc., 1 KW, limited to WBAL and WTIC.

**WMBI**—The Moody Bible Institute of Chicago, Chicago, Ill.—Modification of license, 1080 kc., 5 KW, limited to WBT and KFAB. Present assignment: 1080 kc., 5 KW, limited to WBT, shares WCBD.

**FEDERAL COMMUNICATIONS COMMISSION**

**APPLICATIONS GRANTED**

**WIBW**—Topeka Broadcasting Assn., Inc., Topeka, Kans.—Granted construction permit to increase night power from 1 KW to 5 KW, on 580 kc., and install directional antenna for night use.

**WCBS**—Charleston Broadcasting Co., Charleston, W. Va.—Granted construction permit to increase night power from 500 watts to 5 KW, on 580 kc., and install directional antenna for night use.

**WDBO**—Orlando Broadcasting Co., Inc., Orlando, Fla.—Granted construction permit to increase night power from 1 KW to 5 KW, on 580 kc., install new equipment and directional antenna system for night use.

**KPHO**—M. C. Reece, Phoenix, Ariz.—Granted modification of construction permit (B5-P-2182) approving transmitter and studio site, antenna, and increase in night power from 100 to 250 watts (B5-PRM-979).

**WFBG**—The Gable Broadcasting Co., Altoona, Pa.—Granted construction permit to install new transmitting equipment and increase power from 100 to 250 watts, on 1510 kc. (B2-P-2817).

**Riverside Broadcasting Co., Riverside, Calif.**—Granted construction permit for new Class IV broadcast station to operate on 1420 kc., 250 watts, unlimited time (B5-P-2648).

**WLPM**—Suffolk Broadcasting Corp., Suffolk, Va.—Granted modification of license to increase nighttime power from 100 to 250 watts (B2-ML-977).

The Marion Broadcasting Co., Marion, Ohio.—Granted construction permit for new station at Marion, Ohio, to operate on 1500 kc., using 250 watts power, unlimited time (B2-P-2862).

**WGAN**—Portland Broadcasting System, Inc., Portland, Me.—Granted construction permit to install new transmitting equipment, make changes in directional antenna system for nighttime use, change frequency from 640 to 560 kc., increase power from 500 watts to 5 KW, and change hours of operation from limited time to unlimited (B1-P-2912).

**WPTF**—WPTF Radio Company, Raleigh, N. C.—Granted amended application for construction permit authorizing increase in power from 5 KW to 50 KW, installation of new transmitter and directional antenna for nighttime use on 680 kc, by mutual arrangement with WLAW.

WLAW—Hildreth & Rogers Co., Lawrence, Mass.—Granted construction permit to install new transmitter and directional antenna for night use, increase power from 1 KW daytime only to 5 KW unlimited time, on 680 kc., by mutual arrangement with WPTF in re directional antenna.

**DESIGNATED FOR HEARING**

Mollin Investment Company, Riverside, Calif.—Application for construction permit to erect a new station to operate on 1390 kc., 500 watts, daytime only (B5-P-2464).

**MISCELLANEOUS**

**WHER**—Granite State Broadcasting Corp., Portsmouth, N. H.—Granted license to cover construction permit for installation of new transmitter, move of transmitter and studio, installation of new antenna, and increase power from 250 watts to 1 KW; 740 kc., daytime (B1-L-1183).

**WMPS**—Memphis Broadcasting Co., Memphis, Tenn.—Granted license to cover construction permit for installation of new transmitting equipment; 1430 kc., 50 watts, 1 KW LS, unlimited (B3-L-1184).

**WRAW**—Reading Broadcasting Co., Reading, Pa.—Granted license to cover construction permit for installation of new transmitting equipment; 1370 kc., 250 watts, unlimited time (B2-L-1186).

**WJSN**—The Sun Publishing Co., Inc., area of Jackson, Tenn., Portable-Mobile.—Granted license to construct broadcast station for new relay broadcast station, frequencies 30820, 35820, 37080 kc., power 15 Kw (B1-L-1377).

**WHIZ**—WALR Broadcasting Corp., Zanesville, Ohio.—Granted license to cover construction permit for installation of new transmitter, in power from 100 to 250 watts, and move of studio; 1210 kc., unlimited time (B2-L-1187).

**W8XVH**—WBNS, Inc., Columbus, Ohio.—Granted license to cover construction permit for installation of new equipment, frequency 43000 kc., special emission, 250 watts power, granted upon experimental basis only, conditionally (B2-LHB-62).

**WICA**—WICA, Inc., Ashtabula, Ohio.—Granted license to cover construction permit for changes in equipment and increase in power from 500 watts to 1 KW; 940 kc., daytime (B2-L-1187).

**KAIZ**—Woodmen of the World Life Insurance Society (area of Omaha, Nebr.), Portable-Mobile.—Granted license to cover construction permit for new relay broadcast station, frequencies 1622, 2058, 2570, 2970 kc., power 10 watts (B4-LRY-194).

**WHKY**—Catawba Valley Broadcasting Co., Inc., Hickory, N. C.—Granted license to cover construction permit for new broadcast station, 1370 kc., 250 watts, unlimited (B3-L-1170). Also granted power to determine operating power by direct measurement of antenna input (B3-Z-419).

**WLS**—Agricultural Broadcasting Co., Chicago, Ill.—Granted special temporary authority to rebroadcast regular routine transmissions to be received from the Boone County Police radio system, Bettlere, Ill., from 11:45 a.m. to 12:15 p.m., CST, on July 11, 1940 (B4-S-577).

**Atlantic Coast Broadcasting Co.** (area of Charleston, S. C.), Portable-Mobile.—Granted construction permit for new relay broadcast station, frequencies 31220, 35620, 37020, 38520 kc., power 2 watts (B3-PRE-157).

**WBRC**—Birmingham Broadcasting Co., Inc., Birmingham, Ala.—Granted construction permit to move transmitter from 5½ miles northwest of Birmingham, Ala., to 2400 Arkadelphia Road, Birmingham, Ala.; 930 kc., 1 KW, 5 KW LS, unlimited time (B3-P-2541).

**KOQ**—Queen City Broadcasting Co. (area of Seattle, Wash.), Portable-Mobile.—Granted construction permit to increase power of its relay broadcasting station from 12 watts to 40 watts and install new transmitter (B5-PV-223).

**WSPD**—The Fort Industry Co., Toledo, Ohio.—Granted construction permit for increase of operation from limited time to unlimited (B3-P-2861).

**WBDB**—West Virginia Broadcasting Co., Charleston, W. Va.—Granted construction permit to install new transmitter and directional antenna and increase in power, for extension of completion date from July 8, 1940, to September 8, 1940; 1400 kc., 50 KW, unlimited time, directional antenna day and night (B4-MP-1000).

Glover Weiss, tr as Glover Weiss Co., Jacksonville, Fla.—Denied in case of default the application for construction permit for a new broadcast station at Jacksonville, Fla., to operate on 1170 kc., 250 watts, unlimited time.

WDZ Broadcasting Co. (of Teutopolis, Ill.), Portable-Mobile—Granted license for new relay broadcast station, frequencies 1622, 2058, 2150, 2790 kc., power 2 watts (B4-LRY-191).

WCOV—Capital Broadcasting Co., Inc., Montgomery, Ala.—Granted authority to determine operating power by direct measurement of antenna (B2-KS-1210 kc., power 100 watts, unlimited time (B2-Z-437).

KFRU—KFRU, Inc., Columbia, Mo.—Granted special temporary authority to operate simultaneously with Station WGBF with power reduced to 250 watts from 7:30 p.m., CST, to midnight, for the period July 15, 1940, in order to broadcast the proceedings of the Democratic National Convention, in order to permit WGBF to broadcast said proceedings only.

WGBF—Evansville on the Air, Inc., Evansville, Ind.—Granted authority to broadcast said proceedings only.

WSPA—Spartanburg Advertising Co., Inc., Spartanburg, S. C.—Granted special temporary authority to operate from 7:45 p.m., EST, until the conclusion of the evening sessions of the Democratic National Convention; in the period July 15 and continuing for the duration of the convention, in order to broadcast proceedings of said convention only (B3-S-775). Action taken 7-12.

WLBL—State of Wisconsin, Dept. of Agriculture, Stevens Point, Wis.—Granted extension of special temporary authority to operate specified time 8 a. m. to 4:15 p.m. CST, daily from July 17, 1940, to not later than August 15, 1940, pending the completion of plans being made for additional station personnel to permit full daytime operation.

WSPA—Spartanburg Advertising Co., Inc., Spartanburg, S. C.—Granted special temporary authority to operate from 7:45 p.m., EST, until 9:30 p.m., EST, July 13, 1940, and from 7:45 p.m. to 10 p.m. EST, July 14, 1940, in order to broadcast the pre-convention speeches of Senator Byrnes and Postmaster General Farley.

W2Xoy—General Electric Co., Schenectady, N. Y.—Granted special temporary authority to operate W2XOY with 100 watts amplifier for a period not to exceed 30 days, pending completion of manufacturing and installation of the model A4F2A1 amplifier as stipulated in construction permit.

WPIT—Westinghouse Electric & Mfg. Co., Baltimore, Md.—Granted special temporary authority to operate the equipment of International Broadcast Station WPIT, authorized in construction permit, File No. B1-PYB-23, with power of 35 kw, using WL 893R tubes in final amplifier stage in lieu of 50 kw power with Federal 124R tubes, respectively, specified in construction permit, for a period beginning August 1, 1940, to not later than August 30, 1940.

WESG—Cornell University, to modification of construction permit to authorize license to move studio from Mark Twain Hotel, Elmira, N. Y., to Cornell Campus, Ithaca, N. Y. (B1-ML-1005).

KWFC—Clyde E. Wilson and Howard A. Shuman, d/b as Hot Inn Time, to operate on 1200 kc., 250 watts LS, unlimited time (B3-L-1174): also granted authority to determine operating power by direct measurement of antenna input (B3-Z-430).

W2XWV—Allen B. DuMont Laboratories, Inc., New York, N. Y.—Granted extension of special temporary authority to operate a 50-kw television transmitter on frequencies 600000-860000 kc., at 315 Madison Ave., New York City, for the period July 13, 1940, to not later than August 11, 1940, in order to conduct field tests.

KSUB—E. M. Perry (surviving partner of Johnson & Perry), and Southern Utah Broadcasting Co., Cedar City, Utah.—Denied petition for extension of time within which to make other arrangements for the transfer of station property and the assignment of license of station KSUB, and to file an amended plan for the assignment of said license.

WJHL—WJHL, Inc., Johnson City, Tenn.—Granted petition to reconsider and grant without hearing the application of WJHL to change time and frequency from 1200 kc., 250 watts, unlimited time, to 880 kc., 1 kw, unlimited time, using directional antenna for night use.

WTMJ—The Journal Company (Milwaukee Journal), Milwaukee, Wis.—Granted construction permit to increase power from 1 kw to 5 kw on 620 kc., unlimited time, using directional antenna at night.

WROL—Stuart Broadcasting Corp., Knoxville, Tenn.—Granted petition for reconsideration and grant of application for construction permit to install new transmitter and directional antenna for night use, change frequency from 1510 kc. to 620 kc., and change power from 250 watts to 500 watts night, 1 kw day, unlimited time.

WHJB—Pittsburgh Radio Supply House, Greensburg, Pa.—Re-designated for hearing the application of WHJB for construction permit to change operating assignment from 250 watts, daytime, to 1 kw, unlimited time, on 620 kc., using directional antenna at night.

WWAB—Press-Union Publishing Co., Atlantic City, N. J.—Denied petition for rehearing in the matter of the application of the Neptune Broadcasting Corp., for a new station in Atlantic City to operate unlimited time on 1520 kc., with power of 100 kw, 500 watts local signal, granted by the Commission on April 4.

North Jersey Broadcasting Co., Inc., Paterson, N. J.—Granted petition to reconsider Commission action taken June 11, 1940, in designating for hearing the application for a new station at Paterson to operate on 620 kc., with 1 kw, daytime only, subject to selection of a transmitter site satisfactory to Commission (B1-P-2624).

Sentinel Broadcasting Corp., Salina, N. Y.—Granted construction permit to erect a new station at Salina (a suburb of Syracuse) to operate on 620 kc., with power of 1 kw, unlimited time, using directional antenna at night.

KSM—Sam Houston Broadcasting Assn., Huntsville, Texas—Denied petition for reconsideration of construction permit granted by the Commission on April 4, 1940, in designating for hearing the application for a new station at Paterson to operate on 620 kc., with 1 kw, daytime only, subject to selection of a transmitter site satisfactory to Commission (B1-P-2624).

W2XOR—Rammerger Broadcasting Service, Inc., New York, N. Y.—Granted special temporary authority to remain silent until completion of installation of new transmitter at 444 Madison Ave., New York City, as proposed in application (File No. B1-PYB-281.) but for a period not to exceed 30 days.

W16XG—Radio Electronic Laboratories Inc., Long Island City, N. Y.—Granted special temporary authority to operate Class I experimental station on 43100 kc., power 1 kw, special emission, 200 kilocycle swing, at location to be determined in San Francisco, Calif., on an experimental non-interference basis, to terminate on August 10, 1940, in order to demonstrate frequency modulation reception at the Convention of the National Association of Broadcasters.

WCMC—The Ashland Broadcasting Co., Ashland, Ky.—Granted modification of construction permit for installation of new antenna and move of transmitter, for change in transmitter location locally, and extension of commencement date from July 18, 1940, to 60 days after grant and completion date from January 18, 1941, to 120 days thereafter; 1310 kc., power 5 kw, limitless time (B2-M-1189).

KLZ—KLZ Broadcasting Co., Denver, Colo.—Granted license to cover construction permit for installation of directional antenna for day and night use, and increase in power; 500 kc., 5 kw, unlimited time (B3-L-1189). Also granted authority to determine operating power by direct measurement of antenna input (B3-Z-430).

WIXT—Worcester Telegram Publishing Co., Inc., Holden, Mass.—Granted license to cover construction permit for modified new high frequency broadcast station; frequency 43300 kc.; special emission; 1000 watts power granted upon permission for initial experimental broadcast on July 13, 1940, to August 10, 1940, in order to demonstrate technical feasibility.

WAGA—Liberty Broadcasting Corp., Atlanta, Ga.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-441).

KFRU—KFRU, Inc., Columbia, Mo.—Granted modification of construction permit for installation of new transmitter, new antenna, change of frequencies, decrease in power, change of antenna input. (B3-Z-441)
hours of operation, and move of transmitter, for approval of transmitter site at 1200 Broadway, Columbia, Mo. (present licensed location), approval of present licensed antenna and install new transmitter; frequency 1570 kc., 250 watts, unlimited time. (B4-MP-1010)

WEOA—Evansville on the Air, Inc., Evansville, Ind.—Granted license to cover construction permit which authorized changes in transmitting equipment; 1570 kc., 250 watts, unlimited time. (B3-L-1164)

KGMB—Hawaiian Broadcasting System, Ltd., Honolulu, Hawaii.
- Granted modification of construction permit as modified which authorized change in frequency, increase in power, move transmitter, install new transmitter and antenna, for extension of completion date from August 20, 1940, to October 20, 1940; 590 kc., 5 kW, unlimited time. (B-MP-1014)

WSGN—The Birmingham News Co., Birmingham, Ala.—Granted license to cover construction permit which authorized installation of new antenna, increase in power and move of transmitter; 1310 kc., 250 watts power, unlimited time. (B3-L-1164)

KLZ—KLZ Broadcasting Co., Denver, Colo.—License to cover construction permit which authorized installation of new antenna, and installation of new transmitter and antenna; frequency 1370 kc., 250 watts, unlimited time. (B4-MP-1010)

WSEB—National Broadcasting Co., Inc., New York, N. Y.—Granted construction permit to cover construction permit which authorized installation of new antenna, increase in power and move of transmitter; 1310 kc., 250 watts power, unlimited time. (B2-P-2900)

WKGF—Hugh J. Powell, Colleyville, Kans.—Granted special temporary authority to operate transmitter on 1380 kc. (channels 18 and 19) for limited time; operation to include transmission of video signals under construction permit (File No. B1-PVB-54) aboard the Steamer AMERICA at Norfolk, Va., beginning July 20, 1940, and ending not later than July 31, 1940; to operate as above starting at 7:15 p.m. at New York, N. Y., on or about July 29, 1940, in order to televise view of the arrival of the new Steamer AMERICA arriving in New York.

WLAP—American Broadcasting Corp. of Kentucky, Lexington, Ky. (Granted construction permit to move transmitter from Walton Bldg., Maine and Esplanade Sts. Lexington, Ky., to off Mason Headley Road, Lexington, and install new antenna; 1120 kc., 250 watts, unlimited time. (B2-P-2900)

KGGM—New Mexico Broadcasting Co., Inc., Albuquerque, N. Mex.—Construction permit to install new transmitter, new antenna; 1330 kc., and increase power from 100 watts to 1 KW. (B4-MP-2858)

WMO—The Ashland Broadcasting Co., Ashland, Ky.—Modification of construction permit (B2-P-2742) to install new antenna and move transmitter, requesting change in transmitter location from 43rd and Ohio River to 48th St. and Ohio River, Ashland, Ky., and extend commencement and completion dates from 7-18-40 and 1-18-41 to 60 days after grant and 120 days thereafter respectively.

KVSF—New Mexico Broadcasting Co., Inc., Albuquerque, N. Mex.—Construction permit to install new transmitter, new antenna; 1330 kc., and increase power from 100 watts to 1 KW. (B6-P-2918)

WLAV—Leonard A. Versluis, Grand Rapids, Mich.—Modification of permit to install new transmitter, new antenna; 1430 kc., 250 watts, unlimited time. (B2-P-2900)

KCWO—Charles Walter Greenley, Decorah, Iowa.—Granted special temporary authority to remain silent during the above periods in order to observe the summer vacation.

Pensacola Broadcasting Co., Pensacola, Fla.—Granted special temporary authority to operate on 250 watts, unlimited time. (B3-P-2658)

KGCA—Charles Walter Greenley, Decorah, Iowa.—Granted extension of special temporary authority to remain silent during the period beginning July 17, 1940, and ending not later than August 15, 1940, pending the filing of modification of license and completion of arrangements with Station KWLC.

APPLICATIONS FILED AT FCC

560 Kilocycles

NEW—William H. Rines, Portland, Maine.—Construction for a new broadcast station to be operated on 560 kc. 1 KW night, 5 KW day, unlimited time, employing directional antenna day and night. Class III-B. (App. 11890)

KLZ—KLZ Broadcasting Co., Denver, Colo.—Authority to determine operating power by direct measurement.

KLZ—KLZ Broadcasting Co., Denver, Colo.—License to cover construction permit (B5-P-2523) for directional antenna for day and night and increase power.

590 Kilocycles

KGMB—Hawaiian Broadcasting System, Ltd., Honolulu, Hawaii.
- Modification of construction permit (B-P-2220) as modified to change frequency, increase power, move transmitter, install new transmitter and antenna, requesting extension of completion date from 8-20-40 to 10-20-40.

920 Kilocycles

NEW—General Broadcasting, Inc., Miami, Fla.—Construction permit for a new broadcast station to be operated on 1330 kc. or 1360 kc. when Havana Treaty goes into effect, 500 watts night, 1 KW day, unlimited time. Amended: To change frequency to 1360 kc., increase power to 5 KW, install directional antenna for day and night use, and give location of transmitter as Miami Garden Drive & State 149, Town of Ojus, Fl.

1050 Kilocycles

WEAU—Central Broadcasting Co., Eau Claire, Wisc.—Modification of license to change frequency from 1050 kc. to 900 kc., increase power from 1 KW night, 5 KW day to 5 KW day and night, change time from limited to unlimited time. Amended: To show that the frequency 900 kc. is requested after the effective date of the North American Regional Broadcast Agreement.

1230 Kilocycles

KGGM—New Mexico Broadcasting Co., Inc., Albuquerque, N. Mex.—Construction permit to install new transmitter from West City Limits, Albuquerque, N. Mex. to approximately 3 miles north of business district on North Second Street, Albuquerque, N. Mex., change frequency from 1230 kc. to 590 kc., increase power from 100 watts to 1 KW, and install directional antenna for night use.

1310 Kilocycles

WOMI—The Ashland Broadcasting Co., Ashland, Ky.—Modification of construction permit (B2-P-2742) to install new antenna and move transmitter, requesting change in transmitter location from 53rd and Ohio River to 48th St. and Ohio River, Ashland, Ky., and extend commencement and completion dates from 7-18-40 and 1-18-41 to 60 days after grant and 120 days thereafter respectively.

KVSM—New Mexico Broadcasting Co., Inc., Albuquerque, N. Mex.—Construction permit to install new transmitter, new antenna; 1330 kc., and increase power from 100 watts to 1 KW. Contingent on granting of KGGM’s application B5-P-2918.

WLAN—Leonard A. Versluis, Grand Rapids, Mich.—Modification of construction permit (B2-P-2588) for a new broadcast station, requesting approval of antenna and transmitter and studio sites at 6 Fountain St., N. E., Grand Rapids, Mich.

KSRO—Ernest L. Finley, Santa Rosa, Calif.—Construction permit to change frequency from 1330 kc. to 1230 kc. and increase power from 250 watts to 1 KW, new transmitter and directional antenna for day and night use. Class III-B.

1370 Kilocycles

KFRU—KFRU, Inc., Columbia, Mo.—Modification of construction permit (B4-P-2322) to install new transmitter and antenna, change frequency, decrease power, change hours, move transmitter, for approval of transmitter at present site, approval antenna and transmitter.

WEOA—Evansville on the Air, Inc., Evansville, Ind.—License to cover construction permit (B4-P-2651) for changes in equipment.

NEW—J. Leslie Doss, Bessemer, Ala.—Construction permit for a new broadcast station to be operated on 1440 kc., 250 watts, unlimited time. Amended: To change frequency to 1370 kc., give location of transmitter as N. E. Corner Bessemer Birmingham Super Highway, near Bessemer, Ala., and studio at First National Bank Bldg., Bessemer, Ala.

WCBJ—Birney Imes, Columbus, Miss.—Modification of construction permit (B3-P-2675) for a new broadcast station, requesting approval of antenna and transmitter site at N. W. Corner 1st & Main Sts., Columbus, Miss.

1420 Kilocycles

WBMK—Middle Georgia Broadcasting Co., Macon, Ga.—Modification of construction permit (B3-P-2658) for new station requesting approval of antenna, approval of transmitter and studio site.

1450 Kilocycles

WAGA—Liberty Broadcasting Corp., Atlanta, Ga.—Authority to determine operating power by direct measurement of antenna power.
MISCELLANEOUS

WBIC—Indianapolis Broadcasting Corp., Indianapolis, Ind.—Construction permit to change hours of operation from daytime to unlimited, using 1 kW day and night, directional antenna for day and night use, move transmitter from northeast of Indianapolis to 45th St. and Hollingsworth Road, near New Augusta, Ind. Class II station. Amended: Geographic location.

KIIO—KMTR Radio Corp., area Los Angeles, Calif.—License to cover construction permit (B5-PKY-198) which authorized reinstatement of station.

KEIL—KMTR Radio Corp., area Los Angeles, Calif.—License to cover construction permit (B5-PKY-331) as modified which authorized construction of new relay station.

KGKF—KGKL Inc. (area San Angelo, Tex.).—License to cover construction permit (B5-PKY-206) which authorized new relay broadcast station.

KEI—KLZ Broadcasting Co., Portable-Mobile.—Modification of license to change type of equipment from RCA to COMPOSITE (masking change in tubes in last radio stage).

W2XD—General Electric Co., Schenectady, N. Y.—Modification of construction permit (B1-PYB-55) which authorized new television station, for change in frequencies from 156000-162000 to 162000-168000 kc.

WFME—Monocoy Broadcasting Co., Frederick, Md.—License to cover construction permit (B1-PKY-200) which authorized construction of a new relay broadcast station.

WNBI—National Broadcasting Co., Inc., Bound Brook, N. J.—Modification of special temporary authorization (B1-MLIB-38) which authorized the use of 11830 kc. in addition to present licensed frequencies, requesting change in frequency from 11830 kc. to 11890 kc.

WAIY—WIBX, Inc. (area of Utica, N. Y.).—License to cover construction permit (B1-PKY-203) for a new relay station.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Arlington Sales Company—Samuel H. Koolish, trading as Arlington Sales Company, 210 West 8th Street, Kansas City, Mo., was charged in a complaint with the use of lottery methods in the sale and distribution of radios, flashlights, clocks, cameras, and pen and pencil sets to ultimate consumers.

The complaint alleges that the respondent furnished push cards accompanied by order blanks, instructions and other printed matter for use in the sale and distribution of his merchandise by means of a game of chance, gift enterprise or lottery scheme. Such sales plans, the complaint continues, have a tendency to induce the purchasing public to buy the respondent's merchandise in preference to that of competitors who do not use similar methods, and constitute unfair methods of competition in violation of the Federal Trade Commission Act. (4180)

Bilt-Rite Box Corporation, and its officers, Jacob Gekel and Jacob Press, 242 West 41st St., New York, were charged in a complaint with the dissemination of misleading representations in the sale of paper boxes.

According to the complaint, the respondents used the word "manufacturers" on letterheads, invoices and other printed matter, thereby representing that they manufacture the products they sell, when in truth they do not operate or control a plant, factory or machinery for the manufacture of their product. (4177)

Inlaid Optical Company—Two optical companies were charged in complaints with failure to indicate to purchasers that their lenses or glasses are of Japanese or foreign origin. The respondents are Inlaid Optical Corporation, 1658 Broad St., Providence, R. I., and Lucian V. Segal, trading as Segal Optical Company, 56 West 22nd St., New York.

According to the complaints, the respondents sell eye glasses, including reading glasses and sun glasses, made of lenses having Japanese or foreign origin, without any marking to indicate this fact to purchasers. In this manner, it is alleged, the respondents mislead purchasers into the erroneous belief that the glasses are wholly of domestic manufacture and origin. (4178-4181)

Interwoven Stocking Company, New Brunswick, N. J., was charged in a complaint with the dissemination of misleading representations in the sale of men's hosiery.

According to the complaint, the respondent caused certain of its hosiery to be marked as follows:

"MADE ON MACHINERY IMPORTED FROM ENGLAND GENUINE 6X3 RIBBED"

"MADE ON MACHINERY IMPORTED FROM ENGLAND ENTIRELY HAND EMBROIDERED"

It is alleged that the words "Imported from England" are stamped in large conspicuous type inside an oval in such a manner that the words "Imported from" appear immediately above and are read in conjunction with the word "England," and the words "Made on Machinery" appearing inside the top rim of the oval can be read to such a sense as to indicate merely that the hose were made by machinery, or were made by machinery and are "Imported" from "England." In some instances, the complaint continues, the respondent has superimposed above the oval a simulation of the English Crown with the words "Trade Mark" appearing under it and just above the oval, while underneath the oval appear the words "Genuine 6x3 Ribbed."

By such representations, the respondent allegedly misleads the purchasing public into the erroneous belief that the products are machine made and are imported from England. The complaint alleges that use of the word "Genuine" before "6x3 Ribbed" gives the further impression that such hose are imported from England, inasmuch as England was originally the only source through which a "6x3 Ribbed" hose could be obtained, though now machinery has been devised for its manufacture in America.

According to the complaint, the respondent's products so marked are not imported from England but are of domestic manufacture on machinery which was imported from England. (4179)

Nu-Age Company—Complaint has been issued against Nu-Age Company, 309 Castle Building, Tulsa, Okla., charging it with the dissemination of misleading representations in the sale of a medicinal preparation, "Nu-Age," also described as "Natural Mineral Extract."

It is alleged that the respondent represents its preparation as being a cure or competent for eczema, athlete's foot, burns, skin diseases, tusslitis, bleeding gums, enlarged prostate glands and piles. The respondent further allegedly advertises that internal use of "Nu-Age" is a purifier of the blood; constitutes a tonic for run-down anemic conditions; supplies minerals essential to health, vigor or energy, and constitutes a cure or remedy for indigestion, stomach and intestinal disorders, ulceration of the stomach, kidney and bladder disorders, high blood pressure and rheumatism. "Nu-Age" is also allegedly advertised by the respondent as having germicidal, antiseptic and astringent properties and as being beneficial in the treatment of female disorders.

Such representations are false and misleading, the complaint charges, for in truth the respondent's preparation has no therapeutical value other than that of a mild laxative or mild diuretic. The respondent's preparation would have no value in the treatment of high blood pressure, the complaint continues, and would
be contraindicated as being injurious to health under certain circumstances since it is sometimes necessary to restrict rather than augment salt intake as a means of protecting damaged kidneys against further irritation. (4186)

Segal Optical Company—See Inlaid Optical Company.

United Soap Company—Lawrence L. Keller, trading as United Soap Company, 4726 Ballard Ave., Seattle, Wash., is charged in a complaint with the dissemination of misleading representations in the sale of soap.

According to the complaint, the respondent manufactures soap under the brand names “Hot Springs Mineral Soap,” “Hawaiian Rose,” “Velvete,” and other similar names, each of which is made from the same formulation. The respondent allegedly advertises on the boxes of such soaps that they are manufactured by various companies located in different localities including New York, London and Paris. All of the names of such companies, the complaint continues, are fictitious, nor is his soap imported, or manufactured anywhere except at his place of business in Seattle.

Representations by the respondent that his soap is “vitalized” or medicated are also alleged to be untrue. It is further charged in the complaint that the respondent advertises on boxes of soap that the retail selling price per box is 75 cents, when in truth they are sold for far less than such amount. (4184)

STIPULATIONS

Following stipulations have been entered into by the Commission:

Algren Manufacturing Company, Inc., 8 Washington Place, New York, was ordered to cease employing the term “gold filled” or any similar term, as a designation for wrist watch buckles, unless such buckles shall have an alloyed gold content of one-twentieth by weight of 10 karat gold. (5200)

Carter Sales Company—George C. Huskins, Minia D. Huskins and Howard W. Ellison, trading as Carter Sales Company, 208 West Eighth St., Los Angeles, were ordered to desist from advertising that their drug preparation “Carter’s Special Formula” is of itself a metal or that it is a weld or has the same action as a seal, or is self fusing. The respondent further agreed to cease advertising that millions or any fictitious number of persons use her products, or that there is a limitation as to the time during which her products may be purchased, unless the offer is terminated on a specified date. The respondent further agreed to discontinue claims that her products have absolutely powers of controlling or stopping body perspiration odors. (02592)

Hush Sales Company—Estelle A. Kirstein, trading as Hush Sales Company, 116 Market St., Philadelphia, in the sale of “Hush Cream Deodorant,” “Hush Liquid Deodorants,” “Hush Sno,” “Hush Powder Deodorant” and “Hush Stick Deodorant,” agreed to formulae advertising that millions of persons use her products, or that there is a limitation as to the time during which her products may be purchased, unless the offer is terminated on a specified date. The respondent further agreed to discontinue claims that her products have absolutely powers of controlling or stopping body perspiration odors. (3445)

Lincoln Novelty Company, 54 Summer Ave., Newark, N. J., manufacturer of hats and caps, agreed to cease representing in any manner that hats composed in whole or in part of used or second-hand materials are new or are composed of new materials, or by failure to stamp on the sweat bands, in conspicuous and legible terms which cannot be removed or obliterated without mutilating the sweat bands, a statement that such products are composed of second-hand or used materials, provided that if sweat bands are not affixed to such hats then the stamping must appear on the bodies of the hats in conspicuous and legible terms which cannot be removed or obliterated without mutilating the hat bodies. (2873)

Roselcliff-Quaker Corporation, 1239 Broadway, New York, dealer in shirts, hose and other men’s apparel, has entered into a stipulation in which he agreed to discontinue certain representations in the sale of its products.

The respondent stipulated that it will cease representing that it manufactures its commodities or owns, operates and controls a factory in which such commodities are made.

The respondent further agreed to cease using the terms “shrunk,” “double shrunk,” “no allowance need be made for shrinkage,” or any similar terms, as descriptive of its goods when they are not in fact shrink proof or non-shrinkable, or have not been fully shrink or pre-shrunk or post-shrunk to the extent that no residual shrinkage remains. If the term “shrunk,” or similar word or phrase is used to indicate that such goods have undergone the application of a shrinking process and have been shrunk to a substantial extent but as to which there remains a certain amount of residual shrinkage, then such term shall be immediately accompanied by a truthful statement clearly setting forth the percentage of residual shrinkage remaining in both the warp and the filling, or in the warp or filling, whichever has the greater residual shrinkage.

It is further stipulated that the respondent will desist from using the words “Pure Silk” or “Silk” to designate fabrics or merchandise not made wholly of silk, and from using the word “Silk” in any way which may have a tendency to mislead purchasers into the belief that products made in part of other materials are made wholly of silk. If the leg or boot of hosiery is properly represented as “silk” the heel, toe or sole are composed of other materials, then the word “silk” shall be immediately accompanied by suitable phrasing in equally conspicuous type, indicating clearly that such designation does not apply to the top, heel, toe or sole, as the case may be.

Roselcliff-Quaker Corporation also agreed to cease advertising, branding, labeling, invoicing or selling any product composed in whole or in part of rayon, unless full and nondeceptive disclosure of the fiber and other content of such product is made by clearly designating each constituent fiber in the order of its predominance by the largest single constituent, and by giving the percentage of any fiber which is present in less than a substantial amount, or in any case less than five per cent. (2871)

S. & M. Grand Rapids Furniture Factories, Inc., 123 Ferry St., Newark, retailer of furniture and house furnishings, agreed to discontinue use of the words “Grand Rapids,” and “Factories” as part of its corporate or trade name, or use of the words “Grand Rapids” in any way so as to imply that the respondent corporation is a dealer in “Grand Rapids” furniture or that its furniture is made in or obtained from Grand Rapids, Michigan, when such is not a fact. The respondent further agreed to cease advertising that “Grand Rapids Factories, Direct to You,” or any similar terms, so as to imply to purchasers that it manufactures the products sold by it or actually owns, operates and controls the plants in which its products are made. It was

4438 — July 19, 1940
further stipulated by the respondent that it will desist from marking its products with any false or misleading price which is in excess of the customary and usual price, or from representing in any manner that its products are offered at wholesale prices, when such is not a fact. The respondent also agreed to discontinue use of the words “Custom Built,” or any similar words, as descriptive of “stock” products, that is, products not made upon special orders of a customer. (3872)

United States Marble & Granite Company—Asa L. Wooten, trading as United States Marble & Granite Company, Oneo, Fla., was ordered to discontinue representations that his memorials will stand the ravages of time forever, and will never fade, stain or tarnish, or that his marble and granite tombstones and monuments will always retain their original brightness. The respondent was further ordered to cease representing that he had posted a “Gold Bond Guarantee” assuring purchasers of the everlasting quality, durability, and freedom from fading, staining or tarnishing of his products, and that such guarantee protects purchasers if the respondent’s claims are not true. (4138)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders during the past week:

American Candy & Sales Co.—See Blue Ribbon Candy Co.

Blue Ribbon Candy Company, Inc., also trading as American Candy and Sales Company, 124 Tenth St., N.E., Atlanta, Ga., has been ordered to discontinue lottery methods in the sale of its candy to ultimate consumers.

The order directs the respondent to cease selling or distributing candy or other merchandise so packed and assembled that sales may be made by means of a lottery; supplying to or placing in the hands of others any merchandise, together with pull or push cards, punch boards or any other lottery devices which may be used in selling such products to the public; supplying to or placing in the hands of others such lottery devices, either with assortments of merchandise or separately, which devices may be used in selling articles to the public, or selling or otherwise distributing any merchandise by means of a game of chance, gift enterprise, or lottery scheme. (4091)

Brewster Laboratories—Jefferson R. Brewster, trading as Brewster Laboratories and Dr. Reece Brewster, 1908 Joe Johnson Ave., Nashville, Tenn., was ordered to discontinue certain misleading representations in the sale of medicinal preparations.

According to the findings, the respondent’s preparations are designated as “Brewster’s G-D”; “Brewster’s T-Z”; “Brewster’s Tonic”; “Brewster’s Throat Wash”; “Brewster’s Thoax-Eaz”; “Brewster’s Sinime”; “Brewster’s Pain Kill”; “Brewster’s Ready Relief”; “Brewster’s Pile Ointment.”

The Commission’s order prohibits representations by the respondent that his preparations are of therapeutic value in the treatment of such conditions in excess of the beneficial effect of heat with relation to congested prostatic conditions; that its use will stop the wasting away of issues and beneficially affect the functioning of glands, or that it will supply or renew so-called vigor or vitality.

The order further forbids representations by the respondent that his device, Roche Electric Hygienic Machine, is a cure or effective treatment for paralysis, locomotor ataxia, apoplexy, rheumatism, gout, high blood pressure or hardening of the arteries; that its use is an effective substitute for exercise, will insure perfect blood circulation, restore health, renew vitality, or that it is of therapeutic value or an effective treatment for any weakness of any of the vital organs. (3772)

Roche Electric Machine Co.—See G-H-R Electric Dilator Co.

Sohn & Company, Inc., and its officers and directors, Benjamin Morris and Isadore Sohn, 1450 West Roosevelt Road, Chicago, have been ordered to discontinue certain representations in the sale of mattresses and bedding.

The Commission finds that the respondents buy old, second-hand, used and discarded cotton and other used materials which they comb by machinery, rework and use in the manufacture of mattresses and bedding which are equipped with new coverings, the finished products having the appearance of new mattresses. These products, the findings continue, are then sold to wholesalers, retailers and other purchasers who resell them to the purchasing public without any marking to indicate that they were made from old and previously used materials. Further findings are that certain of the mattresses so manufactured and sold have stamped on them the phrase “Made of previously used materials,” but in illegible and inconspicuous letters than cannot be read by the purchasers.

Under the order, the respondents are prohibited from representing in any manner that mattresses which are composed in whole or in part of old, used, discarded or second-hand materials are new mattresses or are made from new or unused materials. The respondents were also ordered to desist from failing to permanently affix to such mattresses labels or tags which clearly and conspicuously reveal that they are in fact composed of old, used, discarded and second-hand materials, and which tags or labels cannot readily be removed, obliterated, obscured or minimized. (4072)

Madam Vera—Veronica Ignatovitch, trading as Madame Vera, Madam Vera, and Mme. Vera, Meigs Building, Bridgeport, Conn., was ordered to cease representing that her preparation, “Madam Vera Hair Grower Salve,” is a competent or effective remedy for dandruff or falling hair; that it grows new hair; that it has been used successfully by anyone, or that any price which is the customary and usual price at which such preparation is offered for sale is a special or reduced price. (3906)
Final plans and details for the NAB Convention at the St. Francis Hotel, San Francisco, August 4-7, were shaped up at the District 15 meeting there this week.

Advance reservations were even more numerous than had been expected. Those who have not made reservations should do so immediately by wiring Lincoln Dellar, Station KSFO, San Francisco.

The program was printed in the NAB Reports of July 12. James Lawrence Fly, Chairman of the FCC, Louis Johnson, former Assistant Secretary of War, Dr. Frank Kingdon lead the list of speakers on a program that no broadcaster can afford to miss. Copyright, code, labor problems, the industry in the national emergency, and the unit plan of volume measurement are among the many important topics that will be discussed. The convention registration fee is $10. For ladies it is $5. These fees include two luncheons and the annual banquet for men and the banquet and a varied entertainment program for the ladies.

Howard Lane, District 15 Director, has named the following Reception Committees:

Committee for James L. Fly: Don W. Thornburgh, Don E. Gilman, Ralph Brunton, Harold La Fount.

(Continued on page 4442)
CONVENTION PLANS COMPLETED

(Continued from page 4441)

Committee for Col. Louis Johnson: John Kennedy, Howard Lane, A. E. Nelson, Lincoln Dellar.
Committee for Dr. Drewry: F. M. Borton, Jennings Pierce, Robert W. Dumm (KSWO), Arthur Westlund (KRE).
Committee for Mayor Rossi: Phil Lasky (KROW), Ralph Brunton (KJBS), Wm. D. Pabst (KFRC), S. H. Patterson (KSAN), Chas. A. Whitmore (KTTC).

The following broadcasters attended the district meeting:

William D. Pabst, KFRC; Ernest Finley, KSRO; Marion Walker, KHUB; C. E. Arney, Jr., NAB; Howard Walters, KDON; Wilt Gunzendorfer, KSRO; Will Thompson, Jr., KROY; Philip G. Lasky, KROW; Linc Dellar, KSFO; A. E. Nelson, KPO-KGO; C. L. McCarthy, KQW; William E. Shea, KYA; Gurden Mooser, KYA: W. B. Ryan, KGO-KPO; E. J. Grant, KGO-KPO; F. Fiorilla, KGO-KPO; Bob Seel, KGO-KPO; Clare Patrick, KGO-KPO; E. P. Franklin, KJBS; Lou Kopflinger, KSAN; Ralph R. Brunton, KJBS; Chas. P. Scott, KTKC; Chas. A. Whitmore, KTKC; Wm. C. Grove, KSAN; S. W. Warner, KLS; Howard Lane, KFBK.

DISTINGUISHED MEN AND WOMEN

Mrs. Harold V. Milligan, President National Council of Women
Dr. Walter W. Van Kirk, Executive Secretary, Federal Council of the Churches of Christ in America
Rabbi Jonah B. Wise
Honorable James Lawrence Fly, Chairman, Federal Communications Commission
Neville Miller, President, National Association of Broadcasters
Dr. John W. Studebaker, U. S. Commissioner of Education
Roger Baldwin, Director, the American Civil Liberties Union
William Green, President, American Federation of Labor
(These lists are still incomplete)

REMEMBER THE STATION BREAK IDENTIFICATION

Please have your program department reminded again of the station identification wordage to be used at the half-way point in the World's Fairs program.
At approximately 7:40 EST, the network announcer will say:

"This is the American System of Broadcasting"

And the local announcer comes in:

"Of which Station is proud to be a part."

Publicity Now

Stations are urged to expedite the publicity which is being sent out from World's Fairs headquarters. Announcements should also be used as a build-up for maximum audience.
Where possible, stations carrying the program should underwrite the cost of a spotlight ad in the radio pages of local newspapers.

**Labor**

### WAGE AND HOUR ACT

Developments of extreme importance to every broadcaster have occurred in the Wage and Hour field this week.

(1) The Administration issued an opinion that the industry's outside salesmen were not “outside salesmen” within the meaning of the Act, and hence were not exempt from the overtime provisions.

(2) The NAB is of the opinion that the Wage and Hour Administration is wrong about this—that broadcasting's outside salesmen are exempt. However, until the courts decide the issue, no one can be sure whether the Administration or the NAB is right; and broadcasters who do not pay their outside salesmen time and one-half for overtime above 42 hours a week are risking prosecution.

(3) The NAB Labor Relations Director appeared at an Administration hearing on Thursday, called to consider proposals for redefinition of “executive,” “professional,” and “outside salesman.” He proposed amendment of the definition of “executive” so that an executive could do work of the same nature as those under him and still qualify for exemption; and amendment of the definition of “outside salesman” in such a way that broadcasting's outside salesmen would be exempt without doubt.

(4) The Administration reapproved compensation for overtime by giving time and one-half off within a pay period; and pre-payment of overtime when employees work less than their regular work week. For instance, if an announcer regularly works a 42-hour week for $42, but works only 36 hours one week, the employer can pay him the regular $42 and credit himself with $6 for future overtime. That would cover four hours. Broadcasters interested in either of these plans should write to the Labor Relations Director or consult him at the San Francisco Convention.

Here is the text of the Administration's opinion about outside salesmen:

In Reply Refer To: LE:KCR:EPC

Mr. Joseph L. Miller,
Director of Labor Relations,
National Association of Broadcasters,
Normandy Building,
1626 K Street, N. W.,
Washington, D. C.

DEAR MR. MILLER:

Reference is made to your letter of July 5, 1940, in which you inquire if this office is of the opinion that so-called “outside salesmen” employed by radio stations in soliciting radio advertising are exempt from the Fair Labor Standards Act by section 13(a)(1) as outside salesmen, as that term is defined in section 541.4 of our regulations. You state that Mr. A. J. Mosby, manager of radio station KGVO, Missoula, Montana, has advised you that the division is of the opinion that radio advertising solicitors are not engaged in making sales within the meaning of our regulations. Mr. Mosby has correctly advised you of the position of the division. Since section 541.4 of our regulations was originally issued, the division has consistently taken the position that the making of sales must result in the transfer of title to property, tangible or intangible, in order for an employee performing such work to be exempt under section 541.4. An advertising solicitor is not engaged in performing work resulting in the transfer of title to property, but is merely negotiating contracts for the broadcast of prescribed material over the facilities of the radio station. Therefore, in our opinion such advertising solicitor is not exempt as an outside salesman under section 13(a)(1).

Very truly yours,

For the General Counsel,

RUFUS G. POOLE,
Associate General Counsel.

July 26, 1940 — 4443
Their average compensation is $39.31 a week. One hundred and thirty-six medium stations said that 317 of their employees now receive an average of $30.00 a week. Twenty large stations reported that the change would exempt 51 of their employees now receiving an average of $47.18 a week. We believe that this is a typical cross-section. If we are correct, the change we proposed would exempt substantially less than 1,500 employees who, because of their special talents, would be entitled to overtime if the old definition of "substantial amount of work" were used; it is possible that Congress would not find in that group—or in the entire broadcasting industry—I quote from the preamble to the Fair Labor Standards Act—"labor conditions detrimental to the maintenance of the minimum standard of living necessary for health, efficiency and general well-being of workers."

The range, by the way, is from the average weekly pay of the employees which would be exempt by the change of definition is from $30 to $167.31.

In considering that the change we recommend would exempt approximately nine per cent of the industry's 18,000 full time employees, it must be remembered that this broadcasting station has few employees compared with most industrial units. The same 660 stations cited above employed an average of 22 persons on a full-time basis. It appears only natural that an industrial unit producing as varied an output as does a radio station would need more executives than would most industrial units with such a small number of employees per unit. Those 22 employees include technicians, writers, salesmen, announcers, directors of both musicians and actors, auditors, stenographers, janitors, and others. The general manager of a station rarely could find time to give necessary executive direction to all these classes of employees. And yet, under Section 541.1, as it stands, the general manager is often the only "bona fide executive" in the station.

Appended to this statement is a simplified chart of the personnel set-up of the average broadcasting station. Under the general manager are three principal departments—engineering, program production and sales-and-promotion. At the head of these departments are the chief engineer, the program director and the sales manager.

Under the chief engineer, in most medium size and large stations, are the chief transmitter operator and the chief studio operator. These direct the work of the regular operators, engineers and other technicians. The chief engineer and the two chief operators usually meet all the requirements of Section 541.1 except that for which forbids them to do a substantial amount of work of the same nature as that of the regular operators, engineers and technicians. Each often "takes a trick" or does relief work at the transmitter or studio controls.

Under the production director, usually, are the musical director with his musicians; script writers and editors; announcers; various program supervisors, frequently employed on a part time basis; and actors and singers, likewise frequently employed on a part time basis. In large stations, the production director is usually chosen even under Section 541.1. In small stations, he frequently does some announcing or script writing of the same nature as that done by the announcers and writers under him. Often he does this announcing or script writing by choice because he receives extra fees for it.

The sales manager directs the work of the station's salesmen. He also directs a certain amount of script writing. In small stations he often does some of this writing himself. In most stations, the sales manager handles publicity and promotion as well as sales. In small stations this work also involves writing—the work of the same nature as that done by the program director and the sales manager.

The duties, as well as the titles, of all these executives vary somewhat among the 791 stations. In the larger stations there are more departments and more executives.

In a few of the smallest stations, there is only one executive—and would be only one if our proposal for redefinition were adopted. Of the 1,277 station managers who have answered our request for information mentioned above assured us that adoption of the Association's proposal would mean no substantial increase in their executives' working time. Flexibility, not a longer work week, is what the industry wants.

The broadcasting industry is in the business of furnishing entertainment, information and education for the public. It is a young industry. It is developing. It must continually change its output to meet the demands of the public. It must continually change its output to meet the demands of the public. It must continually change its output to meet the demands of the public. It must continually change its output to meet the demands of the public.

For instance, let us take the case of a program director. He meets all the requirements of an executive, under Section 541.1, except the one to which we object. The autumn season of new programs and new shows is approaching. He spends hours planning these programs, interviewing talent, hiring or selecting announcers, reviewing scripts of plots, arranging time and space for them, and arranging for the personnel. Some of these executives are working at least 50 hours a week when the regular 40-hour week is being worked by some employees. If the change were proposed, would the program director receive overtime pay? Probably not, although he would seem to be a "bona fide executive." The same could be said for the entertainment director who has shown himself to be a "bona fide executive," as well as for the general manager and the production director.

The duties of those who cannot punch a clock, and these employees are very definitely the "idea men." The "idea man" cannot punch a clock because he is not an executive. How in the world would you calculate his "substantial amount of work"? The "idea man" is not an executive. How in the world would you calculate his "substantial amount of work"? Or how would you determine whether "overtime" on the part of one of his executives is justified because that executive is the one who must decide how long he should work. For instance, the average station manager is not an engineering expert. His chief engineer is the only man in the station who can determine whether he or any of his subordinates should work overtime.

Another station manager notes that it is impossible to determine whether "overtime" on the part of one of his executives is justified because that executive is the one who must decide how long he should work. For instance, the average station manager is not an engineering expert. His chief engineer is the only man in the station who can determine whether he or any of his subordinates should work overtime.

Another fault of the present definition is the difficulty the employer has in determining what constitutes a "substantial amount of work." The"substantial amount of work" is difficult to determine, especially in an industry where an executive is not only responsible for the station. It is almost invariably caused by the cessation of work in avoiding overtime for the "idea men." Management of any successful enterprise cannot punch a clock, and these employees are very definitely a part of management. One of the principal contributing factors in their success is the recognition, by the management, that they are not just foremen in a factory. They are idea men. And creative endeavor just cannot be turned on at nine and off at five.

I would like to quote from a letter I recently received from a broadcasting station manager on this point:

"Bona fide complaints to us deploring the situation, which they rightly contend jeopardizes their opportunity to demonstrate their ability, interest and progress, added to the extreme inconvenience almost invariably caused by the cessation of work in avoiding overtime for these better-paid men . . . make the literal application . . . both burdensome and undesirable from practically every viewpoint."

"Placing them (the executives) upon an hourly basis with the payment of time and one-half for overtime would make it necessary for the company to withdraw certain very substantial benefits that are granted to them, in the form of no deductions from their regular salary in case of sickness, life insurance and hospitalization insurance, the premiums for which are paid 100 per cent by the company, two weeks' vacation at full pay and substantial cash bonuses which have been paid to them at the end of each year from 1933 to 1939 inclusive. Management of any successful business cannot punch a clock, and these employees are a part of management. One of the principal contributing factors in their success is the feeling that they are members of the executive staff, which feeling would be completely destroyed if they were placed upon strictly an hourly basis."

(The executives this station manager refers to receive weekly salaries ranging from $60.23 to $167.31.)

Another station manager notes that it is impossible to determine whether "overtime" on the part of one of his executives is justified because that executive is the one who must decide how long he should work. For instance, the average station manager is not an engineering expert. His chief engineer is the only man in the station who can determine whether he or any of his subordinates should work overtime.

Another fault of the present definition is the difficulty the employer has in determining what constitutes a "substantial amount of work." The other requirements of the definition are not open to question. An employee does or doesn't make $30.00 a week. He does or doesn't have the right to hire and fire. And so forth. But what is a "substantial" amount of work? Should an employer have to live in fear and trembling of a court decision that he might have been wrong in his determination in the case of each of his executives?

A case in point:

We asked the Wage and Hour Division if a chief engineer who relieved one of his subordinates for lunch five days a week was doing a substantial amount of work. . . .

Also whether a chief engineer who took one eight-hour trick each week at the transmitter was doing a substantial amount of work.

The answer on lunch relief was "no." The answer on one trick a week was "yes."

From these two rulings one might conclude that the dividing line between substantial and non-substantial is somewhere between five and eight hours per week. But we are not sure. Nor is it at all clear that such a dividing line would be upheld by the courts. The fact that an executive does some work of the same nature as that described by the chief engineer in question is not a practical viewpoint. Many a highly paid executive frequently pitches in and does a substantial amount of work of the same nature as that performed by non-executive employees, without
losing his executive status by any common conception of that status. If Mr. Knudsen decided he wanted to work one day a week on the assembly line, would anyone challenge his status as a bona fide executive of General Motors?

It seems to us that the intention of Congress, in placing Section 13(a)(1) in the Act, was to remove any regulation of the hours of those classes of employees whose work was of such a nature that regulation of hours was not consistent with good business practice. Broadcasting executives are in that class, even though they do some work of the same nature as that performed by their subordinates.

And now as to outside salesmen. The 660 commercial stations referred to here employed 1,298 outside salesmen during the week beginning December 11, 1938, according to the Federal Communications Commission. They received an average compensation of $38.41 a week.

We suggest amending section 541.4 of the Division's Regulations by striking out the words "as defined in Section 3(k) of the Act," because it would appear that the interpretative opinion of the Division's counsel excluding salesmen other than those that make sales resulting in the transfer of title to property may be based on a narrow construction—too narrow we think, however—of the definition of "sell" and "sale" laid down in that section of the Act.

We submit that 3(k) has nothing to do with "outside salesman" in 13(a)(1). Section 13(a)(1) of the Act exempts from the provisions of sections 6 and 7, among others, any employee employed "in the capacity of outside salesman (as such terms are defined and delineated by regulations of the Administrator)." The Administrator, expressly given authority to define and delimit the term "outside salesman" as it sees fit within the reasonably understood meaning of those words, has done so by adopting as its definition the salesman who sells or makes sales in accordance with its interpretation of those words in Section 3(k).

We suggest amending section 541.4 of the Division's Regulations so to state in Section 13(a)(1), in place of "as such terms are defined and delineated by regulations of the Administrator." Obviously, the Administrator has chosen the definition in 3(k) as possibly being the closest thing to Congressional intent on the subject to be found in the Act.

However, we contend that the definition of "sell" and "sale" in 3(k) was provided to define those words as they appear verbatim in Section 15(a)(1) of the Act—the section on prohibited acts, wherein it is declared unlawful for any person "to . . . sell in commerce or to ship, deliver, or sell with knowledge that shipment or delivery or sale thereof in commerce is intended, any goods in the production of which any employee was employed in violation of section 6 or section 7 . . . ." Here we find the very words "sell" and "sale" used by Congress, and we submit that it was with the intention of defining these very words that 3(k) was put in the Act, and not as a roundabout way of defining "outside salesman." The Congress chose not to define "outside salesman," but left it to the Administrator to do so.

The construction put on "sell" and "sale" in the interpretative opinion, restricting their meaning to the making of sales resulting in the transfer of title to property, is certainly not unreasonable when applied to the use of those words in section 15(a), where the Congress is prohibiting the transport, shipment, delivery or sale of goods produced in violation of sections 6 and 7. There is nothing in the language of 13(a)(1) limiting sales to sale of goods, and that is doubtless why the Administrator was given authority to define those words and 3(k) was not referred to as the definition.

It is our contention, furthermore, that the language of 3(k), in the words "exchange" or "other disposition" is broad enough to cover sales of services such as radio time. Webster's New International Dictionary, Second Edition, Unabridged (1935) gives these definitions:

SALE. 1. (n.) Law. Act of selling.

SELL. (v.) . . . 7. To transfer (property) for a consideration; to transfer the absolute or general title to (anything, as lands, goods, choses in action) to another for a price or such of money; to give up for a valuable consideration; to dispose of in return for something; to convey.

SALESMAIN. (n.) One whose occupation is to sell, as goods, merchandise, land, securities, transportation, etc., either in a store or within a given territory; specif., a commercial traveler.

It seems clear that title to transportation passes in the same sense that title to the right to use radio facilities passes. It is commonly understood that salesmen sell services of various kinds. Furthermore, it is the understanding of the Federal Communications Commission charged with the regulation of radio broadcasting, as evidenced by that body's reports. We offer page 234 of the "Report of the Federal Communications Commission," wherein in Table X—Functional employment and pay-roll data for the week beginning December 11, 1938," the classification "outside salesman" appears. If anything further can be adduced to show that outside salesman in both common and administrative understanding should include those employees soliciting radio advertising, we do not know where to look for it.

Finally, the emphasis in section 13(a)(1) of the Act, (and in section 541.4 of the Regulations) should be put on the word "outside" rather than on the word "salesman." This section exempts certain employees from the minimum wage and hours provisions of sections 6 and 7, and, we submit, the least common denominator of those exempted employees is the element of the employer's inability to control their time. Inside salesmen, no matter whether they sell goods or services, can punch a time clock; outside salesmen, no matter what they sell, cannot. To be sure, those employed in a "local retailing capacity" do not fit our least common denominator, as do "executives," "administrators" and "professionals"; but this classification was doubtless intended to exempt those employees engaged in intra-state commerce who work for an employer who also does interstate business, and in no wise detracts from the fact that the intention of Congress was to exempt employees whose time from the nature of their employment could not be controlled.

Therefore, we respectfully urge that the words "as defined in Section 3(k) of the Act" be stricken from section 541.4 of the Division's Regulations, and that the Regulation as thus amended be interpreted to exempt employees employed as outside salesmen of radio time, or other services, as well as outside salesmen whose sales result in the passing of title to property tangible or intangible.

**BMI FEATURE TUNES**

**July 29-August 5**

1. **THE SAME OLD STORY**
2. **PRACTICE MAKES PERFECT**
3. **THAT'S FOR ME**
4. **FOOHEY ON YOU**
5. **DON'T THE MOON LOOK PRETTY?**

Four new stations are welcomed to the list of BMI subscribers:

WJTN—Jamestown, N. Y.
KDYL—Salt Lake City, Utah
WSFA—Montgomery, Alabama
WLVA—Lynchburg, Virginia.

BMI members have received this past week a shipment of transcriptions of fifty compositions. In a telegram announcing the shipment, M. E. Tompkins, BMI's General Manager, said, "These recordings, accomplished with cooperation of transcription companies represented, are sent without charge as part of BMI service to subscribers."
Mr. Tompkins states that this shipment is only a beginning and a sample. Similar releases of transcriptions will follow during the coming months which will place 450 additional numbers in transcribed form in the hands of BMI subscribers before the first of the year.

Niles Trammell, President of NBC, recently sent letters to NBC affiliates, to bandleaders performing on NBC sustaining programs, and to advertisers and advertising agencies concerned in NBC commercial programs, advising them of the situation which will make the use of ASCAP music impossible after the expiration of the present ASCAP contracts on December 31, 1940. All the letters were similar in tone and substance. Extracts from the Letter to advertisers and agencies are given below:

"ASCAP has offered to renew our licenses, but only on terms which we considered to be exhorbitant. Such a move would add materially and unfairly in our opinion to the cost of broadcast advertising and broadcasting operation. After serious consideration we have definitely decided we cannot accept these terms. There will be available for use by all NBC advertisers on programs broadcast over NBC networks or M&O stations, the catalogues of Broadcast Music, Inc.; Society of European Stage Authors and Composers (SESAC); Associated Music Publishers; G. Ricordi & Co.; Milan; A. P. Schmidt Co.; E. C. Schirmer Music Company; Society of Jewish Composers, Publishers and Songwriters and other concerns and individuals. Likewise, there is music available in the public domain which can be arranged from the original sources.

"It is obviously important, therefore," Trammell concludes, "for all of us to lay our plans now covering the operating conditions which will exist after the end of this year."

National Defense

373 STATIONS PLEDGE SUPPORT

Three hundred seventy-three (373) broadcast stations had pledged support to the National Defense program by Thursday noon, July 25. Station executives returning pledges up to Monday, August 1, will be listed in "NAB Reports" of August 2.

The promptness with which the industry has responded to the appeal for assistance in locating 100,000 skilled workers has brought cheer to the United States Civil Service Commission as well as to the Army, Navy and other defense agencies. Hundreds of additional station pledges are expected as insufficient time has elapsed to hear from all sections of the country.

Many letters have been received from station executives containing constructive suggestions. These have been forwarded to the Civil Service Commission. Within two to three weeks the Commission is expected to have a more definite knowledge of procurement difficulties.

Until this initial period has passed it is believed best to proceed as outlined in the one page bulletin of July 23 which accompanied the three announcements.

According to a July 24 A.P. dispatch from Rock Island, Ill., the Government arsenal there, one of six Government armament plants, has orders for two years full capacity operation. Employment is expected to soar to eight thousand.

United States Civil Service Commission lists indicate that some of the requirements for the Rock Island Arsenal are covered in the announcements mailed to stations.

Also, on July 24, Secretary of the Navy, Knox, according to the Washington Star, favors bringing skilled workers to ship building cities.

Again the announcements in the hands of broadcasters cover present employment needs in Navy Yards located at:

Charleston, S. C.
Norfolk, Va.
Washington, D. C.
Bremerton, Wash.
Mare Island, Cal.

Stations from which NAB has received National Defense pledges are:

SHORT WAVE BROADCASTERS SPENDING $2,000,000 FOR NEW EQUIPMENT

Short wave broadcasters in the United States have committed themselves to an additional expenditure of $2,000,000 for new and more powerful transmission equipment, Neville Miller advised the State Department in a conference Tuesday with Thomas Burke, chief of the Division of International Communications at the State Department relative to the problem of worldwide broadcasting, with particular reference to South American coverage.

Representatives of the short wave broadcasters have had conferences with officials of the Federal Communications Commission concerning increased power and applications are now pending for construction permits which it is expected will be granted in the near future.

It was revealed that operating costs for the new and more powerful transmitters would be in excess of one million dollars annually.

While the new equipment will insure wider coverage and bring about better reception in South America, the popularity of broadcasts from the United States is already high. Nearly 10,000 letters a month are written by South American listeners to American short wave broadcasters, it was declared. News broadcasts are highest in popularity. Figures compiled by the NAB show that American short wave stations are broadcasting 13 hours and 19 minutes of news to Latin and South America every day. The broadcasts are given chiefly in Spanish, Portuguese and English, though there are two fifteen-minute periods given in German, French and Italian. These are the regularly scheduled periods and do not
include special events such as speeches or statements by
the President, Secretary of State and other officials of
government. When the President speaks, for example,
his speech is broadcast in English, later translated into
Portuguese, Spanish, French, Italian, Polish and German,
and broadcast in these languages.

Other programs which have attracted a wide follow-
ing of listeners in South America include travelogues,
lessons in English, talks on new scientific discoveries and
developments, stamp collecting programs, and aviation.
The South American woman apparently is as much in-
terested in fashion notes and Hollywood gossip as her
North American sister, the program analysis indicated.
In addition to specially built programs for the Latin
American audience, the cream of network programs are
also broadcast, especially important symphonies and
vocalists, as a reflection of North American culture.
Occasionally exchange programs have been done in the
past year where, for example, Brazil furnished a series
of programs which were heard over an American net-
work, and the network in turn broadcast programs which
were heard over the Brazilian network.

Letters from listeners indicate that Latin Americans
prefer news broadcasts from the United States. The
same policies governing the broadcasts of news on stand-
ard stations in the United States also govern the
broadcasting of news by short wave. On regularly sched-
uled periods, a complete coverage of domestic and world
wide events is given. News is presented as it happens.
It is not slanted, withheld or distorted for propaganda
purposes. As a result, South American listeners have
learned to place dependence on news broadcast by United
States short wave stations, it was declared.

The total amount of broadcasting done by all Amer-
ican short wave stations, including news broadcasts, for
South American listeners, is 449 hours per week.

Those attending the conference with Mr. Burke, in
addition to Mr. Miller, were Harry C. Butcher, E. K.
Cohan, Miss Elizabeth Ann Tucker of the Columbia
Broadcasting System; Robert L. Gibson, General Elec-
tric Company; Frank Mason, Guy C. Hickok, Frank
M. Russell of the National Broadcasting Company;
Oswald F. Schuette, Radio Corporation of America; J. G.
Leitch, Radio Station WCAB; Kenneth W. Stowman,
Radio Station WCAU, Philadelphia, Pennsylvania; J. B.
Rock, Walter Evans, Westinghouse Electric & Manu-
facturing Company; R. J. Rockwell, W. C. Koplovitz,
Radio Station WLW, Cincinnati, Ohio; Walter Lemmon,
World Wide Broadcasting Corporation; Ed Kirby, Paul
Peter, National Association of Broadcasters.

FOREIGN LANGUAGE BROADCASTERS
COMMENDED BY MILLER

Following a meeting Thursday of representatives of
radio stations broadcasting foreign language programs,
Neville Miller made the following statement:

"Following a careful study of the foreign language broadcasts
over domestic stations, I am happy to say that American broad-
casters are rendering a distinctly meritorious and patriotic public
service in reaching great groups of our population in the lan-
guage they understand, and reachable through no other medium.

"Our foreign language broadcasts are not foreign broadcasts;
they are American broadcasts in a foreign language. These broad-
casts are promulgating Americanism throughout our foreign-born
population. Should broadcasts in foreign languages ever be re-
moved, a serious blow would be struck in our own campaign
of preparedness and national unity. These groups would then be
driven to get their news and their concepts of democracy from
government controlled short wave radio stations abroad broad-
casting in their own tongues.

"American broadcasters rendering this foreign language service
have shown a high degree of responsibility in formulating policies
designed to protect the interests of the country. All employees are
carefully investigated before hiring, and full personnel records
are kept. Foreign language news broadcasts are simply transla-
tions of the regular news reports taken directly from the wires of
the same press services which supply our daily newspapers and
radio stations. Scripts are carefully checked and appraised in
light of national defense and Americanism. Trusted and competent
linguists are employed to exercise careful supervision of every-
things said over the air, to eliminate any sinister influence which
might be attempted by those unfriendly to our way of life.

"Complete files of programs and continuities are kept for the
inspection of proper authorities of government."

Those attending the meeting were:

Quincy A. Brackett, WSPR, Springfield, Massachusetts; Gerald
Morey, Edwin J. Morey, Ivan B. Newman, WNLC, New London,
Connecticut; Aaron Kronenberg, Brooklyn, New York; Samuel
Gellard, WLIB, New York City; M. S. Novik, WNRC, New
York City; David Cesem, WOV, New York City; Aristides G.
Lazarus, WEVD, New York City; William I. Moore, WBNN,
New York City; Emil Dorer, WWRL, Woodside, New York;
Frank Mason, National Broadcasting Company, New York;
Salvatore D'Angelo, WCFW, Brooklyn, New York; Joseph Lang,
WHOM, Jersey City, New Jersey; Arthur Simon, WNBT, Phila-
delphia, Pennsylvania: Milton Laughlin, WHAT, Philadelphia,
Pennsylvania; Alexander W. Dannenbaum, Jr., WDAS, Phila-
delphia, Pennsylvania; Louis G. Baltimore, WBRE, Wilkes-Barre,
Pennsylvania; Martin Antoncic, Carl George, WAGR, Cleveland,
Ohio; Edythe F. Melrose, WMBC, Detroit, Michigan; Joseph
Hopkins, WJBK, Detroit, Michigan; J. Franklin Viola; Neville
Miller and Ed Kirby, NAB.

Sales

BROADCAST TIME SALES INCREASE
10 PER CENT IN 1939

Broadcast time sales for the calendar year 1939 amounted to $129,468,022, which was an increase of
10.3 per cent over the $117,379,459 reported for 1938,
according to figures compiled by the Accounting, Statis-
tical, and Tariff Department of the FCC.

These figures are based on reports by the three
major networks—Columbia Broadcasting System, Mutual
Broadcasting System, and National Broadcasting Com-
pany—together with 705 other stations, including affili-
ated stations whose time sales were being conducted by
Columbia and National at the end of the year.

The total broadcast expenses of the industry for 1939
were $99,789,920, compared with $92,503,594 for the
previous year, an increase of 7.9 per cent. While the
networks and their affiliated 33 stations had 54.1 per cent
of the total business last year, their proportion of the net business (after deduction of commission payments and amounts due to independent stations for network broadcasting) was 38.2 per cent, and the proportion of the 682 other stations was 61.8 per cent. Time sales last year involved commission payments amounting to $17,405,414 as compared with $16,487,200 the year previous.

The broadcast-service income (revenue less expenses) of the three major networks was $5,631,228, or 23.9 per cent of the total. That of their 23 stations was $5,428,924, or 23 per cent of the total, and that of the 682 other stations was $12,531,792, or 53.1 per cent of the total.

Aside from sales for the use of Canadian and other extra-territorial stations in major network broadcasts, the sales of major network time were $61,310,571, and accounted for 47.4 per cent of the total time sales in the United States for 1939. Other classes of time sales and their comparison with the same classes for 1938 are included in the following:

<table>
<thead>
<tr>
<th>Class of Time</th>
<th>1939 Amount</th>
<th>1938 Amount</th>
<th>Ratio to total</th>
<th>Ratio to total</th>
</tr>
</thead>
<tbody>
<tr>
<td>Major network time (U.S.)</td>
<td>$61,310,571</td>
<td>$55,114,258</td>
<td>47.4</td>
<td>47.0</td>
</tr>
<tr>
<td>National non-network time</td>
<td>$30,472,053</td>
<td>$28,109,185</td>
<td>23.5</td>
<td>23.9</td>
</tr>
<tr>
<td>Local time</td>
<td>$36,815,770</td>
<td>$33,402,801</td>
<td>28.4</td>
<td>28.5</td>
</tr>
<tr>
<td>Regional network time</td>
<td>$869,628</td>
<td>$753,215</td>
<td>0.7</td>
<td>0.6</td>
</tr>
<tr>

<td>$129,468,022</td>
<td>$117,379,459</td>
<td>100.0</td>
<td>100.0</td>
</tr>
</tbody>
</table>

The major networks, in addition to their domestic business shown above, had total sales of $1,311,118 for network broadcasts over Canadian and other extra-territorial stations.

While the foregoing paragraph compares each major class of sales in 1939 with that for 1938, the actual changes within the classes were different, major network total times sales being up $6,196,313, or 11.2 per cent; national non-network up $2,362,868, or 8.4 per cent; and local up $3,412,969, or 10.2 per cent. Receipts from regional networks by stations were about the same for both years.

The 1939 figures include reports from 186 stations which each had revenue for the year in amount less than $25,000, compared with 175 for the year 1938. The 186 stations had total revenue of $2,224,807, compared with $2,520,026 for the 175 in 1938.

The figures released do not include 11 independent stations, reports of which require further correspondence. However, the aggregate amount of revenue involved in these cases is less than $200,000, which is entirely non-network and consists mostly of local business. Nor do the figures cover 38 non-commercial stations, 11 extra-territorial stations, or 49 stations under construction or otherwise not in operation at the close of the year.

The operating expenses of the nine stations operated by Columbia and National, and designated by them as key stations, are not susceptible of direct allocation to network operations on the one hand or to station operations on the other. Therefore, the division of the expenses as reported by the networks between network operations and key station operations reflect arbitrary determinations in some instances.

All figures included in the tabulations are compiled from responses made for networks and stations in compliance with Section 1.361 of the Rules of Practice and Procedure of the Commission, except in the case of Mutual, which filed a report as information to the Commission in connection with the industry survey.

Detailed tables covering operations of the broadcast industry for 1939 will be issued in several days.

**FTC RECORDS GIVE RADIO ADS BEST BILL OF HEALTH**

95.8% of radio commercial continuities reviewed by the Federal Trade Commission are above suspicion, even by that august body, according to an extensive analysis recently reported by the Commission. The figures show that only 4.2% of 334,532 scripts checked by the FTC during the first half of 1939 were marked for further inquiry. No figures are available on the number of commercials actually proven unacceptable.

The FTC also announced comparable statistics for magazines and newspapers, as well as other media. Of 123,646 magazine advertisements reviewed, 12.1% were marked for further investigation. 124,793 newspaper ads were checked, and 7.9% marked, giving radio the best record on this score.

The entire radio advertising section of the FTC release follows:

**RADIO ADVERTISING**

Surveys of radio advertising were carried on during 1939, on a selective and representative basis somewhat similar to the method followed in scrutinizing published advertisements.

Of the total 334,532 commercial radio continuities examined during the first half of the calendar year 1939 (later data not available), 15,390 originated from commercial broadcasts by nation-wide networks. Of these latter continuities, 22.2% were marked and referred for further investigation.

Owing to the obvious interstate appeal of advertisers utilizing the broadcast facilities of nation-wide networks, copies of network commercial continuities are procured on a continuous weekly basis, and the commercial script examined, therefore, comprised all such network announcements.

Commercial radio continuities are procured from individual station broadcasters (for non-network broadcasts) uniformly as to frequency and length of period sampled (and irrespective of transmittal power); with returns being staggered and proportioned throughout the year.

From the total 305,787 commercial continuities examined in script rendered by individual station broadcasters, 150,192 comprised commercial continuities broadcast by medium-powered regional stations. Of these latter continuities, 3.3% were marked for further investigation.

On a whole, it was observed that the average commercial continuities representing nation-wide network broadcasts, were about 7 times the script length of those rendered for individual station commercial announcements.

Commercial continuities covering the built-in commercial portions of electrical transcription recordings intended for radio broadcasts, are procured on a continuous monthly basis direct from the producers of such recordings. Therefore, while the continuity data presented for this type of broadcast represented all commercial recordings of the producers, there is no data avail-
able to indicate the number, or period of time that copies of such recordings, may have been repeated over the air through the facilities of multiple stations.

The completed tabulation, showing other particulars representing each group type of broadcaster whose commercial continuities were included in the advertising surveys during the first half of 1939, are given in the data presented below. (Individual broadcasters are grouped according to their respective authorized maximum night broadcast power, prevailing during the broadcast period reported upon.)

THE CASE FOR ADVERTISING

The Bureau of Radio Advertising has mailed to all members copies of an article entitled “The Case for Advertising,” reprinted from Nation’s Business, July, 1940. This is a follow-up to “The Case for Distribution,” previously sent out, and gives further eloquent answer to the critics of advertising and the American system of free, competitive enterprise. Information contained in the article should be helpful to every station operator and women of this organization can be counted on to devote the coordinated facilities of the Federation to patriotic service, helping to unite the people of this great nation in thought and action, that we shall be prepared to protect our cherished freedom.

II

Advertising and the American Way

The importance of advertising as a social and economic force is crystallized into a single thought by the program theme of this convention: ADVERTISING’S CONTRIBUTION TO THE AMERICAN WAY OF LIVING.

This contribution has been important, for advertising powerfully motivates and stimulates many of those individual acts and group processes which determine the way Americans live. A symbol of free competitive enterprise and of free choice by consumers, advertising arouses the desire and ambition for better living and simultaneously performs an economic service which helps to make better living possible.

The preservation of the American way of free individual enterprise and free consumer choice assumes more than usual importance today in the shadow of perils assailing freemen and free peoples in so many parts of the world.

Therefore, we urge advertising men and advertising women everywhere to respect and take pride in the contribution of good advertising to the American way of living, that by the quality and sincerity of their work they may add daily to the value of this contribution, and thus help to safeguard it as a permanent part of American business.

III

Truth in Advertising

On this twenty-ninth anniversary of the historic advertising convention in Boston, when the great crusade for Truth-in-Advertising was inaugurated by this Federation, with wholehearted participation of Advertising Clubs throughout the country, we subscribe anew to the ideals and principles then set up, and re-dedicate ourselves to the unremitting task of making advertising more believable and more reliable in every respect.

With the help of constructive laws, which were passed with the support of the Advertising Federation and its affiliated groups, fraud and deception have largely been eliminated from advertising. Rising standards of service to the buying public now require even greater refinement in advertising practice, and we urge constant effort to improve the quality and to make advertising as fully informative as good advertising can be, to the end that its fullest measure of effectiveness may be realized.

IV

Consumer Education

The Advertising Federation of America heartily approves and welcomes the rising interest in better education of the individual man and woman in the art of buying merchandise. We urge all business leaders and advertising men and women to cooperate with consumers in this activity, for it is self-evident that more intelligent buying will bring opportunities for better selling and more effective advertising.

V

Federation’s Educational Program

In view of the great need today for dissemination of reliable information about advertising, we urge all affiliated Advertising Clubs and National Groups to give full cooperation to the national educational program of the Advertising Federation of America, and we invite the participation of all advertising interests not now affiliated.

This program, conducted by the Federation for more than ten years, has been most effective in promoting a better understanding of advertising’s contribution to the American way of living, and we call for an expansion of this activity. We feel that this work is especially important at the present time, to counteract the many misleading statements made about advertising, involving false economic reasoning and distortion of facts. When found in textbooks, such faults should specifically be pointed out and answered, as has been done by the Federation.

We believe that it is one of the most important responsibilities of the Advertising Federation of America to see that the public is informed on the economic functions of advertising and its influence on the improvement of our standards of life.

July 26, 1940 — 4451
VI

Mutuality of Interest

With all advertising subjected to attacks from many sources, a united front is necessary to cement public confidence in advertising, and the Advertising Federation of America urges that each branch of advertising exercise self-restraint, good judgment, and tolerance in its attitude toward other advertising interests and media.

Miscellaneous

RECENT PUBLICATIONS

"National Policy for Radio Broadcasting" (Harper and Brothers, $3) gives an up-to-date picture of the broadcasting industry and its problems as seen by C. B. Rose, Jr. The book constitutes a report prepared under the auspices of the National Economic and Social Planning Association.

Printer's Ink of June 28 carried an interesting article about the broadcasting industry's scrap with ASCAP, by Eldridge Peterson.

Editor and Publisher on July 13 said editorially that cancellation of radio commercials for the political conventions was one reason why sponsors should turn to newspapers.

Television

MORE TELEVISION AUTHORIZATIONS

Three additional television grants under its promotional experimental rules were announced Thursday by the FCC. They cover construction permit for a new Philadelphia television station, to be operated by WCAU Broadcasting Co. on television channel No. 5 (84,000-90,000 kilocycles) with 1 kilowatt aural and visual power; construction permit to Purdue University to operate its television station W9XG, at West Lafayette, Ind., on channel No. 3 (66,000-72,000 kilocycles) with 750 watts aural and visual power; and modification of license of the State University of Iowa station W9XUI, at Iowa City, to use channels Nos. 1 and 12 (50,000-56,000 and 210,000-216,000 kilocycles) with 100 watts visual only.

WCAU proposes to experiment with 441 to 729 lines, and 15 to 30 frames; to compare vertical and horizontal polarization as to signal noise ratio, effect of tall buildings, hills, and obstructions, interference from diathermy and ignition systems, and signal strength; to investigate pre-emphasis in the transmitter and de-emphasis in the receiver; and compare FM (frequency modulation) and AM (amplitude modulation) as the sound component of its proposed station.

Purdue University contemplates experimenting with transmission standards, development of new types of pick-up tubes or iconoscopes, research into the design and construction of side-band filters, development of the transmission line or impedance modulation system, research into new methods of background control, and improvements in wide-band amplifiers, plus possible further experimentation with lines and frames, polarization, and new forms of synchronizing signals.

The State University of Iowa station will test different systems of modulation, conduct experiments concerning frequency stability and band width, measure field intensity to determine results of polarization, and otherwise carry on engineering experimentation tending to develop uniform transmission standards of acceptable technical design, plus training of technical personnel.

Neither Purdue nor the State University of Iowa will engage in public program service.

FCC AND RMA COOPERATE

Cooperation between the Federal Communications Commission and the Radio Manufacturers Association in organization of a National Television Systems Committee, to function under the auspices of RMA, will include all industry interests, according to President J. S. Knowlson of RMA. Companies active in television development which are not members of RMA as well as those holding Association membership are included in the list announced by President Knowlson of those invited to have representation on the new National Television Systems Committee.

Coincident with the FCC announcement last week of the television development plan, President Knowlson of RMA issued the following statement:

"I don't think there is much to add to the information given out by Chairman Fly of the Federal Communications Commission on the proposed formation of an industry television committee. While not all those interested in television are members of RMA, it seemed quite obvious that as the accredited Association of the industry it was the responsibility of the Association to assume the job of getting everyone together, and with the cooperation of the FCC we assumed that responsibility.

"Dr. W. R. G. Baker of Bridgeport, Connecticut, Director of the RMA Engineering Department, has been appointed chairman of the new National Television Systems Committee. The chairman, while correlating the work of the committee, will have no vote. I understand that Dr. Baker plans to call an early meeting of the committee for organization purposes at which meeting Chairman Fly of the FCC will informally discuss the problems with the committee members."
"I think I am safe in saying that both the Commission and RMA feel that in this way we are setting the vexing problem of television standards on a path which will lead to a satisfactory solution. We are both encouraged to feel that by so doing we are serving the interests of all concerned."

AN ERROR

The July 19 Report on p. 4430 erroneously listed the power of the Don Lee Broadcasting System television station W6XAO as 100 watts for the visual channel instead of 1000 watts.

The Commission

FCC SETS UP INVESTIGATION UNIT UNDER DAVID LLOYD

An investigation unit has been set up in the Law Department, James Lawrence Fly, Chairman of the FCC, stated at a press conference on Monday of this week. David Lloyd, formerly Assistant Chief Counsel of the Senate Civil Liberties Committee, will be Special Counsel in charge of the unit.

He stated that this has been a great need of the Commission for some time and he expects the unit to get out into the field and investigate transactions and records and interview applicants. He called attention to the fact that ex parte statements are all that the Commission has had to rely on when new applications are filed. He pointed out the fact that the Commission is making many important grants and said that the investigations of the new unit will not be limited to broadcasting.

Mr. Fly expressed doubt that the ex parte presentations which have been made have been sound administration. If the Commission had had an investigation unit in the past, some of the difficult situations which have turned up might have been avoided. The new unit, he told the newsmen, will be generally available for all things under the Commission's jurisdiction. And in addition to legal representation, it will also involve accounting and engineering angles.

Mr. Fly stated that it will be a relatively small unit which can draw on other departments when necessary to meet any special situation.

He expressed the hope that the Commission can get some competent person to deal with labor problems. This, he said, is a separate angle but is more or less related and he explained that there is no one at the Commission at the present time investigating labor situation and problems.

"We have no liaison person," he said, "who can speak the language and reflect the viewpoint of labor."

Chairman Fly stated that he will meet on July 31 with the new television committee which is being sponsored by RMA. He expressed the feeling that the new television committee is a good set-up and "that the industry is in a good frame of mind to go ahead and do a good job." The committee, he said, "will not only study existing systems but will plan and coordinate work for further development and improvement."

FCC RULES REPEALED

Section 4.137 of the FCC Rules Governing Broadcast Services Other Than Standard Broadcast Applying to Non-commercial Educational Broadcast Stations, was repealed and the following substituted therefor:

"Section 4.137 Frequencies. (a) The following frequencies are allotted for assignment to non-commercial educational broadcast stations:

<table>
<thead>
<tr>
<th>Kilocycles</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>42,100</td>
<td></td>
</tr>
<tr>
<td>42,300</td>
<td></td>
</tr>
<tr>
<td>42,500</td>
<td></td>
</tr>
<tr>
<td>42,700</td>
<td></td>
</tr>
<tr>
<td>42,900</td>
<td></td>
</tr>
</tbody>
</table>

(b) Stations serving the same area will not be assigned adjacent frequencies.

(c) Frequency modulation shall be employed exclusively unless it is shown that there is a special need for the use of amplitude modulation.

(d) Only one frequency will be assigned to a station.

FCC RULE EFFECTIVE DATE EXTENDED

Effective date of the FCC Rules and Regulations Sec. 3.32(b) which prohibits broadcasting of commercial programs on experimental authorizations, was further extended from August 1 to October 1, 1940.

FCC BROADCAST MEASUREMENTS

During the month of June, experts of the FCC measured 724 broadcast stations, leaving 115 not measured.

Of those measured, 670 stations showed a maximum deviation within 0-10 cycles; 50 stations a maximum deviation within 11-25 cycles; and 4 stations a maximum deviation within 26-50 cycles. No stations showed a maximum deviation within 20 or over 50 cycles.

FCC APPROVES APPLICATIONS FOR NEW TELEVISION OUTLETS

New television stations for the national capital and New York City are speeded by action of the FCC in confirming previous tentative approval of applications by the Allen B. DuMont Laboratories, Inc., for such outlets. The Commission also authorized DuMont and Columbia Broadcasting System to start television broadcasts under the new promotional rules from their Passaic and New York stations respectively.

DuMont's new Washington station will operate on new television channel No. 1 (50,000-56,000 kilocycles) with 1 kilowatt power for aural and visual transmission, and its New York station will use television channel No. 4 (78,000-84,000 kilocycles) with like power.

DuMont's present television station W2XVT, at Passaic, N. J., is enabled to increase power to 5 kilowatts,
aural and visual, and transmit on channel No. 4. Columbia Broadcasting System station W2XAB, at New York, can use channel No. 2 (60,000-66,000 kilocycles, 7 1/2 kilowatts power, aural and visual.

These new authorizations closely follow Commission action earlier this week in speeding construction of San Francisco's first television station, to be operated by Don Lee Broadcasting System, and, at the same time, giving the "go" signal for Don Lee station W6XAO, at Los Angeles, and National Broadcasting Co. station W2XBS, New York, to use new television channel No. 1 (50,000-56,000 kilocycles), which the proposed San Francisco station will likewise employ.

Opening additional television facilities throughout the country is made possible by the Commission's new rules encouraging experimental operation to promote the art. Approvals in all cases are contingent upon programs to foster research and development.

The DuMont Washington and New York stations, for example, will inquire into the advantages of various types of film projectors, experiment with mobile pick-up utilizing wire links and radio links, and will seek public cooperation on various types of program material. Coaxial cable will be used in transmitting programs between Washington and New York, and the Washington station will test the practicability of providing satisfactory service to Washington and Baltimore from a single transmitter.

The program of research for DuMont's Passaic station embraces tests of various antenna systems utilizing both vertical and horizontal radiators, experiments with systems other than RMA and DuMont, and investigating the effects of phase-shifts, noise, field patterns, etc.; test of transmitter equipment, including power tubes; ultimate experiments in the possible use of FM (frequency modulation) for television broadcasting on the ultra-high frequencies.

In seeking to develop uniform transmission standards of acceptable technical quality, CBS station W2XAB proposes to make comparable investigation of all synchronizing pulses for which generating equipment is available, make comparative study of different combinations of lines and frames, investigate the effect on allocations of using different polarizations in certain adjacent areas, and work with the general public in determining reaction to various changes in program technique.

COMMISSION DEFINES REQUIREMENTS FOR CONTOUR MAPS

It has come to the attention of the FCC that uncertainty exists regarding the exact requirements of Section 1(b) of the Standards of Good Engineering Practice concerning High Frequency Broadcast Stations. The following additional information is supplied to avoid unnecessary work on the part of applicants and to insure that only essential data is included in applications for high frequency broadcast stations.

Section 1(b) of the Standards sets out the procedure to be followed in taking into account the effect of topography on the service areas of proposed high frequency broadcast stations. Profile graphs must be drawn along at least eight radials from the proposed site of the station. These profiles should be equal or greater in length to the radii of the roughly estimated service area. They are divided into not less than ten equal sectors and the average elevation of each sector determined. In no case should the length of a sector be in excess of five miles.

The profile for a sector should be plotted by contour intervals between 40 and 100 feet and where the information permits at least 10 points should be plotted, i.e., the distances should be indicated corresponding to the various contours. In instances of very rugged terrain where the use of the first contour intervals of 100 feet would result in several points in a short distance, 200- or 400-foot intervals may be used in this distance. On the other hand, where the terrain is fairly uniform or gently sloping, the smallest contour interval indicated on the topographic map should be used although only a relatively few points may be available in a given sector. After the profile has been charted for a sector, the average elevation therein shall be determined by one of several approximate means. For example, the elevations at equally spaced points in a sector may be averaged or the average determined by means of a planimeter. The median elevation (elevation exceeded for 50% of the distance) in some cases would give more accurate results for the purpose and may be used.

The elevations or contour intervals shall be taken from the U. S. Geological Topographical Quadrangle Sheets for those sections of the Country where such maps are available. If such maps are not published for the area in question, the best available graphic information available shall be used. Such information may be obtained for certain sections of the country from topographical maps available from the Tennessee Valley Authority, Department of Agriculture (Soil Conservation maps), and the Bureau of Public Roads (Highway Planning maps), other U. S. Government departments and state and local governmental agencies. Also railroad depot elevations and highway elevations from road maps may be used. The data from the Sectional Aeronautical Charts will be accepted where no better information is available, although these maps show only the 1000-foot contour intervals. Bench marks indicated on the aeronautical charts can be used to find approximate elevations between 1000-foot intervals at some points along a radial.

The Commission will not ordinary require the submission of the topographical maps beyond 15 miles from the site, but the maps must include the principal city or cities to be served. However, the source of the topographical information used beyond this distance should be indicated. If it appears necessary, the Commission may require the submission of the detailed supporting information.

Each application shall be accompanied by a map showing the 50- and 1000-microvolt contours of the proposed station. For this purpose, the Sectional Aeronautical Charts or their equivalent, having a convenient scale may be used. This map shall show the radials along which the expected field strength has been determined. In computing the area within the 1000 and 50 microvolt contours large bodies of water should be excluded (oceans, gulfs, sounds, bays, large lakes, etc., but not rivers).

The U. S. Geological Survey Topography Quadrangle Sheets may be obtained from the U. S. Geological Survey, Department of the Interior, Washington, D. C., at a cost of ten cents each. The Sectional Aeronautical Charts are available from the U. S. Coast and Geodetic Survey, Washington, D. C., at a cost of forty cents each.

WCPO PETITION DENIED

The FCC has denied the petition of Scripps-Howard Radio, Inc., licensee of station WCPO at Cincinnati, for hearing or rehearing on the grant to WCOL, Inc., on June 3, of a license authorizing WCOL, at Columbus, to operate on 1200 kilocycles with 250 watts power, unlimited time, which facilities are also permitted WCPO. On March 29 the Commission denied a similar petition of Scripps-Howard Radio, Inc., in connection with the
grant of WCOL's construction permit October 10 of last year.

The latest denial states:

"The instant petition... merely suggests that operation by WCOL under the grant results in interference in petitioner's present service area, but sets forth no facts in any way indicating that the Commission erred in concluding that 'upon a comparison of the benefits and detriments sustained in the respective communities, public interest, convenience and necessity will be served by the grant of the application.' Furthermore, no facts are set forth in the petition upon which the Commission could find that the terms, conditions and obligations set forth in the application and permit of WCOL have not been met, nor has the petitioner brought to the Commission's attention any cause or circumstance, arising since the granting of the WCOL construction permit, which would make the operation of such station against the public interest, convenience or necessity."

KBST—John Galbraith, Big Spring, Texas.—Granted consent to transfer control of The Winter St. Corp. (parent corporation of KBST) from Joe Galbraith to Howard Barrett, Bonnie Davis, Houston Harta and M. B. Hanks, 250 shares of common stock for a consideration of $250,000. (Station operates on 570 kc., 1 kW day, unlimited time, time, unlimited time). (B3-TC-217)

 applications granted

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

The Twin States Broadcasting Co., Augusta, Ga.—Granted construction permit for a new Class IV station to operate on 1210 kc., 250 watts power, unlimited time, to be located in or near Augusta. (B3-P-2891)

KGKO—KGKO Broadcasting Co., Fort Worth, Texas.—Granted authority to transfer control of corporation from KGKO Broadcasting Co., to George B. Dealey, E. M. Dealey, J. M. Moroney and M. M. Donosky, in trust for A. H. Belo Corp.; issued 350 shares of new common stock, for a cash consideration of $250,000. Station operates on 570 kc., 1 kW night, 5 kW day, unlimited time. (B3-TC-217)

John Shepard, Jr., transferor, John Shepard, III, and George R. Blodgett, Trustees, Transferee.—Granted authority to transfer control of The Winter St. Corp. (parent corporation of the Yankee Network, Inc.), from John Shepard, Jr., to John Shepard, 3rd, and George R. Blodgett, Trustees of the John Shepard 3rd, and The Robert F. Shepard, Trusts. (The Yankee Network, Inc., is licensee of the above mentioned station: WAAB, WEAN, WICC, WNAC, WIXOJ, WIXOY, WIXOV, WIXER, WEOO, WEKY, WEXY, WEKZ). The Commission's action in granting consent to this transfer, shall not be construed as an approval of any future transfer of control of licensee corporation which may result from any change in the parties designated as trustees or which may arise out of any amendment or revocation of the trusts, disposition of assets thereof, or otherwise.

KBST—John Galbraith, Big Spring, Texas.—Granted consent to transfer control of corporation (The Big Springs Herald Broadcasting Co., licensee of KBST) from Joe Galbraith to Howard Barrett, Bonnie Davis, Houston Harta and M. B. Hanks, 250 shares of common stock for a consideration of $3,750. (Station operates on 1210 kc., 100 watts, unlimited time). (B3-TC-217)

WNAC—Yankee Network, Inc., Boston, Mass.—Granted modification of construction permit to increase night power from 1 kW to 5 kW, operating unlimited time on 1230 kc. (B3-MP-322)

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following oral argument in a broadcast case will be heard by the Commission during the week beginning Monday, July 29. It is subject to change.

Thursday, August 1

Oral Argument Before the Commission

Report No. B-108:

KSAM—Sam Houston Broadcasting Assn., H. G. Webster, President, Huntsville, Texas.—In re: Revocation of Station License of KSAM.

FUTURE HEARING

Following future hearing in a broadcast case has been scheduled before the Commission during the past week. It is subject to change.

September 9

WPAY—Chester A. Thompson (Transferor), The Brush-Moore Newspapers, Inc. (Transferee), Portsmouth, Ohio.—Transfer of Control of Corp., 1370 kc., 100 watts, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION

FINAl ORDER

FCC has announced adoption of an Order granting the application of Harold Thomas for a construction permit to erect a new station at Bridgeport, Conn., to operate on the frequency 1420 kilocycles, with power of 250 watts, unlimited time, upon condition that permittee shall file an application for modification of construction permits specifying exact transmitter location within two months after the effective date of the order.
WQAQ—Radio Corp., of Porto Rico, San Juan, P. R.—Granted construction permit to change frequency from 1240 to 620 kc., and increase power from 1 kW to 5 kW, install new transmitter and make changes in antenna. (B-P-2385)

Purdue University, W., Lafayette, Ind.—Granted construction permit for new television station to operate on frequencies 66000-72000 kc. (Channel Nos. 6 and 7), on an experimental basis only; 750 watts power aural and visual.

State University of Iowa, Iowa City, Iowa.—Granted construction permit for new television station to operate on frequencies 30000-36000 kc. and 210000-216000 kc. (Channel Nos. 5 and 6), on an experimental basis only; 100 watts power, visual only.

WCAU Broadcasting Co., Philadelphia, Pa.—Granted construction permit for new television broadcast station to operate on frequencies 81000-80000 kc. (Channel No. 5), on an experimental basis only; power 1 kw aural and visual.

RENEWAL OF LICENSES

Licenses for the following stations were extended upon a temporary basis only, pending determination upon applications for renewal, for the period August 1 to October 1, 1940:

- KFAR—Midnight Sun Broadcasting Co., Fairbanks, Alaska.—Granted renewal of license for the period August 1 to October 1, 1940.

- WDSU—WDSU, Inc., New Orleans, La.—Granted renewal of license for the period August 1 to October 1, 1940.

- KGBU—Alaska Radio & Service Co., Inc., Ketchikan, Alaska.—Present license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending October 1, 1940.

- KTW—The First Presbyterian Church of Seattle, Seattle, Wash.—Present license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending October 1, 1940.

- WGST and (Aux.).—Georgia School of Dentistry, Atlanta, Ga.—Present license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending October 1, 1940.

- WMF and (Aux.).—Memphis Commercial Appeal Co., Memphis, Tenn.—Present license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending October 1, 1940.

- KTHS—Hot Springs Chamber of Commerce, Hot Springs, Ark.—Present license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending October 1, 1940.

- KTBC—State Capital Broadcasting Assn., Inc., Austin, Texas.—The present license of KTBC was extended to September 1, upon a temporary basis, subject to all the terms and conditions of the order of revocation entered February 7, 1940, and subject further to the final determination of the Commission on said order.

- KRLD—KRLD Radio Corp., Dallas, Tex.—Granted extension of special experimental authority to operate simultaneously with WTIC, for a period of 2 months, ending no later than November 1, 1940.

- KGFI—Eagle Broadcasting Co., Inc., Brownsville, Texas.—Present license extended upon a temporary basis only to September 1, in conformity with and subject to all of the terms and conditions of the order of revocation entered March 22, 1940, and subject further to final determination of the Commission on said order.

- WAPI—Ala. Polytechnic Inst., Birmingham, Ala.—Special experimental authority to operate unlimited time using directional antenna after sunset at Tulsa, Okla., was extended for a period of two months for the period August 1 to October 1, 1940.

W9XG—Purdue University, W. Lafayette, Ind.—The television broadcast station license was further extended upon a temporary basis to September 1, pending receipt and determination upon application for renewal.

W2XDA—General Electric Co., Schenectady, N. Y.—The television broadcast station license was further extended upon a temporary basis to September 1, pending receipt and determination upon application for renewal.

W2XOY—General Electric Co., Albany, N. Y.—The television broadcast station license was further extended upon a temporary basis to September 1, pending receipt and determination upon application for renewal.

DESIGNATED FOR HEARING

WTNJ—WOAX, Inc., Trenton, N. J.—Application for renewal of license to operate on 1280 kc., 500 watts, S-WCAM, WCAP. (Application already pending, for modification of license pending, requesting unlimited time of operation.)

Trent Broadcasting Corp., Trenton, N. J.—Application for construction permit to erect a new station to operate on 1230 kc., 1 kw, unlimited time, employing directional antenna.

MISCELLANEOUS

Onondaga Radio Broadcasting Co. (area of Syracuse, N. Y.).—Portable-Mobile.—Granted construction permit for new relay broadcast station, frequencies 1616, 2090, 2180, 2830 kc., power 100 watts (B1-FRY-225).

WCBT—J. Winfield Crew, Jr., Roanoke Rapids, N. C.—Granted modification of construction permit for new broadcast station to operate on frequencies 1290, 2200, unlimited time, for approval of transmitter and studio location, approval of antenna, and change in type of transmitting equipment (B3-MP-1008).

KLUF—The KLUF Broadcasting Co., Inc., Galveston, Tex.—Granted construction permit to install new transmitting equipment (B3-P-2741).

WRC—National Broadcasting Co., Inc., Washington, D. C.—Granted modification of construction permit which authorized increase in power and installation of directional antenna for limited time, for a period of completion date from August 5, 1940, to October 5, 1940; 950 kc., 5 kw, unlimited time, directional antenna (B1-MP-1071).

WTHT—The Hartford Times, Inc., Hartford, Conn.—Granted license to cover construction permit as modified for installation of new transmitter and increase in power; 1200 kc., 250 watts, unlimited time (B1-L-1191).

WMFD—Richard Austin Dunlea, Wilmington, N. C.—Granted license to cover construction permit as modified which authorized local move of transmitter, installation of new transmitter and antenna, increase in power, and change in hours of operation from 1200 to 1700 kc., 100 watts, 250 watts, unlimited time (B3-L-1192).

WBT—Columbia Broadcasting System, Inc., Charlotte, N. C.—Granted authority to make changes in the automatic frequency control unit (B3-F-152).

South Carolina Broadcasting Co., Inc. (area of WCSS, Charleston), Portable-Mobile.—Granted construction permit for new relay broadcast station, frequencies 1622, 2638, 2150, 2790 kc., power 25 watts (B3-FRY-222).

KYOS—Merced Broadcasting Co., Merced, Cal.—Granted motion to accept amendment to application for construction permit so as to request use of 1510 kc. instead of 1390 kc., with 500 watts power, 1 kw LS, unlimited time (B5-P-2345).

WPAY—Chester A. Thompson, Transferee, The Brush-Moore Newspapers, Inc., Transferee, Portsmouth, Ohio.—Granted petition for continuance of hearing on application for transfer of control of corporation, from August 12, 1940, to September 9, 1940.

Ben J. Sallows, Alliance, Neb.—Denied as in case of default the application for construction permit for new broadcast station at Alliance, Neb., to operate on 1210 kc., 100 watts night, 250 watts LS, unlimited time (Docket No. 5882).

KADA—C. G. Morris, Ada, Okla.—Granted license to cover construction permit for changes in equipment and increase in power from 100 watts to 250 watts; 1300 kc., unlimited time (B3-L-1193).

KOIN—KOIN, Inc., Portland, Ore.—Granted license to cover construction permit for installation of directional antenna for night use and increase power from 1 kw night, 5 kw day,
to 5 KW day and night; 940 kc. (B5-I-L-1194). Also granted authority to determine operating power by direct measurement of antenna input (B5-I-L-1194).

WHE—The Metropolis Broadcasting Corp., Jacksonville, Fla.—Granted license to cover construction permit as modified for new broadcast station, 1290 kc., 250 watts, unlimited time (B3-L-1195). Also granted authority to determine operating power by direct measurement of antenna power (B3-Z-445).

WBAB—Union Publishing Co., Atlantic City, N. J.—Granted construction permit to make changes in equipment (B1-P-2927).

WKAT—A. Frank Katzentine, Miami Beach, Fla.—Granted modification of construction permit to cover change of frequency, increase in power, installation of new antenna and transmitter, and move of transmitter for approval of new antenna and transmitter site; 1330 kc., 1 KW power, unlimited time (B3-MP-999).

KHAS—Kiska Broadcasting Co., Hastings, Nebr.—Granted modification of construction permit for new station, for authority to install new type transmitter and make changes in vertical antenna; 1200 kc., 250 watts power, unlimited time (B4-MP-1021).

KEIH—KLZ Broadcasting Co. (area of Denver, Colo.), Portable-Mobile—Granted modification of relay broadcast license to change type of equipment (B5-MLRE-61).

WAIV—WIX, Inc. (area of Utica, N. Y.), Portable-Mobile.—Granted license to cover construction permit for new broadcast station, frequencies 1622, 2688, 2519, 2790 kc., power 10 KW, authority to install new type transmitter and make changes in equipment; frequency 1420 kc., unlimited time.

WGAN—Portland Broadcasting System, Inc., Portland, Maine.—Granted special temporary authority to change present directional antenna in accordance with the engineering report submitted and to operate on frequency 550 kc., 500 watts power, using directional antenna unlimited time after changes made and report submitted to the Commission, in order to retain the Canadian interference situation, on 640 kc.

WIEO—National Broadcasting Co., Inc., New York, N. Y.—Granted special temporary authority to operate on regular assignment on board the steamship America in conjunction with visual transmitter WIXBU, using relay station WEJA in New York City as cue channel supporting southbound sound channel of Station W2XBS in connection arrival of steamship America, for the period July 26, 1940, and ending not later than July 30, 1940, for preliminary testing and program transmission.

WBNY—Roy L. Albertson, Buffalo, N. Y.—Granted special temporary authority to operate from 9 p. m. to 11 p. m., EST, Monday through Friday, inclusive, for the period beginning July 30, 1940, and ending not later than August 28, 1940, in order to broadcast musical program as described in letter dated July 12, 1940 (provided WSVS remains silent). All programs to be sustaining.

WHXA—The National Life and Accident Insurance Co., Inc., Nashville, Tenn.—Granted special temporary authority to use the WSM vertical radiator located 6 miles north of Franklin, Tenn., as a support for the high frequency antenna, a single turn-stile element to be mounted at top of structural section of WSM tower, 100 watts to be fed into it through an RCA Type ACT 150 transmitter using crystal control having accuracy of .01 per cent, from July 29, 1940, to not later than August 27, 1940, in order to conduct field intensity surveys on 4450 kc.

WGBF—Evansville on the Air, Inc., Evansville, Ind.—Granted special temporary authority to use the WSM vertical radiator located 6 miles north of Franklin, Tenn., as a support for the high frequency antenna, a single turn-stile element to be mounted at top of structural section of WSM tower, 100 watts to be fed into it through an RCA Type ACT 150 transmitter using crystal control having accuracy of .01 per cent, from July 29, 1940, to not later than August 27, 1940, in order to conduct field intensity surveys on 4450 kc.

WGR—Buffalo Broadcasting Corporation, Buffalo, N. Y.—Construction permit for new Class IV broadcast station to operate on 1200 kc., 250 watts, unlimited time, and requesting facilities of present station WHBP.

Bellingham Broadcasting Co., Bellingham, Wash., and KYOS—KVOS, Inc., Bellingham, Wash.—Adopted as final the proposed findings of fact and conclusions of the Commission, together with the amendment of May 29, DENYING the application of Bellingham Broadcasting Co. for construction permit for new broadcast station, and GRANTING renewal of license of KYOS (B-92).

WIBC—Long Island Broadcasting Corp., Woodside, L. I.—Granted extension of effective date of Provision (3) of Commission’s Order of December 5, 1938, for a period of 60 days from July 26, 1940.

KUTA—Utah Broadcasting Co., Salt Lake City, Utah.—Denied petition for rehearing in re the application of Puget Sound Broadcasting Co. (KVI), Tacoma, Wash., for modification of license to increase night power to 5 KW on frequency 2790 kc., which was granted by the Commission May 14, 1940.

WCAU—WCAU Broadcasting Co., Philadelphia, Pa.—Granted petition authorizing extension of the effective dates of Sections 4.43(c) and 4.45 of the rules governing international broadcast stations, for a period of 30 days.

WMIP—Northwest Airlines, Inc., c/o Aeronautical Radio, Inc., Washington, D. C.—Granted special temporary authority to operate aircraft stations KHNCN and KHNCI on frequency 2790 kc. in order to relay broadcast proceedings of the Minneapolis Aquatennial from 9:45 p. m. to 10 p. m., local time, on July 23, 1940, to Radio Station WCCO.

WSAI—Double Grove City, Pa.—Granted extension of special temporary authority to remain silent for the period August 1, 1940, to not later than September 19, 1940, in order to observe college vacation.

KFRU—KFRU, Inc., Columbia, Mo.—Granted special temporary authority to operate simultaneously with Station WGBF, with power reduced to 250 watts, from 8 p. m. to 11 p. m., CST, on August 2 and 9, 1940; from 8 to 9:30 p. m., CST, on August 12, 1940, and from 9 p. m. to 11 p. m., CST, on August 14, 1940, in order to broadcast special night games of the St. Louis Cardinals and Browns baseball teams only.

Helen L. Walton and Walter Bellati, and Hobart Stephenson, Milton Edge, Edgar J. Korsmeyer, d/b as Stephenson, Edge & Korsmeyer, Jacksonville, Ill.—Granted motion for consolidation and continuance of hearing now set for August 5, 1940, to September 4, 1940, on applications for new stations at Jacksonville, Ill.; Walton & Bellati to operate on 1150 kc., 250 watts daytime; Stephenson, Edge & Korsmeyer to operate on 1150 kc., 250 watts, daytime.

APPLICATIONS FILED AT FCC

550 Kilocycles

WGR—Buffalo Broadcasting Corporation, Buffalo, N. Y.—Construction permit for changes in antenna, move transmitter to Lake Shore Road, Township of Hamburg, N. Y. Amended: Change transmitter site designation to Big Tree Road.

680 Kilocycles

WPTE—WPTE Radio Co., Raleigh, N. C.—Construction permit to install new transmitter; increase power from 5 KW to 50 KW; change hours of operation from limited to unlimited, using directional antenna after local sunset at St. Joseph, Mo.; and move transmitter to near Morrisville, N. C. Amended to omit request for move of transmitter, changes in directional antenna for night use only; and request Class II.

800 Kilocycles

NEW—Camden Broadcasting Co., Camden, N. J.—Construction permit for a new station to be operated on 800 kc., 500 watts, daytime.

940 Kilocycles

KOU—KOIN, Inc., Portland, Ore.—License to cover construction permit (B5-P-247) for increase in power and installation of directional antenna for night use only.

KOU—KOIN, Inc., Portland, Ore.—Authority to determine operating power by direct measurement of antenna power.

950 Kilocycles

WRC—National Broadcasting Co., Inc., Washington, D. C.—Modification of construction permit (B1-P-243) to increase
power and install directional antenna for night use, requesting extension of completion date from 8-5-40 to 10-5-40.

1080 Kilocycles

1120 Kilocycles

WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Construction permit to increase power from 1 KW to 5 KW, install new equipment and directional antenna for night use. Amended: re changes in directional antenna.

1200 Kilocycles

WBOW—Banks of Wabash, Inc., Terre Haute, Ind.—License to cover construction permit (B4-P-2785) for changes in equipment.

KHAS—Nebraska Broadcasting Co., Hastings, Nebr.—Modification of construction permit (B4-P-2367) as modified for a new station, requesting authority to install new type transmitter, and changes in vertical antenna.

KOOS—KOOS, Inc., Marshfield, Ore.—Authorization to determine operating power by direct measurement of antenna power.

WTHT—The Hartford Times, Inc., Hartford, Conn.—License to cover construction permit (B1-P-2240) as modified for new transmitter and increase in power.

WLOF—Hazlewood, Inc., Orlando, Fla.—Modification of construction permit (B3-P-2194) as modified for a new station, to install a new transmitter.

KADA—C. C. Morris, Ada, Okla.—License to cover construction permit (B3-P-2606) for changes in equipment and increase in power from 100 watts to 250 watts.

WBAB—Press-Union Publishing Co., Atlantic City, N. J.—Construction permit for a new station to be operated on 1200 kc., 250 watts, unlimited time. Class IV.

NEW—Worcester Broadcasting, Inc., Worcester, Mass.—Construction permit for a new station to be operated on 1200 kc., 250 watts, unlimited time. Class IV.

WKBO—Keystone Broadcasting Corp., Harrisburg, Pa.—Modification of license to increase power from 100 watts night, 250 watts day to 250 watts day and night.

1210 Kilocycles

KFOR—Cornbelt Broadcasting Corp., Lincoln, Nebr.—Modification of construction permit (B4-P-2537) as modified, for move of transmitter from 4706 S. 48th St., Lincoln, Nebr., to 48th and Vine St., Lincoln, Nebr., make antenna changes, and increase power from 100 watts night, 250 watts day, to 250 watts day and night.

WSAY—Brown Radio Service & Laboratory (Gordon P. Brown, owner), Rochester, N. Y.—Construction permit to move transmitter from 328 E. Main St., Rochester, N. Y., to Maiden Lane, Greece, N. Y., make changes in transmitting equipment, change frequency from 1210 kc. to 1340 kc., increase power from 250 watts to 1 KW, and install directional antenna for day and night use. Class III-B.

WGCM—WGCM, Incorporated, Gulfport, Miss.—License to cover construction permit (B3-P-2618) for new antenna, increase power and move transmitter.

WHBU—Anderson Broadcasting Corp., Anderson, Ind.—Authority to determine operating power by direct measurement of antenna power.

1230 Kilocycles

NEW—Edward Tom O'Brien, David Shepard, Howard S. Johnson, and John W. Boler, a partnership, d/b/a as Brainerd-Bemidji Broadcasting Co., Brainerd, Minn.—Construction permit for a new station to be operated on 1230 kc., 500 watts night, 1 KW day, unlimited time. Class III-B.

1240 Kilocycles

KTPI—Radio Broadcasting Corp., Twin Falls, Idaho.—Construction permit for reinstatement of construction permit (B5-P-2517) to install new equipment, and make changes in authorized equipment.

1250 Kilocycles

WDSU—WDSU, Inc., New Orleans, La.—Construction permit to install new transmitter, move transmitter from Belle Chase Highway, Gretna, La., to 1/5 mile south of intersection of Verrett and Donner Canals, New Orleans, La., increase power from 1 KW to 5 KW day and night, and install directional antenna for day and night use. Class III-A.

1270 Kilocycles

WOOD—King-Trendle Broadcasting Corp., Grand Rapids, Mich.—Construction permit to increase power from 500 watts to 5KW, new transmitting equipment, directional antenna for night use, move studio and transmitter. Requesting Class III-A. Amended: re geographic location.

1280 Kilocycles

KFBB—Buttry Broadcast, Inc., Great Falls, Mont.—Construction permit to increase power from 1 KW night, 5 KW day to 5 KW day and night, and install directional antenna for night use. Class III-A.

1290 Kilocycles

WHJP—The Metropolis Co., Jacksonville, Fla.—Authority to determine operating power by direct measurement of antenna power.

WJHP—The Metropolis Co., Jacksonville, Fla.—License to cover construction permit (B3-P-917) as modified, for a new station, and to change location of studio from 125 W. Church St., Jacksonville, Fla. to 500 Laura St., Jacksonville, Fla.

1310 Kilocycles

NEW—Radio Corp. of Annapolis, Annapolis, Md.—Construction permit for a new station to be operated on 1310 kc., 100 watts, unlimited time. Class IV. Amended: To request facilities of WINX, Washington, D. C.

WBPR—McDowell Service Co., Welch, W. Va.—Modification of construction permit (B2-P-2816) for a new station requesting approval of antenna, new transmitter and approval of studio and transmitter site.

1340 Kilocycles

KFRO—Voice of Longview, Longview, Texas.—License to cover construction permit (B3-P-2117) as modified for move of transmitter, directional antenna for night use, new transmitter, change frequency, increase power and hours.

KFRO—Voice of Longview, Longview, Texas.—Authority to determine operating power by direct measurement of antenna power.

WFEA—New Hampshire Broadcasting Co., Manchester, N. H.—Construction permit to install new transmitter and increase power from 500 watts night, 1 KW day to 5 KW day and night, directional antenna night. Amended: To use directional antenna both day and night.

1350 Kilocycles

KWK—Thomas Patrick, Inc., St. Louis, Mo.—Construction permit to change frequency from 1350 to 630 kc., changes in directional antenna night, increase power from 1 KW night, 5 KW day to 5 KW day and night, requests facilities of KFFU and WGFB. Amended: To change frequency to 630 kc. and increase power to 50 KW, install new equipment and directional antenna for day and night use, move transmitter from Water Works, Conduit & Logan Sts., St. Louis, Mo., to near Merrimac, Ill., and omit request for facilities of WGFB and KFFU.

1370 Kilocycles

KENO—George Penn Foster, Maxwell Kelch and Calvert Charles Applegate, d/b/a as Nevada Broadcasting Co., Las Vegas, Nevada.—Modification of construction permit (B5-P-2555) which authorized new station, for approval of transmitter site at (The Meadows) N. E. 1/4 of Section 1, Township 21S, Range 61E, M. D. B. & M., Las Vegas, Nev., approval of vertical antenna, change in type of transmitter and increase power from 100 watts night, 250 watts day to 250 watts day and night.

WUSA—Northern Broadcasting Co., Inc., Wausau, Wisc.—Authority to determine operating power by direct measurement of antenna power.

4458 — July 26, 1940
WMFD—Richard Austin Dunlea, Wilmington, N. C.—License to cover construction permit (B3-P-2058) as modified, for move of transmitter, new transmitter, antenna, increase in power and change in hours of operation.

WHUB—WHUB, Inc., Cookeville, Tenn.—Modification of construction permit (B3-P-2298) as modified, for a new station, requesting extension of completion date from 7-27-40 to 9-1-40.

NEW—Rose City Broadcasting Co., Tyler, Texas.—Construction permit for a new station to be operated on 570 kc., 250 watts, unlimited time.

WKPT—C. P. Edwards, Jr., & Howard Long, d/b as Kingsport Broadcasting Co., Kingsport, Tenn.—License to cover construction permit (B3-P-2616) as modified for a new station.

WMSL—Tennessee Valley Broadcasting Co., Inc., Decatur, Ala.—Authority to install automatic frequency control equipment.

WTSP—Pinellas Broadcasting Co., St. Petersburg, Fla.—Construction permit for new transmitter, changes in antenna, change frequency from 1370 to 1350 kc., and increase power from 250 watts to 500 watts night, 1 KW day. Class III-B.

1400 Kilocycles

WARD—United States Broadcasting Corp., Brooklyn, N. Y.—Authority to determine operating power by direct measurement of antenna power.

1420 Kilocycles

NEW—Grenco, Inc., Greenwood, S. C.—Construction permit for a new station to be operated on 1420 kc., 100 watts, daytime. Class IV.

KEUB—Eastern Utah Broadcasting Co., Price, Utah.—License to cover construction permit (B5-P-2582) for changes in equipment and increase in power.

1430 Kilocycles

WOKO—WOKO, Inc., Albany, N. Y.—Construction permit to install new transmitter, make changes in vertical antenna and increase power from 500 watts night, 1 KW day to 500 watts night, 5 KW day. Class III.

1440 Kilocycles

KXYZ-KIIS—Harris County Broadcast Co., Houston, Texas.—Transfer of control of corporation from Fred J. Heyne to M. Tillford Jones, 5 shares or 50 per cent.

1450 Kilocycles

KCMO—KCMO Broadcasting Co., Kansas City, Mo.—Construction permit to install new automatic frequency control equipment and make changes in transmitting equipment.

1490 Kilocycles

WKBW—Buffalo Broadcasting Corp., Buffalo, N. Y.—Construction permit for new transmitter and directional antenna for day and night use, increase power from 5 to 50 KW, move transmitter to Lake Shore Road, Township of Hamburg, N. Y. Class I-B station. Amended: Change transmitter site designation to Big Tree Road.

1500 Kilocycles

WSSJ—Puerto Rico Advertising Co., Inc., Mayaguez, Puerto Rico.—Modification of construction permit (B-P-2473) which authorized construction of new station, for approval of transmitter site at Monserrat No. 28, San Juan, P. R., studio site at Monserrat No. 30, San Juan, P. R., and approval of vertical antenna.

KPO—Precast Broadcast Co., Wenatchee, Wash.—Authority to determine operating power by direct measurement of antenna power.

NEW—Earl C. Dunn and Chas. W. Rossi, d/b as Nueces Broadcasting Co., Corpus Christi, Texas.—Construction permit for new broadcast station to be operated on 1500 kc., 250 watts, unlimited time. Studio and transmitter to be determined Corpus Christi, Texas.

WMRC—Textile Broadcasting Co., Greenville, S. C.—Modification of construction permit (B3-P-2738) which authorized new station, for approval of studio and transmitter locations at Mayberry St., Greenville, S. C., approval of antenna and change type of transmitter.

MISCELLANEOUS

NEW—Zenith Radio Corp., area of Chicago, Ill.—Construction permit for a new relay broadcast station to be operated on 133930, 131850, 136810, 138630 kc., 100 watts, special emission for frequency modulation.

WAUV—Courier-Journal and Louisville Times Co., Louisville, Ky.—License to cover construction permit (B2-PRY-104 as modified) for new relay station.

NEW—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Construction permit for new high frequency broadcast station to be operated on 41100 kc., 8135 square miles.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Air Conditioning Training Corp.—A complaint charging misrepresentation in the sale of a correspondence course in air conditioning and refrigeration has been issued against Air Conditioning Training Corporation, and its officers, Benjamin M. Klekner, Morris A. Gluck and Leon J. Knight, 789 Wick Ave., Youngstown, Ohio.

According to the complaint, the respondent corporation misleadingly represented that students who complete its training course are assured of employment in the air conditioning and refrigerating industry; that the air conditioning industry actively participates in the conduct of the school and in the giving of instruction, when such are not the true facts.

Further misleading representations alleged in the complaint are that respondent's salesmen are experts in vocational guidance; that many vacancies exist assured of employment in the air conditioning and refrigerating industry; that persons with insufficient background are qualified to pursue its course of instruction, when such are not the facts.

The respondent also allegedly claims that beginning wages in the air conditioning and refrigeration industry are greater than they are in fact; misrepresents the extent and nature of fees payable by students for its course of instruction, and exaggerates the extent of its laboratory and shop equipment. (4182)
Bauer Manufacturing Company, 1429 East Bowman St., Wooster, Ohio, has been charged in a complaint with the dissemination of misleading representations in the sale of ladders.

According to the complaint, the respondent advertises that its ladders have proven 30 per cent stronger by actual scientific tests than competitive ladders, and that such strength is due to countersunk rung construction. In truth, the complaint continues, respondent's ladders manufactured with the countersunk rung construction are no stronger or more substantial than ladders manufactured from similar materials by its competitors who do not use countersunk rung construction. (4190)

A. S. Butler & Company — A complaint has been issued against Minn Minn Shapiro and Jack Winkler, trading as A. S. Butler & Company, 667 North Clark St., Chicago, alleging misleading representations in the sale of second-hand fruit jars.

According to the complaint, the respondents buy discarded fruit jars from junk dealers and after cleaning them and supplying new rubber bands and caps for such articles, place them in new cardboard cartons for resale to retail dealers without any label to indicate that they are discarded fruit jars.

It is alleged that the practice of the respondents in failing to disclose that their fruit jars have been previously used misleads retail dealers and members of the purchasing public into the erroneous belief that such jars are new, and because of their lower cost, into the purchase of substantial quantities of such articles, thus unfairly diverting trade to the respondents from their competitors. (4192)

Helene Curtis Industries — See National Mineral Company.

According to the complaint, the respondent represents that its oil preparation supplies nourishment and imparts strength and vigor to the hair and causes the growth of hair; nourishes and invigorates the hair roots and hair shaft, and is the original machineless oil wave, when such are not the facts.

The respondent further allegedly represents that its pads are equipped with a thermostatic device which controls and regulates heat, when in truth it is only a thermostatic device which merely indicates changes in temperature.

Representations that the respondent manufactures its products are also alleged to be untrue, as such products are obtained by the respondent from other sources. (4185)

Ohio Art Company — Concealing the German origin of reeds within toy musical tops is charged in a complaint issued against Ohio Art Company, Bryan, Ohio.

According to the complaint, the respondent uses materials of both foreign and domestic origin in its toy musical tops. Among such foreign-made parts, it is alleged, are musical reeds which are imported from Germany, and are stamped with the word "Germany.

In assembling the tops, the respondent allegedly conceals from view of the prospective purchasers the word "Germany" and sells such products without any marking to inform purchasers that the musical reeds are of German origin.

It is further charged that the respondent imprints on the toy musical tops the legend "Made in U. S. A.", and on the cartons the words "Made by The Ohio Art Co., Bryan, Ohio," when in truth such products are not wholly of domestic origin and manufacture but contain reeds made in Germany. (4183)

Paulmac Textile Company, Inc. — A complaint has been issued against the Paulmac Textile Company, Inc., 32 West 38th St., New York, alleging misleading representations in the sale of ribbons and braids.

According to the complaint, the respondent sells ribbons and braids having the appearance and feel of silk, without disclosing the fact that they are not in fact composed of silk but are composed in whole or in part of rayon. It is alleged that typical of such products is a ribbon having the appearance and feel of velvet but whose constituent fiber is 87 per cent rayon and 13 per cent silk, the pile of such ribbon being entirely of rayon. A further example, the complaint continues, is a ribbon having the appearance and feel of silk but in fact composed wholly of rayon.

It is alleged in the complaint that the practice of the respondent in failing to disclose the rayon content of its products misleads the purchasing public into the erroneous belief that such products are composed entirely of silk. (4191)

Frank L. Singer Fur Company — Misleading representations in the purchase of raw furs from trappers is alleged in a complaint issued against Frank L. Singer, trading as Frank L. Singer Fur Company, Peekskill, N. Y.

According to the complaint, the respondent, by means of price lists, circulars, folders and booklets, represents to trappers and dealers in fur that he will pay certain specified prices for designated grades and qualities of furs, when such is not a fact. In truth, the complaint continues, the respondent quotes such fictitious prices only for the purpose of inducing trappers and dealers to ship their furs to him, and without any intention of paying to such shippers the prices mentioned in his advertising matter, but with the expectation that they will dispose of their furs to him for only a portion of the advertised prices because of the difficulty and expense incident to securing a return of the furs shipped to the respondent.

It is also alleged that the respondent makes misleading representations relating to market conditions and the demand for certain of the several grades and types of furs he desires to purchase, thus inducing many trappers and dealers to ship furs to him and accept lower prices than would be realized from other sources. (4189)

U. S. Air Seal, Inc., Girard, Ohio, was charged in a complaint with the dissemination of misleading representations in the sale of a compound. "Air Seal," designed to prevent blow-outs in tires.

The respondent allegedly advertises that its product will cause tires to be safe from blow-outs; will prevent blow-outs caused by large holes; will control a blow-out tire by retaining enough air for safe stopping, and will eliminate friction, when such are not the facts.

According to the complaint, the respondent further misleadingly advertises that its product will extend the life of the tube; will preserve rubber; is superior to similar products used to prevent the escape of air from tubes, and will give 25 per cent or any appreciable increased tire mileage, when such are not the facts. (4187)

Whitewater Brewing Company and its manager, Alex Weingart, 200 North Jefferson St., Whitewater, Wis., have been charged in a complaint with misrepresentation in the sale of beer.

According to the complaint, the respondents sell a brand of beer designated "Badger", the containers of which bear the picture of a badger and the legend: "Badger Beer, Whitewater Brewing Company, Whitewater, Wisconsin." Other advertising material allegedly features a picture of a badger holding a plaque on which appeared an outline of the State of Wisconsin with the word Wisconsin written across the outline. It is also alleged that the respondents have used on certain of their advertising material the legend "The Pride of Wisconsin." The complaint points out that the badger is one of the emblems of the State of Wisconsin which is generally known as the "Badger State.

It is alleged that the use by the respondents of such words, legends and pictures without any accompanying words sufficiently disclosing the correct origin of their product, has the tendency to cause the purchasing public to believe that their beer is brewed in Wisconsin, when in truth it is brewed in Chicago by a concern which sells such beer to the respondents.

The complaint also points out that there is a marked preference on the part of the public for beer brewed in Wisconsin and that the misrepresentation as to the origin of respondents' beer serves to unfairly divert trade to the respondents from their competitors. (4188)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

4460 — July 26, 1940
Hy-Test Cement Company, Fox Building, Philadelphia, has been ordered to discontinue certain practices in violation of the Federal Trade Commission Act.

Commission findings are that the respondent, for the purpose of promoting the purchase of its products, published from time to time the results of cement tests made by the National Bureau of Standards, and identified all masonry cements used in such tests. The findings continue that the respondent, one of the companies participating in the tests, violated the established understanding between the Bureau and participants in the tests that such tests were of a confidential nature, were for the purpose of improving the mortars tested, and the results were not to be used for sales-promotion.

The Commission’s order prohibits the respondent from divulging or assisting the purchasing public in determining the identity of the manufacturer or the brand name of any cement which was tested by the Bureau of Standards of the United States Department of Commerce, the results of which tests were published with cements tested listed under code or symbol numbers by the Bureau of Standards in “Research Paper 683, A Study of the Properties of Mortars and Brick and Their Relation to Bond.”

The order further prohibits use by the respondent for sales-promotional purposes of any report by a United States agency, where use of such report is violative of any regulation issued by the agency, or where such use implies that the agency has approved or recommended the use of respondent’s products. (3779)

Maple Lawn Hatchery—See Maple Lawn Poultry Farm.

Maple Lawn Poultry Farm—Roy T. Ehrenzeller, trading as Maple Lawn Poultry Farm and Maple Lawn Hatchery, McAllisterville, Pa., has been ordered to discontinue misleading representations in the sale of baby chicks.

Under the order, the respondent is directed to cease representing that the flocks of poultry supplying the eggs from which his baby chicks are produced are owned, controlled or supervised by him.

The order further forbids representations by the respondent that eggs or chicks hatched from eggs which were obtained from flocks that have not been blood-tested and found free from disease or have not been culled, are from blood-tested and culled flocks or are free from disease. (3941)

Prostex Company—George G. Neff, trading as Prostex Company, Miami, Okla., has been ordered to discontinue disseminating misleading representations in the sale of a medicinal preparation known as Glantex.

Under the order, the respondent is directed to cease representing that Glantex will cure, or act as a safe, effective treatment for prostatitis, cystitis, urethritis, sugar diabetes, dropsy, ileocolitis, gastritis, malaria, inflammation of the bladder, acute indigestion, ptomaine poisoning, rheumatism, back and leg aches, or run down feeling.

The order further forbids representations that the respondent’s preparation possesses any laxative value in excess of that due to its laxative properties. (3291)

San Pedro Fish Exchange—A group of California fish and seafood product wholesalers and brokers were ordered to cease entering into any agreement or combination in restraint of trade and paying or receiving illegal brokerage fees in violation of the Federal Trade Commission and Robinson-Patman Acts.

Principal respondents are: San Pedro Fish Exchange, San Pedro, and Southern California Wholesale Fish Dealers Association, Los Angeles; their officers and member wholesaler-distributors, and four purchasing or brokerage agents, Seafood Brokerage, Inc., and its officers, directors and stockholders, San Pedro; Los Angeles Fish Exchange, M. N. Blumenthal and Southern Sea Products Brokerage Corporation and its officers, directors and stockholders, all of Los Angeles. The findings state that Seafood Brokerage, Inc., is controlled and its stock owned by members of San Pedro Fish Exchange or their representatives, and Southern Sea Products Brokerage Corporation is controlled and its stock owned by members of the Southern California Wholesale Fish Dealers Association or their representatives.

Officers of the respondent groups specifically named as respondents are: San Pedro Fish Exchange—Anthony B. Jaconi, Giosue Di Massa and Albert H. Finch, all of San Pedro; Southern California Wholesale Fish Dealers Association—Charles Rennick, secretary and manager; Seafood Brokerage, Inc.—John Ivanich, Giosue Di Massa, Yoshihuru Kamiya and Hugh Reves, manager; Southern Sea Products Brokerage Corporation—Elmo C. Jack, manager.

Findings are that members of the San Pedro Fish Exchange and Southern California Wholesale Fish Dealers Association as wholesaler-distributors buy from producers and shippers in various States and foreign countries, and together with these two organizations hold a monopoly on the purchase, sale and distribution of certain varieties of fish and seafood products in the trade territory extending inland from San Pedro and Los Angeles through California and several States to the eastward.

Further findings of the Commission are that the respondent associations and corporations banded together to promote the business and profits of the two respondent wholesaler-distributor groups and pursued a concerted course of action in establishing, fixing and maintaining the prices at and the conditions upon which their products were purchased and sold by respondent distributors to other dealers and to consumers; in seeking to acquire and maintain a monopoly in the sale and distribution of fish and seafood product in their trade area, and in imposing their prices and policies on all dealers in fish and seafood products in their trade territory. (3739)

Silver Service Corporation and Edwin I. Gordon, 58 East Washington St., Chicago, have been ordered to discontinue misleading representations in their sale of sales promotion plans to retailers.

The respondents are ordered to cease representing that they are conducting any special or advertising campaign to introduce or advertise silverware.

The order further prohibits the respondents from representing, or assisting the purchasers of their plan to represent, that any sales promotion plan in which credit vouchers, or so-called prizes are given to the entrants or contestants without regard to the relative correctness of solutions submitted, is a contest. Representations that prizes awarded in connection with such sales promotion plan were based on a financial advantage based on the usual retail price of merchandise are also forbidden by the order, when such is not the case.

It is also ordered that the respondents cease representing fictitious prices as being regular prices, when, in fact, they are in excess of the prices at which their merchandise is regularly and customarily offered for sale. (3654)

Sohn Bros.—Arthur Sohn and Carl Sohn, trading as Sohn Bros., 1709 West Roosevelt Road, Chicago, have been ordered to discontinue misleading representations in the sale of mattresses.

The respondents are ordered to cease representing that mattresses which are composed in whole or in part of old, used, discarded or second-hand materials are new mattresses or are made from new or unused materials.

The respondents are further ordered to desist from failing to permanently affix to such mattresses labels or tags which cannot readily be removed, obliterated, obscured or minimized and which clearly and conspicuously reveal that the mattresses are in fact composed in whole or in part of used, discarded and second-hand materials. (4073)

Western Novelty Company—An order to discontinue misleading representations in the sale of finger rings has been issued against John H. Mulkey, trading as Western Novelty Company, 504 Southwest Third Ave., Portland, Ore.

The respondent is ordered to cease representing directly or by implication that rings set with hematite, or any non-precious crystal or stone, are set with diamonds, “Alaska Black Diamonds,” or Genuine Laska Black Diamonds.

The order further forbids representations by the respondent that such rings are set with any precious or semi-precious stones, or that the sets are produced in the territory of Alaska. (4082)

STIPULATIONS

During the week the Commission has entered into the following stipulations:

July 26, 1940 — 4461
H. W. Barker Chemical Company—H. W. Barker, trading as H. W. Barker Chemical Co. and Barker Laboratories, 500 South Water St., Sparta, Wis., agrees to discontinue representing that “Barker's XZMO” is a competent treatment for eczema, piles, athlete's foot, nervous disorders, insect or animal pests when such is not the case, or exaggerating the extent to which his device will protect planted seed from damage by animal pests. The respondent further agrees to cease representing the coined word “XZMO” or any other term that simulates the word “eczema”. The respondent also stipulates that he will discontinue employing the word “Laboratories,” or any similar word, as part of his trade name, or in any manner representing that he has a laboratory unless that is a fact. (02601)

Cedar Hill Formulae Company, New Britain, Conn., agrees to cease representing that “Stanley's Crow Repellant” will afford absolute protection for planted seed corn from molestation by insects or animal pests when such is not the case, or exaggerating the extent such product will protect planted seed from damage by animal pests. The respondent also stipulates that it will discontinue claims that “Stanley's Crow Repellant” is known to be more effective, convenient or economical to use than any other material; is non-poisonous; does not affect germination in any way, or will “insure” a good corn crop. (02594)

Civil Service Aid Publishers—Irving Groger and Leo I. Rieff, trading as Civil Service Aid Publishers, 505 Fifth Ave., New York, entered into a stipulation to discontinue certain representations in the sale of manuals designed to prepare persons for Civil Service examinations. The respondents agree to cease employing the words “Civil Service” as part of their trade name or in other manner implying connection with the Civil Service Commission or with the United States government. The respondents further agree to desist from naming as open to their students any Civil Service positions that are non-existent, or from implying that they have access to the questions contemplated by the Civil Service Commission for any future examination. (2880)

H. E. Clarke Company—H. E. Clarke, trading as H. E. Clarke Company, 701 Ridge Ave., Pittsburgh, agrees to cease representing that “H. E. Clarke's Nasal Filter” is of value in the prevention of any case of nasal irritation except when caused by the inhalation of dust or other impurities through the nostrils, or that it will afford complete protection against nasal irritation which might result in such manner. The respondent further agrees to desist from exaggerating the extent to which his device will protect against or lessen the severity of any disease, ailment or condition. It is also agreed by the respondent that he will discontinue advertising that his device is an effective agent in protecting against the colds; that it is completely invisible when inserted in the nostrils; that generally physicians have recommended it; that the filters used in his device are sterile, or that the patent application covering his product affords complete or full protection. (02600)

Exhibitors Products Company—Alfred LePine, trading as Exhibitors Products Company, Kensington, Ohio, in a stipulation agrees to discontinue certain representations in the sale of a shampoo or liquid soap designated “Sulphasol” and a medication designated “Best in Show Conditioning Capsules,” both for use on dogs. The respondent stipulates that he will cease using the word “Conditioning” as part of the name of his product so as to imply that it is efficacious generally as a conditioner of dogs for show purposes. It is further agreed that the respondent will cease representing that “Best in Show Conditioning Capsules” is an effective treatment or competent remedy for all maladies, diseases and ailments to which dogs are subject, or that its use will prevent sickness or generally improve the appearance of dogs for show purposes. The respondent also stipulates that he will discontinue claims that “Sulphasol” is a new product or that it imparts any therapeutic effects other than such as may be due to the action of its sulphur content on certain organisms in the skin and hair, as the sarcopitc mite of scabies and certain fungi. (2878)

Hays Advertising Agency, Burlington, Vt., has entered into a stipulation in which it agrees to discontinue certain representations in advertisements concerning cow remedies, disseminated on behalf of Dairy Association Company, Inc., Lyndonville, Vt. Hays Advertising Agency agrees to cease advertising that “Bag Balm,” a stock preparation, is completely antiseptic; is healing, unless limited to its aid to nature in the process of healing; is a competent treatment or effective remedy for acute mastitis or inflamed or caked udders, unless limited to its use as a massage and counter-irritant, or that it cannot taint milk.

LaRue Laboratories—William S. LaRue, trading as LaRue Laboratories, 2309 Ames Ave., Omaha, Nebr., in connection with the sale of “LaRue's Master Scalp Treatment,” agrees to cease advertising that dandruff is caused by germs; that bad nerves are the paramount cause of all gray hair; that use of his product will retard either gray or falling hair, or will stimulate hair growth or help bring back its natural oil and give it brilliant luster. The respondent also agrees to cease employing the words “LaRue Laboratories” as his trade name, when in fact there are no such laboratories, or employing the word “Laboratories” in any way so as to imply that he owns, operates or controls a place devoted to experimental study of any branch of natural science or the application of scientific principles in the preparation of his product. (2874)

Marcus-Lesosine, Inc., L. J. Marcus and John A. Lesoine, 575 Sutter St., San Francisco, dealers in cosmetic products, agree to cease representing that “Lovalon Hair Rinse” is a vegetable product; gives hair more life; or is permanent in effect, or enables one to say goodbye to dull or drab hair. The respondents also agree to discontinue representations that “Lovalon Oil of Lemon Hair Rinse” accomplishes the same results as a lemon rinse; restores natural loveliness of the hair, or invigorates the scalp or hair. (02596)

Pyramid Metals Company, 1335 North Wells St., Chicago, agrees to cease representing in any manner that 18-8 metal trim is offered for sale by it when such is not a fact, or quoting prices for 17-7 trim as being prices for 18-8 trim, or in any other manner misrepresented the type, quality, composition or nature of products which it sells. (2877)

Releco Drug Company—See Reliance Drug Company.

Reliance Drug Company—George W. Lundgren, one of the co-partners trading as Reliance Drug Company, 326 East 35th St., New York, and the Relco Drug Company, Inc. 2159 Fifth Ave., New York, present owner of Reliance Drug Company, agree to cease representing that “Reliance Double Quinine Hair Grower”
and "Reliance Hair Dressing Pomade", when applied externally, will cause or promote the growth of hair; will stop falling hair, or will remove dandruff in the sense that it will not reappear. (2875 and 2876)

Smith Manufacturing Company—Ada G. Smith, trading as Smith Mfg. Company, 107 Underwood St., Fayetteville, N.C., agrees to discontinue advertising that "Smith's Instant Hair Grower" and "Smith's Instant Hair Grower Special" grow hair; grow present hair from one to three inches per month, or will grow hair on any bald head or temple in three weeks or less where the roots are living. The respondent also stipulates that she will cease representing that "Smith's Instant Tetter Salve and Scalp Cure" is a competent remedy or an effective treatment for dry scalp, tetter, eczema, dandruff, falling hair, or other scalp disease; heals sores or skin diseases, or would do more than temporarily relieve the itching that may be associated with certain skin diseases and promote the healing of raw surfaces. Ada G. Smith also agrees to discontinue using the word "Cure" as part of the trade name of "Smith's Instant Tetter Salve and Scalp Cure," and the word "Grower" as part of the trade names "Smith's Instant Hair Grower" and "Smith's Instant Hair Grower Special." (02597)

Sha-Po Manufacturing Co.—A stipulation has been accepted from Lewis Tanenbaum, trading as Sha-Po Manufacturing Company, 185 Mercer St., New York, in which he agrees to discontinue certain representations in the sale of hats and caps.

The respondent agrees to cease representing that hats and caps which are composed in whole or in part of used or second-hand materials are new or are composed of new materials by failure to stamp on the sweatbands in conspicuous and legible terms which cannot be removed or obliterated without mutilating the sweatbands, a statement that such products are composed of second-hand or used materials, provided that if sweatbands are not affixed to the hats or caps, then such stamp must appear on the bodies of the hats or caps in conspicuous and legible terms which cannot be removed or obliterated without mutilating the bodies. (2879)

Washington Furniture Mfg. Co.—L. Kenneth Schoenfeld, trading as Washington Furniture Manufacturing Company, 1964 Fourth Ave., South, Seattle, Wash., agrees to cease selling, offering for sale, or supplying to his customers for resale, any products marked with prices which are in excess of the prices for which such products are sold in the usual course of trade. (2881)
THE WEEK IN WASHINGTON

The NAB won an outstanding victory for the broadcasting industry this week when the U. S. Circuit Court of Appeals in New York decided that broadcasters had the right to broadcast phonograph records without a license. (p. 4465.)

Both CBS and NBC have urged advertising agencies and band leaders to start using music that the networks will be able to broadcast after December 31. Both networks likewise have told their affiliates that they intend to make no deal with ASCAP that would work to the disadvantage of affiliates. (p. 4468.)

ASCAP's request to send a speaker to the NAB convention followed repeated refusals to talk to the NAB about a new contract. (p. 4472.)

Neville Miller urged the FCC to simplify its new FM application Form 319 with the industry's cooperation. (p. 4473.)

Representative Dingell (D-Mich.) introduced a resolution to make August 26 "National Radio Day." (p. 4474.)

Five hundred fifty-seven stations join in the search for man power for the National Defense Program. (p. 4474.)

The FCC announced that briefs in connection with its network investigation must be filed before September 15. (p. 4476.)

NAB WINS PHONOGRAPH RECORD DECISION

The NAB won an outstanding victory for the broadcasting industry this week when the U. S. Circuit Court of Appeals in New York decided that broadcasters have the right to play phonograph records without a license.

Retaining special counsel for this test case, the NAB went to bat for Station WNEW, New York City, and the industry in a suit brought by the RCA Manufacturing Company, Inc., and Paul Whiteman.

Judge Learned Hand handed down the decision July 25. It was a notable victory for the entire industry as well as WNEW.

The text of the decision:

UNITED STATES CIRCUIT COURT OF APPEALS FOR THE SECOND CIRCUIT

No. 357—October Term, 1939
(Argued June 17, 1940; Decided July 25, 1940)

RCA MANUFACTURING COMPANY, INC., Plaintiff,
against
PAUL WHITEMAN, W.B.O. BROADCASTING CORPORATION, AND ELIN, INC., Defendants.

On appeals by the RCA Manufacturing Company, Inc., W.B.O. Broadcasting Corporation, and Paul Whiteman from a judgment of the District Court for the Southern District of New York, in an action for an injunction forbidding the broadcasting of phonograph records.

Before:

L. Hand, Clark and Patterson, Circuit Judges.

"Crawford & Sprague, of New York City (White & Case, Joseph M. Hartfield and Stuart Sprague, all of New York City, of counsel), for W.B.O. Broadcasting Corporation;

"David Mackay, of New York City (David Mackay, Lawrence B. Morris and Jerome H. Adler, all of New York City, of counsel), for RCA Manufacturing Company, Inc.;

"Maurice J. Speiser, of New York City (Herbert R. Speiser and Nathan Bass, both of New York City, of counsel), for Paul Whiteman."

L. Hand, C.J.:

This case comes up upon appeals by the plaintiff, RCA Manufacturing Company, Inc., and the defendants, Paul Whiteman and (Continued on page 4466)

YOU CAN'T AFFORD TO MISS THE NAB CONVENTION!

St. Francis Hotel San Francisco August, 4-5-6-7
NAB WINS PHONOGRAPH RECORD DECISION
(Continued from page 4465)

W.B.O. Broadcasting Corporation. Before the action was brought Whiteman had filed a complaint against W.B.O. Broadcasting Corporation and Elin, Inc., to restrain the broadcasting of phonograph records of musical performances by Whiteman's orchestra. By order of court RCA Manufacturing Company, Inc., then filed the complaint at bar, in behalf of Whiteman, asking the same relief against W.B.O. Broadcasting Corporation and Elin, Inc., as Whiteman had asked in his action, and in addition asking that Whiteman be adjudged to have no interest in the records of his performances, because of contracts between him and itself. Whiteman thereupon discontinued his action, leaving only the ancillary proceedings of course. The dispute is as to whether W.B.O. Broadcasting Corporation, as the publisher of phonograph records prepared by RCA Manufacturing Company, Inc., of Whiteman's orchestral performances, may broadcast them by radio. Whiteman's performances took place in studios of RCA Manufacturing Company, Inc., which arranged for their reproduction upon ordinary phonographic disc records, and which, with the consent of Whiteman, sold the records to the public at large. Of the nine records here in question five were sold between November, 1932, and August 15, 1937, during which period every record bore the legend: "Not Licensed for Radio Broadcast". (Apparently the four earlier records did not advise the purchaser of any such limitation.) After August 15, 1937, this notice was changed to read as follows: "Licensed by Mfr., under U. S. Pats. 1625705, 1637544, RE. 16388 & other Pats. Pending" Only For Non-Commercial Use On Phonographs in Homes. Mfr. & Original Purchaser Each Agree This Record Shall Not Be Resold Or Used For Any Other Purpose. See Detailed Notice on Envelope." These later records were inclosed in envelopes which even more clearly gave notice of the same limitations. W.B.O. Broadcasting Corporation every week bought from a New York company, Bruno-New York, Inc., such records as it needed; it used them thereafter to broadcast over its radio system. Bruno-New York, Inc., had bought the records in question under a contract with RCA Manufacturing Company, Inc., in which they agreed after its date (August 9, 1937) to resell "only for non-commercial use on phonographs in homes as per the notice appearing on the record labels and envelopes." It may be assumed that W.B.O. Broadcasting Corporation is charged with notice of the terms of the contracts, and with the contract of Bruno-New York, Inc., and that it broadcasts them on its radio system in disregard of both.

The questions raised below were whether Whiteman and/or RCA Manufacturing Company, Inc., had any musical property at common-law in the records which radio broadcasting invaded; whether Whiteman had passed any rights which he may have had to RCA Manufacturing Company, Inc., under certain agreements, not necessary to be set out; and whether, if either Whiteman or RCA Manufacturing Company, Inc., had any such common-law property, the legends and notice enabled them, or either of them, to limit the use which the buyer might make of the records. The judge held that all of Whiteman's rights had passed to RCA Manufacturing Company, Inc., which for that reason was entitled to enjoin the broadcasting of these records; and that Whiteman was also entitled to an injunction against W.B.O. Broadcasting Corporation because it was unfair competition to broadcast his performances without his consent. All parties appealed except Elin, Inc. The RCA Manufacturing Company, Inc., appealed because the judge did not recognize its common-law artistic property, arising out of the skill and art necessary to obtain good recording, and also because of the affirmative relief granted to Whiteman. Whiteman appealed because of the holding that he had lost all his rights to RCA Manufacturing Company, Inc., under its contracts with him. W.B.O. Broadcasting Corporation appealed because any relief was granted against it. It is only in comparatively recent times that a virtuoso, conductor, actor, lecturer, or preacher could have any interest in the reproduction of his performance. Until the phonographic record made possible the preservation and reproduction of sound, all audible renditions were of necessity fugitive and transitory; once uttered they died; the nearest approach to their reproduction was mimicry. Of late, however, the power to reproduce the exact quality and sequence of sounds has become possible, and the right to do so, exceedingly valuable; people easily distinguish, or think they distinguish, the rendition of the same score or the same text by their favorites, and they will pay large sums to hear them. Hence this action. It was settled at least a century ago that the monopoly of the right to reproduce the compositions of any author—his "common-law property" in them—was not limited to words; pictures were included. Turner v. Robinson, 10 Ir. Ch. 121; S. C. 10 Ir. Ch. 522; Prince Albert v. Strange, 1 M. N. & G. 25. This right has at times been stated as though it extended to all productions demanding "intellectual" effort; and for the purposes of this case we shall assume that it covers the performances of an orchestra conductor, and—which is far more doubtful—the skill and art by which a phonographic record maker makes possible the proper recitation of those performances upon a disc. It would follow from this that, if a conductor played over the radio, and if his performance was not an abandonment of his rights, it would be unlawful without his consent to record it as it was received from a receiving set and to use the record. Arguedo, we shall also assume that such a performance would not be an abandonment, just as performance of a play, or the delivery of a lecture is not; that is, that it does not "publish" the work and dedicate it to the public. Ferris v. Frohman, 223 U. S. 424, 435; Nutt v. National Institute, 31 Fed. (2d) 256 (C.C.A. 2); McCarthy v. White, 259 Fed. Rep. 364; Uproar Co. v. National Broadcasting Co., 8 Fed. Suppl. 358. Nevertheless, even if Whiteman's "common-law property" in his performances survived the sale of the records on which they were inscribed, it would be very difficult to see how he, or a fortiori the maker of the records, could impose valid restrictions upon their resale. Concededly that could not be done (regardless of the present statutory prohibition) if the restriction went to the resale price. Bobby-Merrill Co. v. Stras, 210 U. S. 339. It would also have been impossible if the restriction forbade the buyer to use the article except with other articles bought of the record maker. Motion Picture Patents Co. v. Universal Film Co., 243 U. S. 502. We do not, however, have that question to decide, for we think that the "common-law property" in these performances ended with the sale of the records and that the restriction did not save it; and that if it did, the records themselves could not be clogged with a servitude. Copyright in any form, whether statutory or at common-law, is a monopoly; it consists only in the power to prevent others from reproducing the copyrighted work. W.B.O. Broadcasting Corporation has never invaded any such right of Whiteman; they have never copied his performances at all; they have merely used those copies which he and the RCA Manufacturing Company, Inc., made and distributed. The putatively protected performances were themselves intended for that purpose and for that alone; the situation was precisely the same as though Whiteman and RCA Manufacturing Company, Inc., had combined to produce an original musical score and inscribe it upon records. The records at bar embodied Whiteman's "common-law property"—his contribution as a conductor—in precisely the same way that the record of such a score would embody his composition. Hence the question is no different from whether he might disseminate a musical score to the public at large, but impose a limitation upon it that buyers
should not use it to broadcast for profit. Whatever might be said of that—if the sale were not a "publication"—it will hardly be argued that if it was a "publication" in the sense that that destroys the "common-law property", the restriction upon the use of the record would be valid notwithstanding. Restrictions upon the uses of chattels once absolutely sold are at least prima facie invalid; they must be justified for some exceptional reason, normally they are "repugnant" to the transfer of title. If "the common-law property" is in a record which one has sold, then anyone may copy it who chances to hear it, and may use it as he pleases. It would be the height of "unreasonableness" to forbid any uses to the owner of the record which were open to anyone who might choose to copy the rendition from the record. To revert to the illustration of a musical score, it would be absurd to forbid the broadcast for profit of its record, if any hearer might copy it and broadcast the copy. Thus, even if Whiteman and RCA Manufacturing Company, Inc., have a "common-law property" which performance does not end, it is immaterial, unless the right to copy the rendition from the records was preserved through the notice of the restriction.

As applied to books, where the problem is precisely the same, there is not very much law as to whether such restrictions prevent complete dedication, but the judges who have passed upon the question have declared, at times with much certainty, that they are nugatory. In 1896 the Court of Appeals of New York flatly so decided in Jewellers Mercantile Agency v. Jewellers Publishing Co., 155 N. Y. 241, and that is the leading case. Judge Putnam had held the same in 1896 (Ladd v. Oxnard, 75 Fed. Rep. 703, 730) and he was followed by Judge Townsend (Larrobe-Loissette v. O'Loughlin, 88 Fed. Rep. 896), Judge Lacombe (Wagner v. Conried, 125 Fed. Rep. 798) and Judge Ward (Savage v. Hoffman, 159 Fed. Rep. 584). In his dissenting opinion in International News Service v. Associated Press, 248 U. S. 215, 256, Mr. Justice Brandeis said, "It is quite true that if "publication" were merely a priori any continuance of their control over the activities of the public to which they have seen fit to dedicate the larger part of their talents and resources (rather than upon them all civilization is built, may never be "owned". Otherwdse it would be possible, at least temporarily, that conduct is a tort which Whiteman could enjoin. That radio announcers declare, directly or indirectly, that the broadcast of the records; and W.B.O. Broadcasting Corporation is free to buy and use them in entire disregard of any attempt to do so. It picture the news which the plaintiff had collected at its own expense. In spite of some general language it must be confined to that situation (Cheney Bros. v. Doris Silk Corp., 35 Fed. (2) 281); certainly it cannot be used as a cover to prevent competitors from ever appropriating the results of the industry, skill, and expense of others. "Property" is a historical concept; one may bestow much labor and ingenuity which injures only to the public benefit; "ideas", for instance, though upon them all civilization is built, may never be "owned". The law does not protect them at all, but only their expression; and how far that protection shall go is a question of more or less; an author has no "natural right" even so far, and is not free to make his own terms with the public. In the case at bar it White-

man and RCA Manufacturing Company, Inc., cannot bring themselves within the law of common-law copyright, there is nothing to justify a priori any continuance of their control over the activities of the public to which they have seen fit to dedicate the larger part of their talents and resources (rather than upon them all civilization is built, may never be "owned". Otherwdse it would be possible, at least temporarily, that conduct is a tort which Whiteman could enjoin. That radio announcers declare, directly or indirectly, that the broadcast of the records; and W.B.O. Broadcasting Corporation is free to buy and use them in entire disregard of any attempt to do so. It picture the news which the plaintiff had collected at its own expense. In spite of some general language it must be confined to that situation (Cheney Bros. v. Doris Silk Corp., 35 Fed. CBS, NBC Urge Agencies to Join Music Battle

Both the Columbia Broadcasting System and the National Broadcasting Company have urged advertising agencies and band leaders to start using music that the networks will be able to broadcast after next December 31.

Both networks likewise have told their affiliates that they intend to make no deal with ASCAP that would work to the disadvantage of affiliates. Broadcasters are urged to read every word of the following six letters which clearly state the networks' position.

NBC to Agencies

NATIONAL BROADCASTING COMPANY, INC.

RCA Building, Radio City
New York, N. Y.

July 23, 1940.

I am sure you are familiar with the situation which has recently arisen between the National Broadcasting Company and ASCAP (The American Society of Composers, Authors and Publishers). There are, however, some important facts regarding the matter which I am anxious for you to get first hand.

NBC's license agreement with ASCAP covering the use of its music for broadcasting purposes expires on December 31, 1940. ASCAP has offered to renew our licenses, but only on terms which we considered to be exorbitant. Such a move would add materially and unfairly in our opinion to the cost of broadcast advertising and broadcasting operation. After serious consideration we have definitely decided we cannot accept these terms. Therefore, without an ASCAP license NBC will be unable to broadcast their music after December 31, 1940.

There will be available for use by all NBC advertisers on programs broadcast over NBC networks or M&O stations, the catalogues of Broadcast Music, Inc., Associated Music Publishers, G. Ricordi & Co., Milan, Society of European Stage Authors and Composers (SESAC), A. P. Schmidt Co., E. C. Schirmer Music Company, Society of Jewish Composers, Publishers and Song Writers and other concerns and individuals. Likewise, there is music available in the public domain which can be arranged from the original sources.

It is obviously important, therefore, for all of us to lay our plans now covering the operating conditions which will exist after the end of this year.

In order to avoid possible copyright infringements we recommend that advertising agencies and their clients make an immediate study of their program music problems. Particular care should be taken to check signatures and theme music presently used on your programs to make sure that such music can be broadcast by NBC after the end of the year. We feel that there is much that can be done immediately to accustom yourselves to the new situation which will be in effect on January 1st, 1941. For example, you may want to instruct your orchestra leaders to commence using in the body of your NBC programs music which NBC will be licensed to broadcast.

This problem will involve not only the NBC network shows but also the local programs, whether live or electrically transcribed, which are broadcast over NBC managed and operated stations. We suggest that if you now have any such programs, or contemplate them in the future, that you check carefully material incorporated in them. Many advertisers who already have on hand electrical transcriptions or who make them before the first of the year may contemplate their use on NBC M&O stations after January 1st. Obviously, such records should be carefully checked to be sure that all musical material will be licensed for broadcast.

It is, of course, impossible to cover in this letter all of the many questions which will arise regarding the new operation and specific problems which may come up. A complete understanding of the changes involved is essential so that we will all be prepared to successfully continue our operations after December 31, 1940.

This is a common problem and it is important that everyone affected give every consideration to its solution.

Cordially yours,

(Signed) Niles Trammell.

NBC to Affiliates

NATIONAL BROADCASTING COMPANY, INC.

RCA Building, Radio City
New York, N. Y.

July 17, 1940.

The current licenses held by NBC for the performance of ASCAP music will expire on December 31, 1940. ASCAP has refused to renew such licenses except upon terms which are so onerous that we have concluded that we cannot accept them.

As you have doubtless noted from the plan of licensing which ASCAP proposes to impose upon broadcasters, NBC would be required to pay ASCAP 71/2% of the gross amount paid for the use of the broadcasting facilities of the stations over which a network program is broadcast. While the license fees payable by NBC on network business under this plan would vary from year to year, it is sufficient to point out that had the plan applied to 1939 income, NBC would have had to pay to ASCAP fees 5 or 6 times greater than those which it is now paying. This is so exorbitant as to be completely unacceptable.

In rejecting ASCAP's demand, we have given careful consideration to the interests of our affiliates as well as the network. Although the new ASCAP plan of licensing would result in decreased payments by many stations so far as their personal licenses covering only local and national spot programs are concerned, it would require vastly increased payments for NBC network programs. NBC obviously cannot itself bear an increase of 500% or 600% in its payments to ASCAP. The increased cost would, therefore, have to be passed on and the additional burden would seriously affect NBC affiliates. We are not going to make any deals which put an unfair financial burden on NBC affiliates, having in mind the additional expenses which are necessarily being incurred at the present time as the result of the position now taken by ASCAP. We have, of course, no intention of making any arrangement which would benefit NBC at the expense of its affiliates.

Without an ASCAP license, it will be necessary for NBC to discontinue playing ASCAP music as of December 31, 1940. We are actively supporting the efforts of Broadcast Music, Inc., to enlarge its catalog of music. In addition, NBC is working to make available for use, after the expiration of our current licenses, as much music as we possibly can. Having in mind the difficulties attendant upon an abrupt elimination of ASCAP music, we are taking steps at this time to increase the use on NBC programs of music which we will be licensed to perform beyond December 31, 1940, in order to effect a gradual transition.

Despite the difficulties which are inevitable, broadcasting will continue as usual.

Sincerely,

(Signed) Niles Trammell.
On December 31, 1940, the license agreements between NBC and ASCAP expire. ASCAP has refused to renew them except on terms which are so onerous that we have concluded that we cannot accept them. Without a license it will be necessary for NBC to discontinue playing ASCAP music commencing with the first of next year.

That means that a large part of the popular music which NBC has been using in the past will be unavailable for its use after December 31st, and it is obvious that we must now begin to accustom ourselves and NBC artists to the use of such music as will be available to us after that date.

With this in mind we are taking steps to increase the use on NBC studio sustaining programs of music which we are licensed to perform beyond December 31, 1940. Among the catalogues which are available for use on NBC programs subsequent to that time are those of Broadcast Music, Inc., Associated Music Publishers, G. Ricordi & Co., Milan, Society of European Stage Authors and Composers (SESAC), A. P. Schmidt Co., E. C. Schirmer Music Company, Society of Jewish Composers, Publishers and Song Writers and other concerns and individuals. Likewise, there is music available in the public domain which can be arranged from the original sources.

It is now essential that we increase the use of such music on all NBC programs including our remote control sustaining shows, and commencing July 31, 1940, the policy of NBC will be that all orchestras broadcasting on NBC sustaining programs shall schedule at least one such composition during each of their NBC broadcast periods. The use of such music will necessarily have to be increased as December 31st approaches.

We also suggest, however, that leaders of orchestras broadcasting over NBC make a study of their signatures, having in mind that after December 31, 1940, they will be unable to broadcast over NBC the ones they are currently using if they are in the ASCAP repertoire. It would appear advisable for orchestras which expect to broadcast over NBC subsequent to that time to consider changing their signatures now to numbers which they will unquestionably be able to use next year.

You will note that among the catalogues we will continue to be licensed to use is Broadcast Music, Inc. NBC proposes to popularize the music of BMI by using it wherever it can and we particularly ask your cooperation in this endeavor.

We cannot overemphasize the importance of being prepared in advance to meet the situation which will exist after December 31, 1940. In addition to the problem, NBC has of maintaining proper balance in musical programs, the purely clerical task of checking the availability of music which you may wish to play after the first of the new year will require the training of personnel to handle the additional burden. A gradual start in that direction will be service not only to us but to orchestras and advertisers as well. If our Music Department can be of assistance to you in solving the problems caused by this situation, please do not hesitate to call upon us.

Sincerely,

(Signed) Niles Trammell.
steps last fall to implement their supply of non-ASCAP music through the organization of Broadcast Music, Inc. Over 300 stations, representing approximately 34 of the entire business done by the industry, have together with the networks, contributed over $1,270,000 to BMI. The primary purpose of this organization is the promotion of the writing of new music and lyrics by giving opportunities to new composers and authors. Broadcast Music, Inc. has now achieved the stature of an outstanding music publishing organization and has attracted talented composers and writers heretofore excluded from the ASCAP inner circle.

BMI is now turning out popular tunes with "hit" potentialities and at the present rate will have 300 popular numbers by the end of the year.

Four of these recently climbed up into the 20 most popular hits as listed by "Variety." BMI is also releasing non-ASCAP arrangements of the most popular public domain music and should have over 1,000 of these available for use by December 31st.

2. Drastic drop in ASCAP music on sustaining programs.

Since April, the use of ASCAP music on Columbia sustaining programs (over 200 quarter-hours per week) has been reduced by 33 7/5%. This has meant the substitution of hundreds of non-ASCAP numbers in our musical selections. This has been effective without the slightest deterioration of any program and without loss of any audience appeal.

3. No special "ASCAP-credits."

Beginning in May on all remote pick-ups of dance bands, CBS eliminated all restricted ASCAP numbers which required special credits.

4. Non-ASCAP numbers on name-band pick-ups.

Effective August 5th, all remote dance bands will be required to include at least one non-ASCAP number. From this start the proportion of non-ASCAP numbers will be steadily increased.

5. Music on its own merit.

Perhaps still more significant to those who know the "high-pressure side" of the music business—Columbia has closed its doors to the professional song pluggers who know that the success of a new number is often in direct proportion to the amount of money appropriated by the Publisher for plugging it on the networks.

We are, you will see, in full stride on making the transition from ASCAP music to non-ASCAP music. Nor are we dependent only on BMI for rich sources of material. The fact is that the potential reservoir of non-ASCAP music is, of course, much larger than the reservoir of ASCAP music. In addition to the music made available through BMI, Columbia has the following supplies of non-ASCAP music:

Music controlled by the Society of European Stage Authors and Composers (SESAC), including the library of A. P. Schmidt Co.
Music controlled by G. Ricordi & Co. (Milan).
Music controlled by the Society of Jewish Composers, Publishers and Song Writers.

Special library arrangements of public domain music, as well as music available under special licenses from individual music publishers not members of ASCAP.

Even a superficial study of the question indicates that ASCAP has been able to throttle broadcasters and advertisers largely because of the unintended cooperation of program builders and the activities of ASCAP song pluggers.

Reduced to its plainest terms, only one thing is needed between now and January 1st to free radio broadcasting from ASCAP's $4,409,000 squeeze-play. This thing is the determination of radio advertisers that they will popularize only the music which will continue to be available to them after December 31, 1940. And that can be accomplished very simply—just by playing this music on the air on commercial programs. If the transition to non-ASCAP music is begun at once, virtually every hit tune in America should lie outside of ASCAP's clutch before January 1.

There have been important issues in radio broadcasting before now in which the interests of radio advertisers and of radio broadcasters were identical. We think it will be evident that there has never been an issue which compares in importance with this one, nor on which the self-interest of our clients and ourselves was so clearly the same.

Members of the CBS sales and service staffs will be at the disposal of each CBS client to facilitate the handling of individual programs during this transition period.

Sincerely,

The Columbia Broadcasting System.

Office of the Executive Vice President

Edward Klauber

July 18, 1940.

The form of the ASCAP contract which has now been submitted to broadcasters is more burdensome than expected, even when viewed in the light of the "demands" made by ASCAP last March. The NAB has made an analysis of the "single station" proposal which was published in the NAB Reports and we have analyzed the "network" proposal. Neither proposal gives the broadcaster any assurance of substantial availability of music as heretofore. Furthermore, the base on which payments are to be computed is substantially broadened, thus tending to dissipate the widely heralded savings to individual stations.

When the ASCAP demands were delivered to the broadcasters last March, we wrote you that Columbia had no intention of acceding to such demands, and advised you that there was then no present possibility that ASCAP music would be heard on the Columbia network after December 31st.

Nothing has happened in the meantime to induce us to change our decision. On the contrary, the wisdom of our decision has been further proved by two developments—first, the intolerably onerous and inequitable provisions in the proposed ASCAP contracts, and second, the definite promise of an increasingly adequate alternate supply of music through BMI.

You realize that any development which adds substantially to the expenses or burdens of network broadcasting operates to the ultimate detriment of both network and affiliate, whether imposed in the first instance on the one or the other. As pointed out in our letter of April 2, without network plugging of ASCAP tunes, the value of an ASCAP license to any station will be greatly diminished. Accordingly, it must be apparent to anyone who has studied the music problems facing our industry that the ASCAP tactics cannot succeed as long as the networks do not play ASCAP music.

We want to repeat that we are in this fight to the finish, not only in the interests of ourselves but in the interests of affiliates and advertisers and that, as a network and for our owned and operated stations, we will go along with any plan, to be worked out through the BMI set-up, for the continuance of its operations and the enlargement of the music available to broadcasters. Further, in order to answer any questions by affiliates as to a possible deal with ASCAP in the unlikely event that ASCAP modifies its present intolerable proposals, our position is that we have no intention of accepting such modifications unless the deal is economically feasible for both networks and affiliates and also is acceptable to representatives of affiliates. We feel that our own best interests, as well as the best interests of our affiliates, can best be served by adhering to this position.

Sincerely yours,

The Columbia Broadcasting System.
CBS to Band Leaders

COLUMBIA BROADCASTING SYSTEM, INC.
485 Madison Avenue, New York
Wickerson 2-2000
Office of the Vice President in Charge of Operations
Lawrence W. Lowman
July 23, 1940.

On account of the present situation existing with respect to performing rights in musical compositions controlled by ASCAP, with which band leaders and members are familiar, Columbia is proceeding with its plans for the gradual and complete elimination of ASCAP controlled music from its network. As you know, our license with ASCAP expires December 31, 1940, and, because of the impossible demands which ASCAP has made upon us, we do not expect that any ASCAP controlled music will be broadcast over our network after the end of this year.

We have already taken steps achieving a substantial reduction in performances of ASCAP music on our studio sustaining programs. It is now necessary that we reduce ASCAP controlled music in other fields, including remote pick-up dance programs. Accordingly, effective August 5, 1940, each remote pick-up dance band broadcast by Columbia will be required to schedule and play one non-ASCAP number for each one half hour of broadcasting time. In case of dance bands with programs of fifteen minutes, this means that a non-ASCAP number must be scheduled and played on every other program.

This is the minimum requirement for the time being, and naturally many bands will see that it is to their best interests to exceed this minimum as quickly as possible. Within a short time and from time to time, we expect to increase the requirements for the performance of non-ASCAP numbers so that substantially in advance of the end of the year remote pick-up dance bands will be broadcasting no ASCAP controlled music. We will try to effect this switch-over as gradually and with as little inconvenience as possible. In this connection, bands should take steps at this time to adopt signature numbers not under ASCAP control so that there will be no question as to the use of signatures by bands after the end of the year.

Several sources of non-ASCAP music are at present available and these include special arrangements of public domain music and selections from catalogs of copyrighted music not controlled by ASCAP. Among the latter, Broadcast Music, Inc., has now available in excess of fifty new popular tunes which are available in standard orchestrations.

Our music librarian will be happy to cooperate with band leaders in making available to them titles and copies of numbers which are not controlled by ASCAP. Mr. Roy Passman of our Program Department will be glad to give you such additional information as you may desire.

Sincerely yours,
The COLUMBIA BROADCASTING SYSTEM.

BMI Developments

The first BMI song to appear on a phonograph record for general retail sale will be available in the record shops on August 2. It is Ray Herbeck's recording of What Good’s the Moon for Okeh Records—Okeh 5659.

Other records of BMI numbers from Okeh, Columbia, and Victor are scheduled for the near future.

BMI FEATURE TUNES
August 5-12

1. THE SAME OLD STORY
2. PRACTICE MAKES PERFECT
3. MADAME WILL DROP HER SHAWL
4. SWINGIN' AT THE SEANCE

BMI has appointed Jimmy Cairns as Professional and Sales representative in the mid-west with headquarters in Chicago and Harry Hume in the same capacity on the Pacific Coast with offices in Los Angeles. Additions have also been made to the professional staff in the New York offices.

An open market for music—so that broadcaster and advertiser will have an opportunity to choose what music they wish to play rather than be forced by economic necessity to pay for and popularize the music of a single group of publishers—the ASCAP group—is the ultimate aim of the broadcasters’ battle to free the air of monopoly, Sydney M. Kaye, vice president and general counsel of Broadcast Music, Inc., told a group of representatives of advertising agencies at a luncheon held July 31st at BMI at the Hotel Waldorf Astoria. The luncheon was attended by radio program directors, account executives, and officers from virtually all of the leading agencies. After his talk Mr. Kaye answered questions relative to the use of the music which will be available for broadcasting after the first of the year when the current ASCAP contracts expire.

“Under the proposed ASCAP contracts,” said the speaker, “the radio industry is being asked to pay eighty times as large a percentage of its revenue for music as ASCAP is now receiving from another industry. We are confronted with a demand for approximately $45,000,000 or $9,000,000 a year for the next five years, and for this we have no guarantee whatsoever as to what music will be available. It is manifestly impossible for the industry to absorb such exorbitant demands which are equal to a 100 per cent increase for the industry and, for example if applied to the networks would absorb their combined profits. It is obviously in the interest of the advertiser and advertising agency to protect themselves from such exorbitant increase in costs; to protect their programs from sudden change by substituting now the music which radio will be licensed to play after January 1, 1941, and in opening the door to creative talent struggling for an opportunity to be heard over the air. We urge them to call on the services of Broadcast Music, radio’s own music enterprise, to solve their musical problems.

“The entire future of radio and radio advertising is
threatened,” said the BMI executive, “unless the advertiser can obtain competitive market for music just the same as he had for everything else that enters into the advertising business. If radio advertisers are willing to go through a short period of readjustment of the musical content of their programs there is no doubt in my mind but that they can obtain an open market for music at reasonable cost. The United States is the only country in the world where such a music situation exists and I am sure it will not exist for long here when the people are acquainted with the facts. There is no objection to a performing rights society in principle but it ought to be a democratic organization open to all who can create music and where payment is made in precise ratio to the utilization of the creator’s work and not offer a contract which produces monopoly. Such a society needs only a staff of accountants to properly allocate the proceeds from users of music.

“The radio industry does most emphatically not want music for nothing. It is currently paying at the rate of $5,000,000 a year and we want to see this money go to those who deserve it after the American public has had an opportunity to hear the music from all talented composers and is not required to select its favorites from just a few.”

Mr. Kaye pointed out that the task was not as difficult as it seemed, as a breakdown of radio performance indicated that 388 popular tunes accounted for 47 per cent of the music time on the air and 2500 tunes for 83 per cent. ASCAP music on sustaining programs has been materially reduced to date, without any apparent diminution in interest, he added.

Broadcast Music, Inc., he said in answer to a question, will grant full indemnity to any advertising agent, advertiser or performer who uses numbers from its catalogue. This differs, he explained, from the ASCAP contract which grants a limited indemnity to broadcaster and none at all to advertiser or agency.

In concluding he asked the agencies to select coordinators to work with music specialists at Broadcast Music and at the radio stations in solving the difficulties incidental to the change of theme songs, background music, music of secondary appeal and music of primary appeal.

to Mr. Paine’s request for a place on the convention program.

Every broadcaster will read with great interest the following exchange of correspondence:

AMERICAN SOCIETY OF COMPOSERS, AUTHORS AND PUBLISHERS
Thirty Rockefeller Plaza
New York City

Mr. Neville Miller, President
National Association of Broadcasters
Normandy Building
1626 K Street, N. W.
Washington, D. C.

MY DEAR MR. MILLER:

The interest shown by your members in the new ASCAP contract, is keenly appreciated by this Society. It indicates to us that the entertainment, cultural, and educational values of music, and its contribution to the progress of radio, is at long last being realized.

In view of this awakened appreciation of music, I believe it will interest the members of your organization who are going to attend your forthcoming Convention, to get some first-hand facts about the plans, purposes and policies of ASCAP, and its desire to contribute to the advancement of radio, particularly as they affect the Public Interest.

We therefore would be pleased to send a representative to San Francisco, at our expense, to address your Convention.

I would greatly appreciate hearing from you at your earliest convenience, so that our speaker can be fully prepared to present a paper worthy of the importance of the occasion.

With all good wishes for the success of your Convention, please believe me to be,

Cordially yours,

AMERICAN SOCIETY OF COMPOSERS, AUTHORS AND PUBLISHERS,
John G. Paine.

NATIONAL ASSOCIATION OF BROADCASTERS
Normandy Building, 1626 K St. N. W.
Washington, D. C.

July 17, 1940.

Mr. John G. Paine, General Manager
American Society of Composers, Authors and Publishers
30 Rockefeller Plaza
New York City
DEAR MR. PAINE:

I have your letter requesting time on the NAB Convention Program. We appreciate your interest in our Convention, and willingness to send an ASCAP representative at your expense to San Francisco, all of which confirms our opinion that the NAB Convention is a most important meeting for broadcasters and will be attended by representative broadcasters from all parts of the country.

I regret that the interest of your Society in the NAB, and your recognition of the fact that it represents the radio industry, comes at such a late date. When I assumed the Presidency of the NAB, I called upon you and the other Officers of your Society, and did all in my power to effect a working arrangement between our two groups, so that the terms of renewal of the present contracts could be discussed by representatives of our groups on a business basis, which would have been mutually advantageous to all concerned. You will recall that I appointed a committee of broadcasters who came to your office a number of times, but our efforts were

ASCAP Asks Place On Convention Program

ASCAP’s request to send a speaker to the NAB convention followed repeated refusals to talk to the NAB about a new contract.

Neville Miller pointed this out to John G. Paine, ASCAP’s general manager, in a recent letter in response
thwarted by the refusal of your President to appoint a committee to meet with the broadcasters, even though your Board of Directors had authorized the appointment of such a committee.

Your present contract was drawn up behind closed doors; the broadcasters, from whom you receive approximately two-thirds of your entire revenue, were not consulted regarding its terms; and, you will recall, that when the contract was made public, the NAB was intentionally ignored, and not invited to your meeting.

However, in spite of this attitude on the part of ASCAP, the broadcasters have always been glad to extend every courtesy to your Society, and, as you know, your Mr. Claude Mills has addressed a number of our District meetings. Unfortunately, our program for this coming Convention has been completed for some weeks, and due to recent developments in the radio field, our schedule is very crowded and it is impossible now to include any additional speakers.

In your letter you state that NAB members have shown an interest in the new ASCAP contract. Such interest is natural, but I am positive has been misinterpreted by ASCAP. Broadcasters have long been keenly aware of the value of music and its importance, not only to radio, but in the cultural life of our country. Broadcasters would like to be able to stimulate the creative musical interests of this country, but ASCAP's new contract is merely an attempt to perpetuate the ASCAP monopoly, and to extract for its relatively few members the money which should be divided among all writers, according to their talents and the use of their music.

ASCAP's policy has done more to retard music progress in this country than any other factor, and broadcasters are bitterly opposed to the continuation of this policy.

Broadcasters are interested further in your contract because of the splendid music written by the members of your Society, and would like to continue to use this music, but they are unwilling to contribute all the funds available for the purchase of music to the comparatively few members of your Society and close the door upon the meritorious music of the many young writers who previously have been prevented by the ASCAP contract from finding an audience for their works.

Our industry at this moment pays forty times as much for each dollar of its gross revenue as any other industry which does business with your Society, and not being content with that, you now demand we pay eighty times as much and increase our payments from approximately $4,500,000 to almost $9,000,000.

The interest of broadcasters in your contract is accompanied by the strongest condemnation of its terms, and resentment of the injustice which your Society is trying to impose upon the industry by virtue of your present monopolistic power. That interest has not caused any broadcaster to sign your contract, but rather has caused representative broadcasters, who pay over two-thirds of the money your Society receives from all broadcasters, to establish Broadcast Music, Inc., as a means to introduce to the American public the meritorious music of many young writers and to give broadcasters the right to purchase music in a free competitive market the same as they purchase other requirements.

The basic principles in which broadcasters are interested were known to you at the time your new contract was drawn. I believe recognition of these principles and a more cooperative approach would have made any explanation of the contract unnecessary.

Cordially yours,

Neville Miller,
President.

Federal Communications Commission
Washington, D.C.

Gentlemen:

We recognize that the Commission has both the right and the obligation under the Communications Act to elicit information regarding an applicant's legal, technical and financial qualifications to operate a broadcast station in the public interest, and in this connection we offer the NAB's fullest cooperation in the development of methods whereby this information may be secured most efficiently.

However, our study of recent revisions of the FCC license application forms and particularly the new form No. 319 for frequency modulation stations indicates that an excessive burden is imposed on applicants by these forms.

Without attempting an exhaustive analysis of any of the Commission's forms, we may direct your attention to such questions as 12 (d), (e) and (f) on Form 319. We assume the purpose of these questions is to cast some light upon the applicant's character and reputation. As phrased, however, they require the submission of certified copies of judgments and decrees arising out of such proceedings as traffic violations, probate matters, divorce actions, and probably even proceedings before the FCC not merely for the applicant but for officers, directors and stockholders of corporate applicants. The task of preparing responses to questions of this sort on behalf of corporate applicants appears to us to necessitate a volume of work not commensurate with the value of the information to the Commission.

Under Question 16 (c) the applicant is required to submit the names and addresses of any "relatives", present or former "associates" of applicant, or, if applicant is other than an individual, of any stockholder, station manager, officer, member of the governing board, director or principal stockholder who have any interest in the application or in any other radio broadcasting station. Is the word "relative" intended to include those related by affinity as well as by consanguinity, and in any event, to what degree of relationship? What is meant by associates? The word "former" in the phrase "former associates", as well as the phrase "has had" appearing in Question 16 (a), are likewise burdensome in the case of corporations having officers, directors and stockholders with extensive business interests extending over many decades since they imply no limitation as to time.

In view of ambiguities of this sort appearing in these application forms, applicants are unable to supply intelligent answers regardless of the amount of effort they devote to the preparation of these forms.

We respectfully suggest that the Commission designate appropriate personnel from its staff to confer with representatives of the NAB in an effort to simplify these forms while retaining their efficacy. Informal conferences on similar matters in the past have produced results that were mutually satisfactory and of definite benefit to the broadcasting industry. It is our belief that such procedure would be equally advantageous in respect of these forms.

Sincerely yours,

Neville Miller.
Promotion

NATIONAL RADIO DAY

Representative Dingell (D-Mich.) has introduced a resolution to make August 26 “National Radio Day.”

The resolution:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States is authorized and directed to issue a proclamation designating August 26 of each year as National Radio Day, calling upon officials of the Government to display the flag of the United States on all Government buildings on that day, and inviting the people of the United States to observe the day with appropriate ceremonies.

LISTEN BEFORE YOU VOTE

In spite of heat, NAB convention, war and national defense, the LISTEN BEFORE YOU VOTE campaign is doing all right for itself. Yes sir!

Broadcasters in many states are saying it with orders for the red, white and blue posters while they complete their own plans for exploitation. Quick on the trigger in reporting satisfaction with the plan was Warner C. Tidemann, commercial manager, KATE, Albert Lea at Austin, Minn.:

“I read with growing interest last night the material you mailed us on the new radio promotion, ‘Listen Before You Vote.’ I think you are to be congratulated, this strikes me as one of the greatest promotions that radio has ever had a chance to make.”

And out in Kansas Chester L. Gowen wrote from Salina: “KSAL is happy to announce that it is in complete accord with the NAB suggestion to LISTEN BEFORE YOU VOTE and is enthusiastically completing plans to launch it in this territory.”

Major Edney Ridge, director, WBIG, Greensboro, always a keen judge of effective promotions, has expressed approval by nonchalantly forwarding his sizable order.

National Defense

557 STATIONS JOIN SEARCH FOR DEFENSE MAN POWER

Five hundred fifty-seven (557) broadcasting stations, up to Thursday noon, August 1, had joined together, through NAB in radio’s recently announced National Defense program, which seeks to locate man power for the United States Civil Service Commission.

A minimum of 100,000 skilled workers represents the present requirements of the Army, Navy, Civil Aeronautics Authority and other defense agencies for which the Commission procures workers.

The figure of 557 is an increase of 184 over those listed in NAB Reports of July 26. Other stations are expected to be heard from this week.

The most recent stations to signify their intentions of cooperating in the National Defense man power search are listed below:

Iowans, too, are going to see the posters and find out what LISTEN BEFORE YOU VOTE is all about. Orders from F. C. Eighmey, general manager, KGLO, Mason City, and from W. B. Quarton, general manager, WMT, Cedar Rapids, insure that.

The astute Mr. Bissell of WMFF, Plattsburg, N. Y., and hard hitting Mr. Thad Holt, WAPI, Birmingham, will put the posters to work for radio in their respective communities. WROK will take care of the situation in Rockford.

The presses will roll in August. Send orders for posters as soon as you have determined the maximum showing possible.

On the basis of orders received, 8 out of 10 stations say that a minimum of a thousand posters are needed to take full advantage of the opportunity. Whatever your needs, don’t delay. Get aboard this “natural” promotion. Four more years before another chance like this!

MEET MR. JOSLYN

Meet Mr. Joslyn of Rockford, manager of the Broadway Laundry.

He is a patriotic American, willing to spend good money to convince his fellow Americans that the American way of life is best, that foreign “isms” are a snare and delusion.

According to Bill Traum, promotion manager of WROK, Mr. Joslyn came to WROK and said that Rockford people ought to have such a program and that he was going to pay the freight.

Today, WROK broadcasts a weekly 15 minute patriotic program, “The American Way.” And believe it or not, there is no commercial on the show, merely an opening and closing credit to Mr. Joslyn.

The program calls attention to the opportunities that exist for men and women in the United States. It features interviews with prominent local citizens who formerly lived in foreign countries who contrast advantages and opportunities in this country with those in their home lands.

August 2, 1940 — 4475
FLY BROADCAST MONDAY

The talk by James Lawrence Fly, FCC chairman, at the NAB convention will be broadcast by CBS and MBS at 5:30-6:00 p.m., Eastern Daylight Saving Time, Monday, August 5.

The Commission

COMMISSION WILL RECEIVE BRIEFS ON CHAIN BROADCASTING REPORT

The FCC announced this week that in connection with its investigation of chain broadcasting it would receive briefs filed by interested parties on or before September 15, 1940.

A committee of the Commission composed of Commissioners Brown, Walker and Thompson, submitted their report to the Commission on June 12, 1940, and recommended the promulgation of regulations to eliminate certain practices in chain broadcasting. Copies of the Committee's report, with its Memorandum of Submittal containing the recommendations of the Committee, are being sent to the licensees of all broadcast stations. The Commission invites the submission of their views on the issues raised by the report. Copies will also be supplied upon request to any other interested party desiring to consider submission of a brief or statement.

It was also announced that the Mutual Broadcasting System, Inc., has recently filed a motion with the Commission requesting the adoption of temporary regulation directed toward maintaining the status quo in chain broadcasting pending the promulgation of permanent regulations by the Commission.

Briefs should be directed solely to the accuracy of factual statements contained in the report of the Committee, to the recommendations contained in the Committee's Memorandum of Submittal, and to the advisability of the adoption of the temporary regulation requested by the Mutual Broadcasting System, Inc.

ASSISTANT GENERAL COUNSEL RESIGNS

Assistant General Counsel George B. Porter is resigning from the FCC to enter private law practice.

Mr. Porter has been in charge of the legal matters affecting broadcasting since the Commission was created in 1934. Before that time he was Acting General Counsel of the Federal Radio Commission, which he joined in 1931, and was for two years an attorney with the Interstate Commerce Commission.

Born at Centerville, Iowa, October 17, 1900, Mr. Porter was graduated from the University of Iowa, A.B., in 1923, and received his LL.B. degree from George Washington University Law School in 1926. After being admitted to the Iowa bar in 1927, he spent two years in law practice as junior member of the firm of Porter and Porter at Des Moines.

Mr. Porter intends to engage in local law practice with A. G. Haley under the firm name of Porter and Haley.

"The Commission reluctantly relinquishes to private practice a man ideally qualified by experience and training for the important work which he has so satisfactorily performed," comments Chairman James Lawrence Fly. To which Acting General Counsel Telford Taylor adds: "Mr. Porter's long experience and expertness in the field of radio law has been highly important and invaluable in the performance of the Law Department's duties. I deeply regret that my association with him has been so brief, and extend to him every good wish in his new activities."

FCC AMENDS ORDER

On its own motion, the Commission, by a board consisting of Commissioners Fly, Chairman, Walker and Thompson, pursuant to Administrative Order No. 3, reconsidered its action of July 16 in granting the application of the Riverside Broadcasting Co. to construct a new station at Riverside, Calif., to operate on 1420 kilocycles, 250 watts power, unlimited time, and set the application down for simultaneous hearing with three conflicting applications—Broadcasting Corporation of America and Mollin Investment Co., to construct new stations at Riverside to operate on 1390 kilocycles, 1 kilowatt power, unlimited time, and 1390 kilocycles, 500 watts power, daytime only, respectively; and Merced Broadcasting Co., to change frequency and increase power of its existing station at Merced, Calif., to 1390 kilocycles, 1 kilowatt power day, 500 watts power night, unlimited time. These three applications were designated for hearing at the July 16 meeting.

FEDERAL COMMUNICATIONS COMMISSION

Washington, D. C.

Administrative Order No. 3
(As amended July 24, 1940)

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 25th day of June, 1940, IT IS ORDERED, That, whenever the Chairman or Acting Chairman of the Commission shall determine a quorum of the Commission is not present, he is authorized to place the following provisions in effect for the period during which a quorum of the Commission is not present:

(1) There is hereby assigned and referred to a Board consisting of all members of the Commission present and able to act, all work, business, or functions of the Federal Communications Commission arising under the Communications Act of 1934, as amended, except that portion of the work, business, or functions of the Federal Communications Commission assigned and referred to the respective Boards and individual Commissioners as provided in Administrative Order No. 2, as amended; Provided, however, that this authority shall not extend to investigations instituted upon the Commission's own motion or, without consent of the parties thereto, to contested proceedings involving the taking of testimony at public hearings, or to investigations specifically required by the Communications Act of 1934, as amended.
The Board created by sub-paragraph (1) acting by a majority thereof, shall have power and authority to hear and determine, order, certify, report, or otherwise act as to any of said work, business, or functions so assigned or referred to it, and in respect thereof shall have all the jurisdiction and powers conferred by law upon the Commission, and be subject to the same duties and obligations. Any order, decision, or report made or other action taken by said Board in respect of any matters so assigned or referred shall have the same force and effect, and may be made, evidenced and enforced in the same manner as if made, or taken by the Commission.

Any party affected by any order, decision or report made or other action taken by said Board may file a petition for rehearing by the Commission, as provided by Section 1.271 of the Commission's Rules of Practice and Procedure, and every such petition shall be passed upon by the Commission.

This Order shall become effective on the 1st day of July, 1940.

FEDERAL COMMUNICATIONS COMMISSION
T. J. Slowie,
Secretary.

TWO PLEAD GUILTY TO UNLICENSED RADIO OPERATION

The FCC announced that recent investigation of unlicensed radio operation in San Francisco, resulted in the indictment of Ralph Wildt and Louis F. Books for violation of Sections 301 and 318 of the Communications Act of 1934, as amended. Both defendants pleaded guilty and will be sentenced by the United States District Court on August 9.

Peter Ruggeri, a minor, also charged with operating an unlicensed radio station will be prosecuted under the Juvenile Delinquency Act. His case is set for trial August 5.

INCOME SHOWS INCREASE FOR 1939

The total revenue of 705 standard broadcast stations reporting to the FCC for the calendar year 1939 amounted to $89,990,646, as compared with $79,128,760 for the 660 stations reporting in 1938. This is revealed in figures on broadcast income of stations by class and network announced today by the Accounting, Statistical, and Tariff Department of the Commission.

The tabulation shows that there were 397 stations in major networks compared with 350 in 1938. The 397 stations received $22,500,941 from the three major networks, compared with $19,645,447 for the 350 stations in 1938.

There were 519 stations in 1939 each of which had total net time sales in excess of $25,000 compared with 485 for 1938.

The 519 stations had net time sales of $80,306,134 for 1939, compared with $71,082,465 for the 485 stations in 1938.

FCC FUNCTIONS FOR AUGUST

FCC has announced that the work, business and functions of the Commission for the month of August have been assigned as follows:

Commissioner Walker: Designated to determine, order, report or otherwise act upon all applications or requests for special temporary standard broadcast authorizations.

Commissioner Thompson: Designated to hear and determine, order, certify, report or otherwise act upon: (a) except as otherwise ordered by the Commission, all motions, petitions or matters in cases designated for formal hearing, including motions for further hearing, excepting motions and petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission and those requesting change or modification of a final order made by the Commission; provided, however, that such matters shall be handled in accordance with the provisions of Sections 1.251 and 1.256, inclusive, of the Commission's Rules of Practice and Procedure; (b) the designation pursuant to the provisions of Sections 1.231 to 1.232 of the Commission's Rules of Practice and Procedure of officers, other than Commissioners, to preside at hearings.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

No hearings or oral arguments are scheduled in broadcast cases before the Commission during the week beginning Monday, August 5.

FUTURE HEARINGS

During the past week the Commission has announced the following future broadcast hearings and oral arguments. They are subject to change.

September 4
NEW—Hobart Stephenson, Milton Edge, Edgar J. Korsmeyer, d/b/a as Stephenson, Edge & Korsmeyer, Jacksonville, Ill.—C. P., 1150 kc., 250 watts, daytime.
NEW—Helen J. Walton and Walter Bellatti, Jacksonville, Ill.—C. P., 1150 kc., 250 watts, daytime.

September 12
Oral Argument Before the Commission
Report No. B-108:
KSAM—Sam Houston Broadcasting Assn., H. G. Webster, President, Huntsville, Tex.—In re: Revocation of Station License of KSAM.

FEDERAL COMMUNICATIONS COMMISSION ACTION

Owing to the absence of a quorum this week there was no regular meeting of the Commission.

August 2, 1940 — 4477
WNBM—National Broadcasting Co., Inc., New York, N. Y.—Granted special temporary authority to operate aboard steamship America on shakeout cruise from Newport, Va., to New York Harbor and to operate on additional frequencies 4797.5, 6423, 9135, and 12862.5 kc., and to use secondarily as sound channel in conjunction with Television Station W2XBU on assigned frequencies and aforementioned experimental frequencies, for the period July 27, 1940, to not later than July 30, 1940 (provided no interference is caused any other radio service).

KFBK—The Farmers & Bankers Broadcasting Corp., Wichita, Kans.—Granted special temporary authority to operate from 9 p.m., CST, to 10:30 p.m., CST, on July 28, 1940, in order to broadcast the final game in the Kansas State Semi-Pro Baseball Tournament only.

WPIC—Sharon Herald Broadcasting Co., Sharon, Pa.—Granted special temporary authority to operate from 9:45 p.m., local time, to the conclusion of the prize fight between Soose and Overlin on July 24, 1940, in order to broadcast said fight only.

Roanoke Broadcasting Corp., Roanoke, Va.—Granted construction permit for new broadcast station to operate on the frequency 1500 kc., with 250 watts power, unlimited time; exact transmitter site and antenna system to be determined subject to Commission's approval (B2-P-2879).

WDK—L. J. Duncan, Leils A. Duncan, Josephine A. Keith, Effie H. Allen, Aubrey Gay, d/b/a Valley Broadcasting Co., West Point, Ga.—Granted modification of construction permit for new authorized construction of a new broadcast station, for approval of transmitter and studio sites on General Tyler Hotel, West Point, Ga., approval of antenna, and installations new transmitter; frequency 1310 kc., power 250 watts, unlimited time (B3-MP-929).

KCMA—KCMO Broadcasting Co., Kansas City, Mo.—Granted construction permit to install new automatic frequency control equipment and make changes in transmitting equipment; frequency 1450 kc., 1 kw, 5 kw LS, unlimited time, directional antenna night (B4-P-2927).

WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn.—Granted authority to determine operating power by direct measurement of antenna input (B1-Z-459).

Helen Townsley, Portable-Mobile (area of Great Bend, Kans.)—Granted construction permit for new relay broadcast station, frequencies 1622, 2658, 2150, 2790 kc., power 75 watts (B4-PRY-224).

KAQY—The Farmers and Bankers Broadcasting Corp., Portable-Mobile (area of Wichita, Kans.)—Granted license to cover construction permit for new relay broadcast station, frequencies 1606, 2022, 2102, 2758 kc., power 40 watts (B4-LRVY-1).

WMSL—Tennessee Valley Broadcasting Co., Inc., Decatur, Ala.—Granted license to cover construction permit (B3-P-2355) for increase in power from 100 to 250 watts, change in hours of operation to unlimited, change in transmitting equipment and antenna, and move of transmitter and studio location, frequency 1370 kc. (B3-L-1099). Also granted authority to install automatic frequency control equipment, and to determine operating power by direct measurement of antenna power (B3-F-149; B3-F-421).

WCSL—WCLS, Inc., Joliet, Ill.—Granted special temporary authority to operate from 8:30 p.m., CST, to 11:30 p.m., CST, DJST, June 31, in order to broadcast a special softball game only.

WINS—Hearst Radio, Inc., New York City.—Granted special temporary authority to operate from 7:15 to 10 p.m., CST, on August 3, in order to broadcast “Special World’s Fair Radio Tribute” program.

WINS—Hearst Radio, Inc., New York City.—Granted special temporary authority to operate from 10 to 10:30 p.m., EDT, on August 5, 12, 19 and 26, in order to broadcast special Army programs.

WLOF—Hazelwood, Inc., Orlando, Fla.—Granted modification of construction permit (B3-P-2394, as modified, which authorized construction of a new broadcast station) to install a new transmitter, 1200 kc., 250 watts, unlimited time. This authority is granted upon condition that it shall not be construed as a finding by the Commission upon the application of Orlando Radio Corp. for operating the same facilities, nor upon application of WLOF for license when construction has been completed, nor upon any of the issues involved therein, nor that the Commission has found that operation of the station is or will be in the public interest beyond the express terms hereof (B3-MP-1027).

WKPT—Kingsport Broadcasting Co., Kingsport, Tenn.—Granted license to cover construction permit (B3-P-2616) as modified authorizing a new station to operate on 1370 kc., 250 watts, unlimited time (B3-L-1197). Also granted authority to determine operating power by direct measurement of antenna input (B3-Z-445).

KFRO—Voice of Longview, Longview, Tex.—Granted license to cover construction permit (B3-P-2117) as modified, authorizing move of transmitter, installation of directional antenna for night use, installation of new transmitter, change of frequency to 1240 kc., increase in power to 1 kw, and change hours of operation to unlimited (B3-L-1202). Also granted authority to determine operating power by direct measurement of antenna input power (B3-Z-448).

KSAM—Sam Houston Broadcasting Assn., Huntsville, Tex.—Granted special temporary authority to discontinue the operation of Station KSAM for the period August 1, 1940, and ending in no event later than September 1, 1940, pending a decision on the revocation proceedings of the license.

KWH—KWHF, Inc., Sonoma, Calif.—Granted license to cover construction permit (B4-P-2785) authorizing changes in equipment; 1200 kc., 250 watts, unlimited time (B4-L-1199).

KPO—KPCO Broadcasting Co., Wenatchee, Wash.—Granted authority to determine operating power by direct measurement of antenna input power (B5-Z-447).

WGCW—WGCM, Inc., Gulfport, Miss.—Granted license to cover construction permit (B3-P-2618) which authorized installation of new antenna, move of transmitter, and increase in power to 250 watts; 1210 kc. (B3-L-1198).

National Broadcasting Co., Inc., New York City.—Granted special temporary authority to rebroadcast program material received from U. S. Coastguard cutters Spencer and Northland out of New York, the cutter Tany out of San Francisco, and a Coastguard plane of the New York Division over the NBC Network on August 4, in connection with the U. S. Coastguard Show.

WEAF—National Broadcasting Co., Inc., New York, N. Y.—Granted special temporary authority to operate aboard steamship America on shakeout cruise from Newport, Va., to New York Harbor and to operate on additional frequencies 4797.5, 6423, 9135, and 12862.5 kc., and to use secondarily as sound channel in conjunction with Television Station W2XBU on assigned frequencies and aforementioned experimental frequencies, for the period July 27, 1940, to not later than July 30, 1940 (provided no interference is caused any other radio service).

KOAC—Oregon State Agricultural College, Corvallis, Ohio.—Granted extension of special temporary authority to operate from 9 a.m. to 1 p.m., and from 6 to 10 p.m., PST, for the period July 31 to August 29 (instead of unlimited time as licensed), in order to observe the regular vacation period.

WJMC—Walter H. McGenty, Rice Lake, Wis.—Granted special temporary authority to operate from 7:15 to 10 p.m., CST, on August 3, in order to broadcast “Special World’s Fair Radio Tribute” program.

WLS—Hearst Radio, Inc., New York City.—Granted special temporary authority to operate from 10 to 10:30 p.m., EDT, on August 5, 12, 19 and 26, in order to broadcast special Army programs.

WMA—WMAF, Inc., Orlando, Fla.—Granted modification of construction permit (B3-P-2394, as modified, which authorized construction of a new broadcast station) to install a new transmitter, 1200 kc., 250 watts, unlimited time. This authority is granted upon condition that it shall not be construed as a finding by the Commission upon the application of Orlando Radio Corp. for operating the same facilities, nor upon application of WMA for license when construction has been completed, nor upon any of the issues involved therein, nor that the Commission has found that operation of the station is or will be in the public interest beyond the express terms hereof (B3-MP-1027).

WPTO—Kingsport Broadcasting Co., Kingsport, Tenn.—Granted license to cover construction permit (B3-P-2616) as modified authorizing a new station to operate on 1370 kc., 250 watts, unlimited time (B3-L-1197). Also granted authority to determine operating power by direct measurement of antenna input (B3-Z-445).

KFRO—Voice of Longview, Longview, Tex.—Granted license to cover construction permit (B3-P-2117) as modified, authorizing move of transmitter, installation of directional antenna for night use, installation of new transmitter, change of frequency to 1240 kc., increase in power to 1 kw, and change hours of operation to unlimited (B3-L-1202). Also granted authority to determine operating power by direct measurement of antenna input power (B3-Z-448).

KSAM—Sam Houston Broadcasting Assn., Huntsville, Tex.—Granted special temporary authority to discontinue the operation of Station KSAM for the period August 1, 1940, and ending in no event later than September 1, 1940, pending a decision on the revocation proceedings of the license.

KWH—KWHF, Inc., Sonoma, Calif.—Granted license to cover construction permit (B4-P-2785) authorizing changes in equipment; 1200 kc., 250 watts, unlimited time (B4-L-1199).

KPO—KPCO Broadcasting Co., Wenatchee, Wash.—Granted authority to determine operating power by direct measurement of antenna input power (B5-Z-447).

WGCW—WGCM, Inc., Gulfport, Miss.—Granted license to cover construction permit (B3-P-2618) which authorized installation of new antenna, move of transmitter, and increase in power to 250 watts; 1210 kc. (B3-L-1198).

National Broadcasting Co., Inc., New York City.—Granted special temporary authority to rebroadcast program material received from U. S. Coastguard cutters Spencer and Northland out of New York, the cutter Tany out of San Francisco, and a Coastguard plane of the New York Division over the NBC Network on August 4, in connection with the U. S. Coastguard Show.

WEAF—National Broadcasting Co., Inc., New York, N. Y.—Granted special temporary authority to operate aboard steamship America on shakeout cruise from Newport, Va., to New York Harbor and to operate on additional frequencies 4797.5, 6423, 9135, and 12862.5 kc., and to use secondarily as sound channel in conjunction with Television Station W2XBU on assigned frequencies and aforementioned experimental frequencies, for the period July 27, 1940, to not later than July 30, 1940 (provided no interference is caused any other radio service).

KOAC—Oregon State Agricultural College, Corvallis, Ohio.—Granted extension of special temporary authority to operate from 9 a.m. to 1 p.m., and from 6 to 10 p.m., PST, for the period July 31 to August 29 (instead of unlimited time as licensed), in order to observe the regular vacation period.
WAIM—Wilton E. Hall, Anderson, S. C.—Construction permit for new broadcast station to operate on 1270 kc., 500 watts, daytime only; exact transmitter site and antenna to be determined subject to Commission approval (B1-P-937).

Watertown Broadcasting Corp., Watertown, N. Y.—Granted construction permit for new broadcast station to operate on 1210 kc., 250 watts, unlimited time; tower to be marked in accordance with Section 3.45(d) (B1-P-809).

WCAR—Pontiac Broadcasting Co., Pontiac, Mich.—Granted special temporary authority to operate from 7:30 p.m. to 8:00 p.m., EST, August 3, 1940, in order to broadcast the World’s Fair Tribute to Radio.

W2XOR—Bumberger Broadcasting Service, Inc., New York, N. Y.—Granted special temporary authority to operate high frequency experimental transmitter at 444 Madison Avenue, New York, N. Y., for a period not to exceed 30 days, pending action on formal application (File No. B1-PH8-281) for such authority.

WSUN—City of St. Petersburg, Fla.—Granted special temporary authority to rebroadcast program material received from Coast Guard Station VR176 from 12:30 p.m. to 12:45 p.m., EST, on August 4, 1940, in order to broadcast Coast Guard Program.

KSAM—Sam Houston Broadcasting Assn., Huntsville, Tex.—Continued oral argument originally scheduled for August 1, 1940, until September 12, 1940, in re revocation of license of station KSAM (Docket No. 5838).

KAWM—A. W. Mills, Gallup, N. Mex.—Granted extension of license upon a temporary basis only, pending determination upon the application for renewal of license, in no event longer than October 1, 1940.

APPLICATIONS FILED AT FCC

740 Kilocycles

WSB—Atlanta Journal Co., Atlanta, Ga.—Transfer of control of corporation from Springer Newspapers, Inc., Atlanta, Ga., and The Evening News Publishing Co. to James M. Cox.

1110 Kilocycles

WRVA—Larue & Bro Co., Inc., Richmond, Va.—License to cover conversion from 1450 to 590 kc.; increase power from 500 watts to 1 KW, change hours of operation from daytime to unlimited, install directional antenna for night use, give location of studio as 346 E. Blvd., and extend commencement of completion date from 8-20-40 to 12-20-40.

1120 Kilocycles

NEW—J. M. West, J. Marion West, T. H. Monroe, & P. M. Stevenson, near Austin, Texas.—Construction permit for a new broadcast station to be operated on 1120 kc., 1 KW, specified hours. Amended to change type of transmitter.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Acme Premium Supply Corp., 3139 Olive St., St. Louis, Mo., is charged with selling aluminum ware, enamel ware, smoker sets, cigarette cases, lamps, glassware and fishing tackle by means of lottery schemes. The respondent allegedly uses push card and punch board devices and Bingo sets to enable it to sell merchandise to the consuming public by means of lot or chance. (4198)

American Drug and Chemical Company, 420 South Sixth St., Minneapolis, allegedly misrepresents that its drug product, "Ardanol", is a cure or remedy for sterility in both sexes, will restore fertility of the generative organs, and is a reliable preventive of abortion. According to the complaint, the respondent further misrepresents that its drug products, "Chloro-Zol" and "Germ-I-Tab", constitute competent and effective antiseptics and germicides and are a reliable means of feminine hygiene, when in truth they possess antiseptic properties of a low toxicity and are not effective antiseptics or germicides. Further alleged misleading representations are that "Chloro-Zol" is a competent and effective treatment for bromidrosis, tetter, Cuban itch, itching between the toes, blisters on the feet, skin irritations, acne, boils, halsitosis and body odors. (4200)

American Institute of Business Administration, Inc., and Paul Kline, 126 Liberty St., New York, are charged in a complaint with the dissemination of misleading representations in the sale of correspondence courses in accounting, business law and federal taxation. It is alleged in the complaint that the respondent Kline directs and controls the policies and practices of the corporate respondent.

According to the complaint, the corporate respondent by means of the name "American Institute of Business Administration, Inc." misleadingly represents that it is a national organization of business executives, administrators or accountants, or that it is the medium of such an organization through which instruction or training is given as a public service. The corporate respondent, it is alleged, further misleadingly implies that it is the parent head of nationally organized local groups of special representatives of business and comprises an organized "Institute".

Associated Sales Agency—B. T. Clifton, trading as Associated Sales Agency, 108 North 17th St., Birmingham, Ala., allegedly sells clocks, knives, fountain pens, pipes, watches, tie sets, cigarette cases and cigarette lighters by means of a game of chance. According to the complaint, the respondent employs punch boards to enable him to distribute his merchandise to the consuming public wholly by lot or chance. (4201)

Kongo Chemical Company, Inc., 66 East 131st St., New York, allegedly misleadingly represents that "Kongo-Ne," a hair cosmetic, is a pure vegetable product; that its use will straighten the hair, will stop hair from falling out, will promote the growth of hair, and will cure and permanently remove dandruff; that it is the greatest discovery of the age; that its use will benefit the offspring of its users, and that it is safe and harmless, when such are not the true facts. (4195)

Primfit Textile Company, 128-130 West Fourth St., Cincinnati, is charged in a complaint with dissemination of misleading representations in the sale of men's hosiery. According to the complaint, the respondent misleadingly represents that its "Jerks" hose is the original garterless sock and that it is a manufacturer of hosiery. In truth, the complaint points out, the respondent is a jobber and distributor of the hosiery which it sells and neither owns, operates nor controls any factory, plant or mill for the manufacture of hosiery. (4199)

Sterling Products, 170 Varick St., New York, and Vita-Ray Corporation, 176 Middle Ave., Lowell, Mass., allegedly misrepresent that their Vita-Ray cosmetic cream, by means of local application, supplies the need of the skin for Vitamins A and D, and serves to stimulate and nourish the skin. The respondents further misleadingly represent that dryness, lines, wrinkles and coarse pores may be symptoms of vitamin deficiency and that such deficiency may be relieved through the use of their cosmetic cream containing Vitamins A and D. According to the complaint, the respondents' cosmetic cream will have no beneficial or therapeutic effect beyond the soothing, emollient and cleansing effects inherent in any cold cream. The complaint further points out that the skin does not require Vitamins A and D by means of local application. (4197)

Walker & Woodward—J. Lawrence Walker and T. Klye Woodward, trading as Walker & Woodward, and Nick A. George, Walker & Woodward, Inc., and John G. Brown, Casper, Wyoming, are charged with misleadingly advertising that their medicinal preparation, "George's Compound," is a cure and effective treatment for numerous ailments, diseases and conditions of the human body, including rheumatism, appendicitis, general run-down condition, neuritis, lumbago, high blood pressure, kidney trouble, streptococcus infection, paralysis, diphtheria, piles, sinus trouble, low blood pressure, pneumonia, black widow spider poisoning, ulcers and pylonemic poisoning. The respondents are further charged with representing that their preparation possesses substantial therapeutic value in the treatment of all ailments of the human body except cancer and diabetes. In truth, the complaint continues, respondents' preparation possesses no therapeutic value in the treatment of any ailment, disease or condition of the human body, in excess of such slight temporary and palliative relief for minor aches and pains as may be afforded by its analgesic properties. (4194)

D. Wroblewski & Company—A group of Brooklyn, N.Y., dealers in various medicinal and cosmetic preparations have been charged in a complaint with the dissemination of misleading representations in the sale of their products. The respondents are D. Stefan Wroblewski, Margie Wroblewski and Norman Hartman, trading as D. Wroblewski & Co., as D. S. Wroblewski, Inc., as

According to the complaint, the respondents misleadingly advertise the therapeutic value of their medicinal and cosmetic preparations among which are the following: a so-called medicinal wine designated as "Kalwaryjskie Wino Lecznicze"; "Ampo-Lin," a liniment; "Reginol," a preparation for corns; "Maso Ratunek," a salve; a cough syrup called "Kalwa;" "Wuzu-Wuzu," a purported fever reducer and headache powder; "Krople-Kobiece" or "Women's Drops," represented as a remedy for ailments peculiar to women; "Sparoton," a tablet represented as a treatment of fever and grippe; "Dunski Wysok," intended for use as a shampoo and for various scalp diseases; facial creams called "Krem Mlodoczi No. 1," "Krem Mlodoczi No. 2," and "Vitamin F Krem;" and a face powder called "Puder Ksiazyce."

It is further charged in the complaint that the respondents fail to reveal that use of "Wuzu-Wuzu" under the conditions prescribed in their advertisements or under customary or usual conditions, may cause injury to the health of the user. (4196)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders during the past week:

Atlantic Commission Company, a wholly owned subsidiary of The Great Atlantic & Pacific Tea Company of America, 102 Warren St., New York, has been ordered to discontinue accepting brokerage allowances and discounts in lieu of brokerage upon purchases made for its own account, in violation of the Robinson-Patman Act.

Commission findings, based on a stipulation entered into between the Atlantic Commission Company and the Federal Trade Commission, are that the Atlantic Commission Company is engaged in the business of buying, selling and distributing fresh fruits and vegetables on and for its own account and that of The Great Atlantic & Pacific Tea Company (and its subsidiaries) and also as a broker and on consignment as a commission merchant for the accounts of other buyers and sellers of such products.

Further findings are that the Atlantic Commission Company has purchased fresh fruits and vegetables at a net price reflecting a reduction from the prices at which sellers were currently selling commodities to other buyers, of an amount representing, in whole or in part, the amount of brokerage which was being paid by brokers representing them in effecting sales of their commodities to buyers other than the Atlantic Commission Company.

Other findings are that with many who did not sell to the Atlantic Commission Company at a net price or on a net basis, the Atlantic Commission Company, in its own name and on behalf of others, has purchased commodities for its own account, negotiated "quantity discount agreements," which provided for the payment to the Atlantic Commission Company of an amount to be computed on the basis of the rate at which the contracting seller was currently paying brokerage to his brokers representing him in effecting sales of commodities to buyers other than the Atlantic Commission Company.

Under the order, the Atlantic Commission Company is to cease making purchases of commodities for its own account at a so-called net price or on a so-called net basis, and at any other price and on any other basis that the Atlantic Commission Company has sold or purchased from sellers at prices which are less than the net price or on a net basis, and at any other price and on any other basis that the Atlantic Commission Company has purchased from sellers at prices which are less than the net price or on a net basis, and at any other price and on any other basis that the Atlantic Commission Company has purchased from sellers at prices which are less than the net price or on a net basis, and at any other price and on any other basis that the Atlantic Commission Company has purchased from sellers at prices which are less than the net price or on a net basis, and at any other price and on any other basis that the Atlantic Commission Company has purchased from sellers at prices which are less than the net price or on a net basis, and at any other price and on any other basis that the Atlantic Commission Company has purchased from sellers at prices which are less than the net price or on a net basis.

Under the order, the Atlantic Commission Company is to cease representing to the responding buyers and sellers of such products that any amount representing, in whole or in part, the amount of brokerage which was being paid by brokers representing them in effecting sales of their commodities to buyers other than the Atlantic Commission Company.

The order further prohibits the Atlantic Commission Company from accepting from sellers on purchases of commodities made for its own account any so-called quantity discounts and payments of all kinds reflecting in whole or in part, brokerage being paid by sellers to their brokers on sales of their commodities.

The order further prohibits the Atlantic Commission Company from accepting from sellers directly or indirectly on purchases of commodities made for its own account any brokerage and any allowances and discounts in lieu of brokerage in any manner whatsoever. (3344)

Berwick Pen Company—See Howard Sales Company.

Howard Sales Company—William and Benjamin Vorunion, trading as Howard Sales Company and as Berwick Pen Company, 117-19 William St., Newark, N. J., and 726 Lyons Ave., Irvington, N. J., have been ordered to discontinue certain misleading representations in the sale of fountain pens and pencils.

The order prohibits the respondents from falsely representing certain prices as being the usual and customary prices charged for their fountain pens and pencils. The order further forbids representations that the respondents' pens and pencils are of a quality and character superior to those sold by competitors at comparable prices.

Further representations ordered discontinued are that the sum of 25 cents charged purchasers for replacement of broken or unsatisfactory pens covers only the cost of handling, postage and insurance; that their fountain pens hold 200 per cent more ink than any ordinary fountain pen on the market, or that certificates cut from newspaper advertisements of their pens and pencils are worth $4.41 or any other sum in connection with the purchase of such products.

The respondents were also ordered to cease representing through the use of the symbol "14K," or any other symbol, that the point or nib of their pens is composed of 14-carat gold or gold of the fineness indicated by such symbol, when such is not a fact. (3514)

Perfect Manufacturing Company, trading as R. E. Engineers, Madison Road, Cincinnati, has been ordered to discontinue the dissemination of misleading representations in the sale of an electrical and mechanical device for attachment to radio receiving sets.

Under the order, the respondent is directed to cease representing that its device, "Add-A-Tube," when attached to a radio receiving set, gives to it the effect of an additional tube; adds life to the tubes; improves reception from foreign and domestic stations; brings the set up to date, or gives to such set additional sharpness, tone and selectivity.

The order further forbids use by the respondent of the term "Add-A-Tube," or any similar term, when the device does not perform the functions of an additional tube in a radio receiving set. (4163)

STIPULATIONS

Following stipulations have been entered into by the Commission:

Coven Bros.—David F. Coven and Raymond Coven, trading as Coven Brothers, 36 John St., New York, agree to cease using the word "Sweatproof" to describe their wrist watch straps, or representing in any way that their leather products have been rendered impervious to the penetration of perspiration. The respondents also agree to desist from representing that their merchandise customarily sells for sums in excess of the prices actually charged. (2882)

Ferguson Company, Inc., Liberty Bank Building, Dallas, Tex., in connection with advertisements disseminated on behalf of Morton Laboratories, Inc., Dallas, Texas, agrees to cease representing that "Hay-No," a medicinal preparation, is a competent remedy or effective treatment for hay fever, or that it has any therapeutic value in excess of affording symptomatic relief for hay fever. The respondent further agrees to cease advertising that the results to be achieved by the use of "Hay-No" in the treatment of sinus irritations, head colds, cold-clogged air passages, distress of nose-blowing and sneezing, stuffiness or other symptomatic conditions are amazing, wondrous or quick, or that the preparation is a discovery. (02605)

O. M. Franklin Blackleg Serum Company—See O. M. Franklin Serum Co., Inc.

O. M. Franklin Serum Company, Inc., trading as O. M. Franklin Blackleg Serum Company, Denver, Col., agrees to discontinue claims that "Franklin Concentrated Blackleg Bacterin" gives positive life immunity against blackleg; always brings positive life immunity with one dose; has a fifteen year untarnished record of positive life immunity with one dose, or that it is invariably effective or 100 per cent efficient for the purpose intended. The respondent further agrees to cease representing that its product contains in one dose more than double the immunizing potency of the usual large 5cc dose of whole culture. (2892)

August 2, 1940 — 4481
Barbara Gould, Inc., 35 West 34th St., New York, stipulates that it will cease representing that "Firma-Tone," a cosmetic preparation, is a competent treatment or conditions of relaxed facial contours, heaviness of the jaw line, or flabby skin; enables the user to "hold the clean, firm contours of youth" or to have "youthful" contours of face and neck; stimulates, exercises, tones or strengthens the muscles of the face and neck, or gives "lasting results." The respondent further agrees to cease using the designation "Firma-Tone" for its product or to represent that use of such product may be relied upon either to "firm" the facial or neck contour of the user, or to "tone" the skin or muscles. (2888)

Grecian Chemical Company, trading as Zala Perfumery Company and as The Olivo Company, 2030 East Willard St., Philadelphia, in connection with its sale of barber and beauty preparations, agrees to cease using the words "sculp food" as descriptive of its products, or the words "Feed the scalp what it needs" so as to imply that its products act as nutriment for the scalp. The respondent also agrees to cease representing that use of any of its products will replace or restore natural oil in the scalp. (2886)

A. Marshall & Sons—Adam Marshall, Frank Marshall and Rudolph Marshall, trading as A. Marshall & Sons, 698 Bergen St., Newark, N. J., have entered into a stipulation in which they agree to discontinue certain representations in the sale of arch supporters. The respondents agree to cease representing that use of their arch supporting devices will permanently end foot troubles; will permanently remove callouses regardless of their nature, or, unqualifiedly assure instant and permanent relief in cases of weak arches. It is also stipulated that the respondents will desist from claims that their devices are made to order, that is, fashioned from a positive cast made from a negative impression of the individual customer's foot through the use of some plastic materials; that their devices are or will remain sanitary when used for the purposes for which they are not intended, or hazardous exercise, or represent any technical and expensive substitutes. (2893)

M. Mintz, Inc., 247 West 35th St., New York, agrees to discontinue use of the word "Alpacas" as descriptive of dresses which are not made of fabric composed of the wool of the Alpaca, and to cease representing that its products, which are made of rayon, are not rayon or something other than rayon. The respondent also stipulates that he will desist from failing to clearly disclose the fact that the material of which his products are made is rayon, such disclosure to appear in all invoices and labeling and in all advertising matter, sales promotional schemes, descriptions or representations. (2890)

Nash-Kelvinator Corporation. 14350 Plymouth Road, Detroit, to discontinue the use of the statement, "Not get out of order" as descriptive of its refrigerator, or the cooling element, which contains moving parts that may, in fact, get out of order. (2884)

Niagara School, Inc., Cleveland, Ohio, entered into a stipulation in which it agrees to discontinue certain representations in the sale of resident and correspondence courses in vocabulary, public speaking, voice and memory. The respondent agrees to cease misrepresenting the usual and customary price or the nature and quality of its instruction. It is also stipulated by the respondent that it will discontinue representing an offer as "Special" or "Introductory" when it is in fact a regular offer; representing an offer to be limited as to time or otherwise when such is not the fact; or representing a commodity or service as "Free" when in fact such commodity or service is regularly included as part of the course of instruction or service. (2894)

Nutritional Service—Janet Warfel, trading as Nutritional Service, 162 North State St., Chicago, entered into a stipulation in which she agrees to discontinue certain representations in the sale of foods designated "Wyd-E-Wake Silicon Tea," and "Vitamin B Food Cons." The respondent stipulates that he will cease representing that "Wyd-E-Wake Silicon Tea" is a health beverage; an excellent source of calcium, silicon and manganese; an antisepic, or an invigorating agent of the generative system. The respondent also agrees to discontinue representing that "Wyd-E-Wake Silicon Tea" performs many important functions in the body; has an influence on the generative system; possesses qualities conducive to mental peace, contentment or contemplative pleasure.

Further representations which the respondent agrees to discontinue are that "Vitamin B Food Cons." supply the body with mineral elements; bring one vigor or youthful zestfulness, or are highly positive, bringing about a proper distribution of body liquids. The respondent further agrees to cease advertising that every ingredient in "Centro Tea" possesses therapeutic value; that its ingredients are carried to the affected parts; that it is not a laxative or that its hypericum content stimulates the appetite. (02606)

Olivo Company—See Grecian Chemical Company.

Poulides Brothers—Themis Poulides, trading as Poulides Brothers, 80 Washington St., New York, stipulates that he will cease stating in any manner that he has a depot or branch at Cavalla, Macedonia, Greece, or that the cigarettes sold by him are made at and imported from such locality. The respondent also agrees to cease representing that use of any of his products will replace or restore natural oil in the scalp. (2883)

Shifman Brothers, Mott St., Newark, N. J., agrees to cease using the word "Doctor" or "Dr." in connection with its products so as to imply that the products so referred to contain special or scientific features resulting from medical determination or services. The respondent further stipulates that it will cease supplying customers for resale mattresses to which are affixed a price or purporting to be the retail selling price of such products, when in fact it is in excess of the price at which they are customarily offered for sale in the usual course of business. (2891)

Smith & Bull Advertising Agency—V. R. Smith, trading as Smith & Bull Advertising Agency, 553 South Western Ave., Los Angeles, in connection with advertisements disseminated on behalf of Olivo Company, trading as Olivo Biscuit Company, Inc., Los Angeles, stipulates that he will desist from representing that "Cento Tea," a medicinal herb tea, is value in the treatment of gall, liver or kidney ailments; possesses healing or analgesic properties; helps eliminate poisons and foreign matter from the system, or is capable of bringing about a natural distribution of body liquids. The respondent further agrees to cease advertising that every ingredient in "Centro Tea" possesses therapeutic value; that its ingredients are carried to the affected parts; that it is not a laxative or that its hypericum content stimulates the appetite. (02606)

Zala Perfumery Company—See Grecian Chemical Company.

Zenith Products Company—Earl Ewing, trading as Zenith Products Company, 423 Main St., Wellsville, Ohio, agrees to discontinue from use of the word "conditioning" as part of the name of his product designated "Best-in-Show Conditioning Capsules," so as to imply that it is efficacious generally as a conditioner of dogs for show purposes or otherwise. The respondent further agrees to discontinue representing that his product is an effective treatment or competent remedy for all diseases or ailments to which dogs are subject, or that its use will prevent sickness and improve the appearance of dogs for show purposes. Further representations which the respondent agrees to discontinue are that "Sulphasol" is a new or revolutionary product; is a skin tonic; will end skin and coat troubles, or imparts any therapeutic effects other than such as may be due to the action of its sulphur content on certain organisms in the skin and hair, as the sarcoptic mite of scabies and certain fungi. The respondent also stipulates that he will discontinue employing the word "guarantee" in his advertising, unless clear disclosure is made of exactly what is offered by way of security. (2887)
This week’s issue of the NAB Reports consists of the officers’ and committees’ reports to the annual convention in San Francisco this week, along with a brief resume of what happened at the convention.

Next week’s Reports will include a more complete report of the convention, as well as the FCC and other official material covering a two weeks’ period.

CONVENTION HIGHLIGHTS

Unanimous approval of the BMI program for licking the ASCAP music monopoly was voted by shouting delegates this week at one of the most enthusiastic sessions in NAB convention history. Theodore Streibert, vice president of the Mutual Broadcasting System, touched off one of the several demonstrations at the session when he announced that none of the principal key stations of that network intended to use ASCAP music after next December 31. Enrollment to use ASCAP music after next December 31, enrollment of the Don Lee originating stations, the H. K. Carpenter and Glen Snyder stations and WOW, Omaha, was also announced. During the convention 51 new stations in all joined BMI, bringing the total membership to 362. A complete list of the new members will be published in next week’s Reports.

The BMI Board of Directors approved a new form of contract to become effective next April 1. It calls for a sliding scale of payments, depending on the amount of income, ranging from one and one-half per cent on less than $15,000 to two and one-half per cent on $100,000 or more. Details will be reported in next week’s issue.

The total registration of 661 was one of the largest in the history of NAB conventions. More than 600 attended the banquet on Treasure Island Wednesday night and laughed at “The Greener Pastures,” a satirical musical comedy staged by the Dodo Club.

Mark Ethridge, WHAS; Harold Hough, WBAP; George W. Norton, WAVE; Don Searle, KOIL; Harry R. Spence, KXRO; John Elmer, WCBM; Edward Klauber, CBS; Fred Weber, MBS, and Frank M. Russell, NBC, were elected to the Board.

As its first act, the newly elected Board took recognition of the services of President Neville Miller. The present contract of Mr. Miller, as President, due to expire next year, was extended for a one year period, being a new two-year contract. As an additional recognition, a substantial increase in his annual salary, effective immediately, was authorized.

The convention received the following telegram from the San Francisco Local of the American Federation of Musicians:

“Inasmuch as the members of the Musicians Union have suffered irreparable harm because of what we regard as excessive license fees collected from employers of music by ASCAP we wish to let you know that the officers and Board of Directors of this Local hereby offer our assistance in whatever form possible to break this stranglehold on employers and musicians alike.”

The delegates and their wives and friends danced to BMI music exclusively at the banquet.

From both James Lawrence Fly, FCC Chairman, and Stephen P. Early, secretary to President Roosevelt, the industry received assurance that the Government had no intention of taking over the Broadcasting Industry in event of war. “I see no occasion for any sort of extraordinary measures as far as radio is concerned,” said Mr. Early. “Alarmists with absolutely no factual basis to support them have conjured up the bogey man of the Government operating the broadcasting systems or of...
the complete curtailment of broadcasting in the event the security of this country were threatened," said Mr. Fly. Next week’s Reports will contain the texts of these speeches.

The Executive Committee approved a resolution adopted by the Labor Committee, directing the NAB to take appropriate action to obtain reversal of the Wage and Hour Administration’s opinion that broadcasting’s outside salesmen were not outside salesmen within the meaning of the Wage and Hour Act.

Sherwood Brunton, KJBS, won the Broadcasting magazine trophy at the Annual NAB Golf Tournament.

The plan for unit measurement of broadcast advertising was approved by both the Board of Directors and the convention.

The Code of Program Standards was unanimously endorsed after Dr. Frank Kingdon and others had praised its operation during the past year.

Louis Johnson, former Assistant Secretary of War, urged the industry to join with all the power at its command in the National Defense Program. Next week’s Reports will include the names of stations newly pledged to support this program. The NAB has received 579 pledges.
The President

With this Eighteenth Annual Convention, the National Association of Broadcasters rounds out another twelve months of activity. It has been radio's greatest year. The trend which has heretofore existed in all phases of radio continued throughout the year and gives promise of continuing far into the future. A constant growth in listening audience is evidence of the public's confidence and approval, and broadcasters have responded by steady improvement in the scope and quality of programs.

During the past year, more than 9,000,000 radio sets were sold, increasing the total number of sets in American homes and automobiles to over 45,000,000. With less than 7% of the world's population, our country has nearly a half of all broadcasting stations and receiving sets, and a greater percentage of radio equipped homes than any other nation. The American people want radio sets more than they want anything else in the line of electrical equipment, for more sets were sold than electric irons or toasters, or washing machines, or vacuum cleaners, or any other electrical device. In various polls, radio has won first place time and again in the preference of the American family. The American radio industry has grown faster—in units, in dollar volume and in public service—than has the radio industry of any other country.

Naturally, there is a reason for this continued development and improvement, and it is not hard to find. Radio has a tremendously intimate effect upon American life. Today it is impossible to conceive of our way of life without radio. Annihilating space and distance, American radio has in a short span of two decades commanded the largest single audience of listeners ever gathered in the history of mankind, over 100,000,000 men, women and children. Today we receive the last minute bulletins directly from Europe as an everyday occurrence. New cultural avenues have been opened and educational features developed; new technical frontiers have been broken through in frequency modulation and television. However, a brilliant future surpassing all the achievements of the past lies before us. It is our task to consolidate our advances along many fronts and to lay a firm foundation upon which the future structure of public service broadcasting and television may soon be built.

I am sure that broadcasters realize that radio, although mighty as a force for good, can do equal evil. The experiences abroad of the past year have all too clearly proved this fact and have stirred us to still greater efforts to keep radio in America free, free for all to speak, for all views of all sides, and from breakfast to bedtime to fill the day of the American people with entertainment, education and news reflecting our culture and aspirations, impossible in any nation where democratic principles do not flourish.

The broadcasters have borne well their part of radio's responsibilities of the past year. Your Association has experienced a busy and most satisfactory year. You will find in the report of each Staff Director, detailed information concerning the activities of his Department. I urge you to read these reports, because by so doing you will secure an excellent idea of the varied and manifold activities of the NAB Staff and by reason of this knowledge will make in the future more and constant use of the services which are available to you in the way of assistance by Staff members. I shall not duplicate those reports, but shall review briefly the larger aspects of the work of this Association.

The value of trade associations to industries has resulted in rapid growth of associations over a period of years. Today trade associations occupy a definite place in business life and perform a useful social and economic function sanctioned by law. The work of your Trade Division divides itself roughly into two divisions—one—tangible services rendered to our members, and the other—intangible services, which occupy the greater portion of our time.

Without minimizing the importance of our tangible assets, may I emphasize the necessity for protecting our intangible assets, such as, freedom of speech, public confidence, the basic value of advertising as a force in developing industry and employment and freedom from unnecessary and burdensome government regulation. No one individual can alone protect these, but united we can—and to unite the industry, to organize the common effort, to promote a working together of competing units, to encourage a broader outlook based on research and facts, and to mobilize the best experience and opinion in the industry—this is one of the major tasks of the NAB.

Persistent effort has been maintained throughout the year to perfect the united front of the radio industry. With the enthusiastic cooperation of the Directors and members who served as membership Chairman in the various states and areas, it is gratifying to report a gain in membership from 427 at the time of our last Convention, to 462 as of today. I cannot emphasize too strongly the need of continued and everlasting effort to bring into membership every radio station in the United States.

The District Meetings have become forums of practical usefulness and of great value in promoting discussion of our problems on an informal basis. I believe these meetings can be developed to even greater usefulness. Together with the meetings of the Board of Directors, the Executive Committee, and the various other committees they have enabled us to develop an industry consciousness and unification greater than has ever existed before within the industry.

May I here express our appreciation to the Directors, to those who served on the various committees and to the entire membership for so generously giving of your time and energy to the work of the Association. Without your assistance, it would have been impossible to carry on the affairs of the NAB during the past year.

I am happy to report that for the first time in the history of either major political party, the platform of each party this year contains a radio plank. This is not only a well deserved recognition of the importance of radio but indicates that the leaders of Congress are well aware of our problems and encourages us to believe that helpful legislation may be enacted in the not too distant future, giving to American radio by law the dignity and protection that has already been given by public opinion.

LEGISLATION

The Johnson Bill prohibiting the advertising on the radio of alcoholic beverages and the Thomas Resolution for adherence to the International Copyright Union were the two major legislative threats during the present session of Congress. We are pleased to report that neither of these pieces of legislation, nor any other legislation adversely affecting broadcasters, was enacted. The
Association's Staff scrutinized all national and state legislation, did not blindly oppose all legislation, but in cooperation with other organizations helped steer the legislation into constructive channels.

Following our custom of being represented by special counsel in litigation involving matters affecting the entire industry, the Association retained special counsel in the RCA v. Whiteman case and has kept in close touch with all phases of the problems dealing with the playing of phonograph records. We are happy to report that we have been successful in our fight to prevent the levy of an additional burden on stations through another license system. On July 25 the United States Circuit Court of Appeals in New York reversed the decision of the District Court and held that broad¬

Radio must not be content to fight a purely defensive legislative battle. We must take the initiative. The present Copyright Law was passed in 1909, prior to the advent of commercial broadcast¬

In our community life today there are propagandists about and we in radio, like many other businesses, are in the line of fire. Public opinion is the controlling factor in our Democracy, and therefore we have a legitimate interest in the public's knowing the real facts about radio in all its manifold branches. To do the job right, it must be done both nationally and locally. During the past year, with your help, we have endeavored to do it nationally, and to supply you with the tools, the weapons and the ammuni¬

Our public relations activity has covered a broad field. We have worked closely with the United States Office of Education through the Federal Radio Education Committee, and have taken a leading part in the Ohio State Institute on Radio and Education, and in many other conferences. There has been a marked change in the attitude of educators generally with reference to radio and radio relationship. The idea that education needed more time on the air has been abandoned because of the realization that education¬

For some time, advertising has been under attack from several angles. It has been charged that advertising is wasteful and burdensome to the consumer and that it gives an undue advantage to large companies and thereby fosters monopoly. These attacks are not directed against abuses in the use of advertising, but against advertising as a business tool. This is a serious threat to radio and to all media. We have believed it important that con¬

Our relations with the press have steadily improved. In this connection, we report a most cordial attitude on the part of J. S. Gray, Radio Chairman of the American Newspaper Publishers Association, whose friendly report on radio was a feature of the recent ANPA convention. In passing, it is well to observe that much of the change toward friendliness in the attitude of the newspapers is attributable to the excellent manner in which radio has acquitted itself in the war crisis and the use by radio of newspaper war correspondents, and the cooperation between these and the radio correspondents constitutes a noteworthy chapter in this relationship. Still another factor in bringing about better relation¬

In cooperation with committees of the American Bar Association, the American Newspaper Publishers Association and the Newspaper Editors Association, the reporting of judicial proceed¬

We proceed upon the theory that there is room for both the radio and the newspaper advertising dollar.

The widespread acceptance and endorsement of the Code be¬

The list of outstanding national organizations with which we have worked during the past year is too long to include here, but you may be sure we have overlooked no opportunity to tell the story of the American System of Broadcasting and to make friends for radio. The efforts of the year were brought to a fitting close in the unprecedented radio ceremonies of last Saturday, when the New York World's Fair of 1940 and the San Francisco Golden Gate Exposition joined hands to convey the thanks of our listeners for public service rendered and to dedicate plaques symbolic of American free radio.

I believe the adoption of the Code was a distinct step forward; that it has proved its value during the past year and that it will
continue to grow in usefulness. To the Code Committee and its able chairman, we owe a debt of gratitude. It is especially pleasing to mention that the American Trade Association Executives bestowed a certificate of Honorable Mention on the NAB for its Code, citing the “achievement of instituting a system of self-regulation designed to make further government regulation or control unnecessary, and which would deserve and earn public confidence.”

LABOR RELATIONS

For another year the industry has operated without any major labor trouble, and, generally speaking, the relationship between our industry and organized labor is friendly. Our employees are well paid; our average weekly pay check of $45.20 is believed to be the highest in the country. Without surrendering our rights, we have complied with both the spirit as well as the letter of the various laws enacted in recent years, and both labor officials and government officials dealing with labor problems have publicly praised the policy and activity of the NAB Labor Relations Department. Labor is a friend of the American System of Broadcasting.

RESEARCH

The activities of the Research Department have been many and varied, in the form of supplying facts and information for the work of the various departments and committees; in working with the FCC, the Census Bureau, the FRBC and other governmental agencies, and with various groups and associations in assisting in analyzing the music copyright problem; in the preparation of a master station file, primarily designed for research purposes, but of immeasurable value to the entire industry; and, in taking a leading part in the preparation of the Program Log and Accounting Manual.

The Program Log Recommendation, and the Transmitter Log Recommendation prepared by the Engineering Department, furnish excellent examples of what can be accomplished by cooperation between the staffs of the FCC and the NAB.

We believe the recently issued FCC Forms 301 and 319—the new forms for application for construction permit or modification thereof for standard broadcast stations and high frequency broadcast stations—impose an excessive burden upon applicants. Although we are in sympathy with the Commission’s desire to secure on these forms full information regarding the applicant’s qualifications, we believe that many of the questions can be so modified as to relieve the applicants of considerable burden in supplying information without unduly increasing the work of the Commission. We hope that by cooperative effort the excellent result which was obtained with respect to the Log Recommendations can be duplicated with respect to these forms.

A Plan for Unit Volume Measurement has been prepared in detail and will be submitted to this Convention for consideration, and we believe this is but the first of many very definite accomplishments which we believe will be achieved in the very near future.

BUREAU OF RADIO ADVERTISING

The Bureau of Radio Advertising was placed in full time operation on September 1st, to assist members in sales and promotion problems. Trade studies, sales manuals covering specific selling problems, together with other material, have been issued and many members report having secured tangible results with the material. The Bureau is getting at the true facts in fields where resistance in radio advertising has existed and has given the commercial managers not only an impetus to get together, discuss their problems and exchange ideas, but has also given sales data with the aid of which many contracts were closed.

In cooperation with the Sales Managers’ Division, the Bureau has taken an active part in AFA and NRDG conventions, and has cooperated with the ANA and AAAA. It has done a good job in promoting the use of radio as an advertising medium.

PROMOTION

The relationship with the RMA has been most friendly and cooperative and the Joint RMA-NAB Promotion Campaign has produced very satisfactory results. A continuous campaign has been carried on to increase the number of listeners, to increase the hours of listening per day, to increase the appreciation of the American radio programs and to spread an understanding of the American system of broadcasting. During the past year, it has sponsored such nationwide events as the “Curtain Raiser,” “Radio Christmas,” the “National Radio Festival,” “Listen While You Ride,” and “Listen While You Play,” and now has in active swing the “Listen Before You Vote” campaign. Under the theme, “Your Electric Utility Can Be Your Best Local Account,” a campaign for utility advertising has been conducted.

This department has also worked in cooperation with the radio servicemen and the set manufacturers to reduce the number of inoperative or partially inoperative set and much progress has been made.

ENGINEERING

In an industry such as radio, it is but natural that engineering is fundamentally first and foremost. This past year has been one of great activity due to the development of television and frequency modulation. Also the ratification of the Havana Treaty by Mexico brings to the front not only the problem of changing the frequency of most of the stations in the country but also other problems in connection with the public and the receivers. I wish to here express the hope that the difficulties which have arisen in connection with the Havana Treaty will be solved, and that the Treaty will become effective at an early date. In addition to keeping in close touch with all these problems, in working with the FCC and the NAB members, our Director of Engineering took a leading part in the preparation of the Transmitter Log and has under preparation a revision of the Engineering Handbook which should be of real value to the industry.

INFORMATION POOL

Before ending the report on the work of the various Staff members, may I mention a service of the Association Staff, the value of which I do not believe is fully appreciated by NAB members. Each Staff member has collected a pool of information for the use of members—labor statistics, legal authorities, research methods, engineering data, information for speeches, for promotional activities, and data on various other subjects.

We urge you to use this for two reasons: First, because we know it will be of value to you; and second, by using it instead of diminishing its value, you increase its value by testing its usefulness, adding your results to the pool, and thereby making it of greater value to the industry.

MUSIC COPYRIGHT

Broadcasters have always been willing to pay a fair and equitable price for the use of music. They are the first to acknowledge the cultural value of music, and that music has played a prominent part in the development of radio. However, they demand the right to purchase music in a free and competitive market the same as they purchase their other requirements. They are unwilling to pay ASCAP on news broadcasts, on sports broadcasts, and on other programs using no music. They are also unwilling to pay ASCAP on programs which use non-ASCAP music. They are unwilling to be required to pay the entire price for music to a relatively few composers merely because those composers have secured a monopolistic control of the means of exploitation of their output. They believe the cultural life of America would be greatly benefited by encouraging the creative genius of young and able composers whose works are at present never played because of the character of ASCAP’s present contracts. Today, broadcasters pay forty times as much per dollar of their gross as any other customer of ASCAP, and the new ASCAP contracts now demand they pay sixty times as much, increasing their payments from $4,500,000 to nearly $9,000,000. This we will not do.

A year ago, a sincere and honest attempt was made to sit across the table from representatives of ASCAP to negotiate a renewal of the contracts on a business basis. This effort was thwarted by the refusal of the President of ASCAP to appoint a committee
to meet with the broadcasters; even though ASCAP's Board of Directors had authorized the appointment of such a committee. In accordance with the mandate of the NAB convention held last year, a final positive effort was made to reach an agreement with ASCAP, upon the failure of which, the special convention was called last September in Chicago. In accordance with the practically unanimous vote of that convention, Broadcast Music, Inc. was organized for the purpose of developing a pool of non-ASCAP music and to assure the broadcasters of the right to purchase their music in a free competitive market. BMI has passed through the organization stage and today is a well-staffed organization, with a membership of over 300 stations. These BMI member stations pay over two-thirds of the revenue which ASCAP receives from the entire industry. Complete information concerning BMI will be given you Tuesday and plans for the future will be discussed at length. Suffice it here to say that today broadcasters have it within their power for once and all to end ASCAP monopoly, to solve this most troublesome question, to give the young composers a chance, and to stimulate creative effort in the United States. Moreover, the solution of this problem by a united industry will have a very salutary effect upon a number of our other pressing problems. Now is a most critical time for broadcasters. We must not fail! Let this Convention send out the word that San Francisco is to be no Munich! We are in this fight to win!

CONCLUSION

What of the future? Today we meet in a very different world from that which existed this time last year. It would be a bold man indeed who would attempt to prophesy under what conditions we shall meet this time next year. There is need for much long-range thinking, realizing as we must that radio will have a most influential and material effect upon the future of this country. It is not our job to decide for the citizens the questions which must be decided, but it is our task to fairly, adequately and honestly bring them the facts. In so doing, we perform a service in assisting people to govern themselves. We must do it courageously, fearlessly and effectively.

Our part in the world picture today is to do our job—and it is a most important job—well and right in the hope and confidence that in the scheme of things the many stones which form the mosaic we call the American way of life will fit together. We must be sure that, regardless of what may happen, radio's pillar in the temple of Democracy will be sound and will not crumble. The foundation of that pillar must be a free radio. There must not only be no censorship, but no threat of censorship. For, as the U. S. Supreme Court recently said, "It is not the sporadic abuse of power by the censor but the pervasive threat inherent in its very existence that constitutes the danger to freedom of discussion."

The foundation of free radio must be good broadcasting. The American public is the only champion radio needs. So long as our thinking is dominated by intelligence and common sense, there will be no serious threat to free speech, a free press or to a free radio. The American broadcasting industry has good reason to be proud of its record. Its position is one to be treasured and guarded from any hands within and without, which may threaten to destroy it. The American public we serve is marching with us.

Respectfully submitted,

NEVILLE MILLER, President,
National Association of Broadcasters.

The Secretary-Treasurer's Office

This is the Annual Report for the fiscal year 1939-1940 of the Office of Secretary-Treasurer of the National Association of Broadcasters.

PERSONNEL

Effective April 1, 1940, the undersigned assumed the duties of the office of Secretary-Treasurer under the title of Assistant to the President. This arrangement was made pending the action of the Board of Directors in filling the position following the resignation, effective May 1, 1940, of Edwin M. Spence.

Upon leaving, Mr. Spence submitted a properly audited statement of the Association accounts which has been accepted and approved by the Board and the surety bond of Mr. Spence discharged.

HEADQUARTERS PERSONNEL

During the course of the past year the headquarters staff of the Association has been completed in accordance with the provisions of the By-Laws. On November 24, 1939, Russell P. Place was named Counsel and placed in charge of the Law Department. On December 1, 1939, Lynne C. Smeby was chosen Director of Engineering. With these appointments the several departments contemplated in the NAB Reorganization Plan are completely manned. In addition to these Directorships, Samuel J. Henry, Jr., joined the Association staff in August, 1939, as manager of the Bureau of Radio Advertising. At approximately the same time, Arthur Stringer assumed charge of the Radio Promotion or Circulation activity, a work supported jointly by NAB and RMA.

We thus find ourselves at the conclusion of this fiscal year with a full and complete staff at headquarters equipped and working efficiently to serve the needs of the industry.

The reports of the various Department Directors contain all essential information relating to their activities.

The total of full and part-time employees of the Association, including stenographic and kindred office help, numbers 36. The Secretary-Treasurer coordinates the activity of this staff and cares for all general correspondence.

The weekly NAB REPORTS are the means of regular periodic contact with the membership. The task of assembling and editing the material going into these REPORTS has been very ably discharged by Joseph L. Miller. We welcome suggestions from the membership regarding the REPORTS.

Board Meetings

The Secretary-Treasurer acts, under the By-Laws, as Secretary of the Board of Directors and of the Executive Committee as well as of all Standing Committees of the Association. Following is a list of Board, Executive and Standing Committee meetings held during the year:

Meetings of Board of Directors

MEMBERSHIP

It is gratifying to report that the membership of the Association stands today at the highest point in its history. The Secretary-Treasurer's report at the membership meeting last year disclosed a total of 425 members. The present membership of the Association totals 461.

The ten weeks membership campaign which ended just prior to this convention proved measurably successful and in this connection we desire to express to the District Directors, the state and area membership chairmen, as well as many individual member broadcasters, our grateful appreciation for the helpful assistance rendered. The following table discloses the gain in membership by dues classification in the period April 1, 1940, to July 15, 1940:

79% of all CBS affiliates are NAB members.
64% of all MBS affiliates are NAB members.
65% of all newspaper owned are NAB members.

(Members are invited to inspect the exhibit of the material used in the membership campaign displayed at the convention.)

Respectfully submitted,

C. E. A. RENGY, JR., Assistant to the President.

FINANCIAL

Since the resignation of Mr. Spence the direct control over Association finances has been exercised by Mr. Miller through the undersigned and through Everett E. Revercomb, Auditor. The following Financial Statement discloses in detail the operations of the Association during the fiscal year, July 1, 1939, to June 30, 1940:

National Association of Broadcasters
Statement of Receipts and Disbursements
For the Period July 1, 1939, to June 30, 1940

RECEIPTS

Cash on Hand, July 1, 1939 (As Reported at Last Convention) ........................................................ $52,556.59
Receipts during period ........................................... 245,502.62
Total ......................................................... $298,059.21

DISBURSEMENTS

Annual Convention (Partially recovered) ........................................... $8,916.84
Board of Directors Meetings ........................................... 9,666.33
Broadcast Music, Inc. (Entirely recovered) ........................................... 6,061.33
Committee Expenses ........................................... 44,512.09
Dues and Publications ........................................... 1,141.93
Furniture and Fixtures ........................................... 2,126.64

[5]
Legal, Engineering and Accounting
Fees ........................................... $21,666.77
Miscellaneous ................................ 14,517.95
NAB Reports .................................. 10,036.94
NAB-RMA Expenses (Partially recovered) 6,919.96
Office Supplies ................................ 2,645.69
Postage ........................................... 3,643.50
Printing ....................................... 9,669.10
Rent ............................................. 8,499.96
Salaries ........................................ 94,572.07
Telephone and Telegraph ..................... 4,896.28
Travel ......................................... 12,273.75 $234,534.13

Cash on Hand, June 30, 1940 ............ $63,525.08

Respectfully submitted,

C. E. Arney, Jr.,
Asst. to the President.

Engineering Department

At the beginning of the year, July 10, 1939, a number of work projects were before the Engineering Committee. Among these were:
A—Formulation of Field Measuring Standards.
B—Improving relations with the Civil Aeronautics Authority concerning antenna installations.
C—Revision of the Engineering Handbook.
D—Insurance Committee.
E—Federal Communications Commission's method of rating interference.
F—Co-operation with the Radio Manufacturers Association on matters of mutual interest.
G—Co-operation with Radio Servicemen.

The present status of these subjects is as follows:
A—The Field Measuring Standards have been formulated.
B—The attitude of the CAA toward radio tower installations has changed to a more favorable one.
C—The Engineering Handbook revision will be released this fall.
D—Mr. Miller has appointed an Insurance Committee for the purpose of co-operating with insurance companies concerning broadcast station insurance and the Director is cooperating with the Committee.
E—A detailed study of the FCC method of rating interference has been made and conferences have been held with the FCC Engineering Department.
F—Conferences held by Mr. Hogan with RMA Engineers have paved the way for cooperation on matters of mutual interest.
G—Recommended Qualifications for Radio Servicemen's Organizations has been formulated and submitted to the Board with a recommendation that it be adopted as a guide for NAB members to use in their cooperative efforts with the servicemen.

Other principal subjects engaging the attention of the Department during the past year are:
a—Television.
b—Frequency Modulation.
c—Facsimile.
d—Havana Treaty.
e—Sample Transmitter Log.
f—Matters pertaining to the FCC.

It is anticipated that the main subjects of attention by the Engineering Committee during the next year will be:
1—Television.
2—Frequency Modulation.
3—Facsimile.
4—Reallocation due to Havana Treaty.
5—The Broadcast Engineering Conference at Ohio State University.
6—Cooperation with RMA.
7—Cooperation with Institute of Radio Engineers.
8—Cooperation with Radio Servicemen.
9—FCC matters pertaining to engineering.
10—Revision of the Engineering Handbook. It is intended that the Handbook be revised each summer for release in the fall.

NAB DIRECTOR OF ENGINEERING

The reorganization of NAB provided for a Director of Engineering. Mr. Raymond M. Wilmotte carried on the duties of the office until a full time Director was appointed on December 1, 1939. Mr. Wilmotte was retained for a period of six months after the appointment, in a consulting capacity in order to assist the new Director.

ENGINEERING COMMITTEE

It was decided that the Engineering Committee of 15 should be expanded to 21 in order that broader representation might be had and in order that there might be a representative from each district. Following this pattern, the 1940-41 Engineering Committee will have a member from each district, a member representing each of the three National Networks and a Chairman. To follow the pattern of other departments of NAB, the Engineering Committee was supplemented by an Executive Engineering Committee of six members appointed by President Miller on December 28, 1939, to serve until the 1940 Convention. These men were selected geographically so that the expense of bringing the Committee to meetings would be a minimum.

This has been a year of interesting technical developments that may have an important bearing on the future of broadcasting. Frequency Modulation, Television, Facsimile and the reallocation plan have held the spotlight.

TELEVISION

Two important hearings on television were held on January 15 and April 8 and these were attended by the Director and reported for NAB REPORTS.

FREQUENCY MODULATION

Frequency Modulation was the subject of an article written for the January 26 REPORTS. A hearing on Frequency Modulation was held by the FCC on March 18 and this was attended and reported for NAB REPORTS. A summary and analysis of Frequency Modulation was written for the April 8 REPORTS.

HAVANA TREATY

With the Mexican ratification of the Havana Treaty on December 28, 1939, the way was cleared for putting the agreement into effect. Many United States broadcasting stations have received serious interference in the past from Cuban and Mexican stations. The Havana Treaty provides channels of their own for the Cuban and Mexican stations, thus eliminating this source of interference. Beside the problem of changing the frequency of most of the stations in the country there are several problems in connection with the public and the receivers. There are four problems in connection with the receivers; these are, resetting the push-buttons on the receivers, extending the tuning range to 1600 kc, where necessary, realigning the intermediate frequency amplifier of the receivers in cities where stations will move to 910 kc, and changing the call-letters on push-buttons and on dials. These problems are being worked out with an organization of servicemen known as the Radio Servicemen of America and RMA, and plans for proper publicity are being formulated, with the cooperation of the Director, by the Headquarters Staff. The reallocation was tentatively set for August 1. Other countries, parties to the Havana Conference, have made a number of exceptions to the original agreement, bringing up a doubt as to whether the agreement will go into effect at all. In any event, the agreement probably cannot be put into effect earlier than December 1.

FIELD MEASUREMENTS

Due to various methods of taking field measurements and interpreting the results, there has been confusion as to the meaning of
field intensity maps and it has been difficult to compare the claims of one station with those of another. A “Recommended Practice for Field Intensity Surveys for the purpose of estimating field strength contours of a broadcast station in the regular broadcast band” has been formulated and turned over to the Research Department, and it is hoped that the recommended practice may find general acceptance and bring about a uniformity in coverage work.

INTERFERENCE RATING

There has been considerable controversy over the FCC’s method of rating interference. Conferences have been held with the FCC Engineering Department with a view towards performing a series of experiments to determine what is the proper law to use. The Director of Engineering has prepared for the Engineering Committee an analysis of the present method of determining interference. This matter is being pursued and it is hoped that it may be cleared up in the near future.

RECEIVING SET REPAIRS

Realizing that station circulation can be increased if listeners will keep their sets in repair and therefore that it is to the broadcasters’ advantage to cooperate with radio servicemen, the Committee has formulated “Suggested Qualifications for Radio Servicemen’s Organizations” and this can be used by a station in determining if a radio servicemen’s organization is worthy of cooperation. Conferences were held with servicemen before formulating the standards.

OHIO STATE ENGINEERING CONFERENCE

One of the most important educational sources for keeping broadcast engineers up-to-date is the “Broadcast Engineering Conference” held annually in February at Ohio State University. The Conference is held under classroom conditions and treats with current engineering developments in a practical way. NAB officially cooperated in this year’s Conference. Mr. Wilmotte and the Director attended as representatives of NAB and participated in the Conference. Two discussion groups dealing with receivers and FCC regulations were led by Mr. Wilmotte. Of the 248 engineers in attendance at the Conference, 140 were from broadcast stations and of these, 127 were from NAB members. Realizing the importance of the Conference to the broadcasting engineers, NAB plans to expand its activity in connection with next year’s conference.

SAMPLE TRANSMITTER LOG

The Director prepared a sample transmitter log and instructions on how to use it, with the cooperation of the FCC Engineering Department, and this log form has been distributed to the membership as a sample log which would meet the FCC requirements.

BROADENING NAB MEMBERSHIP

The Engineering Committee has discussed the membership requirements of the NAB BY-LAWS which specify that the scope of NAB is in the band (530 to 1600 KC). In view of the developments in FM, television, etc., and the hearings held on these subjects by the FCC, this was brought to the attention of Mr. Miller and he appointed the Director as one member of a Headquarters Committee of three to investigate and report on a proposed By-laws revision. The Revision Committee took the matter under advisement and presented to Mr. Miller, for consideration by the Board and the membership, a proposed revision which would make possible the inclusion of new broadcasting services, both aural and visual as they develop.

ENGINEERING HANDBOOK

The NAB Engineering Handbook has not been revised since 1938. The Director, under the guidance of Mr. Wilmotte and the Engineering Committee, is revising the Handbook and it is hoped that a revised edition will be ready for distribution early this fall. New sections are to be added on subjects such as frequency modulation and television.

COOPERATION WITH RMA

The Engineering Committee is cooperating with RMA on problems arising out of the reallocation slated for this fall or early winter and on the matter of push-button receivers having too few push-buttons to allow inclusion of all stations in some localities and on the matter of loop receivers, which are sometimes installed to the detriment of stations with low field strengths.

SERVICE TO MEMBERS

Many minor projects have been carried on, and the Director has assisted many stations with their individual engineering problems. The membership should feel free to call on the Director of Engineering for assistance on engineering matters on which they might think that he can be of service.

The Director wishes to acknowledge the splendid assistance rendered him by the Headquarters Staff and the Engineering Committee in assuming his new duties. Particular mention is due Mr. John V. L. Hogan, Chairman of the Engineering Committee, and Mr. Raymond M. Wilmotte, advisor to the Director, for their splendid advice and counsel during the first months of the new work.

EXECUTIVE ENGINEERING COMMITTEE

The members of the Executive Engineering Committee for 1939-40 were: John V. L. Hogan, WQXR, Chairman; J. R. Poppele, WOR; O. B. Hanson, NBC; E. K. Cohan, CBS; Albert E. Heiser, WLVA; Paul A. de Mars, Yankee Network; R. M. Wilmotte, Consultant, ex-officio, and Lynne C. Smey, Director, ex-officio.

ENGINEERING COMMITTEE

The members of the Engineering Committee for 1939-40 were: John V. L. Hogan, WQXR, Chairman; John E. Fetzer, WKZO; J. H. DeWitt, Jr., WSM; John T. Schilling, WHB; J. J. Poppele, WOR; Paul A. Loyet, WHO; William G. Egerton, KTSU; O. B. Hanson, NBC; E. K. Cohan, CBS; Carl J. Meyer, WGN; Albert E. Heiser, WLVA; William H. West, WTMV; Porter Houston, WCBM; Paul de Mars, Yankee Network; Herbert Hollister, KFBI; Raymond M. Wilmotte, Consultant, ex-officio; and Lynne C. Smey, Director, ex-officio.

Respectfully submitted,

Lynne C. Smey,
Director of Engineering.

Legal Department

Since assuming the position of NAB Counsel on November 24, 1939, the work of the Legal Department has divided itself into the following categories:

LEGISLATION. Of prime importance to broadcasters is the study and analysis of all bills introduced in the Congress and the State Legislatures affecting them directly or indirectly. This work, together with the incidental correspondence, conferences and follow-up of hearings, has been carried out with unceasing vigilance. No measures adversely affecting broadcasters have been enacted.

CONGRESS. Below are the principal pending bills affecting Radio:

Thomas Bill: Introduced by Senator Thomas (D-Utah) on the basis of the report of the so-called Shulze Committee for revision of the copyright laws looking to adherence to the International Copyright Convention, this bill drastically revises the copyright law. Space does not permit of detailed analysis, but numerous provisions, particularly the retention of minimum statutory damages for infringement, make the bill unacceptable to the industry. NAB is opposed to passage of this measure, and will actively voice its opposition when it is set for hearing.
McGranery Bill: Introduced by Representative McGranery (D-Penna.), this measure would amend the Communications Act in the interests of broadcasters. It provides for a minimum license term of three years, for hearings on new applications if the grant would adversely affect an existing station, and requires that no license shall be revoked or renewal denied because of the character or contents of any program, unless such program matter is expressly forbidden by specific provision of the Act or by regulation of the Commission authorized by the Act, and then only after the licensee has been adjudged guilty by a Federal Court of violation of such provisions. The bill would curb the President's emergency powers over broadcast stations. There is small likelihood of hearings on this bill at this session. The Bailey Bill in the Senate, introduced by Senator Bailey (D-North Carolina) is a companion bill. The Directors, as well as the Legislative Committee, have given consideration to NAB's position on these measures.

Johnson Bill: Presented by Senator Johnson (D-Colo.), this bill seeks to ban the advertisement of alcoholic beverages over the radio. Because the NAB Code bans advertising of hard liquor, and beer of some alcoholic content is legal in all States, and because we believe the bill is an unwarranted interference with program content and discriminates against radio in favor of other media, NAB has actively opposed this bill. At the moment it is believed to be stymied by the introduction of an anti-lynching amendment by Senator Clark of Missouri. Numerous broadcasters have registered their disapproval with their Senators and Congressmen. Still on the Senate Calendar, although repeatedly passed over as objected to, it remains a threat. The best opinion is that it may pass the Senate if put to a vote, but would be killed in the House.

Ditter Bill: Introduced by Representative Ditter (R-Penna.), this measure would amend the Communications Act with respect to certain procedures and their consequences. The Ditter Bailey and Pepper Bills tie in to some extent with the Walter-Logan Bill to revise administrative procedure, and to amendments to the Communications Act which the NAB has suggested to the Attorney-General's Committee on Administrative Procedure. It is expected that the entire subject will come to a head at the first session of the next Congress, when NAB will seek to promote major improvements for the benefit of the industry.

Walter-Logan Bill: This measure, which has passed the House by a vote of about three to one, seeks to improve and standardize administrative procedure in most of the government agencies and commissions. The Legislative Committee voted not to take any action with respect to it. NAB, with approval of the Board of Directors, filed suggestions for improvement of FCC procedure with the Attorney General's Committee on Administrative Procedure, recommending particularly independent examination into the facts, and quasi-judicial review or judicial review on the facts and law by a tribunal independent of the administrative body. In most particulars the NAB endorsed the suggestions of the Federal Communications Bar Association.

STATE LEGISLATURES

NAB cooperated with New York broadcasters with reference to the Perry Bill introduced in the New York Legislature, and the most burdensome threat to radio to come before a State legislature this year. This bill would have required broadcasters to secure the written consent of all performers on broadcast programs, a literal impossibility in many cases such as parades, football games and the like. It passed the Senate but was killed in the Rules Committee of the Assembly. No other legislation of importance is pending. Legislatures have been in session this year in only thirteen States.

LITIGATION

RCA v. Whiteman, now pending decision in the U. S. Circuit Court of Appeals in New York, has engaged NAB attention for the protection of broadcasters' interests in the use of phonograph records. The lower court's decision, unfavorable to radio in finding common law rights in performing artists in their recorded renditions, has been appealed, briefs have been filed and oral argument had. Decision on appeal has not yet been handed down. NAB employed special counsel in New York to represent the interests of the industry.

LEGAL ASSISTANCE TO MEMBER STATIONS AND THEIR ATTORNEYS

Specific information and advice has been given upon request concerning the Commission's Rules and Regulations, and on matters pertaining to performing rights licenses, the playing of phonograph records, lotteries, treatment of political candidates, defamation, income tax, Social Security and Wage-Hour rulings, misleading advertising and other topics of importance to members. In all of this work care has been exercised to avoid conflict with the services rendered by private counsel in radio matters.

Counsel has been in touch with government agencies and commissions, attended hearings before the Commission on television and FM, and on administrative procedure before the Attorney General's Committee. Counsel has acted as secretary to the Radio Committee of the Committee on Cooperation between Press, Radio and Bar, which has worked to bring about a basis of mutual understanding between the three groups in their relations with one another and the public.

A radio plank was submitted to the Resolutions Committees of the Republican and Democratic National Conventions at Philadelphia and Chicago.

In addition to routine study of court decisions, special study of the Federal anti-trust laws as they affect the NAB was made and submitted to the Board of Directors.

LEGAL ASSISTANCE TO NAB STAFF AND COMMITTEES

Analysis of statutes, contracts, forms, the drafting of resolutions and proposed amendments, and general assistance to members of the NAB staff was rendered from time to time as problems presented themselves.

Sanders Brothers Case. The decision of the United States Supreme Court in FCC v. Sanders Brothers Radio Station, decided March 25, 1940, is the most outstanding of the year in its effect on broadcast licensees. In accordance with a resolution of the Board of Directors, Counsel has analyzed the decision and submits his analysis below:

Federal Communications Commission v. Sanders Brothers Radio Station, U. S. (decided March 25, 1940, rehearing denied April 22, 1940.)

The Supreme Court of the United States granted a writ of certiorari in this case to determine whether an order of the FCC granting an application for a construction permit to erect a radio broadcasting station is defective because the Commission did not make findings as to economic injury to an existing station in the same area, due to competitive conditions in that area, which had intervened before the Commission to oppose the application; and whether, assuming that findings on this subject are not essential, the intervening rival station is authorized by Sec. 402 (b) of the Communications Act to appeal to the Court of Appeals for the District of Columbia as "a person aggrieved, or whose interests are adversely affected, by any decision of the Commission granting or refusing any such application".

The Court's opinion, by Mr. Justice Roberts, holds that economic injury to an existing station is not a separate and independent element to be taken into consideration by the Commission in determining whether it shall grant or withhold a license, although the question of competition between a proposed station and an existing one may have an important bearing upon the ability of the applicant to serve his public, and on the question of whether both stations will go under and leave a portion of the public without adequate service, or by a division of the field whether both stations will be compelled to render inadequate service.

Thus economic injury to an existing station as such, and apart from considerations of public interest, convenience or necessity,
need not be weighed separately by the Commission. But on the question of whether the grant to the applicant will be in the public interest, competition is relevant. It would seem that a showing that resulting competition would cause both stations to go under, or both to render inadequate service to the public, or make it unlikely that the applicant can adequately serve his public, would defeat the grant.

The opinion also concludes that although a licensee cannot resist the grant of a license on the sole ground that the resulting competition may injure him economically, yet he is entitled to appeal under Sec. 402(b) of the Act, since one likely to be financially injured by the issuance of the license might be the only person having sufficient interest to bring to the attention of the appellate court errors of law in the action of the Commission in granting the license.

Thus, it would seem clear that an existing station which is adequately serving its public, can appeal from an order granting a license to a new applicant which will result in a competitive situation which will prevent either from adequately serving the public for whose attention they would compete. If, on appeal, the existing station can show that the Commission failed to consider the effects of competition on the ability of either station to operate in the public interest, convenience or necessity, or if it can show that the grant of the new license will render it impossible for either station adequately to serve the public, then the decision of the Commission would be reversed for lack of substantial evidence to support the Commission's finding that the new grant would be in the public interest, convenience or necessity.

In deciding that economic injury to an existing station in and of itself and apart from considerations of public interest, convenience or necessity is not a subject on which the Commission must make separate findings, the Court said that the purpose of the Act in respect of broadcasting is the allocation and regulation of the use of radio frequencies by prohibiting such use except under license; that the Act recognizes that broadcasters are not common carriers and are not to be dealt with as such, but that the field of broadcasting is one of free competition; that the Act does not essay to regulate the business of the licensee, and that the Commission is given no supervisory control of the programs, of business management or of policy; that the field of broadcasting is open to anyone, provided there be an available frequency over which he can broadcast without interference to others, if he shows his competency, the adequacy of his equipment, and financial ability to make good use of the channel; that nothing in the nature of a property right vests in the licensee as the result of the granting of a license; and that it is not the purpose of the act to protect a licensee against competition but to protect the public.

Thus, assuming the grant of a new license on substantial evidence that it would be in the public interest, convenience or necessity, both stations, the old and the new must compete for the economic support of their service areas; and the corollary of free competition in broadcasting is freedom from regulation of competition, whether regulation of rates, business management, policy or program content. Stations that must, in the words of the Court, "survive or succumb according to their ability to make their programs attractive to the public" must remain unjettisoned by the regulatory body in the exercise of their discretion as to how best to compete successfully.

Respectfully submitted,
RUSSELL P. PLACE, JR.,
Counsel.

Labor Relations Department

The broadcasting industry's progressive labor policy continues to pay dividends.

Greatest of these has been organized labor's continued friendship, goodwill and respect. Broadcasting needs organized friends. It now has a good one in labor. This relationship should be preserved and fostered.

More tangible are those dividends the industry has received as a result of its policy in its day-to-day dealing with its employees and their representatives.

Broadcasting demands a high standard of workmanship. In return it pays well. The industry's average weekly pay check of $45.20 is believed to be the highest in the country. Although it is extremely difficult for broadcasting employees to keep those regular hours possible in a factory, the average work week in the industry was decreasing toward 40 hours even before federal wage and hour legislation was enacted. Vacations with pay have been the rule rather than the exception for years. Likewise, few broadcasters have ever thought of making pay deductions for sick-leave, time off for fishing trips and the like. Complaints against general working conditions have been few, scattered and minor.

The industry, as a whole, has accepted collective bargaining as a normal and permanent part of its relationship with its employees. Only two stations in the last two years have been accused by the National Labor Relations Board of violating the Wagner Act. During a period when broadcasting employees were rapidly organizing, this is a record of which the industry may well boast.

Nine broadcasting strikes have been called to the attention of the association during the past year. Six of these resulted from failure of stations to agree with technicians' unions on the terms of first contracts. Inexperience with collective bargaining and its technique on the part of station managers undoubtedly was a factor. Those stations which utilized the service of the association's labor relations director in making first contracts fared better.

The other three strikes resulted from failure to agree on terms for the employment of staff musicians. All three were settled by compromise.

To the best of its ability, the industry has compiled to the letter of the Wage and Hour Act, even though there is a widespread feeling among broadcasters that Congress had no intention of placing any burdens on such a well-paid industry when it adopted a measure to eliminate sweatshops. I say the industry has complied "to the letter," advisedly. So many rules, regulations and opinions have necessarily been issued to implement the broad terms of the Act that what appeared to be compliance one day turned out to be violation the next.

The law specifically exempted executives, administrative employees, professionals and outside salesmen from both wage and overtime provisions. At first glance, it appeared that 90 per cent of all broadcasting station employees fell into those classifications and that the law would mean little to the industry. The administration's definitions of executive, professional, etc., were so narrow, however, that, in the ordinary small station, only the station manager was exempt. The association is making efforts to remed[y] this situation.

A great deal of the labor relations director's time during the past year has been devoted to advising station managers to apply the Wage and Hour Act to their employees. His success may be judged by the fact that only three stations have been found to have violated the Act. Settlements without prosecution were arranged in all of these cases.

Personal friendships are as valuable in labor relations as in business. The labor relations director's many friendships among both labor leaders and governing officials dealing with labor have been extremely valuable to the industry. To increase their number, the director has attended practically all the major labor meetings in the country during the past year. At both the A. F. of L. and C. I. O. national conventions, he discussed broadcasting problems with labor leaders, and assisted in arranging convention broadcasts. This was much appreciated.

There has been a tendency during the past year for a few scattered individual broadcasters to allow themselves to be carried away from the industry's general labor policy by the wave of reaction which followed certain labor excesses of the past five years. Since broadcasters were the victims of at least one of those excesses, and since broadcasters are businessmen, this tendency has been entirely natural. Any general feeling on the part of Business is bound to be reflected in the broadcasting industry. But an individual broadcaster should think twice before departing from
the industry’s labor policy. He should think about the long-range effect of his departure upon his station as a part of a public service industry, as well as about the immediate effect upon his individual operation. Compliance with the industry’s labor policy certainly does not mean that the individual broadcaster must make himself an easy mark for any labor union that comes along. He would lose labor’s respect if he did.

On a dollars-and-cents basis, however, it will pay to get along with labor. By avoiding strikes and futile labor litigation, the industry already has saved an incalculable amount during the two years since the NAB was organized.

In pursuing this policy, both the industry and individual broadcasting stations have at their command the services of a well-trained labor relations director and a well-equipped labor relations department. The director knows labor leaders and how they think. He knows the technique of collective bargaining. He knows how to conciliate disputes. At his disposal he has a store of labor information that can be invaluable to any member encountering a labor problem.

The director’s only complaint after two years of service, is that individual members have not made more use of him. Most of the few labor difficulties which stations have encountered during the past two years could have been averted if the NAB had been consulted in time.

Following is a topical review of the principal labor developments in the industry during the past year.

WAGE AND HOUR ACT

Compliance with the Wage and Hour Act has turned out to be one of the most severe of the industry’s many headaches. Rules, regulations and official opinions are so many and complicated that half of the labor relations director’s time during the past year has been devoted to trying to keep member stations out of Wage and Hour trouble. These efforts have been quite successful. Three stations were compelled to settle for back-pay, due under the act, after inspection by the Wage and Hour Administration. But the vast majority of broadcasters have done everything they could to comply with the letter of the law, the rules and the regulations.

Approximately 500 inquiries about how to comply have come to the NAB Labor Relations Department. The information sent out in return has been supplemented by talks at district meetings in Seattle, Portland, San Francisco, Los Angeles, Boston, Philadelphia, Greensboro, N. C., and Memphis. Information about the act also has been given to the entire membership almost weekly through the NAB REPORTS.

The broadcasting industry’s average weekly pay check of $45.20 is believed to be the highest of any industry in the country. When the Wage and Hour Act was approved in the summer of 1938, it seemed that the industry would need to make several adjustments—that it already was complying with a law designed to eliminate sweatshops. But the overtime provisions of the law affected not only sweatshop workers but highly paid craftsmen as well. Only executives, professionals and outside salesmen were exempted. And such stringent definitions of “executive” and “professional” were drawn up by the Wage and Hour Administration that the average broadcasting station found it had only one executive and no professionals at all, except musicians and actors. If any employee worked more than 42 hours a week, he had to be paid time and one-half for his overtime. That, of course, tended to make broadcasters limit their employees workweek to 42 hours, and this limit often was as distasteful to the employees as it was to the employers. In most stations, 40 hours is the standard work week. Broadcasters have been free, too, in giving time off for fishing trips, ball games, funerals, and the like without docking employees. But a broadcasting station just isn’t a factory; and its employees cannot and do not like to work by the time clock.

With all this in mind, the NAB Labor Relations Director appeared at a Wage and Hour hearing July 25 to propose amendment of the administration’s definition of “executive” to make possible exemption of the ordinary station’s chief engineer, program director and other executives from any hours limitation. The administration’s decision is expected late this summer.

When the act was approved, the labor relations director appointed a special Wages and Hours Committee to advise and consult on problems growing out of the act. This committee has met in Washington several times, and has been consulted by letter and telephone on numerous occasions. The committee’s last meeting directed the labor relations director to attempt to have the Wage and Hour Administrator reverse a subordinate’s opinion that talent charges should be added to base salary of announcers in determining their overtime rate. The Administrator refused this request. Some leading broadcasting attorneys are of the opinion that these talent charges need not be added to base pay in determining overtime when the sponsor is the announcer’s employer under Bureau of Internal Revenue rulings.

Efforts have been made in Congress to exempt all employees who are paid $150 or more a month. These efforts have failed so far, but there is now talk that the Administration, by regulation, may exempt all making $75 or $200 or more. Even a $200 exemption would relieve most stations of almost all of their Wage and Hour pain.

The NAB Labor Relations Director succeeded in having the Wage and Hour Administrator revise a rule which required wage and hour records for transmitter engineers to be kept at the transmitter. A. F. OF M.

The industry is currently at peace with the American Federation of Musicians (A. F. of L.). Although neither the industry nor the union is completely satisfied with the present arrangement, it appears to be working out reasonably well and to have been the best practical adjustment of a difficult problem.

The networks and their affiliates since January 17, 1940, have continued to employ, generally speaking, staff musicians, and to pay these staff musicians the same total annual salary that they paid under the national agreement which expired January 17.

As a result of this general policy, the A. F. of M. has dropped its demand of last November 2 for a new national agreement with a $1,500,000 increase.

A large group of non-network stations is continuing to operate under a national agreement which calls for “quota” expenditures for staff musicians until Septemper, 1940. It seems doubtful that the union will press for renewal of this agreement if the non-network stations continue to employ staff musicians as they have for the past two years.

The opinion of Thurman Arnold, assistant attorney general, that it was illegal for labor unions to compel business to employ unnecessary labor was generally believed to have induced the musicians to drop their demand for a new national agreement with the networks and affiliates. This opinion has yet to have a final test in the courts. When the courts hand down a final and applicable opinion, the future relationship between the industry and the musicians union can be predicted with far more certainty than it can be today.

Most local agreements between the musicians and the affiliates expired simultaneously with the national agreement, and there have been a few scattered disputes in arriving at new local contracts. Most of these were settled without even any serious local trouble, but two had national repercussions. When Stations KSTP and WRVA failed to reach an understanding with their locals, the union asked NBC and CBS to quit sending them name-band sustaining programs. The networks turned down this request. The union then ordered name-bands to quit network broadcasting. Within ten days, the local disputes were adjusted by compromise, and the name-bands were back on the air.

Joseph N. Weber, president of the A. F. of M. for 40 years, retired at the union’s Indianapolis convention in June, on orders from his physician. He was succeeded by James Petrillo, for many years president of the Chicago local. Much-loved in his union, Joe Weber was highly regarded by all who dealt with him. His word was his bond. He was kindly and understanding. He was working first, last and always for his members, but he had a long-range viewpoint that won him much respect from the broadcasters.

He was never too busy to hear their complaints and suggestions, and was always ready to try to adjust knotty problems to the best interest of all concerned.
ASSOCIATED BROADCAST TECHNICIANS

The International Brotherhood of Electrical Workers (A. F. of L.) has led the pack of unions trying to organize broadcasting employees during the past year. The I. B. E. W. takes in only technicians. For the past year it has been enrolling them in the Associated Broadcast Technicians, an affiliated union which once confined its membership to Columbia Broadcasting System technical employees. The I. B. E. W. says it now has more than 200 contracts with radio stations, and is talking about trying to get a national agreement within a few years.

A great many stations have used the services of the NAB Labor Relations Director in making their first contracts, or renewing old ones, with the I. B. E. W. The NAB labor contract pool has been of invaluable assistance in these cases. The personal friendly relationship between the labor relations director and the officers of the I. B. E. W. and ABT has proved extremely valuable, too. Both Daniel W. Tracy, president of the I. B. E. W.,1 and D. J. Dunlop, business manager of the ABT, are keen admirers of the personal relations director to help clear up misunderstandings almost as often as the broadcasters have. This relationship has served the industry well. It should be kept and developed.

The NAB, in its advisory capacity, and the I. B. E. W. are approaching common ground on the general form for a contract to cover station technicians. There have been no direct negotiations along this line, and none is contemplated for the immediate future. It is proving helpful to stations negotiating with a union for the first time, however, to find that at least some provisions of the union's proposal are unobjectionable.

AFRA

The American Federation of Radio Artists has continued to concentrate its activity in the larger production centers. Although the union has obtained a few new contracts during the past year, it took a snub when it demanded extra fees for staff announcers for reading commercial announcements. This issue arose almost simultaneously in St. Louis, Chicago, Cincinnati, Philadelphia and Schenectady. In only one instance did a station capitulate to the union's demand. That was in Cincinnati. In St. Louis, there was a compromise. A station there agreed to pay extra fees for commercials only when the announcer was called in to read commercials on his normal days-off. In Philadelphia and Schenectady, stations agreed to turn over talent charges if and when the stations collected them from sponsors. In Chicago, the issue was put to arbitration. There was some difference of opinion as to what the arbitration award meant, when it was rendered just a few weeks ago.

This summer, AFRA approached the major transcription companies with a proposal for an agreement (or "code") to cover wages, hours and working conditions of announcers, actors and singers. From an industry viewpoint, the AFRA proposal was of great interest for two reasons. First, its acceptance would have materially increased the cost of transcriptions to broadcasting stations. Second, it would have forbidden the transcription companies to furnish transcriptions to any station which AFRA declared "unfair." The NAB advised both AFRA and the companies that the industry considered application of such a clause would be illegal. Negotiations were still in progress when this report was prepared.

ACA

The American Communications Association, the C. I. O. union which takes in all broadcasting employees except artists, has obtained a few new contracts during the past year, but its expansion has not compared with that of rival A. F. of L. unions. The ACA membership is still confined almost entirely to Washington, Baltimore, Philadelphia, New York and Buffalo. Philadelphia and Baltimore are its strongholds. The leadership of the union has been accused numerous times of having Communist leanings, but this has always been denied. The ACA has continued to concentrate on ship and telegraph operators, messenger boys and other telegraph employees, and radio communications employees. No great effort has been made to organize broadcasting employees away from the Atlantic seaboard.

AMERICAN NEWSPAPER GUILD

The Guild, the other C. I. O. union in the broadcasting field, continues to hold a few contracts covering writers, announcers and some technicians in radio stations, although the Guild was organized as a newspaper employees' union. Expansion has been slow. Internal friction has been a great hindrance to the Guild, especially since the death of its first president, Heywood Broun.

STRIKES

Of the nine strikes in broadcasting stations reported to the NAB during the past year, five were called by the I. B. E. W., three by the A. F. of L., and one by the ACA. All of the I. B. E. W. strikes resulted from a disagreement on terms for a first contract. The closed, or union, shop was a leading issue in each case. The three musicians' strikes resulted from failure to agree on the amount the stations were to spend for staff musicians during the year. Disagreement over terms for a first contract led to the single ACA strike. Stations faced with a strike might well call in the NAB Labor Relations Director. His experience in dealing with labor unions might avert a nasty situation.

JURISDICTIONAL DISPUTES

In his report to last year's convention, the labor relations director pointed out that the industry faced the possibility of numerous jurisdictional disputes between various unions—disputes over which union's members should do a particular job. Only one of these has materialized during the year. It is between the I. B. E. W. and the Stagehands' Union over which should operate television cameras and handle the electrical equipment for television shows. There has been no show-down fight as yet.

LABOR ON THE AIR

Owing largely to the increased liberalism of the networks during the past winter in giving national labor leaders time on the air, both the A. F. of L. and the C. I. O. are pretty happy just now about the broadcasting situation. The NAB Labor Relations Director arranged for an increase in the number of labor talks last fall when the C. I. O. was looking with a wary eye at the Code of Program Standards. They felt it would be used to keep labor off the air and, at their San Francisco convention, instructed their national officers "to exercise constant vigilance over the availability of radio facilities to organized labor and if necessary to press for appropriate legislation assuring the fundamental right of full and free access to radio facilities for organized labor." Only the labor relations director's personal appearance before the C. I. O. Resolutions Committee kept the resolution this moderate. In a few instances, unfortunately, the Code has been used to keep local labor leaders off the air, but by and large it has worked to labor's advantage. The A. F. of L. is enthusiastic about it. In a program arranged by the NAB Labor Relations Director, Matthew Woll, A. F. of L. vice-president, last fall said the Code's adoption was a big step toward true democracy. By arrangement with both A. F. of L. and C. I. O., neither makes any complaint to the Federal Communications Commission without first consulting the NAB. During the past year, only one complaint went to the Commission; dozens of others were amicably adjusted.

Respectfully submitted,

JOSEPH L. MILLER,
Director of Labor Relations.

Public Relations Department

In the past year the relations of the broadcasting industry with the public it serves may be described in one word: excellent. This is not the result of any one person's activity or of any one radio operation. It is the combined result of program service delivered by the entire industry which immediately affects the social and economic life of more than twenty-eight million American homes every day and night in the year.

1 Mr. Tracy has resigned his union office, probably temporarily, to become second assistant secretary of Labor.
The public relations policy of radio and its program policy are, inescapably, one and the same thing. Here no middleman stands between producer and consumer. What we transmit goes directly to the living-room of the home. If we please, we please instantly. If we displease, the displeasure is deep and widespread. No mobilization of so-called public relations tactics—nothing can regain the confidence and the goodwill of the listener except a good program, a better program, a more balanced program service.

It is clear from the very nature of things, therefore, that public relations and program policies are interwoven and interchangeable. If there has been one significant and sharply defined development in radio in the past year, this is it. The industry's policies for war coverage, for example, proceeded as much from a consideration of program technique and availability as from any wholesome concern about influences in the home, and especially during the past year, a concern for these influences subversive to our American way of life. It can safely be said that the American system of privately operated, competitive radio has no stronger bulwark of organized public support than that bestowed upon it voluntarily by the club women of the nation with whom NAB has been in contact. The one or two anti-radio blasts which were prominently played in the press last fall relative to afternoon programs in one case, and the handling of the war in another, are not representative of the organized club women of the country, nor typical of their constructive attitude and cooperation. These organizations, on November 29 last, accepted the invitation of the NAB to attend a luncheon conference to outline a year-round program for more practical cooperation. Distinguished club leaders from all over the country came to Washington. We are particularly grateful to Miss Saidle Orr Dunbar, president of the General Federation of Women's Clubs, and Mrs. Luella Lautin, executive director of the National Council of Women, for their generous cooperation in making this the successful meeting it was. There follows a list of those attending:

Radio and Children's Programs

Perhaps the finest example of the active cooperation of between the industry and women's groups was evidenced last year when nationally known organizations and leaders voluntarily set up the Radio Council on Children's Programs to implement that section of the children's section of the NAB Code which reads:

"To establish acceptable and improving standards for children's programs, the National Association of Broadcasters will continuously engage in studies and consultations with parent and child study groups. The results of these studies will be made available for application to all children's programs."

The Council is headed by Mrs. Harold V. Milligan, radio chairman of the General Federation of Women's Clubs and president of the National Council of Women. The vice chairmen and the sections of the children's section of the NAB Code which reads:

Dr. Alice Keliker, Progressive Education Association
Mrs. John Morrison Kerr, National President, Children of the American Revolution
Mrs. Benjamin F. Kraus, Radio Chairman, Massachusetts State Federation of Women's Clubs
Mrs. Luella Laudin, Executive Director, National Council of Women
Miss Mary E. Leeper, Executive Secretary, Association for Childhood Education
Mrs. Edwin C. Lewis, National Radio Chairman, National Society of New England Women
Mrs. Blanche C. Lewton, Chairman of Marketing, Woman's National Farm and Garden Association
Miss Dorothy L. McFadden, Executive Director, Junior Programs
Mrs. Harold V. Milligan, Radio Chairman, General Federation of Women's Clubs
Miss Bertha Niernberg, International Association of Altrusa Clubs
Mrs. Moe Offenberg, President of Washington Chapter, Hadassah
Mrs. J. K. Pettengill, President, National Congress of Parents and Teachers
Miss Constance Roach, National League of Women Voters
Mrs. Henry M. Robert, Jr., President-General, Daughters of the American Revolution

Miss Josephine Schain, Chairman, Executive Committee, National Committee on the Cause and Cure of War
Mrs. Nathaniel Singer, Radio Chairman, United Parents Associations
Miss Izora Scott, National Women's Christian Temperance Union
Mrs. sina H. Stanton, Council of Women for Home Missions
Mrs. Victoria Faber Stevenson, League of American Pen Women
Mrs. James Austin Stone, National Women's Trade Union League
Mrs. Marion Hines Taylor, Zonta International
Mrs. Mary Logan Tucker, United States Daughters of 1812
Mrs. Arthur Vandenberg, Camp Fire Girls
Mrs. R. Gordon Wagenet, Women's International League for Peace and Freedom
Dr. Lulu Waters, Osteopathic Women's National Assn.
Mrs. James Watson, League of American Pen Women
Mrs. Roy C. F. Weagley, Secretary, Associated Women of the American Farm Bureau Federation
Mr. Sterling Wheelwright, National Federation of Music Clubs
Miss Earlene White, National Federation of Business and Professional Women's Clubs
Mrs. Robert Clark Wiggins, Pennsylvania Federation of Women's Clubs

Radio and the Press

Since Munich there has been a growingly mature and better understanding between press and radio. Certainly no appeasement, in the Chamberlain manner, has brought this about, for competition in the origination and publication of news continues vigorous and wholesome. But the dramatic impact of Munich and what followed served to force an outline of the area radio was to occupy in the transmission of news. The subsequent European war and the current national emergency have given a still sharper outline: because of its instantaneous coverage, radio must broadcast news as immediately as it is available. This is its duty to the public. To the credit of both this is realized, and superb examples of press-radio cooperation may be summoned from both the European and the domestic front.

It can be successfully demonstrated, we believe, that the greater amount of coverage of important spot news by radio, the greater number of newspapers sold, and conversely, as more newspapers are sold as a result of spot news developments, the more radio news listening results. In this we have found common ground. But to thoughtful publishers and broadcasters there is yet more important ground commonly shared: the concept and the parallel operation of a free press and a free radio in the American democracy. The press cannot live free and radio tampered; nor can a free American radio continue if a free press is gone. Should one go, the other is next.

We believe that NAB has eliminated an erroneous concept in some sections of the newspaper world which felt that radio wished to live at the expense of the press. This was brought to public attention in advance of the formation of the RCCP, Mrs. Milligan said the following:

"The Council is prepared to undertake practical measures for the attainment of this end (better children's programs) even to encouraging the purchase of products of sponsors providing approved children's programs."

It is significant to record here that in her remarks announcing the formation of the RCCP, Mrs. Milligan said the following:

"The Council is prepared to undertake practical measures for the attainment of this end (better children's programs) even to encouraging the purchase of products of sponsors providing approved children's programs."

(A detailed report of the Radio Council on Children's Programs is given elsewhere.)
of the other for long. Each has its field of service. A paper or a radio station will "survive or stumble," as it serves the public and therefore the advertiser. Selling a medium on the basis of what some other medium won't or can't do—and not upon what you will and can do—is poor selling. No schedule so sold, will long stick.

In the past year the NAB relationship with the ANPA has continued friendly and pleasant.

Radio and Education

There has been a steady improvement in the quality and scope of educational broadcasting in the last twelve months. The year has been featured also by the increase in the number of educational directors appointed by commercial stations and in the number of schools and colleges offering courses in radio broadcasting technique. The Office of Education reports that there are now 345 schools and colleges offering radio instruction.

Throughout the year the NAB has enjoyed close cooperation with the Federal Radio Education Committee which, it is recalled, is jointly financed by the industry and two educational foundations, having been set up in 1934 at the request of Congress to bring about a better relationship between education and radio. FREC studies, group conferences and advisory services have contributed tremendously to the advances made this year.

There was a serious setback given to educational radio this spring when Congress failed to provide the necessary funds for the Office of Education with which to carry on its radio script exchange, transcription service, cooperative educational programs and advisory services. Unless necessary funds are forthcoming, this important work will have to be abandoned. Scores of stations throughout the country and hundreds of schools have found the Office of Education's material has enabled them to render a year-round educational radio service with wide public appeal. It is sincerely hoped that this work will not have to be abandoned.

There has been an increase in the number of important national and regional meetings where both educators and commercial broadcasters met to discuss their common problems. At the 11th Institute for Education by Radio at Ohio State University, some 500 attended. Some 70 commercial stations sent representatives, at NAB's request. This was the largest representation of the industry ever to attend the Ohio State meeting, generally regarded as the most important radio educational conference in the country. Several panel discussions and large group meetings were conducted by NAB staff men and by commercial station personnel. The general tone of the meetings indicated a very healthy condition in the relationship between education and broadcasting.

One recommendation made was that consideration be given by station management to the damaging effects and loss of audience and goodwill as a result of unannounced moving of established educational programs, especially where these programs have an in-school listening following. Should it become necessary to move an established educational feature, good practice indicates that the transfer to the new time should be made so as to give the audience an opportunity to make plans to listen at the new hour.

Radio and the Advertiser: Bureau of Radio Advertising

In conformity with the outline of duties set up under the NAB reorganization plan, it will be recalled that among other things, the Director of Public Relations was charged with the duty to "promote the use of radio as an advertising medium."

Pursuant to this mandate, and in close collaboration with the Sales Managers Committee and the NAB Director of Research, there was organized last year the Bureau of Radio Advertising whose functions are as follows:

"The Bureau is designed to promote radio as an advertising medium; to conduct research and studies in all commercial, industrial and marketing fields requiring the use of advertising; to collect from the industry basic information, in usable form, for the industry; to place in the hands of commercial radio men effective presentations, sales stories and data especially adapted for use in auditions, divisional dealer and salesman meetings; to develop closer relationships with advertisers, advertising agencies, trade bodies and the trade press.

"One of the Bureau's important functions will be to examine proposals from publicity-seeking groups to uncover any hidden commercial interest; and to divert as many of these as possible into commercial users of radio; to stop the free-radio-ride abuse."

"The Bureau also will act as a buffer for radio stations who are the victims of undue pressure from advertising agencies or advertisers in the demand for unusual merchandising service or concessions not provided for in the rate card."

Brought forth from the Bureau have not only been trade studies, radio media presentations, and industry-wide representation at all important advertising business-placing meetings, but also the evolvement of the unit plan of radio advertising which places radio on a parity with other media as to comparative classification figures.

Through the cooperation of the NAB Research Director, Paul Peter, the foundation and continuing fact-finding life blood of the Bureau was made possible.

The use of the wide acceptance of the Bureau's services by stations the demands for time and information on the then NAB staff reached a point where it was necessary to retain a full time experienced person for essential follow-through work. NAB chose Samuel J. Henry, Jr., formerly sales promotion manager of the World Broadcasting System for the job. His work, reports and presence at all important advertising meetings have made him known to all. Because of the details involved, the report of the Bureau of Radio Advertising will be found separately reported.

Radio and the Consumer Movement

In the past year, there has been an accelerated growth in the so-called consumer movement. At the present writing it is difficult to give a clear picture of the consumer movement for the reason that groups within it find themselves at cross purposes and conflicting objectives, socially and politically. NAB has kept the membership notified of all developments in the weekly Reports and in special notices.

Inasmuch as certain elements within the consumer movement desire to destroy advertising of all kinds, newspaper, periodical and radio, the NAB has not been hesitant in lending its cooperative effort in the establishment of the Committee on Consumer Relations in Advertising. Inc., which has been created by advertisers, agencies and media for the purpose of examining the merit of the charges made and to carry on a program of consumer education on a factual and fair basis. Neville Miller, NAB president, serves on its Board, representing the broadcasting industry.

It may be observed that examination of and contact with consumer groups reveals an astonishing lack of understanding relative to the social mission the advertising dollar plays, in addition to its mission in stimulating mass demand, commerce, and wide-scale employment. While there will always be room for improvement in advertising as in other human activity, it should be noted by consumer groups and others that without the advertising dollar a free press and a free radio would not be possible in this or in any other country where these democratic privileges are permitted.

Radio and Reallocation

When it was originally anticipated that reallocation of stations in accord with the Havana Treaty was to be made about August 1, a plan to educate the public was developed by NAB so that the switch-over might be made in an orderly, industry-wide, simultaneous basis, without loss of listeners, time or money. The plan included a proposed tie-up with reputable servicemen's organizations such as the Radio Servicemen of America, who, in conjunction with stations, would make the necessary adjustments on push button sets at minimum cost and with guaranteed results.

Radio Institutional and Circulation Promotion

Shortly after it was reorganized, NAB, through its public relations department, in answer to the demand by stations that radio be promoted via radio inaugurated a year-round institutional campaign designed to sell the American System of Broadcasting
through our own media. National backgrounds were provided against which local and regional efforts might be projected. Literature, speeches, facts, figures, and ideas were collected and dispersed industry-wide. The project grew to a point where it was necessary to bring in additional help. For this purpose Mr. Arthur Stringer was retained by NAB. His intelligent and enthusiastic work is known to all members. His report is given separately.

This work has not only emphasized the need of individual station “grass roots” promotion to its area of listeners, it has also pointed the way toward an enlargement of station audiences through circulation promotion; the extra set, as well as the new set in new homes.

Just ahead is the new NAB institutional promotion “Listen Before You Vote,” calculated to dramatize radio’s role in the presidential election, and therefore the national life of the country. The campaign slogan has drawn support from Republicans and Democrats, and from representative non-partisan groups who have realized that radio today is the New England Town Hall of yesterday where people and ideas are fairly presented and evaluated.

In conjunction with this promotion NAB has revised its pamphlet “Is Your Hat in the Ring” helpful suggestions to any candidate of any party about to approach a cold microphone, the “ABC of Radio,” which lives up to its name and other literature, available at cost to member stations.

Many stations have requested promotional program material packaged in transcription form. Up until recently the expense involved has been a detriment to the execution of this idea. However, it is confidentially believed that a concrete proposal along these lines will be presented to the San Francisco convention in acceptable form.

Radio and Labor on the Air

This is a matter which has always been referred to the NAB Director of Labor Relations with satisfactory results. His report is found separately which includes this subject.

Radio and Its Support of National Defense

The entire industry has good reason to be proud of its spontaneous support to the government in the national emergency. No station has failed to give time, talent and facilities in this hour of national need.

Cooperating with the Civil Service Commission, NAB is sending out properly prepared announcements to all stations for the purpose of locating quickly the 100,000 skilled workers needed in preparedness industries. You recall the yellow page bulletins and the follow-up copy.

The NAB has also been in consultation with the War Department in its current recruiting campaign via radio.

The George Peabody Awards for Public Service Broadcasting

At the San Francisco convention there will be announced the establishment of the George Peabody Awards for Public Service Broadcasting which, through a distinguished Board to be announced then, is designed to exercise an influence in radio which the Pulitzer Prize awards exercise in the newspaper field.

Dr. John E. Drewry, Director of the School of Journalism and Radio of the University of Georgia, which will administer the Peabody radio fund, will appear on the NAB Convention program to make the announcement.

The Peabody Foundation was greatly persuaded by Lambdin Kay, now Director of Public Service at WSB, to launch this undertaking. At a meeting held last spring with the Board of Regents of the University of Georgia, NAB successfully backed up Mr. Kay’s proposal. It is confidently felt that from this will come a new and impartial yardstick for the evaluation of American broadcasting in the “public interest, convenience and necessity.”

Radio Report of The American Civil Liberties Union

It will be of interest to note the following excerpts from the annual report just recently released by the American Civil Liberties Union with reference to radio:

“Freedom on the radio has shown marked improvement during the year. The new personnel of the Federal Communications Commission has refrained from the pronouncements concerning programs which marked the Commission a year ago. In the summer of 1939 an issue arose before the Commission under its former chairman on which the Union lodged a formal protest against an order that international broadcasting stations ‘reflect the culture of this country and promote international goodwill, understanding and cooperation.’ The Union held that this contravenes the provisions of the Communications Act prohibiting interference with free speech. The Commission ordered a public hearing on petition of the Union and at the hearing suspended the order. It has not been put into effect.

“Station program managers, under the influence of the new code adopted by the National Association of Broadcasters, have shown a far greater appreciation of radio’s function in presenting all sides of controversial issues. Under the code, no time can be sold for a discussion of public issues, and equal facilities must be granted to all sides of a controversy. The public forum type of discussion has become widespread.

“... An examination of the working of the code was made by the representatives of the National Council on Freedom from Censorship on all types of stations with the net conclusion that the code has promoted a far larger and fairer degree of discussion of public issues. The National Association of Broadcasters represents radio stations reaching about ninety per cent of the listeners in the country.

”With the declaration by the President of a national emergency in September 1939 some fear was felt that he might act under the law to take over and operate radio stations. The Union, therefore, prepared a bill to take from the President that power. Though a bill was introduced in Congress it has made no headway, and there has been no indication that the power granted the President will be so used.

“The Union appeared before the Federal Communications Commission in behalf of the technical improvement in broadcasting known as frequency modulation, under which the number of wave lengths will be greatly increased, thus expanding the market for free speech.”

NAB FIELD WORK

In conjunction with public relations activity of the NAB, the director attended and spoke at the following meetings during the past year:

November
Chicago—Illinois Federation of Women’s Clubs.
Peoria—Peoria Advertising and Selling Club.
Springfield, Mass.—Radio Council of Western Massachusetts.
Indianapolis, Ind.—Indianapolis Advertising Club.

December
New York City—Civil Liberties Union Dinner.
New York City—New York Women’s City Club.
Chicago—Third School Broadcast Conference.

January
Boston—Radio Division of Massachusetts Federation of Women’s Clubs.

February
Baltimore—Convention of National Association of Cleaners and Dyers.

March
Columbia, Mo.—Stephens College, Consumer Educational Conference.

April
New York City—New School for Social Research.
New York City—Broadcasters’ Bull Session.
Des Moines, Iowa—American College Publicity Association.
Columbus, Ohio—Eleventh Institute for Education by Radio.

May

June
Chicago—Advertising Federation of America Convention.

PUBLIC RELATIONS OBJECTIVES AHEAD

On August 3rd there occurred a milestone in American radio history. The New York World’s Fair of 1940 and the San Fran-
Cisco Golden Gate Exposition joined hands to convey to the industry the thanks of a hundred million listeners for public service rendered. Plaques were unveiled in dedication to the American system of free radio. In them the sculptor visualized this line written by Walt Whitman: "The liberties of the people will be preserved so long as there are tongues to speak and ears to hear."

Here is the kernel of American democratic radio.

Representatives of the press, religion, education, labor and other groups were on hand to bear testimony to the importance and solemnity of the occasion. It is to be hoped that from now on there will instantly occur in the mind and heart of the average American a parallel concept of "freedom of radio" when "freedom of the press", "freedom of religion", "freedom of assembly" are mentioned in speech or print. The phrase and the concept "freedom of radio" deserves to and will find currency in the everyday language and feeling of the American people.

Respectfully submitted,

Ed Kirby,
Director of Public Relations,

Research Department

During the course of the last year, since the Atlantic City Convention in July 1939, substantial progress has been made in developing the research activity of the National Association of Broadcasters.

The work started by the Research Director in assembling basic industry data has been continued and the Research Department was better able to fulfill requests for information from the membership and the general public. Much of the Department's time has been devoted to the collection of information and the performing of special analyses for President Neville Miller and the various Administrative Directors of the Association needed in conjunction with their work. The Research Department has worked, also, with various NAB committees in developing the factual material needed to fulfill their functions.

PROGRAM LOG—FOR ACCOUNTING COMMITTEE

In conjunction with the revised Rules and Regulations Governing Broadcast Stations, issued August 1, 1939, by the Federal Communications Commission, the NAB Accounting Committee undertook the task of evolving a Program Log Recommendation. Many stations called upon the Association to assist them in the matter of interpreting the Program Log requirements of the Commission and also asked for a form suitable for the keeping of such a log. The Accounting Committee called on the NAB Research Department for assistance in this undertaking.

After the form had been evolved and instructions for the use of the log prepared, it was decided to check with the Commission to determine whether the recommendation met the requirements of the Commission Rule. A sub-committee of the FCC Rules Committee was appointed to consider the NAB Proposed Program Log Recommendation, and the D. Ring, Assistant Chief Engineer, served as chairman of the sub-committee with George B. Porter of the Legal Department, de Quincy V. Sutton and Frank Utter of the Accounting Department and William P. Massing of the License Bureau, serving on the committee. Mr. D. H. Deihler of the Legal Department substituted, on occasion, in Mr. Porter's absence. The Secretary-Treasurer and the Director of Research of the Association, at the direction of the Accounting Committee, represented the NAB in the discussions.

After a number of conferences with the FCC sub-committee, the Program Log Recommendation was completed, with slight revision, to the satisfaction of that committee. On recommendation of the sub-committee, the Program Log was then submitted to the FCC Rules Committee. That committee, in turn, expressed verbal approval with the request that the Program Log Recommendation be submitted formally to the Commission for its review.

After deliberation, the NAB Accounting Committee instructed the Secretary-Treasurer to submit the recommendation to the Commission. This was done by letter to the Commission's secretary, March 30, 1940, in which the Commission was asked to review the recommendation to determine whether the form and instructions for the keeping of the Program Log would satisfy the requirements of the FCC Rule. A reply was received from the Commission May 8th and appropriate notice appeared in the FCC Report No. 928 B "Decisions of the Commission" on the same date. The Commission's decision as stated in their letter is as follows: "The Commission has determined that the log form submitted by you makes provision for the keeping of log entries as required by the Rules now in effect applicable to standard broadcast stations, and that the instructions submitted by you for keeping the log are appropriate under the Rules."

The Program Log Recommendation represents a valuable contribution in that controversy on interpretations of the requirements of the Rule has been cleared up. Stations and FCC field inspectors now have a clear conception of the log specified in the Rules. Adherence to the Rule as set forth in the recommendation which is designed to meet the minimum requirements of the Rule with minimum effort, should end the frequent citations issued by FCC inspectors, in the past, for improperly keeping the program log.

ACCOUNTING MANUAL—FOR ACCOUNTING COMMITTEE

The NAB Accounting Committee reviewed the "System of Accounts for Broadcast Stations" prepared by the Association in 1935 in the light of numerous requests from member stations on details of accounting systems. The developments since issuance of the "System of Accounts for Broadcast Stations," particularly the financial reports required by the Federal Communications Commission, necessitated a complete revision. The Accounting Committee called upon the NAB Research Department to assist in preparing a revised accounting manual for broadcast stations.

On recommendation of the Research Department, the manual was prepared in loose-leaf form. This provides the facility for current revision without necessitating complete reprinting on the occasion of each change arising as improvement in accounting procedure or caused by developments within the industry.

The "Accounting Manual for Broadcast Stations" as prepared by the Research Department (at the direction of the Accounting Committee), was approved in meeting in March, 1940, and was mailed to the membership April 5, 1940. The manual is a simple workable system which meets the everyday needs of station management. The annual financial report required by the Federal Communications Commission created the principal need for the revised manual. Particular attention was paid to the aligning of accounts to provide a direct and inexpensive means of preparing the FCC financial report eliminating the necessity for costly and time consuming special analyses. Equal attention was given accounting requirements for Federal and State income tax purposes.

Lastly and most important, particular attention was paid to the matter of providing a system which would produce the vital financial facts needed in conducting the business of broadcast advertising.

ON THE CALENDAR—FOR ACCOUNTING COMMITTEE

The American Association of Advertising Agencies has expressed the desire to standardize invoice forms used in billing for radio advertising service rendered. The Research Director, after consultation with the chairman of the Accounting Committee, has indicated NAB's desire to cooperate with the 4 A's in evolving a recommendation on the detail of information to be included on the face of invoices which will satisfy the needs of advertising agencies, broadcasters and advertisers. Through this cooperative undertaking, effort will be made to eliminate affidavits required by some advertising agencies. The official status of the program log, as required by the FCC, is an unimpeachable "proof of performance" document held in the files of the station. When that document is quoted on the face of the invoice and advertising agencies are acquainted with the nature of the program log, affidavits requirements should be held superfluous.

This subject, upon conclusion of the cooperative undertaking with the 4 A's, will be handled as a revision of the accounting manual.
In such a revision, there will be a recommendation concerning
invoicing and also recommendations concerning expansion of the
program log as an accounting document. With reference to the
latter, the program log can be used as a sales journal. Also, it
will be shown to that with some modification the program log can be
improved as a "proof of performance" record.

The Accounting Committee will, undoubtedly, have
practice the Standard Order Blank for Spot Broadcasting. The
present form was evolved by NAB in cooperation with the 4 A's
in 1933. Developments in the industry since that time have intro-
duced agreement stipulations not included in the standard condi-
tions.

Mr. Miller has indicated the industry's desire to cooperate and
will appoint a committee to represent NAB.

1940 CENSUS—RESEARCH COMMITTEE

The Director of Research and the Research Committee were instrumen
tal in having a question on radio ownership included in the
1940 Census. Numerous conferences were held with Census
officials and the Director attended many meetings and hearings
held by the Bureau of the Census and the Central Statistical Board.
During January of this year, in making final appeals to the Census
Bureau, the Director of Research joined with the Department of
Commerce, the Office of Education, the State Department, the
Federal Communications Commission, the Radio Manufacturers
Association, the United States Army and the United States Navy.
This group set forth the questions on radio it desired included in
the Census and the purposes to be served by information thus
obtained.

The Census Bureau decided to exclude the subject, radio, from the
Population schedule but included a single radio question in the
Census of Housing which was ordered by Congress to be conducted
in conjunction with the 1940 Population Census. Continued efforts
are being made to impress upon the Census Bureau the social
significance of radio and, therefore, the justification for including
the subject in population censuses in the future.

The single question included in the Housing schedule of the Census is as follows: "Is there a radio in this dwelling?" The Census answers to this question will revise the industry figure of the number of radio families in the United States. There will be no information as to the number of radios in each home. Nor will there be a count of automobile radios, sets in places of business, hotels, institutions, etc.

It is hoped that the Census Bureau will grant the request that the
radio question be analyzed against the Census question on family income. The importance of this undertaking should not be underestimated. It has been very well established through sur-
veys that radio advertising has a more universal circulation as to
income classes than any other advertising media. In the 1940 Census, with the inclusion of that much discussed question on income, there exists the means of developing, through this authenti-
cated source, the positive proof of radio's universal appeal.

FUTURE RADIO SET COUNTS AND LISTENING
HABITS—FOR RESEARCH COMMITTEE

The Research Department, at the direction of the NAB Research
Committee, is preparing plans for developing annual estimates of the
number and distribution of radio sets in the country. The
point of primary interest naturally will be that of annually bring-
ing up to date the figure of radio families in the country. In
addition to that information, there is the desire to establish the
number of radio sets in homes in automobiles, in sub-homes
(summer cottages, etc.), and portable sets in order to establish a
measure of the increased radio circulation afforded by multiple sets. If it is financially feasible, an effort will be made also, to
determine the number of radios in institutions, places of business,
hotels, and so on.

At the direction of the Research Committee, plans are being
drawn for a continuous survey which will include questions to
procure information on radio set ownership in homes. In addition
to these receiving set data, plans include questions on listening
habits in an effort to establish:

1. Available Audience—that is, when family individuals are avail-
able to radio receiving sets and therefore able to listen. This
information is of prime scientific value in gauging potential listening for industry to shape program policies by individual hour of the day.

2. Radio Set Use—that is, when each radio set within the home
and in automobiles was in operation on the day prior to the

In addition to these broad objectives, it is planned to develop
data revealing the age and condition of receiving sets, the age and
sex composition of radio families, ownership of automobiles, auto
radios, the presence of telephones in the home, the occupation of
the head of the family, and allied information. Data on available audience and radio set usage will be developed in detail by hour for each day of the week and tabulated by economic groups, geographic areas and by population as to city size and farm area.

The plan as being developed employs very much the same method as that used by the Joint Committee on Radio Research in its study of "Rural Radio Ownership and Use in the United States."

An urban survey, patterned after the Joint Committee's Rural Survey has been conducted jointly by CBS and NBC during 1938
and 1939. Through this experience, some improvement of the
method has been made carrying on the objectives of the Joint
Committee on Radio Research.

The Research Committee is recommending to the NAB Board of
Directors that NAB publish the findings of the 1938 and 1939
surveys as a Bureau of Radio Advertising undertaking.

BROADCAST ADVERTISING VOLUME
REPORTING

At the request of the NAB Board of Directors, the Director of
Research and the Research Committee have evolved a plan for
reporting broadcast advertising volume by month in terms of
time units. No dollar figures will be released. In the report to be
submitted to the Board of Directors at its meeting, August 4th in
San Francisco, it is recommended that the information obtained
from stations on business carried shall be interpreted in terms of
time units—one unit shall equal one minute of program time.

Announcements shall be interpreted in terms of average time rep-
resented but tabulated separately from program units. Monthly
reports of broadcast advertising volume will be presented in the
following detail:

1. By source of business
   A. National network
   B. Regional network
   C. National non-network
   D. Local

2. By city size—population
   2,500,000 and over
   1,000,000 to 2,500,000
   500,000 to 1,000,000
   250,000 to 500,000
   100,000 to 250,000
   50,000 to 100,000
   25,000 to 50,000
   10,000 to 25,000
   Less than 10,000

3. By type of rendition
   A. Live talent programs
   B. Electrical transmissions
   C. Records
   D. Announcements

4. By class of station
   Clear channel
   Unlimited
   Part-time
   Regional
   High Power
   Unlimited
   Limited and Day
   Part-time
   Local
   Unlimited
   Day
   Part-time

5. By type of sponsoring business
   A. Retail Advertising
      1. Amusements
      2. Book Stores
      3. Boots and Shoes
      4. Clothing Stores
         a. Men's
         b. Women's
         c. Men's and Women's
      5. Department Store
      6. Drug Store
   B. General Advertising
      1. Agriculture
      2. Alcoholic Beverages
      3. Amusements
      4. Automobile
      5. Confections
      6. Educational
      7. Financial
      8. Groceries
         a. (by 9 classes)
      9. Hotels and Resorts
      10. Housing Equipment and supplies
Neville Miller, during the negotiation stages with ASCAP. Later was designed to develop information as to the extent of Department will maintain a complete file by advertiser to serve as a reference source for the industry.

The Research Director and the Research Committee are urging the adoption of the plan by the Board of Directors and the membership in convention.

COPYRIGHT

During the course of the year, the Research Department has devoted much time to the development of information on the subject of music copyright. This material was developed for the Board of Directors, the Copyright Committee, and President Neville Miller, during the negotiation stages with ASCAP. Later numerous special studies were made in conjunction with the formation of Broadcast Music, Inc.

FEDERAL RADIO EDUCATION COMMITTEE

During the course of the past year, the Director of Research has served, at the direction of President Neville Miller, in the work of the Federal Radio Education Committee. Constant contact has been maintained with Dr. Leonard Power, Research Coordinator of the FREC. The NAB Research Department has reviewed the various surveys and reports prepared by the FREC prior to publication.

DEPARTMENT STORE QUESTIONNAIRE

On May 15, 1940, the NAB Research Department sent out a Department Store questionnaire to all stations. The questionnaire was designed to develop information as to the extent of Department Store use of radio, case histories of successful Department Store campaigns and detailed information as to points of questions existing in the minds of Department Store heads which must be answered in successful sales approach. The survey was conducted in the interest of the Bureau of Radio Advertising to fulfill numerous requests from member stations, and to cooperate with the National Retail Dry Goods Association in preparing a report on—How Radio Advertising can be Used in Department Stores and its application to station employees.

FOREIGN LANGUAGE QUESTIONNAIRE

At the direction of the Board of Directors and President Neville Miller, the Research Director prepared a questionnaire which was sent to every radio station, on the subject of foreign language programs broadcast. Information obtained from this questionnaire will be used in conjunction with the industry’s study of radio’s position with regard to national defense.

WAGE AND HOUR—QUESTIONNAIRE

The Research Department has cooperated with the Labor Relations Director in the matter of analyzing the questionnaire addressed to all stations on the subject of the Wage and Hour Act and its application to station employees.

RESEARCH METHODS

At the direction of the NAB Research Committee, the Research Department is preparing reports of research methods which may be employed in developing reliable information on program audience. These reports will be available in manual form to assist those stations who are conducting their own research. To those stations employing outside research agencies, it will serve as an aid in understanding and evaluating the methods employed.

The Research Committee and the Research Department are studying methods for determining station service area. In this connection, the Research Committee called upon the NAB Engineering Committee to prepare a report on “Recommended Practices for Field Intensity Surveys for the Purpose of Estimating Field Strength Contours of a Broadcast Station in the Regular Broadcast Band”. This report has been completed and is being studied currently by the Research Committee in the light of its usefulness in evolving a recommended standard of station service claims. It will be recalled that the Joint Committee on Radio Research worked on this problem and developed a great deal of useful information. This material is available to the NAB Research Committee and it is hoped that with some additional studies, a recommendation can be evolved which will be satisfactory to the broadcast industry, advertisers, and advertising agencies.

STATION ANALYSES

As of July 1, 1940, the stations in the United States and possessions number 847. An analysis of these by class of station is presented in the following table together with the count of NAB member stations within each classification. These classifications agree with those used by the Federal Communications Commission in analyzing financial data furnished by stations. For purposes of comparison, figures as of June 1, 1939, are also presented.

[ 18 ]
The second analysis of radio broadcast stations by population of metropolitan district or city appears in the above table. The information presented here shows the total number of stations in each classification as of July 1, 1940, and NAB member stations as of July 15, 1940. The nine population classifications agree with those employed by the FCC in their financial analyses.

The Research Department is currently studying the new classification of stations as set forth in the revised Rules and Regulations Governing Broadcast Stations, issued by the FCC, August 1, 1939. When the provisions of the North American Agreement are put into effect, NAB will revise the above analyses of stations in terms of Class I, II, IIIa, IIIb, and IV stations as defined in the Rules and Regulations.

Your Research Director feels that the Association has advanced in matters of research during the past year. He has enjoyed his work for the industry and is looking forward to further progress during the coming year.

Respectfully submitted,

PAUL F. PETER.

July 17, 1940.

Promotion

The Promotion Department of the National Association of Broadcasters is specifically interested in the:

2. Increase of radio homes.
3. Increase of secondary sets in homes.
4. Increase of hours of listening per day.
5. Creation of the widest appreciation of the fullness and diversity of the American program service.

Implementation of these aims divides activities into two parts: institutional promotion and circulation promotion; though, in most instances, a single activity encompasses both phases.

The success of this NAB activity depends entirely upon the voluntary and aggressive cooperation of member stations. This statement is made a part of the record for the purpose of pointing out that the hundreds of stations which participate in NAB promotions must profit thereby and think them beneficial.

Every effort is made to gear promotions with individual station activity. Though stations are urged to cooperate, the admonition is always included: "Write your own ticket." This policy has built up a group of loyal member-promoters. It has caused competing stations in many multi-station cities to join hands in industry promotion and thus present a united front to the public.

UTILITY PROMOTION

Utility sales promotion is also assigned to the Promotion Department. Service is conveyed through personal correspondence and by bulletin. The position taken is that "your power company can be your best local customer."

From the figures of radio ownership, it is apparent that every domestic utility customer is the owner of at least one radio set. According to tabulations appearing in the February issue of the Edison Electric Institute Bulletin, these radios have an impressive influence on the net income of all power companies. As a current-consuming device, the Bulletin reveals, the radio set is fourth in importance. Radio sets account for 14 per cent of the entire domestic appliance load. Consequently, the increased interest in radio which has been promoted by broadcasters has a sound basis in fact.

Whatever a utility does to increase radio listening, to its own programs, or to the programs of others, has the same effect as putting additional appliances on the line—with one exception. The exception is that the consumer is not required to make any capital investment whatsoever.

Since January additional power companies have been converted to the use of broadcasting. Others have increased their schedules. By experience, broadcasting is being found the most economical method of reaching the power companies' customers, either to induce the purchase of current-consuming appliances, or to increase the use of appliances now in the home.

The pendulum is swinging in favor of broadcasting. The prediction is made that the coming twelve months will find the increase proceeding at an accelerated rate, provided broadcasters intelligently and aggressively cultivate this great potential utility field.

NATIONAL RADIO FESTIVAL

The grass roots promotion, NATIONAL RADIO FESTIVAL, held the stage during May and June with several stations deciding to feature the event later, during participation in State and County Fairs in August and September.

More stations participated in Radio Festival than in previous promotions. For the first time a state registered 100 per cent participation of all its stations. That honor goes to Connecticut. For the purpose of the record these stations were:

- WATR, Waterbury
- WBRY, Waterbury
- WDRG, Hartford
- WELI, New Haven
- WTC, Hartford
- WICC, Bridgeport
- WNRC, New Britain
- WNLC, New London

9 GOVERNORS PROCLAIM FESTIVAL

Nine Governors who issued Radio Festival proclamations were:
- California—Gov. Culbert L. Olson
- Colorado—Gov. Ralph L. Carr
- Kansas—Gov. Payne Ratner
- Louisiana—Gov. Samuel Houston Jones
- New Jersey—Gov. A. Harry Moore
- New Mexico—Gov. John E. Miles
- Oklahoma—Gov. Leon C. Phillips
- Virginia—Gov. James H. Price
- West Virginia—Gov. Homes A. Holt

Countless mayors of cities likewise proclaimed Radio Festival Week.

* The Institute is the power companies' trade organization.
Limited space does not permit inclusion of more than a geographical sampling of letters commending Radio Festival but excerpts which follow are typical:

Marshall B. Shantz, Jr., program director, WJTN, Jamestown, N. Y.:

"We would like to take this opportunity to express our gratitude to NAB for fostering National Radio Festival Week. We have received many definite indications that it has done us a lot of good from a number of angles, and we're looking forward to a repeat performance next year."

Howard Lane, manager, KFBK, Sacramento:

"Radio Festival Week in Sacramento was a terrific success and opened new avenues of promotion for us that we intend to utilize throughout the year. Our work in the schools met with such widespread approval of school authorities that an extensive schedule of cooperative school broadcasts, entirely different from what we have done in the past, has already been tentatively outlined to start this fall."

Joseph T. Connolly, promotion director, WCAU:

"From our standpoint Radio Open House Week in Philadelphia was a great success. Some 30,000 people toured the eight floors of the WCAU building."

Arch L. Madsen, manager of the nine months old station, KOVO, Provo, Utah:

"We made central Utah Radio Festival conscious and have received many compliments on the special programs. . . . we are already making plans for next year's celebration."

Dr. H. E. Fowler, head of the Department of English, State Teachers College, New Britain, Conn., over WTIC:

"It was a grand idea to promote the study of American broadcasting methods in our schools. Teachers and pupils alike (to say nothing of the judges of the contest) have been enlightened as to the remarkable development of radio in this country, and its many points of superiority to old-world broadcasting. And we have all learned more about the ways whereby radio may serve with the schools, to create a more intelligent citizenship in our democracy."

Allen Haid, program director, WHIZ, Zanesville, Ohio:

"Thank you for all past cooperation. Again may we wish you the very best of luck for the greatest Radio Festival of all times."

Ivan Streed, production manager, WHBF, Rock Island, Ill.:

"The week was very successful so far as the Quad-Cities was concerned. We received a lot of response from our listeners. The members of the seven cities, attorneys and ministerial alliances were enthusiastic and responded to all our requests. It was quite an event in itself for the two radio stations to broadcast something simultaneously." (WHBF and WOC, Davenport, Iowa, cooperated during Radio Festival Week.)

Alfred J. McCosker, president, WOR, New York:

"It is a pleasure to be able to cooperate with the work you are doing, as I feel that the more radio makes the public conscious of its efforts as a solidified industry, the more we, within the industry, will be able to do in mutually evaluating our problems and our subsequent gains."

Mrs. John R. Morris, WGBR, Goldsboro, N. C.:

"The Festival really went over in a big way and we were very happy over it. A record of visitors during the week was kept and we had an amazing number. We thank you very, very much for your suggestions and for your excellent cooperation at all times."

"LISTEN WHILE YOU RIDE"

To raise the plateau of summer listening many stations are participating in the twin promotion—"Listen While You Ride" and "Listen While You Play." Listeners are told that it's no longer necessary to miss favorite programs when away from home. Auto radios and portable sets will do the trick.

This approach to the problem of increasing listener availability to programs is bearing fruit. One student of the question attributes a large part of this summer's 15% increase in the amount of listening to the growing ownership of auto radios and portable sets.

Many stations accompanied their decision to participate in these campaigns with the statement that they would be on all summer.

"RADIO CHRISTMAS"

Last fall NAB suggested participation in "Radio Christmas." One phase emphasized circulation entirely; the other featured good will, with circulation secondary. Relative to the campaign an over enthusiastic article in a trade publication stated:

"With practically every major station in the country cooperating and with every market thoroughly canvassed via radio and newspaper campaigns, more than 6,500,000 old radios were selected by stations, repaired and distributed to under-privileged families by the stations, with local dealers and distributors tying in drive.

"CURTAIN RAISER"

Last year's autumn time change was ushered in with "Curtain Raiser," an industry-wide promotion, credited with contributing substantially to circulation increases. A four-page rotogravure piece, newspaper size, containing photos of typical participations was mailed the membership.

As for radio set ownership, which is the basis of radio circulation, the NAB research department estimates that a total of 44,000,000 active radio sets were in operation in the United States at the first of the year. Twenty-eight million radio families have at least one set. But in those homes are 7,500,000 extra sets and 6,500,000 auto sets. Two million additional receivers are located in offices, stores, institutions, apartments, etc.

The Promotion Department is aggressively interested in adding to the 7,500,000 extra or "secondary sets" in homes throughout the nation. It is interested also in the replacement of primary sets BY "primary sets," rather than by "secondary sets"—because of the superior quality of reproduction.

RMA RECOMMENDS RADIO ADVERTISING

The Radio Manufacturers Association, in a bulletin to its members, has recommended that set makers supply dealers with broadcast material, thus placing stations on an equal basis of competition with newspapers, for the solicitation of cooperative business. The RMA bulletin reads:

"Action by RMA members, especially large companies, is recommended by the RMA Board of Directors for further cooperation in the joint radio promotion campaign of the National Association of Broadcasters and RMA."

"The broadcasters of NAB, local stations as well as networks, have been and now are giving splendid service to the radio industry with many special programs, spot announcements, promotion features and other activities—all aiding manufacturers, distributors and dealers to sell more radio sets and also increase the unit of sale."

"Local broadcasters desire to be placed at least on an equal basis of competition with newspapers, in respect to the cooperative advertising allowances of manufacturers to their distributors and dealers. The RMA committee in the joint promotion campaign, and also our officers and directors who have held conferences with the NAB, agree that we should assist local stations to solicit part of the cooperative advertising allowances of distributors and dealers. This can be accomplished if RMA members will supply to their distributors advertising material, such as forms of spot announcements, continuity, etc., similar to the advertising material furnished to distributors for newspaper use. This is recommended so that local broadcast stations may better solicit such local advertising from radio distributors and dealers."

"Also it would be effective if you would send your distributors a letter reiterating your company's faith in the power of radio broadcast advertising, especially for replacement sales. Such a letter might well point out the close community of interest existing between radio distributors and dealers and the local broadcast stations, together with the necessity of their working closer together for their mutual interests. Such an expression would be in accordance with the views expressed by members of the RMA committee and RMA Board of Directors who were appointed to work out the joint national campaign of industry cooperation with NAB. If you will send your distributors (or so interest your advertising agency), samples of the suggested distributor-spot announcements, continuity, etc., and suggest their use on broadcasting stations, it would be most helpful."

[20]
"It is now desired that RMA members demonstrate to NAB and its members that they are doing their part by encouraging their distributors and dealers to place cooperative advertising with local stations. The broadcasters are helping your sales. Please do your part to help them."

**SERVICE**

An essential part of maintaining radio circulation is maintenance of radio sets in first class operating condition. Partially operative radio sets reduce the number of listening hours and the number of listeners.

Adequate service, legitimately and expertly rendered, remains one of the most perplexing problems in broadcasting. Aggressive station managements are keenly aware of the problem and are handling it with foresight. Generally speaking, however, cooperation between stations and local servicemen could be greatly improved with mutual benefit.

Radio Servicemen of America, the only national organization of servicemen in the United States, continues to cooperate wholeheartedly with NAB. It is being urged to establish more chapters. RSA's guaranteed service plan, with qualification of local chapter members, is operating in some forty cities. Refinements in the plan were suggested by NAB's Engineering Department.

Minimum standards for servicemen have been worked out by the Engineering Department and will be mailed members as a guide to judge the qualification of individuals in the service business.

Both the Promotion Department and the Engineering Department agree that the engineering staff of member stations can be most helpful in the improvement of local servicing.

**INTERNATIONAL ASSOCIATION OF ELECTRIC LEAGUES**

This organization has appointed, as its official NAB contact representative, J. S. Bartlett, managing director, The Electric Institute of Washington. The cooperation has proven most beneficial.

**RADIO'S RICHES**

Several hundred thousand copies of the sixteen page rotogravure booklet, "Radio's Riches," were purchased by member stations with delivery in April. This institutional promotion piece, telling radio's story in picture and print, proved an appreciated station gift in every part of the country.

**NATIONAL DEFENSE COOPERATION**

On July 19, this department issued a special supplement to NAB REPORTS which announced and outlined a plan for recruiting 100,000 trained workers for national defense agencies.

The assignment was gladly accepted from the United States Civil Service Commission by NAB, on behalf of all broadcasting stations in the United States. The imperative need of the national defense agencies for assistance in securing their manpower requirements is confidently expected to bring widest cooperation from broadcasters.

"LISTEN BEFORE YOU VOTE"

As a means of capitalizing on the intense national interest in the presidential election, LISTEN BEFORE YOU VOTE was offered to the membership as the fall promotion, on July 18. This is a combination institutional and circulation-building campaign. A delayed, yet pronounced effect will carry over into the field of sales promotion.

And the reason is not hard to find. The political campaign is to be fought out over the airways. It is to be a radio campaign. When votes are counted, the lay public and the business public are going to realize that it was the POWER OF RADIO that put the next man in the White House, whoever he may be.

September 16 is the suggested date for the public launching of the LISTEN BEFORE YOU VOTE campaign.

Respectfully submitted,

Arthur Stringer,
Promotion and Circulation Department.

**Bureau of Radio Advertising**

The NAB Bureau of Radio Advertising is one of several aggressive moves which the broadcasting industry through NAB has made since reorganization.

Authorized by the Board of Directors in May, 1939, the Bureau was placed in full-time operation September 1. Under the combined guidance of the NAB Departments of Public Relations and Research, and cooperating closely with the NAB Sales Managers' Division, which was largely responsible for its creation, the Bureau reports considerable progress in its efforts to serve the members on sales and promotion problems. Stated in the simplest possible terms, the Bureau's objectives are two-fold:

1. To provide the entire industry with usable, well-organized facts and figures of a promotional nature, through industry cooperation, to open up and develop untapped sources of radio advertising, and in other ways to assist stations in selling more time.

2. To cooperate with broadcasters, advertisers, agencies and others in increasing the effectiveness of radio as an advertising medium.

"RESULTS FROM RADIO"

In seeking to sell time, the Bureau agrees with recognized media promotion experts that nothing succeeds like success stories. A keystone, therefore, in the Bureau's work has been the series of advertising trade studies entitled "Results from Radio." The experience of stations who have used the studies bears out the belief that success is contagious. Over 300 stations have ordered and are using over 3,000 copies of the case histories and success stories, of which seven have been released to date. Though faced with a serious problem in collecting complete, accurate and useful information, especially in the spot and local fields, the Bureau has provided the members with complete trade studies in the following classifications:

- Department Stores
- Ice Cream and Confectionery
- Laundries
- Garden and Field
- Jewelers-Optician
- Light and Power
- Furniture Stores

Many members report tangible, direct sales results from this material, which is provided them at actual cost of printing and production only. Many more such studies, covering other important local and national advertising accounts, are on the way.

For the first year, the major effort of the Bureau was directed to the local sales problems of stations, since it was felt that here was the next great opportunity for expansion of radio volume. However, in July, 1940, an announcement letter accompanied by a special Bureau file folder and sample copies of the "Results from Radio" studies were sent out to 1100 advertising agencies in the national and regional field. This was the first official announcement of the Bureau of Radio Advertising, outside the broadcasting industry, and met with an enthusiastic response from many agencies.

This response was not unexpected, after the line support which NAB member stations have given the Bureau since its inception. The point is: Here is a trade association service much needed and appreciated by broadcasters, agencies and advertisers alike. Alike, they benefit from information collected direct from the industry, organized by the Bureau and available from no other source. Attached to station's letterhead, or with call letters imprinted on back cover, each trade study provides a complete, self-sufficient mailing piece. Designed to help stations sell more time, the studies are also designed to help advertisers make more effective use of radio to answer their questions about programs, methods, commercial copy, merchandising, results, etc. Completeness, it is agreed, counts heavily if the success stories are to serve the two-fold purpose for which the Bureau was established. Apparently, the "Results from Radio" studies are performing that service.

**MANY OTHER SALES AIDS**

In addition to the printed trade studies, the Bureau has made every effort to help stations with their personal selling problems.
Many special sales manuals, reports, bulletins and reprints have been issued free of charge to all members. Released in loose-leaf folder form, the manuals include:

Outiine and Suggested Script for a Station Sales Presentation.
A Report of the Hettinger Survey on Station Sales Administration.
A Sales Manual for the Building Field, in cooperation with FHA.

Special articles written by the Bureau and reprints of other pertinent material include the following:

What the Bureau Means to Members—reprinted from Variety Anniversary Number.
Dealers and Radio Advertising—reprinted from Broadcasting Magazine.
Radio for Retailers—by Kenneth Taylor, reprinted from The Retail Executive.
Ed Kirby's Speech at National Cleaners & Dyers Convention.
The Case for Distribution—reprinted from Nation's Business.
The Case for Advertising—reprinted from Nation's Business.

Late in 1939, an informal bulletin service was begun by the Bureau to provide members with additional facts and figures of a selling nature. These are issued frequently.

FIELD ACTIVITY

The foregoing covers the actual promotion phases of the Bureau's activities. At present, these constitute the major part of the Bureau's service to stations. However, in answer to the increasing demands of many members, the Bureau has made an effort to represent the industry in the fields of national spot and dealer-cooperative advertising. This work has been carried on in two ways, by direct mail and personal solicitation. Limited appropriation and personnel have necessarily confined the Bureau's activities. At present, these constitute the major part of the Bureau's service to stations. However, in answer to the

A MEDIA RECORDS FOR RADIO

At two meetings of the Sales Managers' Steering Committee held during the year, the immediate adoption of a complete "media records for radio" was urgently and unanimously recommended. This is the so-called Unit Plan of Volume Measurement now being perfected by the NAB Research Department. The Bureau agrees that the value of such a service cannot be over-estimated, and urges that every effort be made to place such a yardstick in operation as soon as possible.

FREE OFFERS

During the past year, the Bureau has devoted considerable time and effort to the problems of free offers and percentage advertising. The effort has been made to convert as many of these as possible into regular advertisers, while at the same time lessening the flood of chiseling attempts which plague the lives of station managers. According to many stations, a good deal of progress has been made in both directions. The Bureau is much encouraged by these reports, and will continue to work along similar lines in handling this problem.

In conclusion, it becomes evident that there has been a genuine need for a Bureau of Radio Advertising within the NAB. In spite of budget restrictions and the problem of gathering information, which only the Unit Plan can solve, every effort has been made to answer this need. Judging from the development of similar services established by our competitors before us, a great deal is yet to be done. If the Bureau is properly and effectively to develop new sources of radio advertising, expand present fields, and combat the unceasing claims of competing media, it is a job that will require the whole-hearted support and cooperation of every member and all phases of the industry. This cooperation the Bureau has enjoyed during the past year, for which it is deeply grateful. It is our sincere hope and firm belief that the coming years will see an even greater usefulness for the Bureau.

Respectfully submitted,

Samuel J. Henry, Jr.
THE WEEK IN WASHINGTON

By unanimous vote the NAB Convention pledged the Association's continued support of BMI as a permanent organization and urged completion of the Federal Government's monopoly suit against ASCAP as soon as possible. (p. 4485.)

Fifty-four more stations subscribed to BMI, bringing the total membership to 364. (p. 4485.)

The Mutual Broadcasting System notified all Mutual stations and advertising agencies that its key stations do not intend to accept the terms proposed by ASCAP for renewal of their existing licenses. (p. 4486.)

Advertising agencies are reported to be ready to go along with the broadcasting industry in the copyright fight. (p. 4486.)

Some of the principal convention speeches, including James Lawrence Fly's assurance that the Federal Government has no intention of taking over the industry in event of war, are printed in this issue. (p. 4488.)

The NAB now has 473 members, the largest membership in the Association's history. (p. 4501.)

The American Federation of Musicians has banned such noted musicians as Heifetz, Iturbi and Zimbalist from broadcasting. (p. 4501.)

Total number of stations now pledged to support the national defense campaign is 603. The industry is asked to assist in the alien registration program. (p. 4501.)

The "Listen Before You Vote" promotion campaign is in full swing. (p. 4502.)

Free offers and cost per inquiry propositions continue to clutter up broadcasters' desks. (p. 4503.)

The FCC has extended for one month time for compliance with an order calling for all licensed operators to submit proof of citizenship. The Commission has listed approved frequency monitors. (p. 4503.)

San Francisco public schools received the first construction permit for an FM station in the non-commercial educational field. (p. 4503.)

Convention Backs BMI

Determination to break the chains of the music monopoly for all time was unanimously voiced by delegates to the NAB's Eighteenth Annual Convention in San Francisco. After a rousing copyright session, the convention adopted two ringing resolutions without dissent.

1. That the NAB pledged its continued support of BMI as a permanent organization and unalterably declared its intention of refusing to yield to the demands of the music monopoly.

2. That the NAB should support the Federal Government's monopoly suit against ASCAP and urge that it be completed as soon as possible.

Enthusiasm for BMI was, perhaps, best displayed by the addition of 54 stations to the list of subscribers. At the close of convention the total membership was 364, representing more than 85 per cent of the dollar volume of business done by the broadcasting industry. Elsewhere in the REPORTS is a list of the stations which signed at the convention.

Another high spot was the announcement by Theodore Streibert, Vice President of the Mutual Broadcasting System, that none of the key stations of MBS intended to accept the terms proposed by ASCAP for the renewal of their existing ASCAP license. The text of a letter sent by Fred Weber, General Manager, to all Mutual stations and advertising agencies is printed elsewhere in this issue.

Good BMI tunes are becoming increasingly popular with radio audiences—so popular, indeed, that they are being recorded by the phonograph companies.

From both the action and spirit of the convention it appears very definitely that the battle of many years to free the industry of the music monopoly yoke is turning in favor of the industry.

Mutual’s Letter

August 2, 1940.

To all Mutual Stations and Advertising Agencies:

Stations associated with, and agencies and clients utilizing facilities of, the Mutual Broadcasting System have requested information as to the position this network intends to take on January 1, 1941, with reference to ASCAP licenses.

In the past, as you know, network companies have not been required to maintain ASCAP licenses for their network operations, but only for the operations of the individual stations managed or owned by them. Inasmuch as Mutual Broadcasting System, Inc., does not own or manage any stations, it has not heretofore been necessary for it to have an ASCAP license.

Mutual does not originate programs, but merely makes available to members and affiliates programs originated by other members and affiliates. Accordingly, questions involving music copyrights in connection with such programs must ultimately be decided by the member and affiliate stations.

We wish to advise you that we have been informed by the following key originating stations that they definitely do not intend to accept the terms proposed by ASCAP for the renewal of their existing ASCAP licenses: WAAB, key station of Colonial Network; WKRC, Cincinnati; WHK-CKLE, Cleveland; WGN, Chicago; WOR, Newark; and KHJ, KFRC, KGB, KDB, key stations of the Don Lee Network. This means, of course, that without an ASCAP license none of those stations will be able to originate any programs containing ASCAP music or to broadcast any such programs transmitted to them from other stations.

This information is reported to you at the earliest moment it became available.

Inasmuch as the Mutual Broadcasting System is a station owned, financed, and operated network, you may be sure that the best interests of all the member and affiliate stations will be the paramount consideration in any decision by Mutual member stations.

Very truly yours,

Fred Weber.

Other BMI Developments

Billboard, amusement trade weekly, questioned some of the leading advertising agencies on their feelings about the radio music matters. It headlined the answer across
NAB BOARD OF DIRECTORS, 1940

Network Directors
Edward Klauber, executive vice-president, CBS.
Fred Weber, general manager, MBS.
F. M. Russell, vice-president, NBC.

One agency executive expressed his lack of worry with a reason in a masterpiece of terseness—“We can readily substitute BMI and other catalogues.”

Nearly all the agencies indicated that they are laying plans for carrying on their programs after January 1 without ASCAP music. A few named certain programs which might face some difficulties but added, “We are not worried . . . we can manage . . .”

Agencies handling those programs which are most likely to face difficulties have been among the first to call on BMI for the purpose of working out solutions of their problems. The whole tenor of Billboard’s report on its inquiries confirms the evidence received by BMI directly from advertisers and agencies alike. The conclusion is clear—the advertising industry is giving solid support to the broadcasting industry and to BMI.

There I Go, one of BMI’s new songs, grabbed a comet by the tail, climbed into the saddle, and went off for a ride all by itself. It appeared on the “sheet” in Variety last week although it had never yet been listed among BMI feature tunes and had not received any special promotion. Because it had already gone so far alone, it was added to the list of feature tunes and this week is on the “sheet” for the second time.

Three other BMI songs also are on the list. “Practice Makes Perfect” is in 5th place with 29 network plugs—the highest being 41. “The Same Old Story” also appears and “We Could Make Such Beautiful Music” is there for the sixth week. The list in the Enquirer, which is taken from a slightly different period, carries another of BMI’s earliest hits, “Here In The Velvet Night.”

August 16, 1940 — 4487
We have been getting some letters that are both pleasing and full of good ideas. Here's one from Paul Vincent of WMBG, Richmond, Virginia:

We'd like to express our appreciation for the fine manner in which you're going about this business of building up BMI. The extra orchestrations you've been submitting have contributed to a wider distribution of your tunes, and consequently, to a greater appreciation of their worth.

At least five musical groups on WMBG (including two popular dance bands) are highlighting BMI numbers regularly on their air and they report excellent audience reception at their dance spots.

We haven't had occasion to actually use your classical arrangements yet, but they're being catalogued for the future. Needless to say, these public domain favorites are highly appreciated at any time, but when so well arranged and so neatly distributed their value doubles.

As to publicity, be assured that BMI gets plenty of "plugs" here. We're even contemplating the setting aside of several minutes on one of our most popular dance music shows, to interviews on BMI music and its popularity with the viewing-room audience.

So keep up the good work, fellows, and remember our willingness to cooperate to whatever extent we may that BMI might go sky-high.

Walter Haase of WDRC, Hartford, Connecticut, writes:

Perhaps you'd be interested in what we're doing currently to promote BMI:

Each of our local recorded programs contains two BMI tunes. This will be in effect during August and September. During October, we will use 25% of BMI music. During November 50%—December 75%.

Our string ensemble starting for the fall season early in September will be kept exclusively on BMI music for one program a day on WDRG, and two on FM station WIXPW.

Before each BMI tune, the announcer says "Here is another of those BMI song hits." We announce the title afterwards. We are using this method to build up curiosity among our listeners as to what BMI is and also to familiarize them with these letters. Later when they specifically inquire about BMI, we shall tell them that this is a new music publishing concern sponsored by the industry to give new and unheard song writers a chance for fame and fortune.

We'll be glad to hear what other stations are doing, so that we may augment our own plans if we find other worthwhile suggestions.

John Cleghorn of WMC in Memphis announces receipt of a long list of BMI numbers and after signing it he adds with pen and ink:

"P. S. They're swell!"

More phonograph records of BMI music for general retail sale will be issued as follows:

Madame Will Drop Her Shawl recorded by Al Donahue for OKEH—record number, OKEH 5704—August 8;

The Same Old Story recorded by Freddie Martin for Victor—record number, B-10830—August 23;

The Same Old Story recorded by Frankie Masters for OKEH—record number, OKEH 5716—August 23;

Practice Makes Perfect recorded by Bob Chester for Victor—record number, B-10838—August 30;

I Give You My Word recorded by Al Kavelin and his Cathed¬

Chords for OKEH—record number, OKEH 5734—August 30.

Convention Speeches

Some of the principal convention speeches are printed in full below. Broadcasters who were unable to attend will want to read all of them. Those who heard them will want them for future reference.

The entire convention was recorded. Any member wishing to purchase any or all of the records should communicate with the NAB. A corrected text of John Elmer's BMI speech will be published in the convention issue of The Advertiser.

JAMES LAWRENCE FLY

(Chairman of the Federal Communications Commission)

It is a genuine pleasure to meet with you for the mutual consideration of radio and the problems which it meets today. This is a healthy type of meeting. Only through joint discussions of this kind can we promote the free exchange of ideas so necessary to effective cooperation between government and industry. At no time in our history has cooperative endeavor been more essential to the welfare of the public and the industry alike. I have the feeling that as we meet face to face, dope-story conflicts and phantom crises will move out under the veil of the first fog retreating over the bay.

Before moving to the discussion of one vital problem of the broadcasters I think we ought to utter a word of tribute to those great engineers whose scientific genius and tireless efforts created radio broadcasting. To a great extent their names are unsung, yet it is they whose research developed radio in the laboratory and continued from year to year for almost a quarter of a century to lift radio broadcasting to successively higher planes of technical efficiency. They have given us the equipment to do a splendid job. We are assured of even greater things on new frontiers. That leaves the task to us as broadcasters.

Grave problems confront us in the policies to be pursued in the public service. But in the outset some of the supposed problems may be dispelled. For example, you may be concerned about the effect on you of the present emergency. Alarmists with absolutely no factual basis to support them have conjured up the bogeyman of the government operating the broadcasting systems or of the complete curtailment of broadcasting in the event the security of this country were threatened. I have said that these disturbing rumors are completely without substance and I want to reiterate that as forcefully as I am able. The whole trend today of governmental planning to meet any emergency is toward mini¬

mizing, as far as possible, dislocations of our normal way of life. I can assure you that broad plans for the shutting down of broad¬

casting or for governmental operation have existence only as

rumors may be dispelled. For example, you may be concerned about the effect on you of the present emergency. Alarmists with absolutely no factual basis to support them have conjured up the bogeyman of the government operating the broadcasting systems or of the complete curtailment of broadcasting in the event the security of this country were threatened. I have said that these disturbing rumors are completely without substance and I want to reiterate that as forcefully as I am able. I have said that these disturbing rumors are completely without substance and I want to reiterate that as forcefully as I am able. The whole trend today of governmental planning to meet any emergency is toward mini¬
should like to make it clear that it is the Commission’s constant aim to do exactly the opposite—to expand rural service. It is our duty to provide for the people of the United States—and that means all the people, not merely the city dwellers—the best and most widespread radio service possible. To that end the designation of classes of stations and the uses of channels are constantly under study. I can assure you that no move making for a general curtailment of rural service is being planned or even considered. If anything, steps in the other direction may be anticipated.

There are many comparable ghosts which I shall not take the time to behabor here. Needless to say the radio broadcasting industry has reached its majority. It is even wearing shoes. It should no longer believe in ghosts.

In a graver mood I would turn to a real problem. Amid a world in conflict I venture to pause at this important juncture to stress one significant phase of American idealism which has become such a vital force in the practical conduct of radio broadcasting: Freedom of Speech.

Radio, in the past twenty years, has grown from a dream of its sponsors into a primary means of reaching the American people. The realization of that dream has fortunately come in time to aid in the struggle for the preservation of the ideals on which all American industry and particularly your own is founded.

You who have come into the broadcasting industry have dedicated yourselves to the service of the American people. You have been granted the privilege of sharing in the administration of a limited public facility and in turn have assumed an obligation to conduct your operations in the manner required by the public interest.

The public interest in broadcasting derives from two chief sources. It stems from the great force which radio exerts over the customs, the opinions and the very lives of the people as a whole. Not a public utility, it is indeed more than a public utility—more than an ordinary convenience made available to all alike. The public force of broadcasting places it in a uniquely important and novel class of public service. The manner in which that great force is wielded necessarily is a matter of great public concern in fact.

Another source of public interest in broadcasting is that the radio spectrum is public domain. Radio waves are not the subject of private ownership. The public has every right to insist that, in the private exploitation of this public facility, the public interest shall be served. Where private operation runs counter to public interest, the Federal Communications Commission as the servant of the Congress and of the people is under a duty to repossess the wave length in the name of the people. It is a rare tribute to the radio industry that this duty has seldom been exercised because of the character of the public service rendered. That duty must never be performed in a capricious manner. Nor should it ever be used as leverage to control program conduct.

Under the law there cannot be any governmental censorship of radio. This is another ghost which seems to have taken on substance by the repeated whippings it has taken.

It is important to observe that no government official directs you to maintain particular programs or to delete any particular program. Great latitude must exist in the conduct of a broadcasting station. And under our American way it is entirely proper that broad discretion in the conduct of the station is vested in the private operator. At the same time the public does and should urge that certain basic principles be preserved. But the greatest of these very principles requires that neither I nor any other particular person or interest shall utilize this great force to impose one’s own ideas upon the public.

Radio must remain as an instrument of freedom and for the preservation of freedom. That being true we must not be deluded

into the thought that such an instrument is under no obligation to the public.

On day before yesterday at the World’s Fair, there was presented to the radio industry an impressive plaque symbolizing freedom. On it were inscribed, in words of Walt Whitman, “I say there can be no safety for these states—without free tongues, and ears willing to hear the tongues.”

As I sat there in the spell of Treasure Island I could not but ponder upon the significance of that plaque. To the broadcasting industry, it was the message—the desired message—well done.

But there were grouped on this plaque the images of such men as Lincoln, Washington, Jefferson, Henry, Franklin. Theirs was the struggle to create in the first instance, to secure and finally to defend our democratic institutions.

To me, in a deep emotional sense, freedom of speech is a basic right. But setting there I began to wonder if the fathers were deeply concerned with my own interest in speaking my mind or in forwarding my own special purpose or in your own selfish interest in getting somebody told. If that be true, then freedom of speech were well nigh illusionary and devoid of useful function. With what then were they really concerned? What is the substance of freedom of speech—what is the basic interest protected?

Let us again turn to the plaque. Whitman’s words are significant. His concern was not in free tongues for the sake of the tongues but, in haec verba, “safety for these states.” “I say there can be no safety for these states without free tongues.” To him as with us today free tongues were essential, not merely as a part of our democratic customs and conveniences but rather as an actual instrument for the preservation of our democracy.

Every one of these great statesmen aided in creating, securing, or preserving the Bill of Rights, including freedom of speech. The principle of self government was at stake. The capacity of a people to govern itself was being tested. Democratic institutions were in the crucible. These men like Whitman were concerned with the safety of the states and the permanence of the democratic form of government they symbolized.

Education—the diffusion of knowledge and information—have long been deemed essential to the American scheme of things. No people without adequate knowledge of the true facts involved are capable of intelligent self government. The American people properly informed are best capable of self government. Washington himself in the Farewell Address emphasized the need to “promote—as an object of primary importance—organizations for the general diffusion of knowledge.”

The role of facts and knowledge in enabling a democracy to attain the heights of which it is capable can never be overemphasized.

In that light, freedom of speech begins to take on substantial meaning—as an instrument dedicated to the service of a free people.

Let us turn again to this plaque—this symbol of the broadcasting industry as an instrument of freedom. In Whitman’s words there is a further requisite for the safety of our system of government, that is, listeners who were ready, able and willing to hear. Whitman’s dream has now come true—the radio at last has provided the great audience. And so, appropriately it will serve as the guardian of our institutions.

It must be borne in mind that however much the individual has personally enjoyed his freedom of speech there were always serious limitations. How many people could he reach by speech—how many by leaflets—over what distances—through what machinery—and at whose expense? Whatever the mental relief he may have enjoyed, there were various limitations in the means of achieving his own purposes as an individual. But there has always been the important need of the democratic nation to
create and maintain an enlightened and informed public opinion based, as it must be, upon the facts—fully and fairly presented.

This means, of course, that where vehicles of public discussion are under private control there must be balanced and two-sided—not biased or one-sided—presentations.

The Supreme Court recently said:

“Freedom of discussion, if it would fulfill its historic function in this nation, must embrace all issues about which information is needed or appropriate to enable the members of society to cope with the exigencies of their period. * * * Those who won our independence had confidence in the power of free and fearless reasoning and communication of ideas to discover and spread political and economic truth. Noxious doctrines in those fields may be refuted and their evil averted by the courageous exercise of the right of free discussion.”

The handicap of the individual is still grave. Radio is a limited facility. Only the few may talk. The millions will listen. But there again we are driven back to the paramount concern of the broadcaster—his duty to the public. Since he cannot supply to all individuals the right to speak, he must render his service to the public and to the democracy by according that public the overwhelming benefit which can come from free discussion and full exposition. Neither Washington nor Henry nor Jefferson could be other than happy at the creation and use of such an important public facility for the preservation of our democratic institutions.

It must follow that the broadcaster owes to the public whose facility he occupies—and to the democracy he is bound to preserve the inescapable duty of full and fair reporting, balanced treatment, and honest and impartial comment on all facts and information of public concern; and adequate coverage on all public issues by two sided discussion and equality of facility and representation. The responsibility for this service rests with the licensee. It is inconceivable that control of the radio as an instrument of freedom should be delegated to any special interest with the liberty to control news, information and comment services. So soon as this service is rendered on behalf of a special interest or political party the radio ceases its most important function in the public interest.

The world too well knows, and will long remember, outstanding instances where the instruments of free speech have been utilized by particular individuals and special groups to serve their own individual purposes. The radio not merely follows the trend in government but it too often implements those trends. Where the radio has fallen as the voice of the people self-government has disappeared.

Broadcasting is all the more important in places where the other vital source of public information and opinion has on occasion utilized its basic freedom to promote its own or other special interests and causes. In the press we have long respected the traditional role of the editorial, however much we might deplore it in the radio—yet one cannot but view with concern the instances where “News” is handled in such manner as to give the public what the newspaper owner, in the light of his interest, wants the public to receive.

“News” can be colored. Headlines can be slanted. Spacing can be contracted or expanded; emphasis supplied or extracted by artful placing; important events or responsible views can be overlooked, yet John Doe can send a telegram and become a national character overnight. All this may appear momentarily to be good business; but it would not be democracy. It would overlook the real function of our basic freedom; and we should have an instrument of freedom devouring itself and the democratic structure which nourished it.

Let me not be deemed to criticize the American system of broadcasting. I am here to praise it. These are trying times and I have thought it beneficial frankly to discuss the great principle. Frankness is essential in these discussions, and those which I hope will follow on other problems of mutual concern. You will know that I am proud to observe the great public service rendered by the broadcasters in the midst of a tremendous conflict.

Their general news, informational and commenting service have been of a high order. News has been searched out and brought to us from the four corners of the earth. The networks have rendered particularly valuable public service in this regard. And so have the many broadcasters moved across a vast field of public service with creditable results. I face the future with confidence in radio and believing in it as a great and permanent institution. There can be no real fear that, conscious of your great privilege and its attendant responsibility, you would ever let the torch fall.

Need I add, gentlemen, as domestic issues compete with foreign events, that I am not asking for special favors. It is basic in this speech that I oppose and shall always oppose special favors in the conduct of radio broadcasting.

It is of greatest importance that neither I nor any other government official or group of officials shall endeavor to bend radio to our own special causes. That is fully as important as that radio shall not bend to other special interests. Yours is the discretion to be exercised in the conduct of the station, which, after all, is constantly under the effective scrutiny of the listening public. No government official or group can or should undertake to substitute its judgment for your own. Your decisions are many—your problems difficult. But they are yours, not mine. Such is the American system of broadcasting as it rounds into its third decade of public service.

Radio is a tremendous achievement. Its future is one of continually greater strength in the affairs of mankind and in the service of the public. These are troublesome days for all of us. But radio is not and must not be imperiled. To radio, time is endless.

Wars may come and nations may go. Tomorrow's political campaigns will pass into yesterday, as brief events in the life of a free people. The years like great black oxen will thunder down the trail of unending time. But, as the great bulwark of our great democratic institutions, radio must stand—till kingdom come.

LOUIS JOHNSON
(Former Assistant Secretary of War)

Members of the National Association of Broadcasters:

Three years ago I became a radio commentator. For my subject, I took “National Defense.” For sponsors, I chose the American people. Since then I have come to the microphone on an average of almost once a week to discuss my theme.

In 1937, America was not awake to the needs for adequate preparedness. Too many of us lived with a false sense of security. We had begun to look upon our oceans as impregnable Maginot lines. It was such a state of mind that I felt it my duty to correct.

As a World War veteran with overseas service, as a former National Commander of the American Legion, and as a patriotic American citizen, I realized the importance of national defense. As soon as I joined the War Department I made it my responsibility to go out and to convince the American people that national defense was a basic consideration in the life of our country. To gain the cooperation of our citizens, I visited every state in the union at least once, and, many of them, several times. Altogether I made more than two hundred public addresses on the subject of national defense.
With the aid of radio facilities, with the support of the press, and with the cooperation of military and civic leaders everywhere, I was able to awaken a great deal of enthusiasm for our defense program. Some skepticism, I did encounter; and, here and there, I ran into what radio advertising men call "sales resistance" to the "commodity" I was advertising. Persistence, time, and especially events in Europe and in Asia at last made our people national defense conscious.

It is no longer necessary to advertise national defense to the American people. Today, every loyal citizen, regardless of party affiliation, wants an America sufficiently well fortified on land, on sea, and in the air, as to command the respect of the world. To reach our objective, every citizen must be willing to make all necessary sacrifices of time, of money and of effort toward achieving such an objective. He must be ready, nay, anxious, to serve at the bench, the lathe, the loom, the plough, or in the armed forces, if need be, to gain the desired goal.

National defense in its broadest phases, however, includes not only a strong army, an unsurpassed navy and an invincible air corps, not only an industry geared to produce munitions of war in time, in quality and in quantity as required, but also a united nation, a nation spiritually aroused to its grave responsibilities and ready at all costs to work for a common end.

You broadcasters of America, who are expert phrase and slogan makers, I urge to coin a national motto to keep constantly before the American people as a reminder, every day, in every way, of the necessity for national teamwork. In your bulletins, in your advertising script, when you open your program and when you sign off, let there come forth an urgent and effective appeal to all Americans for national unity.

We are a people unique in the annals of civilization. Alone among nations, we always have made the most of the present, and always have looked toward a future of even greater promise. With the past that was gone, we concerned ourselves but little. Unlike European nations, we gave no thought to a glory that once was ours, to an empire that once we possessed, or to a place in the sun that once we held. These were the concerns of an older world whose governments continually strove to win back lost provinces and departed prestige.

We were a young nation with a future, a virile people of energy, character and enthusiasm, with an eye on the forward horizon. Early in our history, we broke the shackles that chained us to the past, never to return to bondage. For more than one hundred and fifty years ours has been the promised land, the land of tomorrow. Regardless of origin, of race, or of creed, our forefathers worked together, fought together, and bled together in the name of liberty. Let us keep that spirit alive today.

Not only as a nation, but as individuals, we looked forward and not backward. Yes, there were obstacles, human and physical, but to our forefathers nothing was insurmountable. War, depression and panic ran their cycles, but always the individual American emerged with new courage, unbounded enthusiasm and the will to succeed. He had no use for quitters, trouble-makers, gossipers and whisperers. He had no patience with those who worshipped the idols of the past. He had a job ahead. To him a man was a man.

What mattered it whether he was born in the north or in the south, in Europe or in America? What difference did it make that he belonged to one political party or another, that he chose to worship his God in a cathedral, a church, or a synagogue? The test for admission to the communal life of America was simple. When a newcomer arrived the question was not "Who are you?"—"Where did you come from?"—but, "What can you do?" or "What can you contribute to American life?"

Immigrants came to us from every European nation. We did not ask their origin. We did not look into their social status. If they had the character, the diligence and, most of all, the determination to work and get ahead, they got ahead; and in their progress up the ladder towards success they carried with them the respect and the admiration of their neighbors. They were welcomed into American citizenship; and they continued to work and work hard.

All of our people worked hard so that our great natural resources might be developed to their fullest advantage for the benefit of all. They worked that their lives might be made fuller and more worthwhile. Every loyal citizen felt the responsibility that it was up to him to help transform the new world into an earthly paradise where free people could live in peace, happiness and prosperity.

Today, alas, non-American doctrines that crept into the darkness of the past and dared not face the bright sun of the future, have raised their ugly heads. They do not ask, is this man a useful citizen? They are not concerned whether he walks humbly with his God or not. They do not demand credentials of ability, of courage, of fairness or even of efficiency.

Instead, they blare forth with blatant generalities. They prejudice character by external standards. They pit native-born against foreign-born. They breed misunderstandings between capital and labor. They create confusion toward our foreign and domestic policies. They sow seeds of hate among sects and creeds. In brief, they spread discord at a time when union is essential to our existence as a free people.

Yes, we always have had honest differences of opinion. We are not and never have been a society of automatons that bent its knees before self-constituted authority or sat in adulation before self-appointed rulers. We always spoke our minds freely. We always dared to disagree. The time has come, however, when we must place less emphasis upon individual likes and dislikes, and think more and more in terms of the public good.

Our individual tastes, our individual ambitions, to be sure, are important to us. In time of peace and tranquillity, we live for them. When there are no external dangers we strive to realize them; but in times of crisis we must be willing and ready to forego them. When the fate of our nation is at stake it is not the time for the cultivation of individual aspirations.

Today we must think and act not as industrialists, not as laborers, not as civilians, not as governmental workers, not as anything but Americans determined to protect our nation against all hostile threats.

Our forefathers put into practice the ideals of America toward which every citizen, native and foreign born, should reach—justice, freedom, democracy and loyalty. These principles are a sacred trust. We must take them to our hearts. We must maintain them. We must perpetuate them. We must live for them. If necessary, we must be prepared to die for them. They are the cornerstone of America. They are the foundation of all civilization.

Life in America is not perfect, but do you know of anything that is better anywhere in the world? To be an American in the world of today! What a privilege! Compare the blessings we are enjoying this very minute right here in this room with what other countries have to offer. While we assemble without fear in a large body, there are few places across the seas where men may meet even in small groups without arousing suspicion. While we speak freely, others must padlock their lips or whisper in guarded undertones. While lights may brighten these walls, others live in black-out darkness. While we breathe God's own pure air, others are adjusting gas masks. While we live peacefully among ourselves, others stand in terror of their nearest neighbors.

In Europe, there may be a stigma attached to one's origin which may taint the life and business of a whole family, even a whole people. Here, men are measured by their own conduct. Each is free to live his own life in his own way so long as it does not encroach upon the similar rights of others. While we may dial

August 16, 1940—4491
our radio to any program anywhere in the world, others must deafen their ears to the outside and listen only to the voice of self-appointed masters. While we may think, write and say what we please, the lives of others are circumscribed to the minutest detail.

If we lose this cherished liberty, our dreams and our plans for a better and happier life will be destroyed. A time will come, and may it come soon, when again we can emphasize our personal hopes and our individual desires. But until we achieve a strong armor of protection for our country they must take second place. Unless we become strong, we may be thrown back into a darker age when the simplest of rights that we now take for granted will be lost perhaps for generations.

We must therefore acquire national unity. We must achieve without delay a cohesion into one pattern of all American dreams and aspirations lest they be forever denied. I therefore urge upon you the need for a revival of the spirit of American unity and as broadcasters, to keep the ideal in the forefront in all your radio activities.

In addition to a slogan for national unity, we need one for hemisphere solidarity. Too often in the past we looked upon the Monroe Doctrine as a unilateral self-imposed obligation upon the part of the United States for the protection of the new world. Hemisphere solidarity today, however, means something more. It is a multilateral understanding among all American peoples that we are one for all and all for one; that we have a necessity for common defense, and that we must all work together for a common goal.

Those who would disparage our efforts toward a united American front usually point out the cultural differences that separate the Anglo-Saxon from the Latin peoples. Such a distinction is not an obstacle toward hemisphere solidarity. There is a deeper sense of solidarity in our common aspiration for freedom that transcends language or custom.

We in the United States in whose veins flow the blood streams of Europe's many peoples have shown that character, not origin, is the true basis for understanding.

Here in California, Anglo-Saxon and Spanish cultures have merged into an American way of life which has been enriched by the contributions of men and women of other national origins. Everywhere on the Western Hemisphere we have American character. It manifests itself principally in a passion for independence. It is a common bond that must bring us more closely together.

Let me remind you that in 1776 the people in Massachusetts had much less in common with those in Virginia than we do today with our neighbors to the south. Let no misunderstandings nor recriminations arise between us. Let us regard each other with patience and with tolerance. Let us forget our differences and think only of our common ties. Let us act, talk, and think in terms of hemisphere solidarity.

We must move closer and closer toward each other. We must visit each other more frequently and exchange our goods more freely. This is no time to think of bargains and profits. In the world of today we in this continent must work together.

Again, I turn to you radio broadcasters to translate this ardent desire into a popular formula that will remind us every day of our duty and responsibility.

Besides national unity and hemisphere solidarity we need a resurgence of respect for the dignity of labor. I have touched upon that subject a number of times in my drive for recognition of the need for skilled labor as a major national defense measure. With your indulgence I shall repeat a few of my observations, which I believe are still applicable.

In modern battle we demand not only a disciplined fighter, but a skilled mechanic. He must have a firm grasp of the powers and capabilities of his weapons as well as the strength and the courage to use them intelligently and efficiently. Guns, tanks, planes, and the other numerous battle accessories today call for craftsmen skilled in handling machines, as well as fighters bred in discipline. Any ordinary chauffeur can drive a car, but the pilot of a heavy tank who must traverse varied terrain, climb over steep hills, drive through thick forests, wade across deep gullies and speed along wide open fields while planes from above and artillery from the flank shower him with a deadly spray, must indeed be a mechanic in arms; and behind the pilot are the army maintenance men who must keep the wheels rolling.

This is only one side of the demand for skill. Behind our planes, our tanks, our trucks and all of our modern, delicate engines of war is the manual dexterity of our industrial mechanics. For the production of our war equipment and our munitions in our civilian factories we must look to deft hands.

In our pioneer days, we boasted of our manual dexterity. We seemed to have an inexhaustible supply of skilled mechanics. Today, many of us wonder whether we shall have enough to meet the expanding needs of armament.

In the first place, the training of apprentices in our industrial plants was reduced or entirely eliminated as a result of the 1929 depression. So long as there were mechanics out of work, industry saw no reason for the training of apprentices.

In the second place, there has grown up a tendency on the part of our young men to look upon manual labor with disdain. They have been encouraged to seek white collar careers. Our public high schools have overemphasized that importance as a preparation for college and have neglected their value as a training for a job. As a result, we have thousands upon thousands of young men looking for work in overcrowded fields but possessing none of the manual dexterity required of skilled mechanics for whom jobs are available in reasonable numbers.

We must change our whole attitude toward secondary school education. We must pay more attention to those who have little aptitude for college and train them in our high schools for useful occupations. Our young men must be encouraged to seek careers in the mechanical trades and arts where better prospects for jobs may await them. We must give a dignity to manual labor which heretofore has been lacking or, in many cases, entirely absent.

The future of America rests largely upon the courage, the character, the discipline, the level-headedness, the poise and the balance of the young men who are now of high school age. Their lives, their jobs and their careers depend on the training we give them today. We must develop in them a loyalty to their family, their community and their country. We must instill in them a spirit of tolerance and understanding and a devotion to our American ideals and institutions. With their enthusiasm and their cooperation, we shall keep America happy, wholesome and free.

In the post World War era, America's spiritual life has suffered from false standards of which the attitude toward manual labor was but one manifestation. All of them stem from the debunking philosophy that swept over America after the Armistice.

There are real values in life, sentimental ones, if you will, that are at the foundation of our American way of life. They are our loyalties—our loyalties to our home, to our family, to our church, to our community, to our country. They were, are, and shall be our inspiration and our refuge. I appeal to you as radio broadcasters to put new life and meaning into them, to extol them before the youth of our country, to recall them to the minds of our mature and our aged.

Yes, let us have a revival of our traditional mode of life. Let us advertise the homely virtues of our fathers of charity, of integrity, of sympathy, of courage, of understanding, of work, and of common purpose. Let us think as Americans, act as Americans, and work as Americans. Let us rekindle our hopes and look to
the horizon before us. The future is still bright. Let us strive to keep it so for ourselves and for our children.

We must build up our armaments, tighten up our belts, give unstintingly, sacrifice, work, work, and work more to get this job done. An unprepared America may mean the end of civilization. We have a sacred trust. We dare not fail.

DR. FRANK KINGDON
(Executive Director Citizenship Educational Service)

The organization with which I am presently connected is the creature of national, social, youth, labor and welfare agencies that have an enrolled membership of thirty million men, women, and young people. They have joined together to ask one question:

How can we most effectively cooperate to teach the true principles of American democracy and to perpetuate in this country conditions of life that will assure the maximum happiness and prosperity of all our people? We are acutely aware of the penetrating part played by the radio in the experience of our fellow citizens. We are also conscious of the power of the radio in influencing national attitudes and in affecting the human relationships of our people.

It is this very appreciation of the power that radio represents that makes us sensitive to its activities. Undoubtedly, you have from time to time had evidence of this sensitiveness in correspondence from our agencies criticizing some programs or incidents within programs. Such criticism is in no sense querulousness. It may at times seem to you to be mistaken, but it is always the expression of a profound and honest concern for the best interests of the actual people who make up the United States and for the creation of the most creative possible attitudes among them.

We gladly recognize that you yourselves have seen the implications of your medium and have accordingly established the NAB code to guide your practices. No intelligent men and women can look upon the present world situation or contemplate the disintegration of nations without a sobering realization that current events call for action designed with the utmost care to conserve and extend the ties that bind men for good purposes. The price of carelessness is today nothing less than disaster. The dimensions of disaster are such that all of us, rich and poor, employer and employee, are engulfed in it when it comes. We must all govern ourselves with a realization of the good of the whole or else we shall each lose all we have in the collapse of all. Your code is an expression of your realization that the art of the radio draws its strength from the people and will keep its vitality only as it serves all the people. In this spirit the common sense and common idealism that it represents should be further extended rather than curtailed.

It is one of the paradoxes of freedom that liberty can be maintained only by those who willingly accept the necessary disciplines of social control. Freedom is not an absolute. It cannot be. Each person's right to do or say what he likes is limited by two boundaries.

The first limitation comes at the point where his action impinges on another person's rights. Freedom of speech obviously does not give anyone the right to slander another. Freedom of assembly does not mean that someone can call a meeting in somebody else's house without his permission. It is childish to speak of freedom without this realization of its relative application to conduct. When we speak of a democracy we mean a society that so balances rights one against another as to provide the maximum possible degree of freedom to all on as nearly a basis of distribution as ingenuity can devise. This implies more than a merely legal definition. It calls for a mutual respect of each other's rights on the part of individuals. It also demands the voluntary self-regulation of interest groups based on a recognition of their mutual interdependence; this is what gives meaning to codes of ethics established by various industries for their own regulation; they are more than expressions of good intentions, they are essential definitions of practices that make a society of free men possible.

In this sense, freedom does not mean the absence of government, it means self-government, that is, the rational exercise of the moral will.

Self-reverence, self-knowledge, self-control.

These three alone lead life to sovereign power. The only alternative to them in a complexity of laws rigidly enforced, and every gain of force is a loss to liberty.

The second limitation upon freedom is not so simple and has never been as fully explored in our national political literature. We have the measure of freedom that we enjoy because we are citizens of a country that guarantees these liberties to us. The United States of America, as a sovereign entity, one of the nations of the world, is the fact that makes our freedom possible. If the United States should be destroyed our freedom would be lost. This means that we must defend the United States. In our contemporary world mere love of liberty is not enough. The Scandinavian nations had that, but they were not prepared to defend their national states and so they lost their independence. On the other hand, Switzerland has combined the practice of democracy with a vigorous defense policy, and so, in spite of multiple languages and many minorities, it has maintained a degree of liberty unequaled among the small nations of Europe. To keep our freedom we must protect our country. Therefore, we have to accept enough of a limitation on our freedom to assure the continuance of the institutions that guarantee it in the first place. Freedom must not be used to destroy freedom. If any one says that this principle is a denial of the logic of liberty, I answer that it is an appeal to a higher court than logic, it is an appeal to the principle of self-preservation. No man can claim in the name of freedom the right to destroy the nation and its institutions that guarantee his freedom to him. Put into plain words, this means that we, as a nation, must outlaw all parties and organizations that serve first and principally the interests of some other nation than our own. Such people have no rights, theoretically or in justice, in our country for they do not accept the rules of our democracy. Disloyal to the fundamental ideals of America, they are traitors and they should be treated as such. If we do not handle them vigorously our softness will bring us to the same sort of disaster as overwhelmed the Weimar Republic and the Republic of France.

These are serious words, but their implications are justified by the fact that we are confronted by a new kind of attack upon our way of life. Hitherto, our canons of freedom of speech have had to govern differences of opinion among men who accepted the premises of our democratic philosophy. For example, Franklin Roosevelt, Wendell Willkie and Norman Thomas differ extremely, even bitterly, on matters of public policy, but they are all honest supporters of the American way of liberty. It is comparatively easy to handle the techniques of a non-partisan presentation of issues between them within the democratic framework. Every tenet of eighteenth century liberalism can be applied to this situation, and all of us can and must insist that they be so applied.

The tragic experiences of other democratic nations, however, have made inescapably plain the fact that we are now dealing in the twentieth century with a kind of propaganda for which the traditional dogmas of democratic debate are not adequate. If we fail to recognize this, we shall follow other peoples into the dark shadow of division and disintegration. Democracy must control its own weapons to protect itself or they will be turned against it, and it will die of its own indulgence.

We are a unique nation. This is not a patriotic boast. It is a statement of historical fact. We are the only people in recorded history who began our national life and have continued it as a
free society of free men. When Abraham Lincoln said that we were conceived in liberty he spoke a historical truth and he was saying what could not be said of any other people in all the story of mankind. For a hundred and fifty years the forces that gave us birth have been pushing the extension of democracy throughout the world. With all its faults the nineteenth century must be counted as one of the superb epochs of human history; it saw human emancipation march steadily forward, and discovery, invention and knowledge make unprecedented advances. Now, for the first time since we won our independence we find ourselves in an age when the tide of opinion is surging in the opposite direction. Powerful voices are flatingly asserting that democracy is dead. Acting on this premise, resolute men are actively at work seizing and enlarging their personal power. They are aggressive. They are unscrupulous. They fight with any weapons they can find. They are unhampered by any considerations of truth or morality. And they are confessedly bent on world domination. These men are not limiting their activities to lands outside our own. They have their agents and representatives in our own midst, some of them drawn from among our own people. They speak our language and use our slogans. With complete cynicism, they are fomenting every latent prejudice among our people and are skillfully producing contradiction and confusion in our body politic for the purpose of creating a condition of indecision that will precipitate panic in an emergency. In our country at this moment these men greedy for power stand not only ready to undermine our freedom but deliberately planning to do so. They intend to take America over and to make it into something it has never been, and I am convinced will never be under its native impulses, a totalitarian country in which liberty has no place and human dignity is reckoned a romantic illusion.

In the face of such facts we cannot afford to be merely patronizing or indulgent. We have to take stock of an actual situation and plan our social strategy in such a way as to safeguard the patterns of life to which we are devoted. The primary issue is not the definition of limitations upon freedom of speech, but whether as a nation we are going to survive or whether we are going to surrender ourselves to forces that will destroy our independence, and thus wipe out the very possibility of our continued existence as a free people. The process we are facing is a subtle undermining of our whole confidence in our national life, the breaking down of our faith in decency and in human respect, the substitution of cynicism for fair dealing; the fomenting of group hatred and the destruction of cooperation and national unity. This profounder issue of the perpetuation of democracy itself calls for clear judgment and for action as effective as that of its enemies.

There is a new weapon in this war. It has already been used effectively in other lands. It paralyzes men's wills. It is propaganda artfully disseminated through every medium of communication. The design it carries has been explicitly stated by the head of the German Reich. In his own words, he seeks to create "contradiction, confusion, indecisiveness of will, and panic." This weapon is now being used in this country. Nazism and Communism are invading our land with it. If they should attack our shores in a military way none of us would hesitate a moment to resist them and to go on a war footing to do so. Yet we seem unable to make up our minds that this new weapon is as real and as dangerous as explosives. We have seen Norway, Denmark, Holland, Belgium and France split and rendered impotent by it. We have seen Finland stand out because it was not vulnerable to it. Yet we are comparatively indifferent while day after day the enemies of this country use it here, and blackmail certain of our fellow-citizens into paying its costs.

As a matter of fact, we, above all nations, must take account of this weapon, because we are a peculiar people. A German is a German, a Frenchman is a Frenchman, an Englishman is an Englishman, because each is born that way and has ties knit by generations of common blood and soil to unite him to his fatherland. Here, we are a nation drawn from many countries and traditions. That which unites us is an idea, a common love of freedom. We ask no man his ancestry. We ask him only if his heart is for liberty, and if he swears it is, we give him our hand. Some who look upon us from afar scoff at us and say that we are no nation, but a mere conglomerate of bloods having no unity. They do not know the ties that bind us. Their very skepticism, however, must be our warning. They will attack us, they are attacking us, where they think we are weakest. They seek to exploit our differences to disunite us. Our answer must be to recognize their attack, to make the necessary sacrifices, economic and social, to disarm them, to mobilize our brains and resources to outmaneuver them at their own game and to rededicate ourselves to that love of liberty which is our boast and our bond.

In such a campaign, the broadcasters have a real part to play in defending America. The radio is a means of communication that has almost immeasurable penetrating power. The dictators of totalitarian countries have realized this, and have risen to power by using it to the utmost. Once in power, they have taken it over and have monopolized it absolutely, visiting drastic punishments, even death itself, upon those who listen to programs other than their own. They have transformed a magnificent instrument of enlightenment into a tool of ignorance and tyranny. Using it to the limit, they have launched an imperialistic revolution in which the whole pattern of private property, contract, and free labor is being replaced by a gigantic and absolute state monopoly. It combines the worst features of both nationalism and socialism. And now its leaders are dreaming of it as a worldwide regime.

You stand at one of the points where its attack on our way of life centers. In your hands, therefore, to a large extent rests the protection of the American mind against its poison. The minions of totalitarianism in all its forms are besieging you in the name of free speech to let them talk. Soberly, and in the full blaze of public discussion, you must establish the standards of good sportsmanship in democratic discussion, as organized groups have to lay down the rules in any area of human relationships, and you must abide by those rules and outlaw all who play foul, regardless of their influence or their position. The radio is itself a wonderfully democratic instrument, bringing all its programs to all kinds of homes throughout the country. A broadcaster betrays the genius of his own medium when he allows it to be used to break down the very democracy it exemplifies.

In advertising commercial products you have a simple rule. No one shall be allowed to use the radio to advertise harmful products. The radio is not accessible to peddlers of poison. This same rule applies to purveyors of ideas. A man may say fairly harmless things over the radio, yet in his program overtly or tacitly advertise a magazine or a book that is definitely anti-social. One program having a wide hearing is given in the name of religion, but the literature of the group represented is viciously anti-Catholic. Another program claims high patriotism as its motive but the magazine associated with it is demonstrably anti-Semitic and turned to totalitarian views. Ideas are no less poisonous than physical toxins. Your responsibility is as great for these products as for any others sold by radio.

There is another danger here. Vicious controversy feeds on itself. One man preaches hatred. Soon another answers him in the same spirit. The air waves become an arena of the kind of vituperation, of charge and counter-charge, that appeals only to prejudice and aggravates groups into militant antagonists. We have already seen riots in our cities resulting from such con-
ditions. It is the antithesis of democracy when passion displaces reason.

Controversy at this level has another serious effect. It colors all legitimate discussion with its evil temper and cloud other issues in the minds of men. There are basically important questions before us as a people, questions involving the whole adjustment of economic and political power. These should be thrashed out with seriousness and dignity they deserve. Candidates and makers of opinions should be judged by their programs on these issues. Instead of this, the general level of argument is dragged down to competition in cheap emotional appeals. And candidates are judged on the single question of some overrated demagogic issue. Thus our whole public life is muddled up with false appeals. Radio cannot be held responsible for all the cheapness of political exhibitionism. It can, however, guard against letting itself be exploited by the fomenters of false antagonisms, and to this extent the nation and the decent people in it will hold radio responsible.

There are some attitudes that are so fundamentally American that any attack upon them is clearly undemocratic and cannot lay claim to the facilities of broadcasting by appealing to freedom of speech. Let me name some of them:

1. Human Brotherhood

It is written in the foundation document of our independence that “All men are created equal, and are endowed by their Creator with certain unalienable rights, among which are life, liberty and the pursuit of happiness.” Notice that it says, “all men.” Our Constitution opens with the phrase: “We the people of the United States.” It is inclusive, taking in all people. Therefore, any doctrine of race that asserts that one group is superior or inferior to another, is completely and inescapably un-American, so un-American as to be anti-American. The racism now being taught in Germany is a blasphemy against the deepest religious convictions of all who believe in the Fatherhood of God and the brotherhood of man. If possible, it is even more distorted heresy than the monstrous nationalism that supports it. And it violates every premise of democracy. Therefore, the man who incites anti-Semitism here is false to the very nature of our Society. He may call himself an American and praise democracy but in his soul he has denied humanity and lost his right to call himself by the name of American. The whole racial emphasis of Nazism is a lie born of a lie. It is a refusal to accept our common humanity, the blood that flows in all our veins, and it is a denial of the scientific spirit that knows no such pseudo-races as it describes. Those who echo it here are servants of a falsehood. They have no claim upon a freedom they would twist into a means of ignorance and intolerance.

2. Religious Freedom

When the Bill of Rights was added to the Constitution (and without it the Constitution would not have been adopted) the first principle guaranteed was that of religious freedom. Thus was its preeminent importance emphasized. It is a cornerstone in the structure of our American life. Every man has a right to worship at the altar he chooses, or not to worship at all if that be his conviction. By the same token, everyone has a right to teach and spread his religious belief, provided its practice does not violate laws established for the maintenance of public morality. No man, however, has the right in the name of his religion to prevent, or to incite others to prevent, the practice of another religion. The teaching of religious prejudice, therefore, is un-American, so un-American as to be anti-American. This means that a man who preaches anti-Catholicism or anti-Protestanism or any other form of religious bigotry is an enemy of our way of life. It is an unreasoned and prejudiced approach to a human relationship and so is at the opposite pole of thought from the essential thinking of which we are an expression. It is sheer absurdity in the name of freedom of the Spirit to deny spiritual freedom to those who worship at other altars than our own. Freedom does not have to prove its integrity by making itself ridiculous. The deniers of freedom can assert no valid claim upon their rights under it.

3. The Dignity of the Individual

One emphasis that runs all through the Constitution and that is made explicit in the Bill of Rights is the safeguarding of the dignity of the individual against the power of the state. Democracy puts a limitation upon absolute state power. It asserts that there is an area of individuality so sacred that no power may invade it. Even though a majority of citizens may vote a certain measure it cannot enforce its decision against the conscientious scruple of one who resists it at this deep level. This is the safeguard of minorities. It is the alternative to totalitarianism. He, therefore, who advocates the extension of unlimited power to the state, making the individual a tool of the state, rather than the state the servant of the individual, is false to a basic characteristic of America. To say that we must extend full radio freedom of speech to a group that advocates totalitarianism because as a minority it has a right to freedom is the kind of casuistry that betrays its own premise. Communists, for example, are ardent supporters of civil liberties in this country. They support them, however, as a minority within a democracy. As Communists they do not believe in them at all. Even as a minority they are the agents of a foreign power, taking their orders from a foreign government. In spirit and in practice they are opposed to our American way of life. Yet they ask us not only to countenance them but to encourage them. In a similar way all totalitarians cynically prey upon our good intentions. France has proved conclusively that their pretended caress of democratic principle is a kiss of death. We have to pay a price for maintaining democracy—but not the price of life itself. A free government deserves better of history than to win the epitaph that it was expert at suicide.

4. The Home

No single fact more brightly illuminates the essential struggle of our generation than the fate of the home under the rival systems of dictatorship and freedom. From the beginning our nation has safeguarded the family. At this point, if at no other, the Judaeo-Christian teaching has definitely moulded our practice. From the pioneer days to the present, families have had to face economic hardship, and in some cases it has been unnecessarily severe, but the home has actually been protected by two principles recognizing its sacredness—our moral code and our respect for its privacy. America would certainly cease to be America in the profoundest sense imaginable if the home as we know it should be undermined. Yet current totalitarian philosophies strike at the citadel of the home—both at its morality and its privacy. I do not need to recount the abysmal tale of denial of ethics, of children set to spy upon their parents, of hidden dictaphones, of sudden invasions, seizures and murders. The melancholy story is too familiar to us all. What I do need to stress is that no principle of freedom implies the moral right of any teacher of this disruption to demand that we must magnify his voice. Freedom is ill-served in the house of its friends when it enlists the loudspeaker to blast the family. Eccentricity has its prerogatives in a free state but they do not necessarily include a microphone. A home-breaker, even a housebreaker, we send to jail; yet we are blithely told that we must help the smashers of the whole home idea to broadcast his aberrations. We cannot claim elemental sanity if we confuse a license to freedom as freedom for license. Freedom presupposes...
intelligent discrimination and we prove our fitness for liberty by
discriminating in our use of its privileges.

I have no right to speak officially for the organization whose
servant I am. I can, however, act as their interpreter. They are
born of the American community. They are themselves at once the
spontaneous expressions of its will to freedom and instruments to
perpetuate and serve that freedom. They include in their mem-
bership the people who are the backbone of America and who
have a deep and moving concern for America. Therefore, I have
no hesitation in saying that they will not sit quietly when voices
inimical to our way of life are lifted. And I say confidently that
they will support every sincere and intelligent effort that you make
to defend America by keeping broadcasting an active and aggres-
sive agent of liberty. We join hands with you to guard the land
we love and with you we hold aloft the light of freedom that the
feet of our people may not stumble in the quest for happiness.

ED KIRBY
(Secretary of NAB Code Committee)

What has the NAB Code done for me? This is the question
which practical minded broadcasters are asking in this convention.
The Code has been in effect just short of a year. In the results
which have already been accomplished, the Code Committee hopes
the broadcaster has the answer.

The development of the Code as a means of industrial self-
regulation began two years ago when Mr. Miller called to deter-
mine if such a step were needed, or desirable. It was immediately
apparent that in few fields of endeavor could it possibly be as
important to clarify and codify for the benefit and guidance of the
entire industry those practices and standards which had proved in
actual practice the soundest means of fully discharging that obliga-
tion to serve the best interests of the public assumed by the broad-
casters by the very terms of the licenses empowering them to
operate. At that time the industry determined to do for itself
from the inside what others proposed or longed to do from the
outside. The wisdom of self-regulation is reflected in a statement
of Mr. Justice Frankfurter who said, “Government as a rule under-
takes no services or regulation except after private agencies have
proved themselves incapable or unwilling.” The broadcasting
industry has proven itself both capable and willing.

What have been the results? Real value may be determined
only by comparison and contrast. Two years ago, there was an
effort emanating from two sources which would impose upon radio
stations program regulation by law, requiring that fixed periods
of time be set aside for the discussion of all public questions. The
operating hardship which such a regulation would impose, the
inability of the broadcaster to retain control over his program
structure with reference to balance and listener interest, the dan-
gerous political implications which attend an interpretation of what
constituted a “public question” are obvious to all. Today, through
the industry’s policy for the handling of controversial public issues,
this danger no longer exists. The demand for such regulation was
withdrawn simultaneously with the announcement of the Code.
The Code Committee declares with confidence that there will be no
restrictive legislation imposing the allotment of fixed periods of
time for particular program categories so long as we continue to
pursue the same policy we are now following. Thus, the Code
not only saved the broadcaster a complex operating problem in
bringing about a new order of public confidence, but it has also
saved him needed dollars and cents.

Two years ago there existed a situation involving the goodwill of
the millions of organized women in this country. Caused chiefly
through a misunderstanding on the part of club women about the
industry’s attitude on children’s programs and by isolated instances
of ill-considered programs, they were exposed to the influence of
those outside zealots looking for a cause and a mission who
promised the relief they sought through pressure tactics and legis-
lation. It is a tribute to the common sense of the American club
women that they did not respond to the voice of false prophets.
It is also fortunate that at this time the foundations of the NAB
Code were being laid. Through this vehicle we were able to give
them the hearing they deserved and the information and under-
standing they had not hitherto received. The result: Whereas
two years ago the attitude of the club women was such as to
invite the interest of those who sought to change the basis of the
American System of Broadcasting through arousing a widespread,
unfavorable public opinion, today the American system of privately
operated and competitive radio has no stronger bulwark of organ-
ized public support than that bestowed upon it voluntarily by
American club women. The Code Committee can announce with
complete confidence that there is no significant large body of
women’s clubs in the nation which has not supported and which
will not fail to continue to support the present Code and American
Radio.

Perhaps the finest example of the active condition of cooperation
between the industry and these groups was evidenced last year
when nationally known women leaders representative of every
strata of women’s activity, such as patriotic societies, library,
teacher and parent groups and the like, voluntarily, and at their
own expense, set up the Radio Council on Children’s Programs
to cooperate with the NAB in the implementation of the children’s
section of the Code. At the present time there is a survey jointly
sponsored by the Council and NAB. Mrs. Dorothy Lewis, its
field representative, is travelling through forty-four states, visiting
local club leaders and radio stations, bringing about not only a
remarkably better understanding of your program problems, but
also uncovering a wealth of valuable information which later will
be released to the industry, advertising agencies and their clients.
It is significant here to record the remarks of Mrs. Harold V.
Milligan, Chairman of the Council.

“The Council is prepared to undertake practical measures for
the attainment of improving children’s programs even to encourag-
 ing throughout the women’s world the purchase of products of
sponsors providing acceptable children’s programs which live up
to the standards set out by the NAB Code.”

No other advertising medium has ever received such important
support from the representatives of the purchasing agents of the
American home. We must thank the Code for this.

RADIO AND RELIGION

The service of American radio in projecting the voice from the
pulpit to every home is acknowledged by every thoughtful church-
man. With few exceptions, most representatives of the 207 de-
nominations carrying on their missions in the United States readily
appreciate the soundness of the industry’s position as expressed in
the Code: “Radio, which reaches men of all creeds and races
simultaneously, may not be used to convey attacks upon another’s
race or religion.” And with few exceptions, the overwhelming
majority of radio stations in the United States and their clerical
speakers have lived up to this self-imposed standard by radio and
church. Where these few exceptions have occurred, in a day when
both the motives and inspiration may well be questioned, the
resultant and growing condemnation of both public and clergy is
such as to bring about self-correction, or, failing this, eventual
commercial self-destruction.

In the past year, the NAB has had the most helpful and symp-
thetic cooperation and support of most of the church organiza-
tions of the country. We are particularly grateful to Dr. Frank
Goodman, executive secretary of the Department of National
Religious Radio of the Federal Council of the Churches of Christ,

4496 — August 16, 1940
in America, and to Edward J. Heffron, executive secretary of the National Council of Catholic Men. Stalwart religious leaders both, they have brought to the problem a decade or so, each, of practical broadcasting experience.

There has been a steady improvement in the broadcasters' relations with the educational world. Not long ago, it will be recalled, there were those who felt the problem of educational broadcasting would be solved only by the allotment of more time on the air, with a slice ranging from 15 to 25 per cent of all facilities assigned exclusively to non-commercial educational operation by schools and colleges. Through collaboration which has been accelerated by the Code, educators now know that the answer is not to be found in more time on the air, but more time in preparation and rehearsal. A closer understanding between radio and teachers has characterized the year just closed.

From its very start, the Code Committee has endeavored to be of service to each member as well as to the industry at large. It has not sought to assume the responsibility to accept or to reject program material delegated solely to the licensee. It has sought to be a clearing house of information and experience for the benefit of all. It has sought to formulate industry policy as it develops from station operating experience. Indeed, the Code itself is but the composite best judgment of all the stations. Of necessity the Code must be a continuous evolution of interpretation and policy to suit the ever-changing social and economic problem of broadcasting.

In order to preserve its proper function, the Committee follows one line of procedure in the handling of requests for Code interpretations; the request or inquiry must come direct from a broadcaster before the Committee undertakes action.

A political campaign lies ahead. The law is explicit in its regulations for political broadcasting. The broadcasting industry will of course continue to live up to the spirit and letter of the law governing political broadcasting. But the law does not cover the use of radio of those groups and their leaders who are not members of political parties, or to whom the law governing political broadcasting. But the law does not cover the use of radio of those groups and their leaders who are not members of major political parties, or who desire to express political convictions about candidates or matters subject to ballot. The Committee points out that during political campaigns, when leaders of these groups desire to secure radio time on behalf or in opposition to candidates or issues, the facilities of radio stations are open to them, subject to provisions of law and the Code. The Committee has always preached the doctrine of fairness and consistency in the handling of such matters. Should a station sell time to such groups, it should of course hold available an equivalent amount of time so that the opposition may have a fair and equal opportunity to reach the ear of the public.

When the political campaign is over in November, the classifications of such groups who have secured radio time for political purposes revert to their original classification as provided in the public controversy issue, religious, or other section of the Code. When the opportunity to buy time expires at the end of the campaign, radio stations are again prepared to extend a microphone neither bought nor paid for in accord with the public interest, with adequate provision that equal opportunity will be given their opposition.

The Code Committee feels that in these days of national emergency, when challenges to our national safety exist within and without our borders, the wisest possible amount of discussion should freely and fairly be accorded the many important questions affecting our American way of life. The Committee feels that the injection of emotionalism and sensationalism into discussions of politics, public controversies, religious or social questions would seriously affect the public welfare and prevent the American people from gaining a quick and clear access to the facts upon which our future course of action must be determined. In following a policy of objective and fair-sided presentation of the issues, radio stations are making outstanding contributions to the American democratic process.

The commercial section of the Code becomes fully effective October 1. Complete details and announcements of this were sent to all agencies and advertisers by both stations themselves and by NAB headquarters on July 1, and has been generally well received. Linked as we are in common concern with all media and advertisers, in both a social and economic relationship, the Code has been well received by the four A's, the Association of National Advertisers, the National Association of Better Business Bureaus and the Advertising Federation of America. It has brought about a strengthened industry position with reference to the so-called Consumer Movement.

The business of broadcasting is the only business where a public pledge to serve the public interest is mandatory as prelude to the right to operate. Radio stations have since the beginning made and continue to make sincere and eager effort to discover in what areas of programming lies the best public interest. The impact of public opinion is a far more potent enforcement power than could possibly be wielded by any industry policeman. Public opinion, and it alone, governs American radio and enforces the code. This is the American system of broadcasting.

The popularity and the prestige of American radio is at its highest peak. Certainly this is a tribute to the stewardship of the individual station and network management in adhering to a code of conduct which has won for radio the largest audience in the world. The Committee knows that every broadcaster wants to and will keep it so. Last Saturday we had an index to the standing of broadcasting among those we serve, when on the World's Fairs broadcasts there appeared representatives of every segment of our American life—labor, religion, education, youth, women, civil liberties and government, conveying thanks and pledges full support to a system of free American radio. Standing side by side were a Jewish rabbi, a Catholic priest, and a Protestant minister in tribute to a system of democratic radio which tries to bring people together in bonds of understanding. Those for whom these eminent men and women spoke last Saturday number in the tens of millions. No other industry, whether it be in the entertainment, educational or communications field, has ever received such an eloquent tribute. With a united industry and with the people of the nation united in its support, surely radio has reached a new level of self confidence and of public confidence. The Code Committee pledges that it will continue to be of service to the industry at large and to each individual member.

BY JOHN E. DREWRY

(Dean, Henry W. Grady School of Journalism, the University of Georgia)

The story of the George Foster Peabody Radio Awards is largely an account of and a tribute to the imagination and enterprise of Lambdin Kay, for years director of Radio Stations WSB and WAGA of the Atlanta (Ga.) Journal, and now director of public service for WSB.

Last fall—less than a year ago—Mr. Kay asked me to come to Atlanta for a conference, during which he made a suggestion out of which grew the action of the Board of Regents of the University System of Georgia in setting up these awards. At this time, Mr. Kay explained to me that although there were miscellaneous prizes and distinctions in the radio field, there was nothing comparable to the Pulitzer awards in journalism and literature. He said that the industry had been so busy "growing up" that its leaders had not given sufficient attention to the public service implications of radio. He felt that the time had come to remedy
this situation, and so, as a member of your committee on awards for distinguished service, he was turning to us for possible assistance. He mentioned the fact that the Pulitzer awards are administered by the School of Journalism of Columbia University, and suggested that perhaps we of the University of Georgia School of Journalism might be interested in administering similar awards for radio. He also proposed that the radio awards bear the name of George Foster Peabody, a distinguished patron and life trustee of the University of Georgia.

Needless for me to say, I was interested in his proposal, and assured him that I would pursue the matter with officials of the University and the Peabody estate. This I did, and at the May 1940 meeting, our Board of Regents officially approved and set up the George Foster Peabody Radio Awards. This action was the result of a series of conferences participated in by Dr. S. V. Sanford, Chancellor of the University System of Georgia; Marion Smith, chairman of the Board of Regents; Mayor of the City of Athens; Dr. Harmon W. Caldwell, president of the University of Georgia; Mrs. Marjorie Peabody Waite, Saratoga Springs, New York, daughter of George Foster Peabody; Harry Hodgson, Athens, personal friend of the late Peabody; Ed Kirby, director of public relations of the University of Georgia; Dr. Harmon W. Caldwell, president of the University of Georgia; Mrs. Marjorie Peabody Waite, Saratoga Springs, New York, daughter of George Foster Peabody; Harry Hodgson, Athens, personal friend of the late Peabody; Ed Kirby, director of public relations of the University of Georgia; the Regents of the University System of Georgia; the National Council on Religion in Higher Education; the National Association of Broadcasters; and the National Institute Arts and Sciences.

All of these men, and all the organizations with which they are identified, have been interested in the public service contributions of the broadcasters. And so I was interested in his proposal, and assured him that I would pursue the matter with officials of the University and the Peabody estate.

I am assuming that all of you are familiar in a general way with the distinguished career and generous philanthropies of Mr. Peabody. Perhaps, however, at this point I should interpolate a little biographical data about this very fine friend of high education and social betterment. In the interest of brevity, I shall merely quote some of the high points in the sketch of Mr. Peabody as it appeared in "Who's Who in America".

"GEORGE FOSTER PEABODY, banker; born in Columbus, Georgia, July 27, 1852; received A.M. Harvard, LL.D., Washington and Lee, the University of Georgia. In banking many years. Treasurer, Democratic National Committee; chairman, State of New York Reservation Committee at Saratoga Springs; trustee, American Christian Institute for Negroes, Hampton Normal and Agricultural Institution, Pennsylvania Normal and Industrial School, Fort Valley High and Industrial School, Colorado College, the University of Georgia, Skidmore College, Lake Placid Education Foundation, National Council on Religion in Higher Education, Georgia Warm Springs Health Foundation. He was a member of the Southern Society, National Institute Arts and Sciences; a member of the following clubs: Century, Cosmopolitan, Down Town, Reform, National Arts, City, Hamilton, Lake George County Club. His home was at "Yaddo" in Saratoga Springs, New York."

To these bare facts, I may add that Mr. Peabody devoted much of his fortune to education and social enterprises. He was especially interested in the state university of his native Georgia, and has been referred to as the "best friend of the University of Georgia ever had." Far visioned as he was, as early as 1905, he saw the necessity of a chair of forestry in the College of Agriculture of a state in which the pine tree is of no small consequence. Today our School of Forestry bears his name. Democrats in this audience possibly will recall, or may be interested to learn, that Mr. Peabody was a close personal friend of Franklin D. Roosevelt, and was largely responsible for interesting the President in the Georgia Warm Springs Foundation, near which is located the "Little White House."

The resolution providing for these Peabody Radio Awards, as approved by the Regents, reads as follows:

A PLAN WHEREBY THE OLDEST CHARTERED STATE UNIVERSITY WOULD RECOGNIZE AND ENCOURAGE THE SOCIAL RESPONSIBILITIES OF THE YOUNGEST OF THE MEDIA OF COMMUNICATION—AND ALSO HONOR A DISTINGUISHED AMERICAN:

Recognizing that the radio is an important medium of information, entertainment and public service, comparable to the press, The University of Georgia (chartered 1785), through the Henry W. Grady School of Journalism and a Board of Adversers, in conjunction with the National Association of Broadcasters, will confer annually, beginning in 1940.

THE GEORGE FOSTER PEABODY RADIO AWARDS for the most disinterested and meritorious service rendered by each of three American radio stations, representing the three major types of stations (local, regional and national), and also by a national broadcasting chain, said awards to be given to perpetuate the memory of George Foster Peabody, benefactor and life trustee of The University of Georgia and friend of educational progress everywhere.

These awards will be announced and bestowed publicly by the Regents of the University System of Georgia, upon recommendation of the Advisory Board set up and maintained jointly by the University of Georgia, through the Henry W. Grady School of Journalism, and the National Association of Broadcasters.

The membership of this Advisory Board shall consist of the Chancellor of the University System of Georgia, and eleven other outstanding American citizens who have demonstrated in a notable degree their interest in public affairs, and who also by position and achievement are prepared to evaluate in an impartial and detached manner the contributions of radio stations and chains in connection with these awards. The Board is to be self-perpetuating, subject to the approval of the Board of Regents. Nominations for membership are to be made through the office of the Dean of the Henry W. Grady School of Journalism. (The initial personnel of the Advisory Board will be announced at an early date. An explanation on this point will be made on the floor.)

Nominations of candidates for these awards shall be made in writing to the Dean of the Henry W. Grady School of Journalism, The University of Georgia, Athens, Georgia. Each nomination must be accompanied by complete and self-evident data setting forth clearly the claim to consideration for one of these awards. Program subjects, program outlines, program transcripts, recordings, letters, and other pertinent data should be so presented as to comprise an exhibit which will be a faithful record of the station's particular contribution to public service offered for consideration in this connection.

Competition for one of these awards will be limited to work done during the calendar year ending December 31 next preceding. The first award will be made in 1941, based on public service programs of 1940.

The closing date for entries will be January 15.

When informed of these awards, Neville Miller, president of the National Association of Broadcasters, made a statement which cheered us very much. It read:

"American broadcasters are honored that under such distinguished and impartial auspices, annual awards will be bestowed for the most outstanding contributions rendered in the public interest which they are dedicated to serve.

"Without question, the George Foster Peabody Radio Awards to be selected by a group of outstanding Americans representing a cross section of the religious, cultural and economic life of the nation, will become a new and noteworthy standard by which the public service contributions of the broadcasters will be gauged and measured.

"We welcome this new and wholesome influence in broadcasting. Our thanks go out to those individuals and to The University of Georgia whose public spiritedness has combined to bring about this worthy means through which to further perpetuate the noble memory of a great American, George Foster Peabody."
We of The University of Georgia School of Journalism feel that radio is very much a part of our educational program. For a number of years, the following statement has appeared in the annual bulletin of the Henry W. Grady School of Journalism, The University of Georgia:

"To the average person, the term journalism means newspaper work, perhaps reporting. Important as is the newspaper, and essential to the welfare of a democracy as is accurate and truthful reporting, journalism embraces a great deal more than the daily and weekly press. Journalism, in the broad sense, includes metropolitan dailies, small town dailies and weeklies, press associations and syndicates, certain phases of the radio, specialized magazines and trade journals, general magazines, various aspects of book publishing, advertising and publicity, much of the production and promotion work in motion pictures and the theatre, and editorial, instructional, and research work for schools, colleges and various social agencies."

The creation of the George Foster Peabody Radio Awards was but the next and largest step in our efforts to be of educational assistance to an important agency of communication. We expect to do all we can to make these Peabody Awards of the maximum usefulness to radio. But a large part of the responsibility for the success of the project rests with you members of the National Association of Broadcasters. Your representative, Mr. Kay, initiated the plan! Your members, by entry, participation, and publicity, can make these Peabody Awards a real stimulus to that meritorious, public service which has already reflected so much credit on radio. We of The University of Georgia are counting heavily on your support, just as we expect to give you ours in every way possible.

Resolutions

The convention adopted the following resolutions:

1. THANKS. The National Association of Broadcasters hereby extends its hearty thanks to those who have participated in its deliberations and who aided so materially in the success of its 18th Annual Convention.

Especially do we wish to thank Mr. Stephen B. Early, secretary to the President of the United States, the Hon. James Lawrence Fly, Chairman, Federal Communications Commission, the Hon. Louis Johnson, former Assistant Secretary of War, Dr. Frank Kingdon, and Dr. John E. Drewry for their valuable contributions to our deliberations.

In addition, our thanks go to the St. Francis Hotel, the Mark Hopkins Hotel, the San Francisco Convention and Tourist Bureau (which arranged the excellent entertainment program for the ladies), the Golden Gate International Exposition, Mayor Angelo J. Rossi, and those other individuals and groups from the city of San Francisco who have been so generous with their time and talents.

Our most hearty congratulations and thanks to the local convention committee, especially to the Chairman, Howard Lane, to Ralph Brunton and Lincoln Dellar, and to those other local broadcasters whose cooperation made possible the presentation of the banquet and the show, "The Greener Pastures," directed by J. Kenneth Jones.

The association also extends its hearty thanks to the directors of Treasure Island Press Building for their entertainment Sunday afternoon at the San Francisco Press Club.

2. NEVILLE MILLER AND STAFF. The National Association of Broadcasters hereby extends its thanks to its President, Neville Miller and to the members of his staff for their generous efforts and extremely commendable work during the year just completed.

3. APPROVAL OF ACTS OF OFFICERS. The 18th Annual Convention of the National Association of Broadcasters hereby approves the official acts performed since the last annual convention by its duly qualified officers.

4. MEMBERSHIP EXTENSION. The Association takes this opportunity to thank District Directors, the State and Area Membership Chairmen for their enthusiastic and unremitting efforts which have resulted in the attainment of the highest membership in the history of NAB, namely, 464.

5. EDUCATION. The Association looks with regret to the probable discontinuance of the splendid non-partisan efforts of the Federal Office of Education, which have brought so many educational programs, such as "Smithsonian Institute" series, "The World Is Yours" and "Immigrants All—Americans All," which have been so favorably accepted by the United States.

6. CHILDREN'S PROGRAMS. The Association desires to express its appreciation to the Radio Council on Children's Programs which has brought about such splendid cooperation and understanding between parents and teacher groups, and American broadcasters, in the improved standards of children's programs.

7. ACCEPTANCE OF CODE OF ETHICS. Our Association expresses its gratitude to those representatives of the various segments of our American life in the field of labor, education, religion, youth, civil liberties and Government who have expressed their complete confidence in the American system of free radio as exemplified in the Code of Ethics of the National Association of Broadcasters. This was dramatically brought forth in the tribute to American radio by both the New York World's Fair of 1940 and the Golden Gate International Exposition in a broadcast of unprecedented proportions which was carried by all networks and many non-affiliated stations on Saturday, August 3, 1940.

8. B.M.I. The National Association of Broadcasters wishes to take this opportunity to commend the work of those responsible for the organization of Broadcast Music, Inc., and its unprecedented development. The Association feels that the scope and magnitude of the work accomplished in such a brief time not only reflects the outstanding ability of the leaders of the industry, but the unanimity among broadcasters when faced by a common vital problem.

9. MUTUALITY OF INTEREST. The National Association of Broadcasters joins with other advertising media, and organizations interested in advertising, in the presentation of a united front to cement public confidence in advertising. We join with others in urging that each branch of advertising exercise self-restraint, good judgment, and tolerance in its attitude toward other advertising interests and media.

10. ADVERTISING AND THE AMERICAN WAY. The Advertising Federation of America at its 1940 National Convention in Chicago made a distinct contribution by the development of the theme of the convention—"Advertising's Contribution to the American Way of Living."

"Advertising powerfully motivates and stimulates many of those individual acts and group processes which determine the way of American life. A symbol of free competitive enterprise and of free choice by consumers, advertising arouses the desire and ambition for better living and simultaneously performs an economic service which helps to make better living possible.

"The preservation of the American way of free individual enterprise and free consumer choice assumes more than usual importance today in the shadow of perils assailing free men and free peoples in so many parts of the world."

The National Association of Broadcasters joins with the Advertising Federation of America in urging "Advertising men and
women everywhere to respect and take pride in the contribution of good advertising to the American way of living, that by the quality and sincerity of their work they may add daily to the value of this contribution, and thus help to safeguard it as a permanent part of American business."

11. DEFENSE OF THE NATION. Since the American people are today faced with new and urgent problems of national defense calling for the unselfish united effort of all Americans, the National Association of Broadcasters, recognizing the vital duty and responsibility of the American radio broadcasting industry to bend every effort in the organization of plans for national defense, hereby instructs the President of the National Association of Broadcasters to appoint a committee, of which he shall be one, to represent the industry and to be known as the Advisory Radio Committee on National Defense, which will still further implement the cooperation which the industry has already extended, and is still extending.

The Association instructs this Committee to advise the President of the United States, the Secretary of War, the Secretary of the Navy and the Chairman of the Federal Communications Commission of the desire and purpose of the American Radio Broadcasting Industry to cooperate fully in the organization of defense plans.

And the Association further instructs this Committee to place its services at the disposal of all departments of the Federal Government in coordinating and promoting the defense work; and in order to anticipate possible calls from the Federal Government, that the Committee undertake a survey of the Industry to determine requirements in the event of national emergency, and the qualifications of all employees for defense service.

12. AMERICAN WAY OF LIVING. The American Radio Industry is fully conscious of the vital inter-dependence of a free radio and a free people, and has long been dedicated to the preservation and the promotion of the American way of life, with its democratic liberties and free institutions.

Our greatest hope for the preservation of the American way of life rests fundamentally with the preservation of the stout and unconquerable unity of the American people which in the past has permitted us—though drawn from every race, creed and nation of the world—to live together in peace and harmony.

Malevolent forces, active today in this country of ours, are seeking to undermine the faith of Americans in democracy, to weaken our will to defend ourselves and to fan into burning hatreds the differences of race, creed, class and descent of which we are now composed.

In the face of these attacks, the American radio industry is bound not only to continue, but to intensify its efforts to promote the American way of life and thus protect its own freedom and the freedom of the people it serves.

The National Association of Broadcasters does solemnly re-dedicate the American radio industry, with whose freedom it is entrusted, to the promotion of the American way of life, and to preservation of the unity and morale of the American people.

Submitted by the Resolutions Committee,

EDGAR H. TWAMLEY—WREN
W. CAREY JENNINGS—KEX
H. K. CARPENTER, Chairman—WHK

Fair Broadcast

Tributes to the American System of Broadcasting from representatives of virtually every major organized group in the country were heard on the World’s Fairs broadcast August 3. All will be printed in pamphlet form. Below are the remarks of James Lawrence Fly, FCC chairman, and Stephen Early, secretary to President Roosevelt.

CHAIRMAN FLY

I am happy to participate in this tribute of the two great World Fairs to the radio industry—both in an official capacity, as Chairman of the Federal Communications Commission, and as just another listener who has found many enjoyable hours by the side of his radio.

First, let me say a word about the government’s interest in this field. The Federal Communications Commission was created by Congress to protect the public interest in radio and related fields of communication. It was set up to carry into effect the policies which you, the American people, want. The members of the Commission are your representatives.

No less are the broadcasters your servants. As trustees of the radio frequencies which are public domain, the broadcasters are eager to learn what the public desires. They spend large sums of money in making surveys to learn the type of programs which meet with your approval. They are always sensitive to public reactions once they are made known.

Those in the broadcasting industry know, for example, that so far as public issues are concerned you want an opportunity to learn all the facts. They realize that other sources are open to those who want, or who may be willing to tolerate, the partisan presentation of information—with its unbalance and the insinuation of prejudice into factual reporting. They are aware of their great opportunity to establish radio as the completely reliable, impartial medium. Idealism is a practical influence in the conduct of radio broadcasting.

That, in large measure, is because you have made it clear that you do not want the magic of radio bent under the yoke of selfish interests; that you want this public facility left completely free to serve the interests of the public. It is entirely appropriate that you make your wishes known to the broadcasters, and for that matter, to the Commission. All of us want radio to continue its great strides for the benefit of the whole race. Its great force we all want exercised, in this country, to maintain American radio, in the future as in the past, the finest and freest on the face of the globe.

In the last analysis, the best radio, the freest radio, is that most responsive to the wishes of the people. That is democracy in flower.

MR. EARLY

It is singularly fortunate that, at a time when the freedom of mankind is at stake throughout much of the world, we can assemble here to participate in a ceremony which symbolizes liberty in America. These words “freedom” and “liberty” are so much discussed in these days that, I sometimes wonder, if we maintain a constant appreciation of their real significance. So long have we enjoyed these blessings there is temptation for the words to become abstractions. Yet today there are millions of men who, perhaps, can hear these words over shortwave transmitters—men who are suffering the tyranny and slavery that follow the loss of their freedom.

Expression of opinion in parts of this world of ours is a felony, punishable by death. It is, likewise, a crime, according to the credo of the tyrants, for men to listen to the opinions of others if such opinions differ with those of their dictators. Yes, there are men who are fighting and dying to maintain that freedom for themselves and—perhaps for us all. And, this freedom cannot be maintained without sacrifice. The old truism: “eternal vigilance
is the price of liberty" has no boundaries in the world today. When free men become slaves in any part of the globe, vigilance requires that we prepare to make certain that encroachment on liberty cannot happen here. This nation is now engaged in such preparation. Industry, labor, agriculture and other groups are being mobilized into this great effort to make America invulnerable against whatever the future may hold as a threat to our freedom. This is being done by democratic procedures, and, with a real sense of national unity.

Broadcasters, in common with many other groups in America, no doubt are concerned with the contribution they can make to the program of national defense. I can only give you a personal opinion. Broadcasters, it would seem, have a unique responsibility and a privileged opportunity. The dependence of our people upon radio as an important source of information calls for the highest degree of care in presenting facts impartially and without distortion. In the event of an even more extreme emergency, it seems to me, radio can and should continue to make its important contribution to the maintenance of the morale of our people.

I see no occasion for any sort of extraordinary measures so far as radio is concerned. I am convinced that broadcasting will continue to function in accordance with the public interest and, in a democratic way, during any emergency. Your duty, as American citizens, is the best standard of conduct in times of crises, as well as under more normal circumstances.

To the broadcasters and to the listeners to this program, I bring greetings and best wishes from the President. You broadcasters know the President's views on the relationship of radio to government. Recently, he pointed out that while the government long ago had to set up essential controls of radio operation, to prevent complete confusion on the air, in all other respects, radio is as free as the press. I bring to you a new expression of hope that this freedom will endure forever. Likewise, I offer congratulations to the radio industry for its great record of progress and service. The American system of free radio, as symbolized by these plaques, is actually a living symbol of the freedom of us all.

I thank you very much.

NAB MEMBERSHIP NOW 473

Six new members brought the total NAB membership this week to 473, the largest number of members in the history of the Association. The new members are:

WAGA—Atlanta, Georgia
WAIR—Anderson, South Carolina
WAGR—Morgantown, West Virginia
KGA—Spokane, Washington
KHO—Spokane, Washington
KVEC—San Luis Obispo, California

Labor Notes

The American Federation of Musicians, in a jurisdictional squabble with the American Guild of Musical Artists, has banned such noted musicians as Heifetz, Iturbi and Zimbalist from both broadcasting and recording. These artists belong to the Guild. Mr. Petrilio says that they play instruments and, therefore, should belong to the A. F. of M. Both unions are A. F. of L. At the same time the A. F. of M. banned the Boston Symphony, last of the major non-union orchestras, from broadcasting and recording. The Boston orchestra has not broadcast for a long time.

The cost of living for wage earners and lower-salaried workers in the larger cities increased 0.7 per cent during the three months ended June 15. The increase during the year ended June 15 was 1.9 per cent. Atlanta, Birmingham and Houston were the only cities to report decreases during the quarter. The greatest increase was 1.7 per cent in Chicago.

A case to test the constitutionality of the Wage and Hour Act has finally reached the Supreme Court. It was brought by the Opp Cotton Mills, Inc., of Alabama.

The Wage and Hour Administration has issued a new set of regulations governing employment of learners at less than the minimum wage "if such employment is in connection with a bona fide vocational training program." Since in no case is the learner's wage to be less than 75 per cent of the minimum specified by the law, it would scarcely be worth while for broadcasters to take the necessary steps to obtain learners' permits.

A great many broadcasters at the San Francisco Convention were interested in the new plan for pre-payment of overtime for certain employees. (See NAB REPORTS, page 4443.) Any questions about application of this opinion will be answered by the NAB Labor Relations Department.

National Defense

NATIONAL DEFENSE TOTAL 603

Forty-six (46) more broadcasting stations have pledged their support to the National Defense campaign. The total to noon, August 15, is 603.

Several pledge blanks, not filled out, have been received in the mail. Consequently stations which mailed them cannot be listed.

Station executives who detect errors or omissions in this or in the listings of July 26 and August 2 are requested to register corrections with Arthur Stringer, NAB headquarters, 1626 K Street, N. W.

An example of extra cooperation with the National Defense Program was offered by Grover C. Crilley, general manager, WJEJ, Hagerstown, Md., on Monday evening,
August 5. The 15-minute program presented W. H. Rempe, district manager of the Ninth Civil Service District, St. Louis, who is now detailed as liaison officer to the War Department. An open forum was held after the broadcast when the large studio audience asked numerous questions about the positions that are to be filled under the National Defense Program. C. C. Hatheway, chief of the Information and Recruiting Division, of the United States Civil Service Commission, and other Commission personnel expressed themselves as highly pleased with results.

Generally speaking, the Man Power campaign is making progress according to the United States Civil Service Commission. The situation will be covered in more detail on a memo by mail to all broadcasters at an early date.

The additional 46 cooperating stations appear below:

**ALIEN REGISTRATION**

The Immigration and Naturalization Service asks stations to make as much use as possible of the following announcement before August 27:

Are you an American citizen? If not this message means you. The Alien Registration Act requires all aliens to register between August 27 and December 26, 1940. Anyone who is not a citizen and who fails to register will be liable to fine or imprisonment, or both. The Government is confident that all loyal aliens will cooperate by registering as early as possible. Ask your postmaster for a sample form of the registration questions, and remember the date—August 27th.

**Promotion**

**LISTEN BEFORE YOU VOTE**

Many conversations with broadcasters as well as letters lead to the belief that LISTEN BEFORE YOU VOTE is already over the top.

But what is done from now on is going to determine whether radio is to get the maximum possible benefit out of this industry-wide, country-wide promotion. This is the time to make and perfect plans; not to execute them. Best results will undoubtedly be produced by concentrating effort in the interval from September 16 on.

In the original LISTEN BEFORE YOU VOTE release, July 18, it was suggested, among other things, that the LISTEN BEFORE YOU VOTE story be told to members of local organizations, and that dates be arranged well in advance.

On August 2 this idea received impetus from Rotary. Rotary International News Letter, distributed to presidents and secretaries of 5,073 clubs, carried the following:

**“LISTEN BEFORE YOU VOTE”**

“Listen Before You Vote” is the theme adopted by the (U.S.A.) National Association of Broadcasters, and approved by the national committees of the two major political parties and by minority political groups, under which political speeches, addresses, and discussions are to be presented to the public over
the radio stations of the U.S.A. during the presidential campaign of 1940. Some idea of the growing importance of radio in the public and political life of the U.S.A. is understood through the increased number of radio sets in use today (44,000,000) as compared with the number of sets in use in the presidential year of 1920 (400,000).

The Association of Broadcasters are hopeful that U.S.A. Rotary clubs and Rotarians will avail themselves of the opportunity to listen to the radio broadcasts during the presidential campaign which constitutes "a parade of ideas from which the U.S.A. voter can receive information upon which to base his judgment in casting his ballot."

In advance of September elections in South Carolina, WCSC, Charleston, is now promoting LISTEN BEFORE YOU VOTE, using announcements and movie trailers in 11 theatres throughout its service area.

One hundred red, white and blue LISTEN BEFORE YOU VOTE posters will be distributed to member stations, free, next week. Distribution is automatic. No order is necessary.

Several hundred stations, at least, will find it advantageous to distribute larger quantities in their service area. Many orders for extra quantities have already been received.

Station managers are urged to forward such orders at an early date, because it is an advantage to have the posters on the premises in advance of actual use. A convenient order blank was enclosed with a one page letter to members August 14.

**FAIR SALUTE PROMOTION**

"1940's biggest broadcast," the salute to American radio, August 3, received powerful air and newspaper promotion in many cities.

In Philadelphia, WCAU used 250 lines of copy in the "Bulletin" and "Inquirer". The top line was: "Hear It on WCAU Tonight."

WDBJ, Roanoke, Va., sponsored six inch-two column copy in both the Roanoke Times and the Roanoke World-News. On August 3 the latter newspaper published an editorial on the broadcast. Its concluding statement, agreeing with the industry's position in the matter of freedom of radio, said:

"In a democracy, the avenues for communication of information and ideas must be kept open and free."

WJTN, Jamestown, N. Y., ran 250 lines of copy in one ad and 84 lines in another. The display of the former read: "A Must on Your Radio Calendar! The biggest parade of radio stars in the history of the industry on one and the same program."

**Advertising**

**FREE OFFERS**

The Bureau of Radio Advertising has invited the following concerns to use radio on a regular basis in promoting their various interests:

- The Glycerine Producers' Association, who have sent to stations dessert recipes calling for the use of glycerine.
- Ringling Brothers, Barnum and Bailey Circus, who ask stations to broadcast recordings dealing with "educational material on circus history, circus life in general, etc."
- Lawrence H. Sels Organisation, who are currently issuing publicity on behalf of insulating materials and carbonated beverages.
- Pan American Society for Tropical Research, who have a very interesting proposal offering station managers a Panama hat in return for free time telling about the rare and exotic flora of Ecuador.
- Ziff-Davis Publishing Company (Pets Magazine) who have devised a plan to bring refugee dogs from Great Britain and find homes for them in America. Radio is asked to broadcast the plea, which was turned down as impracticable by the English Kennel Club.
- The Woman Magazine, who would be glad to have stations offer their listeners a special subscription rate, as an audience test.
- Your Life Magazine, who are submitting as news matter publicity scripts calling attention to articles in their forthcoming issue.

**Cost-per-Inquiry**

In addition, the following have recently made percentage proposals to member stations, and have been advised by the Bureau that such methods are not acceptable to reputable broadcasters:

- Huber Hoge & Sons, on behalf of Velve-Tize;
- Playcrafters, on behalf of Foot Master Balm.
- Benton & Bowles, Inc., has asked stations to broadcast plans for a National Certo Jelly Making Contest. The rules of the contest state that only jellies and jams made with Certo are eligible. In view of this, the Bureau believes that time should be paid for on the regular basis, and has advised the agency accordingly.

**AIR CONDITIONING TRAINING CORP.**

Many stations may be interested in the following FTC complaint:

A Federal Trade Commission complaint charging misrepresentation in the sale of a correspondence course in air conditioning and refrigeration has been issued against Air Conditioning Training Corporation, and its officers, Benjamin M. Klekner, Morris A. Gluck and Leon J. Knight, 789 Wick Ave., Youngstown, Ohio.

According to the complaint, the respondent corporation misleadingly represented that students who complete its training course are assured of employment in the air conditioning and refrigeration industry; that the air conditioning industry has designated the respondent to train men for employment; that many vacancies exist in the air conditioning and refrigeration industry that are available to students who complete its training, and that representatives of the air conditioning and refrigeration industry actively participate in the conduct of the school and in the giving of instruction, when such are not the true facts.

Further misleading representations alleged in the complaint are that respondent's salesmen are experts in vocational guidance; that students while pursuing its course will be qualified and able to secure part time work in the servicing of air conditioning and refrigeration equipment, and that persons with insufficient background are qualified to pursue its course of instruction, when such are not the facts.

The respondent also allegedly claims that beginning wages in the air conditioning and refrigeration industry are greater than they are in fact; misrepresents the extent and nature of fees payable by students for its course of instruction, and exaggerates the extent of its laboratory and shop equipment.

Twenty days are granted for filing answer to the alleged violation of the Federal Trade Commission Act.

**Engineering**

**ENGINEERS' CITIZENSHIP**

The FCC has extended for one month—to September 15—the time for compliance with its Order No. 75 calling upon each licensed
radio operator, commercial or amateur, to submit proof of citizenship.

Many communications have been received showing delayed receipt of information regarding the order, and indicating further delay in responding to it as a result of absence or other causes. It is not contemplated, however, that a further extension will be granted except where unusual circumstances exist.

Inquiries have also been received concerning the basis of the order and the penalties which might follow non-compliance. Under Section 303 of the Communications Act of 1934, as amended, the Commission is given authority "to prescribe the qualifications of station operators, to classify them according to the duties to be performed, to fix the forms of such licenses, and to issue them to such citizens of the United States as the Commission finds qualified." It should be noted that the act limits such licenses to citizens of the United States and under existing conditions it is necessary to obtain additional evidence of citizenship in respect to those persons licensed by the Commission. The Commission likewise is authorized to suspend the license of any operator, among other causes, for violation of any regulation made by the Commission.

Instances have been reported to the Commission in which an operator having theretofore believed himself to be a citizen of the United States and having so affirmed, discovered, upon endeavoring to secure the information required for compliance with Order No. 75, that he was in fact an alien and was not and had never been entitled to the license which he held. Under such circumstances the only proper course of action is to submit his license to the Commission for cancellation, advising the Commission at the same time of the circumstances. The license document which has been issued by the Commission to such an operator is null and void. Continued operation under such a condition would be unlicensed operation in violation of the Communications Act. Furthermore, continued reliance upon a false claim of citizenship would subject such persons to penalty by imprisonment and fine under Section 79 of the United States Criminal Code which provides in part that such penalties shall be imposed upon "whoever, for any fraudulent purpose whatever, shall falsely represent himself to be a citizen of the United States without having been duly admitted to citizenship."

Operators holding more than one license, such as a radiotelegraph and radiotelephone, or a commercial and an amateur class, have inquired whether it is necessary to submit a separate response for each such license. This is not necessary. A single response to the order is required from each individual affected, whether he holds one or more licenses or holds one and is applying for another.

The order does apply to the holder of a radio operator's license or permit of any class. Thus, a person holding only a restricted radiotelephone operator permit or radiotelephone third class should respond. Service in the military forces, police departments, or other organizations, does not exempt a license from compliance.

Inquiries relating to the submission of valuable personal papers such as birth or baptismal certificates, naturalization certificates, passports, marriage certificates, etc., have also been received. Whenever possible original certificates and records should be submitted to the Commission by registered mail. They will be returned when they have served their purpose. When certified copies may be obtained, such copies may be submitted in lieu of the original.

It should be noted, however, that it is unlawful to make any copy of any certificate of naturalization or of derivative citizenship. When it is impracticable or undesirable to forward original naturalization or derivative citizenship certificates, they may be presented for examination to any office of the Commission together with the completed questionnaire and all other documents necessary for a complete response to the order. In the alternative, where the operator has been issued a certificate of naturalization or of derivative citizenship in his own name, the response may be accompanied by the certification of the notary public or other duly authorized official before whom the response has been affirmed, stating over his seal that he has examined the original certificate and found it to be accurately described in the response to the questionnaire and that he believes the affiant to be the person named in such certificate.

Certificates of derivative citizenship may be obtained by persons qualified therefor upon proper application to the Department of Justice, Immigration and Naturalization Service, Washington, D. C. It is unquestionably to the advantage of any person who claims citizenship through the naturalization of parent or husband to obtain such a certificate. Although the possession of a certificate does, the filing of an application for such a certificate does not relieve the operator from submitting to the Commission the other documentary evidence required for the complete response to Order No. 75.

In every case a person responding to the order should submit completed forms 735 and 735A, including fingerprints taken by appropriate officials as the form provides. It is not acceptable to refer to fingerprints already on file in some other Federal or State agency. Postmasters at county seats or post offices of the first or second class may take fingerprints. In Alaska, the postmaster may also serve as a notary public. For the purpose of this order, fingerprints may also be taken by a military officer who is authorized to take fingerprints for enlistment purposes, as well as by local or State police officials. When appearing for fingerprints the operator should exhibit the completed form 735 as a means of identification to the official taking the fingerprints.

The nature of the documentary evidence of citizenship is suggested in Form 736. When a certified copy of public record of birth does not name the child, or if a different name is shown, additional identifying data must be submitted. Such identifying data may be a certified copy of the baptismal record, affidavits of parents, or other methods of proof suggested in Form 736.

Where original certificates or records other than fingerprints have been presented to and are now in the possession of other departments of the United States Government, it will be sufficient if reference is made to that fact, in response to Form 735 provided the documents relied on are described in detail.

FREQUENCY MONITORS

The Chief Engineer of the Federal Communications Commission acting under and by virtue of the authority conferred upon him by Section 2(h) of Administrative Order No. 2 has approved the following frequency monitors for use by standard broadcast stations as complying with the requirements of Section 3.60 of the Rules and Regulations and the provisions of Section 15 of the Standards of Good Engineering Practice:

<table>
<thead>
<tr>
<th>Manufacturer's Name</th>
<th>Type</th>
<th>Approval Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>General Radio Company</td>
<td>Type 25A (Formerly Oscillator, Type 475-C, Deviation Meter, Type 681-B, Quartz Plate Type 376-L)</td>
<td>1461</td>
</tr>
<tr>
<td>General Radio Company</td>
<td>Type 25-AB (Oscillator Type 475-B and Deviation Meter 681-A modified)</td>
<td>1463</td>
</tr>
<tr>
<td>RCA Manufacturing Co.</td>
<td>Type 311-A</td>
<td>1462</td>
</tr>
<tr>
<td>Western Electric Co.</td>
<td>Type I-C (Type I-A modified)</td>
<td>1464</td>
</tr>
</tbody>
</table>

The above monitors are the only frequency monitors approved at the present time as complying with Section 3.60 of the Rules and Regulations, effective August 1, 1940. These are the only monitors which may be employed by new stations (original construction permit granted on or after August 1, 1939). However, several other manufacturers have submitted, or have advised that they propose to submit data showing that with certain modifications, monitors that were formerly approved under Section 21

4504 — August 16, 1940
of the Standards of Good Engineering Practice are capable of compliance with Section 3.60 of the Rules and Regulations and Section 15 of the Standards of Good Engineering Practice.

If and when these modified monitors are approved, they will be assigned approval numbers and will be listed with the above units as approved frequency monitors under Section 21 of the Standards of Good Engineering Practice.

In the event existing stations (original construction permit granted prior to August 1, 1939) do not choose to have the present monitors modified after the modifications in the monitor are approved by the Commission or have other than approved modifications made, they may continue to use the formerly approved monitors. However, no explanation of a frequency deviation in excess of that permitted by Section 3.59 can be accepted where it is evident or claimed that the deviation was due to the failure or inaccuracy of the monitor.

MORE POWER FOR INTERNATIONAL BROADCAST STATIONS

Five additional international broadcast stations have been authorized by the Federal Communications Commission to increase power to 50 kilowatts. This makes nine such stations which are now using or are authorized to use the maximum power deemed by Commission rules necessary for satisfactory international service.

The five stations just granted construction permits for this purpose are National Broadcasting Company's stations WRCA and WNBW at Bound Brook, N. J.; Columbia Broadcasting System's station WCBK near Wayne, N. J.; and General Electric Company's station WGEA, at Schenectady, N. Y., and KGEI at San Francisco.

The National Broadcasting Company's stations had been using 35 kilowatts, the Columbia Broadcasting System's station 10 kilowatts, the General Electric Company's Schenectady station 25 kilowatts and its San Francisco station 20 kilowatts. WRCA operates on 9670 and 17780 kilocycles; WMBI on 6100 and 21630 kilocycles; WCBX on 6120, 6170, 9650, 11830, 15270, 17830 and 21570 kilocycles; WGEA on 6190, 9550, 15330, 21500 and 21590 kilocycles; (6190 and 21590 frequencies having just been authorized), and KGEI on 6190, 9530 and 15330 kilocycles.

Two stations were previously authorized to go to 50 kilowatts—Westinghouse Electric & Manufacturing Company's station WPIT, which is moving to Hull, Mass., and World Wide Broadcasting Corporation's WRUL, at Scituate, Mass.

Two stations are already complying with the minimum power requirement—General Electric Company's station WGE, South Schenectady, N. Y., 100 kilowatts, and Crosley Corporation's station WLW, Mason, Ohio, 50 kilowatts. Incidentally, the Crosley station has just been granted special experimental authorization to operate a 1 kilowatt transmitter on the frequency 6080 kilocycles, for identification only.

Three other international broadcast stations have until January 1 next to bring their power to the required minimum—WCAB, operated by the WCAU Broadcasting Company, Newton Square, Pa., now using 10 kilowatts; WDJM, Isle of Dreams Broadcasting Corporation, Miami, Florida, 5 kilowatts, and WBOB, Westinghouse Electric & Manufacturing Company, Millis, Mass., 10 kilowatts.

The Commission

SAN FRANCISCO PUBLIC SCHOOLS GET FM PERMIT

First use of FM broadcast in the non-commercial educational field is proposed by the Board of Education of the San Francisco Unified School District as a result of being granted a construction permit by the FCC for a new station at 22nd and Bartlett Streets, to operate on 42,100 kilocycles with 1 kilowatt power, unlimited time.

It intends to use radio for instructional, administrative, supervisory, and other functions in the local schools. Thirteen studios are planned for high schools and colleges in that area. They will be connected with the broadcast station by means of leased wires. In this manner it is expected that a greater number of teachers and pupils will be enabled to participate with less effort and expense of transportation.

The broadcast programs will cover nearly all of San Francisco as well as the East Bay area which includes the cities of Alameda, Oakland, Berkeley, El Cerrito and Richmond. The Board of Education, which is the governing body of the San Francisco Unified School District, has allocated $9,000 for the station, and an additional amount of $42,000 has been made available.

Three other institutions were previously licensed to use AM (amplitude modulation) on the channels set aside for non-commercial educational purposes. They are the New York City Board of Education, the Cleveland Board of Education, and, more recently, the University of Kentucky.

857 STATIONS

During the month of July, 1940, the FCC issued operating licenses to eight stations and granted ten permits for the construction of new stations. A comparative table by months follows:

FEDERAL COMMUNICATIONS COMMISSION DOCKET

No broadcast hearings or oral arguments are scheduled to be heard before the Commission during the week beginning Monday, August 19.

FUTURE HEARINGS

Following future hearings and oral arguments in broadcast cases have been scheduled by the Commission during the past week. They are subject to change.

September 19
Oral Argument Before the Commission
Report No. B-110:
KGKB—East Texas Broadcasting Co., Tyler, Texas.—In re: Revocation of station license of KGKB.
**September 30**

NEW—George F. Meyer, Medford, Wis.—C. P., 1500 kc., 100 watts night, 100 watts LS, unlimited time.

**FEDERAL COMMUNICATIONS COMMISSION ACTION**

**APPLICATIONS GRANTED**

KOAC—Oregon State Agricultural College, Corvallis, Ore.—Granted construction permit to install new transmitter, move transmitter site, install directional antenna for day and night operation, and increase power from 1 KW to 5 KW; frequency 550 kc., 1 KW night, unlimited time (B-5-P-2422).

WFDF—Flint Broadcasting Co., Flint, Mich.—Granted construction permit to change frequency from 1310 kc. to 880 kc., increase power from 100 watts to 1 KW, move transmitter site, install new transmitter, and install directional antenna for day and night use (B-2-P-2451).

WFMD—Monocacy Broadcasting Co., Frederick, Md.—Granted construction permit to increase power from 100 watts to 250 watts, unlimited time, subject to the condition that permittee shall file an application for modification of construction permit specifying the exact transmitter location and antenna system, within two months after date of order (Docket No. 5792).

WOW—Greater New York Broadcasting Corp., New York, N. Y.—Granted construction permit for new broadcast station to operate on 1210 kc., 100 watts night, 250 watts LS, unlimited time; exact transmitter site, studio site, and antenna system to be determined subject to Commission approval.

WKIP—Dr. George W. Young, Minneapolis, Minn.—Granted construction permit to change frequency from 1180 kc. to 1160 kc.; increase power from 1 KW night, 5 KW LS, to 5 KW night, 10 KW LS; increase hours of operation to unlimited; install new transmitter and directional antenna for night use (B-4-P-2720).

WMOB—S. B. Quigley, Mobile, Ala.—Granted modification of license to increase power from 100 watts to 250 watts; frequency 1200 kc., unlimited time (B-3-ML-997).

Van Curler Broadcasting Corp., Schenectady, N. Y.—Granted construction permit for new broadcast station to operate on 1210 kc., 250 watts, unlimited; exact transmitter site and type of antenna to be determined subject to Commission approval.

WGN—J. W. Birdwell, Knoxville, Tenn.—Granted construction permit for new broadcast station to operate on 1210 kc., 100 watts night, 250 watts LS, unlimited time; exact transmitter site, studio site, and antenna system to be determined subject to Commission approval (B-3-P-2840).

KFYO—Plains Radio Broadcasting Co., Lubbock, Tex.—Granted modification of license to increase night power from 100 watts to 250 watts; frequency 1310 kc., 250 watts day, unlimited (B-3-ML-946).

WPAY—Vee Bee Corp., Portsmouth, Ohio.—Granted construction permit to increase power from 100 watts to 250 watts, make changes in transmitter, move transmitter, and install vertical radiator; frequency 1270 kc., unlimited (B-2-P-2685).

WFMD—Monocacy Broadcasting Co., Frederick, Md.—Granted construction permit for increasing in operating hours from daytime to unlimited hours and install directional antenna; frequency 900 kc., power 500 watts.

W2XD—General Electric Co., Schenectady, N. Y.—Granted modification of construction permit for television relay broadcast station to change frequency assignment from 156000-162000 kc. to 162000-168000 kc.; power 400 watts visual night and day, 100 watts aural night and day; A1, A2, A3, A5 emission (B1-AL-280).

W2XAT—Western Gateway Broadcasting Corp., Schenectady, N. Y.—Designdated for hearing application for construction permit for new international broadcast station to operate on 1210 kc., 100 watts LS, unlimited time, limited time (B1-P-2690).

W2VO—Stapleton Advertising Co., stapleton, S. C.—Granted construction permit to increase power from 100 watts night, 250 watts day, to 250 watts unlimited; change transmitter and studio sites, and change type of transmitter; frequency 1370 kc. (B3-MP-988).

Star Printing Co., Miles City, Mont.—Granted petition to reconsider Commission action of October 31, 1939, in designating for new broadcast station to operate on frequencies 100-150 kc., 250 watts power, unlimited time, subject to the condition that permittee shall file an application for modification of construction permit specifying the exact transmitter location and antenna system, within two months after date of order.

WTAD—Illinois Broadcasting Corp., Quincy, Ill.—Granted petition for reconsideration and granted application for authority to operate station WTAD unlimited time on frequency 900 kc., with 1 KW power, using a directional antenna at night, thus setting aside Commission's Statement of Facts of March 30, 1939, and dismissing petition for rehearing.

**DESIGNATED FOR HEARING**

Mohawk Radio, Inc., Schenectady, N. Y.—Designated for hearing application for construction permit for new broadcast station to operate on 1210 kc., 250 watts, unlimited time (B1-P-2732).

Western Gateway Broadcasting Corp., Schenectady, N. Y.—Designated for hearing application for construction permit for new broadcast station to operate on 1210 kc., 250 watts, unlimited time (B1-P-2690).

Columbia Broadcasting System, Inc., Brentwood, N. Y.—Application for construction permit for new international broadcast station to operate on frequencies 1000-1500 kc., 250 watts, unlimited time, subject to the condition that permittee shall file an application for modification of construction permit specifying the exact transmitter location and antenna system, within two months after date of order.

Caribbean Broadcasting Assn., Inc., San Juan, P. R.—Application for construction permit for new international broadcast station to operate on frequencies 1000-1500 kc., 250 watts, unlimited time, subject to the condition that permittee shall file an application for modification of construction permit specifying the exact transmitter location and antenna system, within two months after date of order.

**MISCELLANEOUS**

W9XA—Everett L. Dillard, trustee Commercial Radio Equipment Co., Kansas City, Mo.—Granted special temporary authority to operate high frequency broadcast station W9XA on a frequency of 2500 kc., using maximum power of 1000 watts, special emission (frequency modulation) in cooperation.
tion with the license of high frequency broadcast station W2XJ, for a period not to exceed 30 days, to conduct and determine the extent of mutual sky-wave interference existing between two stations operating with 1 KW on 26300 kc., employing frequency modulation, and to determine to what extent strength contour of the desired station the interfering station whose transmissions are received via sky-wave will interfere with program reception of the desired station in its service area.

WNY—City of New York Municipal Broadcasting System, New York City.—Granted special temporary authority to operate until 10 p.m., EST, for the period August 1, 1940, to not later than August 31, 1940, in order to broadcast programs as set forth in letter dated July 31, 1940.

W2XNT—Allen B. DuMont Laboratories, Inc., Passaic, N.J.—Granted special temporary authority to operate 60-watt transmitter on the old No. 1 channel in the Plattsburg, N.Y., area, in order to pick up signals from mobile transmitter W2XKT and rebroadcast pictures in the area, for the period August 4, 1940, to not later than August 24, 1940, in connection with tests in cooperation with the U.S. Army.

W10XK—Allen B. DuMont Laboratories, Inc., Passaic, N.J.—Granted special temporary authority to operate in the Plattsburg, N.Y., area for the period August 4, 1940, to not later than August 24, 1940, in order to make tests in cooperation with the U.S. Army.

World Peace Foundation, Abraham Binneweg, Jr., Oakland, Calif.—Granted petition to accept additional material as part of the record in re application for construction permit for new broadcast station to operate on Channel No. 4, 22908, 61425, 86655, 91535, 17310, 12862.5 kc., 10 watts power night, 10 watts LS, emission A, A1, A2, A3, unlimited time (Docket No. 5851).

WRUW—World Wide Broadcasting Corp., Boston, Mass.—Granted request for dismissal without prejudice of application for modification of license to add frequency 6890 kc. to 17290, 15140 kc., 20000 watts night, 20000 watts LS, A3 emission, unlimited time (Docket No. 5887).

WHJB—Pittsburgh Radio Supply House, Greensburg, Pa.—Granted special temporary authority to operate from 7:15 to 8 p.m., EST, August 3, in order to broadcast special NAB program on the CBS network from 8 to 8:30 p.m., EST, and visual, A3 and A5 emission (B1-PVE-58).

WOCB—Cape Cod Broadcasting Co., near Hyannis, Mass.—Granted construction permit to operate on frequencies 60000-66000 kc. (Channel No. 2), on an experimental basis; power 1 KW aural and visual, A3 and A5 emission (B4-PVB-50).

The Television Program Co., Inc., Los Angeles, Cal.—Granted construction permit for a new television broadcast station to use frequencies 78000-81000 kc. (Channel No. 4), on an experimental basis, conditioned; power 1 KW aural and visual (B5-PVE-33).

National Broadcasting Co., Washington, D.C.—Granted application for construction permit to erect a new television broadcast station to operate on frequencies 102000-108000 kc. (Channel No. 7), on an experimental basis only, conditioned; power 1 KW aural and visual. This application is granted in lieu of the tentative grant for a television station in Chicago, as it appears that the Philadelphia station will make possible a more concentrated study of television systems by the entire RCA research organization (B2-PVB-5).

W9XZV—Zenith Radio Corp., Chicago.—Granted extension of special temporary authority to operate experimentally on frequency 11890 kc., for the period August 8 to September 6, pending action on application for modification of license.

WCBI—Binney Ims, Columbus, Miss.—Granted modification of construction permit (B3-P-2675) which authorized a new station, for approval of antenna and transmitter site at northwest corner of 1st and Main Streets, Columbus, Miss.; 1370 kc., 250 watts, unlimited time (B3-MP-1016).

KWL—Lakeview Broadcasting Co., Willmar, Minn.—Granted modification of construction permit (B4-P-2370) for new broadcast station, authorizing installation of new transmitter, antenna changes and approval of transmitter site and studio at Willmar (1310 kc., 100 watts, unlimited time) (B4-MP-1011).

KTFI—Radio Broadcasting Corp., Twin Falls, Idaho.—Granted construction permit for reinstatement of application (B5-P-2517). To install new broadcast equipment and make changes in authorized equipment; 1210 kc., 1 KW, unlimited time (B5-MP-294).

WLB—The Bowling Green Broadcasting Co., Inc., Bowling Green, Ky.—Granted license to cover construction permit (B2-P-2194) as modified, authorizing new broadcast station to operate on 1310 kc., 250 watts power and unlimited hours of operation, studio and transmitter to be located at Cemetery Pike and Lehman Avenue, near Bowling Green, Ky. (B2-Z-436).

KRK—Southern Minn. Broadcasting Corp., Rochester, Minn.—Granted authority to determine operating power by direct measurement of antenna power (B2-Z-425).

WBAF—L. B. Wilson, Inc., Portable-Mobile (area of Cincinnati, Ohio).—Granted license to cover construction permit (B2-PRX-218), authorizing a new relay broadcast station, frequencies 1616, 2060, 2190, 2830 kc., 25 watts power. To be used in cooperation with applicant's standard broadcast station WCKY (B2-LRY-198).

WCBN—Columbia Broadcasting System, Inc., New York City.—Granted special temporary authority to operate relay transmitter aboard the "USS Wyoming" en route from Guantanamo, Cuba, to New York City, using additional frequencies 4400, 4915, 5290 kc., for the period August 3 to August 11, in order to rebroadcast the report of the Captain of the "USS Wyoming" to the Secretary of the Navy, which is to be a part of the "We the People" program on the CBS network from 8 to 8:30 p.m., EST, and from 11 to 11:30 p.m., EST, on August 6.

Allen B. DuMont Laboratories, Inc., Passaic, N.J.—Granted special temporary authority to operate a 50-watt portable-mobile FM unit and a 25-watt mobile FM unit as described in letter of August 2, for the period August 4 to 24, in order to establish an order circuit in connection with the television demonstration during Army maneuvers in the Plattsburg area.

National Broadcasting Co., Washington, D.C.—Granted application for construction permit to erect a new television broadcast station to operate on frequencies 60000-66000 kc. (Channel No. 2), on an experimental basis; power 1 KW aural and visual, A3 and A5 emission (B1-PVE-58).

Balaban & Katz Corp., Chicago, Ill.—Granted application for construction permit to erect a new television broadcast station, frequencies 60000-66000 kc. (Channel No. 2), on an experimental basis; power 1 KW aural and visual, A3 and A5 emission (B4-PVB-50).

W9XY—Zenith Radio Corp., Chicago, Ill.—Granted modification of television station license Channel No. 1 (50000-56000 kc.), on an experimental basis, only, to be used for carrying on research; power 1 KW aural and visual (B4-MLRB-8).

Zenith Radio Corp., Portable-Mobile, area of Chicago.—Granted construction permit for a new special relay broadcast station; 156750, 158100, 159300, 161100 kc., 100 watts; to be used in connection with applicant's high frequency broadcast station W9XER in Chicago (B4-PRE-358).

WHUB—WHUB, Inc., Cookeville, Tenn.—Granted license to cover construction permit and using new station to operate on 1310 kc., 250 watts, unlimited time (B3-L-1204). Also granted authority to determine operating power by direct measurement of antenna input (B3-Z-452).

WOCB—Cape Cod Broadcasting Co., near Hyannis, Mass.—Granted modification of construction permit as modified, which authorized a new station to operate on 1310 kc., 250 watts, unlimited time; extending completion date from August 1 to October 1, 1940 (B1-MP-1032).

KSTP—National Battery Broadcasting Co., St. Paul, Minn.—Granted license to cover construction permit (B4-P-2744) to move auxiliary transmitter to St. Paul, and use directional antenna as authorized, with auxiliary transmitter (B4-L-1114).

August 16, 1940 — 4507
KGKB—East Texas Broadcasting Co., Typer, Texas.—Granted construction permit for new relay broadcast station at 1622, 2058, 2150 and 2750 kc., 40 watts; to be used in connection with applicant's standard broadcast station WKBH. (B3-PRY-219).

KGEI—Electric Company, San Francisco, Calif.—Granted construction permit to make changes in equipment and increase power of international broadcast station from 20 kw to 50 kw. (B1-PB-25).

WRCA—National Broadcasting Co., Inc., Bound Brook, N. J.—Granted construction permit for international broadcast station to use frequencies 1520 kc., 280 watts, unlimited time. (B3-Z-467).

WLWO—The Crosley Corp., Cincinnati, Ohio.—Granted special experimental authorization to operate a 1 kw transmitter on the frequency 6060 kc., for identification only, sharing with WLWO. (B2-SAIB-1).

WGSA—General Electric Co., Schenectady, N. Y.—Granted modification of international broadcast station license to add frequencies 6140 and 21500 kc., to present assignment of 9550, 15330 and 21500 kc. (B1-MLIB-36).

The First Baptist Church, Pontiac, Mich.—Granted extension of authority to transmit religious programs to Station CKLW, Windsor, Toronto, Canada, through the facilities of the Mich. Bell Telephone Co., for the period August 13, 1940, to August 13, 1941.

KGEC—Elmer G. Beehler, Sterling, Colo.—Denied special temporary authority to operate from 10:30 to 11:30 a.m., MST, on August 6, 9, 13, 16 and 20, in order to broadcast "Homemakers Program" only. (B5-S-120).

WBRW—McDowell Service Co., Welch, W. Va.—Granted modification of construction permit which authorized construction of a new station to operate on 1310 kc., 250 watts, unlimited time, for approval of transmitter and studio sites, antenna, and change in type of transmitter. (B2-MP-1002).

KWBG—The Nation's Center Broadcasting Co., Inc., Hutchinson, Kans.—Granted modification of construction permit as modified, which authorized increase in power, changes in power and changes in equipment and antenna system and move of transmitter for extension of completion date from August 20 to December 20, 1940. (B4-MF-1029).

WRVA—Larus & Brother Co., Inc., Richmond, Va.—Granted license authorizing use of old transmitter as an auxiliary for emergency use only, with power of 5 kw, employing directional antenna both day and night, and move of transmitter. (B2-L-1203).

WKJ—Bamberger Broadcasting Service, Inc.—Granted construction permit to move transmitter of high frequency broadcast station from 1450 Broadway, to 444 Madison Ave., New York City. (B1-PH-183).

W2XUP—Bamberger Broadcasting Service, Inc.—Granted construction permit to move transmitter of high frequency broadcast station from 1450 Broadway, to 444 Madison Ave., New York City. (B1-PFB-19).

Greenville Broadcasting Co., Greenville, S. C.—Denied as in case of default, the application for a new broadcast station to operate on 1500 kc., 250 watts, unlimited time. (B3-P-3907).

W3XE—Phileco Radio and Television Corp., Philadelphia, Pa.—Granted modification of television broadcast station license to use frequencies 66600-72900 kc. (Channel No. 3), on an experimental basis only; power 1 kw visual and aural. (B2-MLVB-9).

Helen L. Walton & Walter Bellatti, Jacksonville, Ill.—Granted petition for order to take depositions in re application for a new station to operate on 1150 kc., 250 watts, daytime only.

WBHP—Wilton Harvey Pollard, Huntsville, Ala.—Granted petition for leave to intervene in the hearing on the application of The Huntsville Times Co., Inc., for a new station to operate on 1300 kc., 250 watts, unlimited time—the facilities of WBHP.

Broadcasting Corp. of America, Riverside, Cal.—Petition to intervene in the hearing on application of KUJ to change frequency from 1370 to 1390 kc., and increase power from 100 watts to 1 kw, was withdrawn at request of petitioner.

WHAM—Stromberg-Carlson Tel. Mfg. Co., Rochester, N. Y.—Denied petition to intervene and enlarge issues in re application of Helen L. Walton and Walter Bellatti, for a new station at Jacksonville, Ill., and the application of Stephenson, Edge and Korsmeyer, for a new station at the same location to use 1150 kc., 250 watts, daytime only. "Issues to be enlarged later on Commission's own motion." Stephenson, Edge & Korsmeyer, Jacksonville, Ill.—Granted petition for order to take depositions in re their application for a new station at Jacksonville, Ill. Helen L. Walton & Walter Bellatti, Jacksonville, Ill.—Granted supplemental petition for order to take depositions in re application for new station.

George F. Meyer, Medford, Wisc.—Granted petition to continue hearing now scheduled for August 19, for a period of 30 days, in re application for new station to operate on 1500 kc., 100 watts, unlimited time.

WNB—National Broadcasting Co., Inc., New York City.—Granted denial of special experimental authorization to change frequency from 11820 to 11890 kc., subject to condition that no interference is caused to any other international broadcast station having priority of registration on the same or adjacent frequencies. (B1-MSAIB-1).

WGEA—General Electric Co., Schenectady, N. Y.—Granted modification of license to increase power, changes in equipment and antenna, and change in type of transmitter (B2-MP-1002).

KOTN—Universal Broadcasting Corp., Pine Bluff, Ark.—Granted license to cover construction permit (B3-P-2673), authorizing changes in transmitting equipment and increase in power from 100 to 250 watts, on 1300 kc. (B3-L-1207).

WTHT—The Hartford Times, Inc., Hartford, Conn.—Granted authority to determine operating power by direct measurement of antenna input. (B4-Z-458).

WTAX—WTAX, Inc., Springfield, Ill.—Granted authority to determine operating power by direct measurement of antenna input. (B4-Z-458).

WEIX—Memphis Commercial Appeal Co., Portable-Mobile.—Granted construction permit to increase power in relay broadcast station from 100 watts to 22 watts, and install new equipment (B3-PRE-352).

WFMD—The Monocacy Broadcasting Co., Frederick, Md.—Granted special temporary authority to operate from 8 to 9 p.m., EST, on August 13th in order to broadcast official opening of the 43rd Annual Fair of the Carroll County Agricultural Fair Association. (B1-S-675).

WELL—Enquirer News Company, Battle Creek, Mich.—Granted assignment of construction permit (B2-P-2669), covering increase in power from 100 to 250 watts, installation of new transmitter and changes in equipment and antenna, to Federated Publications, Inc. (B2-AP-32).

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Granted license to cover construction permit for installation of new transmitter and increase in power from 100 watts to 250 watts; 1210 kc.; shares WGRB and WBRB. (B1-L-1208).

WFPG—Neptune Broadcasting Corp., Atlantic City, N. J.—Granted license to cover construction permit for new broadcast station (B1-L-1201). Also granted authority to determine operating power by direct measurement of antenna input. (B1-Z-451).

WGOV—E. D. Rivers, Valdosta, Ga.—Granted license to cover construction permit as modified for new broadcast station; frequency 1420 kc.; power 100 watts, 250 watts LS; unlimited time (B3-L-1205). Also granted authority to determine operating power by direct measurement of antenna input (B3-Z-453).

WSB—Atlanta Journal Co., Atlanta, Ga.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-457).

4508—August 16, 1940.
APPLICATIONS FILED AT FCC

560 Kilocycles

WIS—The Liberty Life Insurance Co., Columbia, S. C.—Construction permit to make changes in directional antenna system and increase power from 1 KW day to 5 KW day and night, employing directional antennas at night, and modified for renewal of license.

Herald Publishing Co., Albany, Ga.—Denied petition for stay of issuance of construction permits to Station KGBX and Station WFBM to increase their power to 5 KW day and night, and night, employing directional antennas at night, and denied petition for rehearing or reconsideration of the partial grant of the application of Herald Publishing Co. for a new broadcast station issued by Commission on June 25, 1940.

610 Kilocycles

WIP—Pennsylvania Broadcasting Co., Philadelphia, Pa.—Authority to determine operating power by direct measurement of antenna power.

WIP—Pennsylvania Broadcasting Co., Philadelphia, Pa.—License to cover construction permit (B2-P-1927) as modified, for new transmitter, directional antenna day and night use, and increase in power, also move of transmitter.

630 Kilocycles

WMAI—National Broadcasting Co., Inc., Washington, D. C.—Modification of construction permit which authorized construction of new broadcast station, for approval of vertical antenna and approval of transmitter location.

KBG—Don Lee Broadcasting System, San Diego, Calif.—Granted construction permit to make changes in transmitting equipment; frequency 1350 kc.; 1 KW power, unlimited time.

KGB—Don Lee Broadcasting System, San Diego, Calif.—Granted construction permit to make changes in transmitting equipment; frequency 1350 kc.; 1 KW power, unlimited time.

KGB—Don Lee Broadcasting System, San Diego, Calif.—Modification of construction permit which authorized construction of new broadcast station, for approval of vertical antenna and transmitter location.

KBG—Don Lee Broadcasting System, San Diego, Calif.—Modification of construction permit which authorized construction of new broadcast station, for approval of vertical antenna and transmitter location.

WIP—Pennsylvania Broadcasting Co., Philadelphia, Pa.—License to cover construction permit (B2-L-1200) as modified, for new transmitter, directional antenna day and night use, and increase in power, also move of transmitter.

WMAI—National Broadcasting Co., Inc., Washington, D. C.—Modification of construction permit which authorized construction of new broadcast station, for approval of vertical antenna and approval of transmitter location.

690 Kilocycles

KGGF—Hugh J. Powell, Coffeyville, Kans.—Construction permit to increase power from 1 to 5 KW; install new transmitter and directional antenna for night use; move transmitter from S. Coffeyville to north of Coffeyville. Request Class III-A station (1010 kc.). Amended to request 960 kc. and Class II if and when North American Regional Agreement is effective.

740 Kilocycles

WSD—Atlanta Journal Co., Atlanta, Ga.—Authority to determine operating power by direct measurement of antenna power.
1040 Kilocycles

KYOS—Meredith Broadcasting Co., Merced, Calif.—Construction permit to install new transmitter; make changes in vertical antenna; change frequency, power and hours from 1040 kc., 250 watts, daytime, to 1390 kc., 500 watts night, 1 KW day, unlimited time (contingent on KOY going to new frequency BS-ML-525). Amended to change frequency from 1390 to 1340 kc.

1200 Kilocycles

KFXD—Frank E. Hurt, Nampa, Idaho.—Construction permit to change frequency from 1293 to 990 kc.; increase power from 250 watts to 1 KW; equipment changes; move transmitter; install new antenna; request Class II station (1290 kc.). Amended to specify transmitter site as to be determined.

WKOK—Sunbury Broadcasting Corp., Sunbury, Pa.—License to cover construction permit (B2-P-2561) for changes in equipment and increase in power.

WTTH—The Hartford Times, Inc., Hartford, Conn.—Authority to determine operating power by direct measurement of antenna power.

NEW—Evansville on the Air, Inc., Evansville, Ind.—Construction permit for a new high frequency broadcast station to be operated on 43700 kc.; coverage 8,330 square miles.

NEW—Alexander Broadcasting Co., Inc., Alexandria, La.—Construction permit for a new high frequency broadcast station to be operated on 43300 kc.; coverage 3,025 square miles.

NEW—James F. Hopkins, Inc., Detroit, Mich.—Construction permit for a new high frequency broadcast station to be operated on 46599 kc.; coverage 3,050 square miles. Amended: Section 12(e).
FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Altman Neckwear Corporation, 333 Fifth Ave., New York, is charged in a complaint with the dissemination of misleading representations in the sale of neckties.

One of the respondent's necktie styles is allegedly described as made of "Cherokee Indian Homespun Wool" and bears the likeness of an Indian, when in truth it is not woven or manufactured by Cherokee Indians or any other Indians. Another style, the complaint charges, is described by the respondent as "Dup-Silk-All-O Lined Throughout," when actually the material consists of a mixture of silk and rayon, the rayon predomi-nating, the lining being rayon and the interlining cotton. (4226)

Baltimore Macaroni Company—See King Foods Company.

Baltimore Sales Service Co.—See King Foods Company.

Bigelow-Sanford Carpet Company, Inc.—Two New York companies are charged in complaints with misrepresentations in the sale of rugs. The respondents are Sol, Raphael, Inc., an importer and distributor, of 333 Seventh Ave., and Bigelow-Sanford Carpet Company, Inc., 140 Madison Ave., which also has plants at Thompsonville, Conn., and Amsterdam, N. Y.

It is alleged that Sol, Raphael, Inc., in the sale of certain of its rugs, designates them by names such as "Khandah", "Aristan", "Karachi", "Numbah", and others indicating Oriental origin. The respondent states, however, that these rugs, although simulating Oriental or Chinese Oriental rugs so closely as to be indistinguishable therefrom by many buyers, do not possess all the characteristics of true Oriental or Chinese Oriental rugs. They are neither made by hand nor in the distinctive manner of the true Oriental or Chinese Oriental rug, the complaint continues, but are woven on power looms, in French and Belgian factories and from cotton or jute or both combined.

Bigelow-Sanford Carpet Company, Inc., allegedly sells rugs closely resembling true Orientals under names indicating Oriental origins such as "Patent," "Armenian," "Kashmir," etc., when in fact they do not have all the characteristics of true Oriental rugs and are woven on power looms in the United States. The respondent company also allegedly advertises certain of its rugs as being "true copies of Sarouks, Kirmans and Persians," and as "amazing reproductions from the original Orientals," when in fact, according to the complaint, they are not exact copies or reproductions of true Orientals in structure or method of manufacture, but merely simulate Orientals in appearance. (4205-4207)

Harry M. Bitterman, Inc.—Charging violation of the brokerage paragraph of the Robinson-Patman Act, a complaint has been issued against Harry M. Bitterman, Inc., 151 West 40th St., New York, which acts as intermediary for certain buyers in their purchases of fur garments from the sellers.

As named as respondents are Harry M. Bitterman, Herman Bitterman and Irving Dash, officers of Harry M. Bitterman, Inc., and four selling concerns which the Commission considers typical of a large number of fur garment manufacturers engaged in selling garments to retail buyers by means of similar practices. The four selling concerns named as respondents are: I. and A. Berger, Inc., 150 30th St., B. Ordrov & Sons, Inc., 150 West 30th St., Arthur Petras, Peter Petras and George Alveras, trading as Petras, Petras & Co., 249 West 29th St., and Morris Minsk, 352 Seventh Ave., all of New York.

According to the complaint, Harry M. Bitterman, until 1938, received, and since that time Bitterman, Inc., has received and now receives orders from retail buyer customers in several States to purchase fur garments, such orders being executed with the four respondent selling companies and other sellers. Estimated usual purchases so negotiated by Harry M. Bitterman or by Bitterman, Inc., the complaint continues, amounted to $200,000 in each of the years 1937, 1938 and 1939.

The seller respondents, it is alleged, have paid the respondent Bitterman, and have paid and now pay to Bitterman, Inc., brokerage fees and commissions amounting customarily to 5 per cent of the price of goods sold to the respondents to the retail buyers, and the respondents Bitterman and Bitterman, Inc., while acting as intermediary for the buyers, allegedly accepted, and Bitterman, Inc., now accepts, such brokerage fees and commissions, in violation of section 2 (c) of the Clayton Act as amended by the Robinson-Patman Act. (42291)

Brahant Needle Company, Inc.—Concealing the foreign origin of needles is charged in a complaint issued against The Brahant Needle Company, Inc., 47 Great Jones St., New York.

According to the complaint, the respondent imports needles in pads or flaps from Germany, with the name "Germany" stamped on the back of each pad or flap. In marketing certain of its products, it is charged in the complaint, the respondent combines various pads or flaps of needles into booklets, sometimes in combination with other articles such as a manner as to entirely conceal the printing which indicates the foreign origin of such needles.

Pointing out that a substantial number of purchasers prefer products manufactured in the United States or England to articles made in Germany or other foreign countries, the complaint alleges that the respondent further misrepresents that its needles are of domestic or English origin and that it owns, operates or controls factories located in England and in the United States, wherein the needles are manufactured. In truth, it is charged, none of these needles are manufactured in the United States or England, and the respondent has not owned, operated or controlled any factory in which such needles sold by it were manufactured either in England, the United States or elsewhere. It is further charged that all of the needles are imported by the respondent from foreign countries other than England for the purpose of resell. (4212)

Cohen Drug Company—Louis, Sol and Maryvyn Cohen, trading as Cohen's Cut Rate Drug Store, as Cohen Drug Co., and as Cohen's, 905 Virginia St., East, Charleston, W. Va., allegedly misrepresented that their preparation, designated as "Soluble Gela-tine Capsules No. 5. Apol and Ergotin Compound," and advertised and sold as "Lady Lydia Capsules," is a competent, safe and effective treatment for delayed menstruation. In truth, the complaint continues, the respondents' preparation is not an effective treatment for delayed menstruation, and is not safe as it contains a drug that is green, ergotin, or may give rise to aloin, in quantities sufficient to cause serious and irreparable injury to health if used under the conditions prescribed in the advertisement or under such conditions as are customary or usual. Such use of the preparation, it is further alleged, may result in a toxic condition extending even to abortion; abortion, in turn, resulting in uterine infection with extension to other pelvic and abdominal structures, and even the blood stream, causing the condition known as blood poisoning or septicemia. The complaint charges that the respondents' advertisements are also false in that they fail to reveal that the use of their preparation under the prescribed conditions or under such conditions as are customary or usual may result in serious and irreparable injury to health. (4202)
Deniston Company, 4856 South Western Ave., Chicago, is charged in a complaint with the dissemination of misleading representations in the sale of lead head roofing nails designated as "drive screw" and "ring shank." The respondent allegedly misleadingly advertises that the holding power of its "drive screw" and "ring shank" nails is approximately four times that of the straight shank nail; that a nail provided with the "drive screw" shank will afford greater holding power than any other type of lead head nail and that both the "drive screw" and "ring shank" nails possess a substantial superiority in holding power over all competitive products. In truth, the complaint charges, the comparative superiority and holding power claimed by the respondent for both types of nails is greatly in excess of any superiority that does exist between either of such nails and straight shank nails and other competitive nails. (4219)

Isaacs Diekler, 370 Seventh Ave., New York, buying agent in the purchase of fur garments in behalf of approximately 17 fur garment dealers located in several States, is charged, in a complaint with violation of the brokerage paragraph of the Robinson-Patman Act. The complaint alleges that the respondent receives from various retail fur stores, for whom he acts as agent, requests to purchase fur garments. He contacts various fur garment manufacturers and places the orders at the most advantageous prices from the standpoint of the buyer. The manufacturers are located in New York, the respondent acting on behalf of buyers in San Francisco, Baltimore, Washington, and other cities.

In the course of the purchasing transactions by the respondent, the complaint continues, sellers have, since June 19, 1936, paid to the respondent commissions based on a certain percentage of the sales price agreed upon, and the respondent has received and accepted such commissions on purchases of merchandise by retail buyers in whose behalf he has been and is in fact acting. These acts and practices, the complaint declares, are in violation of subsection (c) of Section 2 of the Clayton Act as amended by the Robinson-Patman Act. (4231)

Do-Ray Lamp Company, Inc., 1458 South Michigan Ave., Chicago, is charged in a complaint with the dissemination of misleading representations in the sale of a fog lamp known as "Bright Ray Crest Driving Lamp." According to the complaint, the respondent misleadingly represents that its fog lamp, when attached to an automobile or truck, develops 40 thousand candle power, which produces sufficient illumination to have "revealing power" at 1,500 feet ahead of objects on the road at that distance under any and all conditions. The respondent also allegedly misrepresents that the beam of light produced by its lamp provides sufficient illumination to penetrate fog and furnish adequate visibility under fog, rain or snow conditions when used on an automobile or truck operated on the highway. (4218)

Ely & Walker Dry Goods Company, 1320 Washington Ave., St. Louis, Mo., is charged in a complaint with the dissemination of misleading representations in the sale of men's robes. According to the complaint, the respondent represents by means of advertisements featuring the words "Camel Suede Robe," and through the use of labels or bands marked "Camel Suede" and bearing illustrations of a camel, that its men's robes are made of camel's hair or camel's wool, or have a predominant composition of camel's hair or camel's wool. In truth, the complaint charges, such robes are not composed in any part of the hair of the camel, but are made wholly of rayon. (4216)

A. M. Florman & Bro.—Acceptance of commissions in violation of the brokerage paragraph of the Robinson-Patman Act, is charged in a complaint issued against a firm of New York commission residents buyers of millinery. The respondents are Arthur M. Florman and Leo Florman, trading as A. M. Florman & Bro., 134 West 32nd St., New York.

It is alleged that the respondents act as purchasing agents for approximately 40 retail millinery and department stores located in various States, and place their clients' orders with 25 or more New York manufacturers of millinery. The respondents allegedly receive and accept from the seller manufacturers commissions which represent a certain percentage of the sales prices agreed upon between the seller manufacturers and the respondents on purchases of merchandise by their 40 retail millinery and retail department store principals who are the actual purchasers in such transactions. (4227)

France-Belgian Importing Co., Inc., 41 East 28th St., New York, is charged in a complaint with the dissemination of misleading representations in the sale of rugs. It is charged in the complaint that the respondent describes certain of its rugs by means of Oriental names such as "Kazakh," "Tebriz," "Rajah" and "Garnastan" and attaches to such products labels with depictions of an Oriental scene and of the familiar Turkish star and crescent, thus creating the belief that they are true hand-made Oriental rugs. The respondent further allegedly represents that its rugs are in all respects, including material, reproductions and copies of true Oriental rugs. Actually, the complaint continues, the respondent's rugs are woven in power looms in factories in Belgium and are not exact copies or reproductions of true Oriental rugs in structure, material or method of manufacture, but merely simulate them in appearance. (4225)

Joseph Gluck & Company, Inc., 305 Seventh Ave., New York, allegedly designates certain of its rugs which closely resemble true Oriental rugs in appearance, by names which are the same as or similar to the names of true Oriental rugs, and attaches labels depicting Oriental scenes to such products, thus tending to induce the erroneous belief that they are made in the Orient by hand. In truth, the complaint charges, the respondent's rugs are woven on power looms at factories in France. (4221)

Grand Rapids Furniture Show Rooms—See Ziblatt Furniture Co., Inc.

Hoskier Candy Sales Company—Two candy dealers are charged in complaints with the use of lottery devices in the sale of merchandise to ultimate consumers. The respondent, H. S. Talsnick, trading as Hoskier Candy Sales Company, 426 South Meridian St., Indianapolis, Ind., and Pelican State Candy Company and its officers Max J. Pinski, formerly trading as Pelican State Candy Company and Royal Chocolates, 1501 North Rampart St., New Orleans, La., are charged in complaints with the dissemination of misleading representations in the sale of candy so packed and assembled as to involve the use of games of chance, gift enterprises or lottery schemes when sold and distributed to ultimate consumers. (4209-4210)

King Foods Company—Violation of the brokerage paragraph of the Robinson-Patman Act is alleged in a complaint issued against H. Stanley Jones, H. Edwin Jones and Maurice C. Berkeley, of 206 South Broadway St., Baltimore, who are co-partners trading under the firm names of Howard E. Jones & Co., King Foods Company, Baltimore Sales Service Company, Baltimore Macaroni Company, and Ocono Company. The complaint points out that the co-partners trading principally under the name of Howard E. Jones & Co., have acted as brokers in the course and conduct of their business of buying and selling that class of products for their own account, principally under the name King Foods Company but also under the names and styles of Howard E. Jones & Co., Baltimore Sales Service Company, Baltimore Macaroni Company, and Ocono Company.

It is alleged that in the course and conduct of their business of buying food products for their own account the respondents, doing business under their respective firm names, have been and are now receiving and accepting from numerous sellers brokerage fees, or allowances or discounts in lieu thereof, and that the respective respondents have made for their own account, in violation of section 2(c) of the Clayton Act, as amended by the Robinson-Patman Act. (4215)

D. J. Mahler Company, Inc., 3124 Pauwket Ave., East Providence, R. I., is charged in a complaint with the dissemination of misleading representations in the sale of a device recommended for use in the electrolytic removal of superfluous hair from the human body.
According to the complaint, the respondent misleadingly represents that its "Mahler Electrolysis Apparatus" or the "Mahler Method" is an efficient, effective and safe device and method for the permanent removal of superfluous hair from the human body and that it is a device invented and made by a layman with ordinary care and skill. In truth, the complaint continues, use of the device as recommended by the respondent may result in local infections, erysipelas, skin burns, scars, metallic tattoo marks, pitting and permanent disfigurement. It is further charged that in certain cases where infection occurs as a result of the use of respondent's device, there may follow serious injury to health.

The respondent's advertisements are also alleged to be misleading in that they fail to reveal that use of its device under conditions prescribed in such advertisements or under customary or usual conditions may result in serious physical injury, permanent disfigurement and in serious irreparable danger to health.

Upon petition of the Federal Trade Commission, the respondent was recently restrained by a United States District Court from further dissemination of certain false advertisements with respect to this preparation pending issuance of a complaint and final disposition of the case under the Federal Trade Commission Act. (4228)

Manshine Mills—See Siegel-Kahn Company, Inc.

Memorial Granite Company, Inc., 159 Hancock St., Quincy, Mass., is charged in a complaint with the dissemination of misleading representations in the sale of tombstones and monuments.

According to the complaint, the respondent misleadingly advertises that its monuments and tombstones were produced or quarried in the Barre, Vt., district, the Wasterly, R. I., district, or manufactured from imported Red Granite; that the price at which such products are offered for sale saves 30 per cent to 50 per cent more to the purchasers than if they bought similar products sold by competitors; that its indicated price includes such items or expenses as the cost of lettering, delivery and erection of such products; that the tombstones and monuments are polished on all sides, including the front, back, top, sides and base, and that its place of business is of the size pictured in its advertisements.

In truth, the complaint continues, the respondent's tombstones and monuments are manufactured from Rygate, Vt., granite which is a cheaper grade than that represented; its products are not offered for sale for less than the customary and usual price, and additional charges are required for lettering, delivery, erection, finishing and polishing of its products. It is also charged that the pictorial representation of the respondent's place of business is a composite of two different views of the plant, formed by combining two or more pictures in such a manner as to convey an untrue impression to purchasers with respect to the size of the business conducted by the respondent. (4214)

Michigan Merchandising Company—Charles D. Brown, trading as Michigan Merchandising Company, 31 Allison St., Pontiac, Mich., is charged in a complaint with the dissemination of misleading representations in the sale of a small electric water heater, called "Wonder Electric Water Heater".

According to the complaint, the business as conducted by the respondent is a scheme to extract money from persons in need of employment by misrepresenting to them, through "Help Wanted" sections of newspapers, the character of work to be performed, the purpose of an initial payment of $100 by the applicant for work, the terms of the employment, the salary to be paid, the price for the heater, its conditions of sale, and its place of business, to induce them to come to the business and enter into an employment contract. The business is composite of two different views of the plant, formed by combining two or more pictures in such a manner as to convey an untrue impression to purchasers with respect to the size of the business conducted by the respondent.

Among such alleged misrepresentations made by the respondent are that prospective distributors who answer his "Helo Wanted" ads, are only to make deliveries of and collections for his heaters; that the respondent will establish the required number of dealers to handle his heaters on a consignment basis without any sales effort on the part of the distributor; that the initial payment of $100 required of each distributor is in the nature of a temporary bond and will be refunded as soon as the routine matter of securing and approving the list of dealers has been accomplished by the respondent that the initial payment of $100 will pay his weekly salary of $25, commencing on the day the contract is signed, plus a commission of 50 cents per heater for every heater over two sold each week by each established dealer in the distributor's territory.

In truth, the complaint continues, no salary or commission has ever been paid by respondent to any distributor; no quota of dealers has ever been established which met the number necessary to be established to entitle the distributor to a refund, salary or commission; the initial payment of $100 was not in the nature of a temporary bond, but is applied by the respondent as payment for forty-eight of the electric water heaters, and the distributor, under the respondent's plan, becomes a mere purchaser of the heaters without any adequate outlets for their disposal or established dealers to handle them. (4207)

Oconco Company—See King Foods Company.

Oxol Laboratories—W. S. McClymonds and G. L. McClymonds, trading as Oxol Laboratories, 1042-48 Santa Fe Drive, Denver, Colo., are charged in a complaint with the dissemination of misleading representations in the sale of a drug preparation known as "Trox Tablets".

According to the complaint, the respondents represent that their preparation is a cure, remedy and effective treatment for various diseases and ailments of the kidneys and of the prostate gland, when in truth it has no value with respect to relieving any such conditions. (4208)

Pelican State Candy Company—See Hoosier Candy Sales Co.

Queen City Candy Company, Inc., 531 Bruns Ave., Charlotte, N. C., is charged in a complaint with the use of lottery methods in the sale of candy to ultimate consumers.

According to the complaint, the respondent sells certain assortments of candy so packed and assembled as to involve the use of a game of chance, gift enterprise or lottery scheme when such candy is sold and distributed to consumers. One of such assortments, the complaint continues, consists of a number of bars of candy together with a device commonly called a push card. (4220)

Sol. Raphael, Inc.—See Bierelow-Sanford Carpet Company, Inc.

Reed's Cut-Rate Drug Store—Lenard and Sarah Gottlieb, trading as Reed's Cut-Rate Store and as Fountain Cut-Rate Stores, 127 South Fourth St., Clarksburg, W. Va., are charged in a complaint with the dissemination of misleading representations in the sale of a medicinal preparation.

According to the complaint, the respondents misleadingly represent that their preparation designated as "Prescription Female Capsules," and as "Lady Lydia Female Capsules," also designated as "Prescription Female Capsules—Double Strength," "Prescription Female Capsules—Triple Strength," and as "Lady Lydia Female Capsules—Double Strength" and "Lady Lydia Female Capsules—Triple Strength," is a competent and efficient treatment for delayed menstruation and that it is safe and harmless. In truth, the complaint charges, the respondents' preparation is not an efficient treatment for delayed menstruation, and is not safe in that it contains the drugs apol, green, ergotin, oil of savin and aloin, in quantities sufficient to cause serious and irreparable injury to health if used under the conditions described in the advertisements or under such conditions as are customary or usual.

The respondents' advertisements are also false, the complaint continues, in that they fail to reveal that use of their preparation under the prescribed or customary conditions, may result in injury to health.

Upon petition of the Federal Trade Commission, the respondents were recently restrained by a United States District Court from further advertisement of this preparation pending issuance of complaint and final disposition of the case under the Federal Trade Commission Act. (4211)

Schmidt Brewing Company, 1995 Wilkins St., Detroit, Mich., is charged in a complaint with the dissemination of misleading representations in the sale of beer.

According to the complaint, the respondent advertises that its beer contains no fattening substances, and such advertisements bear the statement "No Sugar," "No Glucose," "No Fattening Syrups Added" and "Schmidt's affords peace-of-mind to weight
Seboreen Laboratories, Inc.—A group of Illinois dealers in medicinal and cosmetic preparations is charged in a complaint with the dissemination of misleading representations in the sale of its products in preference to that of its competitors, the complaint grants the respondent 20 days for filing answer to the alleged violation of the Federal Trade Commission Act. (4225)

Seboreen Laboratories, Inc.—See Seigle-Kahn Company, Inc.

Stephen Rug Mills—See Siegel-Kahn Company, Inc.

Diamond Candy Company—Curtis C. Walker, trading as Diamond Candy Company, 219 North Graham St., Charlotte, N. C., is charged in a complaint with the use of lottery methods in connection with the sale of candy. According to the complaint, the respondent sells certain assortment of candy so packed and assembled as to involve the use of a game of chance, gift enterprise or lottery scheme when such candy is sold and distributed to consumers. One of such assortment, the complaint continues, consists of a number of bars of candy together with a device commonly called a push card. (4224)

Siegel-Kahn Company, Inc., trading as Manshire Mills and as Snugintucks Mills, 93 Worth St., New York, is charged in a complaint with the dissemination of misleading representations in the sale of women’s undergarments. According to the complaint, the respondent represents that certain of its products designated “Snugintucks” contain 30 per cent and 15 per cent wool, respectively, when in truth neither of such products contains the specified percentage of wool, the actual fiber content being 88 per cent cotton, 9 per cent rayon and 3 per cent wool. The respondent further is alleged misleadingly to represent that its products designated “Dr. Ames Treat Yourself Woolywarms Multi-Ply Crotch, 30 per cent Pure Wool,” and “Dr. Ames Treat Yourself Woolywarms Multi-Ply Crotch, 15 per cent Pure Wool,” contains 30 per cent and 15 per cent wool, respectively, when in truth the product represented as containing 30 per cent wool is composed of 85 per cent cotton and only 15 per cent wool, while the product represented as containing 15 per cent wool contains 90 per cent cotton and only 10 per cent wool.

Through the use of the word “Woolywarms” in designating “Dr. Ames Treat Yourself Woolywarms Multi-Ply Crotch, Fort Combed,” unaccompanied by any specific designation of the fiber content, the respondent allegedly represents that such product contains a substantial percentage of wool, when in fact it contains no wool whatever, but is composed entirely of cotton. It is further alleged in the complaint that the respondent sells undergarments composed in part of rayon, without disclosing the rayon content of such products.

The complaint continues that through use of the word “Mills” in its trade names Manshire Mills and Snugintucks Mills, the respondent represents that it owns or operates a mill where its products are manufactured and that it is the manufacturer of such products, when in truth it purchases all of its products from other parties.

Through use of the term “Dr. Ames,” the respondent also allegedly misrepresents that its products are designed, recommended or approved by a physician. (4204)

Sun Cut-Rate Drug Company—Howard Deckelbaum, trading as Sun Cut Rate Store, Huntington, W. Va., is charged in a complaint with the dissemination of misleading representations in the sale of a medicinal preparation. According to the complaint, the respondent misleadingly represents that his preparation advertised as “Harmless Prescription Capsules” and as “Special Prescription Capsules” otherwise designated as “Prescription Female Capsules—Double Strength” and as “Prescription Female Capsules—Triple Strength,” is a competent and efficient treatment for delayed menstruation and that it is safe and harmless. In truth, the complaint charges, the respondent’s preparation is not an efficient treatment for delayed menstruation, and is not safe in that it contains the drugs apion green, ergotin, oil of savin and aloin, in quantities sufficient to cause serious and irreparable injury to health if used under the conditions described in the advertisements or under such conditions as are customary or usual.

The respondent’s advertisements are also false, the complaint continues, in that they fail to reveal that such use of his preparation under the prescribed or customary conditions may result in injury to health. Upon petition of the Federal Trade Commission, the respondent was recently restrained by a United States District Court from further advertisement of this preparation pending issuance of complaint and final disposition of the case under the Federal Trade Commission Act. (4213)

Wain’s Laboratory, Inc., 4687 Hollywood Boulevard, Hollywood, Calif., allegedly misrepresents that its preparation, “Wain’s Compound,” formerly designated as “AMA-GON,” is an effective and competent treatment for bronchial asthma and bronchial coughs; that its use gives immediate or prompt relief from the paroxysms of asthma, and that it is entirely safe and may be used without danger of ill effects upon the health of the user. In truth, the complaint continues, the respondent’s preparation has no therapeutic value in the treatment of such conditions in excess of the temporary relief commonly derived from the paroxysms of asthma and bronchial irritations. It is further charged in the complaint that “Wain’s Compound” is not in all cases safe as it contains potassium iodide in quantities sufficient to cause in some instances injury to health if taken under the prescribed conditions or under such conditions as are customary or usual. It is alleged that the respondent’s advertisements are also false in that they fail to reveal that use of its preparation under the conditions prescribed in its advertisements or under such conditions as are customary or usual, may result in injury to health. (4203)

Zisblatt Furniture Company, Inc., trading as Grand Rapids Furniture Show Rooms, and Morris, Meyer, Sam and Lillian Zisblatt, and A. Maccia, 4132 Park Ave., New York, are charged in a complaint with the dissemination of misleading representations in the sale of household furniture.

August 16, 1940—4515
According to the complaint, the respondent corporation misleadingly represents that furniture sold by it is manufactured in Grand Rapids, Mich.; that it owns, operates or controls a factory at Grand Rapids; that the furniture is sold direct from the factory to the purchasers without the addition of a middleman's profit; that the prices at which the furniture is sold are wholesale prices; that it does not ordinarily sell at retail, and that it occupies a large, seven-story building. In truth, the complaint charges, the respondent's sales are in fact resales, at retail, of furniture purchased from factories or from wholesalers; its place of business is not a factory, nor a retail store; the prices which it charges for its wares are higher than the usual, current wholesale prices, and the building which it occupies is not correctly represented on its business cards and stationery, but is in fact a run-down building of only three stories. (4206)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

**J. E. Bernard & Company**—Sales to dealers in foreign countries of reconditioned spark plugs not properly designated as such, are prohibited in an order issued against J. E. Bernard & Company, Inc., 27 Pearl St., New York.

Commission findings are that substantially all of the spark plugs sold by the respondent are used and discarded spark plugs which originally were manufactured and sold by the Champion Spark Plug Company and AC Spark Plug Company under the brand names "Champion" and "AC". The articles, the findings continue, were repaired and reconditioned by The Perfect Recondition Spark Plug Company, from whom the respondent purchases such products for resale to dealers in foreign countries without proper disclosure that they were used and defective articles and had been repaired and reconditioned.

The respondent was ordered, in connection with its sale of spark plugs to foreign countries, to cease selling or delivering to others for sale to the public, any spark plug which has been used and thereafter reconditioned in any manner unless the words "used", "second-hand" or "reconditioned", or some similar words, have been permanently stamped or fixed on each plug in a color in contrast to the surface to which it is applied and of a size and in such location as to be clearly legible to purchasers after the spark plugs shall have been installed, and unless there has been plainly printed or marked on containers a notice that they are used, second-hand or reconditioned. (3534)

**Consolidated Sign Letter Company, Inc.** 416 South Dearborn St., Chicago, has been ordered to discontinue certain misleading representations in the sale of metallic sign letters and numbers.

Under the order, the respondent is prohibited from representing, through the use of the terms "genuine gold leaf sign letters" or "genuine gold leaf," or any similar words, that sign letters or numbers composed of a combination of gold and silver leaf on a backing of lead and tinfoil are composed of gold, gold leaf, or genuine gold leaf.

The order further prohibits representations by the respondent that the gold leaf used in the manufacture of its products is 24 karat fine gold; that such leaf contains an amount of gold in excess of 90 per cent of its actual content, or that the leaf is made exclusively from gold and does not contain an alloy.

The respondent was also ordered to cease representing, through the use of the word "silver" in the trade name or in any other manner, that letters or numbers manufactured from a combination of lead and tinfoil contain, or are composed of, silver metal. (5359)

**Hardwood Charcoal Company**—Price-fixing agreements tending to eliminate competition in the hardwood charcoal industry and other practices deemed to be in restraint of trade, are prohibited under an order issued against producers of approximately 65 per cent of the Nation's output of that product which is used principally as a fuel in the pulp industry. Among the respondents are Hardwood Charcoal Company, Memphis, Tenn., and Manufacturers Charcoal Company, Bradford, Pa., which are exclusive sales agents for groups of charcoal producers, and Tennessee Eastman Corporation, Kingsport, Tenn., and Cliffs Dow Chemical Company, Marquette, Mich., hardwood charcoal producers.

Commission findings are that some or all of the respondents entered into various agreements having the effect of preventing price competition; that the Hardwood Charcoal Company and Manufacturers Charcoal Company, from 1932 to 1937, exchanged price and other information and in 1933 agreed to allot territories among themselves on a quota basis, the Hardwood company paying the Manufacturers company brokerage for handling the products of their respective groups, and that members of the Manufacturers' Charcoal Company group, from November, 1936 to January, 1937, purchased the entire output of Canadian charcoal entering the United States so as to prevent its competition with their products.

The Commission order directs that Hardwood Charcoal Company, Manufacturers Charcoal Company, Cliffs Dow Chemical Company, Tennessee Eastman Corporation, and their officers, directors and employees, directly or indirectly, or while the Hardwood and Manufacturers companies are acting on their own behalf or that of the members of their groups or other charcoal producers, are to cease and desist from fixing or maintaining, pursuant to agreement, understanding or combination, identical delivered prices at which hardwood charcoal is to be sold by them to distributors or dealers at any destination. The Manufacturers and Hardwood companies are directed, pursuant to agreement or understanding, to (1) ceasing all fixing or maintaining identical or uniform resale prices; (2) allocating territories for sale of products of the members of their respective groups; (3) limiting severally and reciprocally the respective quantities of hardwood charcoal which each sells to its respective customers; (4) refusing to solicit customers of each other; and (5) limiting the number of distributors or dealers to whom each shall sell, and (6) exchanging information as to delivered prices, sales policies and other matters for the purpose of effectuating agreements to fix identical or uniform delivered prices.

Hardwood Charcoal Company, while acting on behalf of itself or members of its group, and Tennessee Eastman Corporation, and their officers or representatives, are ordered to discontinue, pursuant to agreement or understanding, filling orders for hardwood charcoal for each other from dealers or distributors throughout the United States in bags or receptacles bearing the trade-mark or trade name of the seller without a statement on such containers that the contents thereof were packed for the seller.

The respondent producer members of the Manufacturers Charcoal Company group, are directed to cease, by means of contract, agreement or understanding, from constituting that company as their exclusive sales agent during any specific period and also from acting by any means or method to purchase the entire or a substantial proportion of Canadian hardwood charcoal shipped into the United States so as to eliminate competition therewith.

The Commission dismissed as to Tennessee Products Corporation, Forest Products Chemical Company, and Crossett Chemical Company, certain allegations in its amended complaint pertaining to an alleged understanding and agreement among those three companies to eliminate and suppress competition through formation of the Hardwood Charcoal Company, such dismissal being without prejudice to its right to issue a new complaint containing such allegations should future facts warrant that procedure in the public interest. (3670)

**Industrial Plants Corporation.** 90 West Broadway, New York, has been ordered to discontinue the dissemination of misleading representations in the sale of spliers.

Commission findings are that the respondent advertised that its "Nickel plated pliers are ground and polished all over, heavily nickel plated and buffed to a high lustre," when in truth such pliers are not nickel plated.

The order prohibits the respondent from representing that spliers or any other tools which are not plated with the metal nickel are nickel plated. (5835)

**Luxor, Ltd.** a manufacturer of toilet article containers, with its place of business at 1355 West Thirty-first St., Chicago, has been ordered to discontinue violations of the Robinson-Patman Act in the sale of certain of its products.

The respondent company, according to findings, furnished some of its most popular products in "junior" or ten cent size packaging to competing retailers at wholesale prices and refused to supply such packaging to competing purchasers such as retail druggists.
Commission findings are that the "junior" or ten cent size is preferred by many customers because it is easier to carry, aids in the retention of fragrance and freshness, and reduces waste; that this size of packaging facilitates the resale of products, and that retail druggists endeavoring to obtain the junior size could get only the larger or forty-nine cent size which could not be conveniently divided into smaller quantity units for resale.

The Commission order directs the respondent company to cease and desist from furnishing any of its commodities packaged in containers of a certain size and style unless all purchasers comply with the requirement of obtaining such packages. The order requires that all such articles are accorded the facility of packaging in containers of like size and style, on proportionally equal terms. (3736)

Sales Promoting Company—Charles Polk, trading as Sales Promoting Company, 160 Fifth Ave., New York, has been ordered to discontinue the use of lottery methods in the sale of watches, clocks, leather goods, electric lamps, quilts, blankets, waffle irons, radios, toilet sets and tourist sets.

The order prohibits the respondent from selling or distributing any merchandise so packed and assembled that sales to the general public are to be made by means of a lottery; supplying others with merchandise together with lottery devices which may be used in selling or distributing such merchandise to the general public by means of a lottery scheme; supplying others with lottery devices which may be used in selling such merchandise to the general public by means of a game of chance, or selling any merchandise by means of a game of chance, gift enterprise, or lottery scheme. (4175)

Seaboard Paint & Varnish Company—Samuel Swimmer, trading as Seaboard Paint and Varnish Company, 275 Russell St., Brooklyn, N. Y., has been ordered to discontinue certain misleading representations in the sale of reconditioned paint known as "Spray Booth Off Fall".

Commission findings are that the respondent misrepresented that the regular price of his paint is $2.65 per gallon and that it is being offered at a sacrifice price of $1.35 per gallon; that it was manufactured for use on surfaces exposed to the weather; that it is preferred by many customers because it is easier to carry, aids in promoting Company, 160 Fifth Ave., New York, has been ordered to discontinue certain misleading representations in the sale of a musical instrument designated "Tonette."

The respondents are found to have represented that pens ordinarily selling at prices ranging from 89 cents to $1 have a regular price per gallon of his paint is any sum in excess of the average earnings within like periods of time, of any amounts which the respondent also agrees to discontinue representations that prospective agents, salesmen or distributors can make earnings or profits, within any specified period of time, of any amounts which in excess of the average earnings within like periods of time made by a substantial number of its active, full-time agents or distributors in the ordinary and usual course of business and under normal conditions and circumstances. (02619)

Beutalure, Inc., 14 Ashley Place, Wilmington, Del., stipulates that it will cease advertising that "Beutalure Hair Tonic" (now designated "Beutalure Hair Lotion") will bring hair back to its original shade; contains no dye; relieves dandruff, unless the assertion is limited to its aid in the temporary removal of dandruff; checks or stops excessive falling hair; reveals the natural hidden beauty of the hair, or is a competent treatment for gray, dull, faded or streaked hair. The respondent also agrees to desist from describing its product as a tonic and will not use the word "tonic" as a part of the trade name for the product. (02609)

Chicago Musical Instrument Co., and its subsidiary The Tonette Company, both of 30 East Jackson Blvd., Chicago, entered into a stipulation in which they agree to discontinue certain representations in the sale of a musical instrument designated "Tonette."

The respondents agree to cease representing that anyone, though unable to read musical notes, and without regard to knowledge of music, musical training or aptitude for music, can in just a few minutes' time learn to play on the Tonette, song hits, classics or "old favorites." (02614)

Cliff Fabric Products, Inc., 300 West 19th St., New York, entered into a stipulation in which it agrees to discontinue certain representations in the sale of auto and marine fabric equipment, including life preserver cushions or vests.

Under the stipulation, the respondent agrees to cease advertising that its life vests have an individual total weight of 36 ounces or more, or that the weight of the filling used in the construction of such products is 24 ounces or more, when in fact, the actual total weight and the actual weight of the filling is less than that indicated. The respondent further stipulates that it will cease representing that its device has a designated total weight or is equipped with a filling of a designated weight, the effect of which will convey the belief to purchasers that it has a buoyancy commensurate with such designated weights, when in fact, the weights are less than that represented.

Cliff Fabric Products, Inc., also agrees to cease representing that the buoyancy of its life vests is due to the air in the filling, which is subject to the requirements of Section 5 of the Act of Congress approved June 9, 1910, for Motor Boats not Carrying Passengers for Hire, when in fact, such is not the case. (2895)

Curtiss Candy Company, 622 Diversey Parkway, Chicago, stipulates it will cease advertising that "Baby Ruth" candy will avoid fat. The respondent further agrees to cease representing that "Baby Ruth" candy will avoid fat; sustains body activity; reinforces body resistance to avoid ill health, or will snap one out of spring fever, unless it is clearly stated that it is intended to help overcome fatigue and temporarily increase energy when eaten between meals. The respondent also agrees to discontinue representing that it is necessary to eat dextrose to secure the energy building and sustaining foods, or that people who need energy need dextrose or "Baby Ruth" bars. (02608)

Eagle-Picher Lead Company and its subsidiary, Eagle-Picher Sales Company, Temple Bar Building, Cincinnati, Ohio, agree to cease advertising that all insulation using paper as a base, or

STIPULATIONS

During the week the Commission has entered into the following stipulations:

Akron Lamp & Mfg. Co., 600 South High St., Akron, Ohio, engaged in selling stoves using gasoline for fuel, designated "Diamond" in the resale of such articles are accorded the facility of the heater burns 96 per cent air, or that the liquid transforms ordinary air into heat, or that it burns air at all, or that it burns only 4
der per cent fuel; that the heat produced is a new kind of heat and is the kind that experts recommend; that the heat is almost like that from the sun itself or that it produces infra-red or ultraviolet rays, or the same penetrating or health-giving rays as are produced by the sun. The respondent also agrees to desist from representing that the classifier will relieve lumbago and all ailments; is a competent treatment for colds, flu or pneumonia, or that it has healing qualities or is valuable for checking diseases or for the promotion of health, and that the method of heating is endorsed by physicians or leading health authorities. The respondent also agrees to discontinue representations that prospective agents, salesmen or distributors can make earnings or profits, within any specified period of time, of any amounts which in excess of the average earnings within like periods of time made by a substantial number of its active, full-time agents or distributors in the ordinary and usual course of business and under normal conditions and circumstances. (02619)

Beutalure, Inc., 14 Ashley Place, Wilmington, Del., stipulates that it will cease advertising that "Beutalure Hair Tonic" (now designated "Beutalure Hair Lotion") will bring hair back to its original shade; contains no dye; relieves dandruff, unless the assertion is limited to its aid in the temporary removal of dandruff; checks or stops excessive falling hair; reveals the natural hidden beauty of the hair, or is a competent treatment for gray, dull, faded or streaked hair. The respondent also agrees to desist from describing its product as a tonic and will not use the word "tonic" as a part of the trade name for the product. (02609)

Chicago Musical Instrument Co., and its subsidiary The Tonette Company, both of 30 East Jackson Blvd., Chicago, entered into a stipulation in which they agree to discontinue certain representations in the sale of a musical instrument designated "Tonette."

The respondents agree to cease representing that anyone, though unable to read musical notes, and without regard to knowledge of music, musical training or aptitude for music, can in just a few minutes' time learn to play on the Tonette, song hits, classics or "old favorites." (02614)

Cliff Fabric Products, Inc., 300 West 19th St., New York, entered into a stipulation in which it agrees to discontinue certain representations in the sale of auto and marine fabric equipment, including life preserver cushions or vests.

Under the stipulation, the respondent agrees to cease advertising that its life vests have an individual total weight of 36 ounces or more, or that the weight of the filling used in the construction of such products is 24 ounces or more, when in fact, the actual total weight and the actual weight of the filling is less than that indicated. The respondent further stipulates that it will cease representing that its device has a designated total weight or is equipped with a filling of a designated weight, the effect of which will convey the belief to purchasers that it has a buoyancy commensurate with such designated weights, when in fact, the weights are less than that represented.

Cliff Fabric Products, Inc., also agrees to cease representing that the buoyancy of its life vests is due to the air in the filling, which is subject to the requirements of Section 5 of the Act of Congress approved June 9, 1910, for Motor Boats not Carrying Passengers for Hire, when in fact, such is not the case. (2895)

Curtiss Candy Company, 622 Diversey Parkway, Chicago, stipulates it will cease advertising that "Baby Ruth" candy will avoid fat. The respondent further agrees to cease representing that "Baby Ruth" candy will avoid fat; sustains body activity; reinforces body resistance to avoid ill health, or will snap one out of spring fever, unless it is clearly stated that it is intended to help overcome fatigue and temporarily increase energy when eaten between meals. The respondent also agrees to discontinue representing that it is necessary to eat dextrose to secure the energy building and sustaining foods, or that people who need energy need dextrose or "Baby Ruth" bars. (02608)

Eagle-Picher Lead Company and its subsidiary, Eagle-Picher Sales Company, Temple Bar Building, Cincinnati, Ohio, agree to cease advertising that all insulation using paper as a base, or

August 16, 1940 — 4517
that insulation such as that sold by their competitor, Insul-Wool Insulation Corporation of Wichita, Kans., is inflammable or that its thermal conductivity compares unfavorably with that of rock wool or is higher than that of sawdust. The respondents further agree to discontinue claims that insulation having a paper base is susceptible to moisture or will settle when properly placed in the stud of a building. The respondents also stipulate that they will cease representing, through the use of excerpts from newspapers concerning a fire which occurred at the plant of a competitor, that the material which was burned was the finished product, when in fact, the burned material was only raw material which had not been placed in the completed form in which it was customarily sold by the competitor in the usual course of trade. (2900)

Herb Products Company—A. P. Durham, trading as Herb Products Company, Anderson, S. C., agrees to cease representing that this medicinal preparation, “Vim Herb,” will strengthen or build up the system; will rid the system of poisons; will completely cleanse the intestinal walls; will act as a tonic for the blood; will benefit everyone; will relieve pain; will clear the skin of eruptions, or will afford immediate, lasting, or positive relief from any disease, disorder or ailment. The respondent further agrees to desist from representing that his preparation is a tonic; that it has benefited thousands, or that the preparation is harmless, without at the same time clearly indicating that its use may be injurious where there are present acute inflammatory conditions in the gastro-intestinal tract. The respondent also stipulates that he will cease representing that his preparation is guaranteed, without at the same time clearly indicating the nature and scope of the guarantee. (02604)

Hoffman Health Products Company—A stipulation has been accepted from Albert H. Hoffman, trading as Hoffman Health Products Company, 5912 Lynn Ave., Tampa, Fla., in which he agrees to discontinue certain representations in the sale of honey designated as “El Panel Cuban Wonder Honey.” The respondent agrees to cease advertising that his honey has a natural lubricating effect that helps to eliminate waste and thus promotes better appetite and consequently better assimilation; that it has nine mineral elements which have special virtues in supplying minerals needs of the body, or that it vitalizes, alkalinizes and affords special virtues in the treatment of anemia and poor appetite.

The respondent further stipulates that he will desist from claiming that his product assists in relieving and overcoming attacks of asthma, bronchitis, colds, hay fever, sinus trouble, or coughs other than local throat irritation. It possesses remedial powers in the treatment of gastric ulcers and disorders of the bowels and colon, or differs essentially from domestic varieties of honey in the matter of nutritional or therapeutic value. (2902)

K-R-O Company, Springfield, Ohio, engaged in selling a rat-killing preparation designated “K-R-O (Kills Rats Only),” agrees to cease representing that the preparation is a sure killer and will make rats go outside to die, unless their burrows or habitats are outside of the homes and other buildings, or that it will drive rats out of homes or other buildings once and for all, or that it will protect homes or farm buildings, or livestock or supplies from damage by rats, or that K-R-O is the most effective rat-killer on the market. (02618)

McCoy Drug Company—Paul V. McCoy and L. E. Goursmen, trading as McCoy Drug Company, 511 Lynn Ave., Santa Ana, Calif., have entered into a stipulation in which they agree to discontinue certain representations in the sale of such compounds known as “McCoy’s Little Tablets.”

Under the stipulation, the respondents agree to cease representing that use of their product will correct the elimination of any organ or will effect other than temporary relief from constipation. The respondents further agree to discontinue claims that when constipation is overcome through use of their product, it ends, or often ends, nine-tenths or any other specified numerical estimate of other ailments with which a sufferer may be afflicted when in fact such claim is not based upon statistical or other competent evidence.

Further representations which the respondents agree to discontinue are that their product does not contain harsh laxatives or ingredients that depend upon irritating the bowels for their effect, or that it will act as a tonic for every part of the digestive tract and will sweeten the stomach. (2897)

Medical Tea Company of California, 823 East Seventeenth St., Los Angeles, agrees to discontinue representing that its “Sylphide (or Cleo) Tea,” a preparation consisting of various herbs, is safe to use for weight reducing purposes, except when such use is moderate or employed over short periods of time, or that it is a competent and effective remedy or treatment for obesity, except to the extent that it may reduce weight by increased elimination. The respondent also stipulates that it will cease representing that some of the ingredients of Sylphide Tea possess certain therapeutic properties which they do not in fact possess. (02615)

Mellquist Reducing & Cosmetic Salons, Inc., a New York corporation, Mellquist Reducing & Cosmetic Salons, Inc., an Illinois corporation, and Erik W. Mellquist, individually and as officer and director of both corporations, 550 Fifth Ave., New York, in connection with the sale and distribution of “Mellquist Massage Balm,” agree to cease and desist from use in their advertisements and advertising matter, or in any other way, of statements or representations the effect of which tends or may tend to convey the belief to purchasers that use of the product in and of itself will break down fat cells and strengthen tissues, or in any way reduce the user’s weight or otherwise solve the user’s reducing problems. (2903)

Robert E. Miller, Inc., 35 Pearl St., New York, has entered into a stipulation in which it agrees to discontinue certain representations in the sale of tacks and upholstery nails. The respondent agrees to cease marking its imported commodities with the words “Made in U.S.A.” or otherwise representing that such products are of domestic origin. If commodities of foreign origin are treated in the United States to improve their appearance or for other purposes and reference is made to such treatment, then in that case, suitable words shall be used to indicate clearly that they are merely treated or processed in this country, according to the stipulation. (2904)

Morris Paint & Varnish Company—Leo Sophir, Jack J. Sophir and Alfred Sophir, trading as Morris Paint & Varnish Company, 5161 Easton Ave., St. Louis, Mo., have entered into a stipulation in which they agree to discontinue certain representations in the sale of paints, varnishes and lacquers.

Under the stipulation, the respondents agree to cease representing through use of the word “Manufacturers,” or in any other manner, that they own, operate or control the factory in which their products are manufactured.

The respondents further agree to desist from use of the phrase “100% Pure White Lead” as descriptive of paint, the pigment content of which is not composed wholly of white lead, from use of words “White Lead” either alone or in conjunction with any other words so as to imply that the pigment content of such paint is composed wholly of white lead. If the pigment content of the paint is composed in substantial part of white lead, and in part of other ingredients and the words “White Lead” are used to describe such white lead content, then in that case, the words “White Lead” shall be immediately accompanied by some other words printed in equally conspicuous type so as to indicate clearly that the pigment content is not composed wholly of white lead but is composed in part of some other ingredient. (2885)
Hewett P. Mulford & Company—Hewett P. Mulford and M. R. Mulford, trading as Hewett P. Mulford & Company, Lebanon, Ohio, stipulate that they will discontinue use of the phrase “Holland Potted Bulbs” as descriptive of bulbs not grown in and imported from Holland, or use of the word “Holland” so as to convey the belief to purchasers that their bulbs were grown in and imported from Holland, when in fact such bulbs were grown elsewhere. (2901)

Musebeck Shoe Company, Danville, Ill., agrees to desist from representing that its “Health Spot Shoes” will relieve the wearer of foot trouble; will enable the wearer to get rid of foot trouble, sick, sore, tired or aching feet; are perfect foot health and comfort insurance; will keep the feet healthy, or will control the bones of the feet. The respondent also agrees to cease representing that “Health Spot Shoes” keep the whole body in good posture and are fitted by people who have taken a course in scientific shoe fitting. (G2612)

National Briar Pipe Company, Inc., 41 Morris St., Jersey City, N. J., agrees to discontinue using punch boards or other lottery devices in the sale of its pipes to ultimate consumers. (2898)

Neah Laboratories—E. A. Hartman, Ezra Hartman and R. J. Jeffries, trading as Neah Laboratories, 326 East Wayne St., Fort Wayne, Ind., agree to cease representing that their preparation, “Sinus-Aid,” affords a new or effective method for treating sinus infections, colds, asthma, hay fever, or other disturbances of the respiratory tract, or that the fumes of their preparation are effective without carrying the infection to other parts of the respiratory tract. The respondents further stipulate that they will discontinue use of the word “Laboratory,” or any similar word, as any part of their trade name, or representing in any manner that they own, operate or control a laboratory. The respondents also agree to cease using the word “Sinus,” or any similar word, as part of the trade name of any medicinal preparation which is substantially similar to “Sinus-Aid.” (02613)

Per-Mo Mothproof Company—O. S. Schaffer, trading as Per-Mo Mothproof Company, 3729 Virginia Ave., Kansas City, Mo., agrees to cease using the words “Permanent Mothproof Liquid” as descriptive of his product “Per-Mo”, or using the word “permanent”, or any similar term, so as to convey the belief to purchasers that the moth immunizing effect of his product will endure indefinitely or that its use will assure constant, equal efficacy against moths throughout the years and that such efficacy will not be impaired by dry cleaning, exposure, or use. (2899)

Henry J. Pinkston Laboratories—Henry J. Pinkston, trading as The Henry J. Pinkston Laboratories and as The Pinkston Laboratories, 54 West Randolph St., Chicago, agrees to desist from advertising that his preparation, “Pinkston’s Corn and Callous Remover”, is one of the greatest discoveries of modern times or is a discovery at all; that it will remove corns or callouses by the roots, or that corns or callouses have roots. The respondent also stipulates that he will cease representing that “Pinkston’s Bunion Reducer” will do more than temporarily aid evacuation of the intestine, or that “Drawsit” is a competent remedy or effective treatment for boils, old running sores, abscesses, scars, scaly skin, or chronic ulcers. (02616)

James M. Piwonka—A stipulation from James M. Piwonka, Cleveland, Ohio, has been accepted in which he agrees to discontinue certain representations in the sale of booklets, folders, formulas and health information designated “Gaining Weight Rapidly,” “Body-Cleansing Diet System,” “Guide to Beauty Culture,” “Nature’s Health Food Laxative” and “Drawsit.” Under the stipulation, the respondent agrees to cease representing that he is a qualified or licensed health director; that human ailments, diseases or old age are caused by acids or wastes; that the health is ruined by constipation, or that the phrases “internal cleanliness” and “clean blood” are of therapeutic or scientific significance. The respondent further agrees to desist from representing that the information in the folios “Gaining Weight Rapidly,” “Body-Cleansing Diet System” and “Guide to Beauty Culture” will benefit or improve the health or that such folios sell for other than their actual price; that “Nature’s Health Food Laxative” is of any use in the treatment of internal or external parasites; that “Pinkston’s Bunion Reducer” will do more than temporarily aid evacuation of the intestine; or that “Drawsit” is a competent remedy or effective treatment for boils, old running sores, abscesses, scars, scaly skin, or chronic ulcers. (G2611)

Red Seal Beverage Company, trading also as Zip Company, 2338 West Erie St., Chicago, entered into a stipulation in which it agrees to discontinue certain representations in the sale of a carbonated water beverage known as “Zip.” The respondent agrees to cease representing that “Zip” is an alkalizing beverage; is a health factor of proven value; keeps one physically fit; is a sure relief for indigestion; corrects any physical condition whatsoever, or renews energy. The respondent also agrees to desist from representations that its beverage helps burn up surplus flesh or adipose, or has any therapeutic properties or any appreciable effect on bodily conditions beyond such degree of refreshment as may properly be attributed to a carbonated water beverage. (2889)

Seaver Laboratories, Inc., 420 Lexington Ave., New York, entered into a stipulation in which it agrees to discontinue certain representations in the sale of cereal flour and rye bread sours. The respondent agrees to cease representing that its flour, spices and beverages designated as “Ward’s Summer Drinks” or “Summer Koolers”, it will cease advertising that its representatives in the usual course of business under normal circumstances. The respondent also agrees to discontinue representing that its soft drinks are composed wholly of the natural fruit or juice of the fruit. (02607)

Zip Company—See Red Seal Beverage Company.

FTC CASE CLOSED

The Federal Trade Commission has closed its case against National Hops Co., 664 North Michigan Ave., Chicago, without prejudice to its right to resume proceedings should the facts so warrant. The respondent corporation, which is now dissolved and its charter forfeited, had been charged with unfair competition in promoting the sale of hops, in violation of the Federal Trade Commission Act.

August 16, 1940 — 4519
THE WEEK IN WASHINGTON

The NAB has arranged with the National Defense Advisory Commission for the NAB to act as the clearing house for member stations in furnishing information and advice relative to requests from government agencies seeking time for "national defense" programs (p. 4521).

The Code Compliance Committee discusses the proposed Father Coughlin series (p. 4522).

Neville Miller discusses foreign language broadcasts (p. 4523).

The New BMI license form, effective next April 1, and the text of the court decision in the Florida ASCAP case are included in this series (p. 4525).

Summer promotion at two stations and the progress of the LISTEN BEFORE YOU VOTE campaign also are reported (p. 4529).

National Defense

As a result of its consultations with the National Defense Advisory Commission this week, the NAB will act as a clearing house for member stations in furnishing information and advice relative to requests from government agencies seeking time on the air in the name of national defense.

In addition, the National Defense Advisory Commission will aid NAB in securing factual information with which to guide radio advertisers in presenting claims of possible price advances due to possible demands upon industry and raw materials in the present emergency period. In addition, the National Defense Advisory Commission, beginning this coming Sunday, August 26, will issue a weekly Radio Release to all press services giving a statistical week-to-week report on the progress of national defense. It is planned to issue this report at 6 P.M. each Sunday. It is anticipated that the full report—a three to four minute statement—will be carried in full by all press wires serving the news rooms of radio stations, enabling Sunday night radio audiences to have a week-to-week, factual, non-political accounting of defense preparations.

In the past two weeks there has been a tremendous increase by various departments of government, both from Washington and regional offices, in requests for programs, announcements and time on the air to promote various aspects of national defense.

In many stations the requests for such purposes reached a point where it became almost impossible to find adequate time to take care of all requests received. Many requests were duplications.

In an effort to clarify the situation for members, NAB this week called upon the National Defense Advisory Commission, which is the central government organization responsible for the coordination of all elements of the national defense program.

The Commission expressed its appreciation for the support the broadcasting industry has already given, and extended its cooperation to NAB in its effort to eliminate unnecessary multitudinous and duplicating requests for radio time in the name of national defense.

Upon receipt of an inquiry from a member station, NAB will check directly with the National Defense Advisory Commission to determine whether or not the requested time is needed and coordinated with the central national defense effort. Naturally, the National Defense Advisory Commission has neither the authority or desire to advise on requests from government departments for radio time, except those made on behalf of national defense.

Question of Rising Consumer Prices and National Defense

Attention of the NAB has been directed to the copy by some advertisers warning consumers of impending skyrocketing prices advising "buy now". The American Retail Federation was among those calling it to our attention.

NAB has expressed its willingness to cooperate in making available all possible information, but it has also pointed out the primary responsibility of retailers, advertisers and their own trade associations in handling the matter.

According to information from the National Defense Advisory Commission, there is no present basis for state- (Continued on page 4522)
NATIONAL DEFENSE

(Continued from page 4521)

ments that prices of consumer goods and merchandise are due for skyrocketing or unseasonal advances due to the effect of the national defense program.

609 STATIONS COOPERATE

Total number of stations now known to be cooperating in recruiting 100,000 skilled workers for national defense jobs is 609. Cooperating stations not listed in NAB Reports of July 26, August 2 and 16 are urged to register the fact with Arthur Stringer at headquarters.

According to the United States Civil Service Commission, these men are wanted, for the most part, to build guns and equipment in government arsenals and ships and equipment in government navy yards.

Bringing qualified men to these vital jobs stands at the very pinnacle of the country’s defense needs. Soldiers and sailors without weapons are powerless.

Stations cooperating in the man power search, not previously listed, are:

WAR DEPARTMENT PRAISES RADIO

Declaring “because of the patriotism and wonderful cooperative spirit of the broadcasting companies the War Department has never been called to purchased radio time to disseminate to the public information of general interest,” the Department praised radio and expressed its thanks for the resolution adopted at NAB Convention pledging the industry’s support to national defense.

The letter follows:

The National Association of Broadcasters, Normandy Building, 1626 K Street, N. W., Washington, D. C.

My Dear Mr. Kirby:

I desire to take this opportunity to express to you and to all our good friends in the National Association of Broadcasters the appreciation of the War Department for the splendid resolution adopted in San Francisco, California, on August 7, 1940, in placing its services at the disposal of all departments of the Federal Government in behalf of National Defense.

The War Department appreciates the great power of radio in reaching, effectively, the great mass of the people of the country with any message or program in a minimum of time. Radio broadcasting is a tremendously efficient force that can be applied to all problems of interest to the country whether it be a commercial sales campaign, or one of public service in the interest of National Defense. It is noteworthy to state that because of the patriotism and wonderful cooperative spirit of the broadcasting companies the War Department has never been called upon to purchase radio time to disseminate to the public information of general interest.

The loyal and wholehearted cooperation of the broadcasters of the country in assisting to build up our Army is of great value and is greatly appreciated by the War Department.

Very truly yours,

(Signed) E. S. Adams,
Major General,
The Adjutant General.

Code

FATHER COUGHLIN SERIES

In reply to several informal inquiries from stations, the Code Committee advises as to the status under the NAB Code, of the proposed broadcasts on a commercial basis by Father Charles E. Coughlin which we understand are being offered in a series of fifty-two weekly programs to begin October 10. This advice must necessarily be limited to our interpretation of the code in relation to the proposed broadcasts, and in no sense preempts or replaces the authority or responsibility of station licensees for programs broadcast.

It is also to be borne in mind that such advice must, at this time, be based on certain assumptions, since final judgment on our part as advisers—or on the part of station licensees—requires actual knowledge of the content of such broadcasts. Not until the programs are read or heard in advance can final determination of their status under the code be made. We are, however, assuming as a fact what we believe has been represented or implied by the agency seeking to order time for these broadcasts in its statement that the broadcasts would comply with the code—that is, that they will necessarily be political in nature. On that premise, the question clearly falls under that phase of the code which deals with political broadcasts as a part of the general section devoted to the broadcasting of “controversial public issues.” The follow-
ing paragraphs from this section seem to be directly pertinent:

“As part of their public service, networks and stations shall provide for the presentation of public questions, including those of controversial nature. Such time shall be allotted with due regard to all the other elements of balanced program schedules and to the degree of public interest in the question to be presented. Broadcasters shall use their best efforts to allot such time with fairness to all elements in a given controversy.

“Time for the presentation of controversial issues shall not be sold, except for political broadcasts.

“The political broadcasts excepted above are any broadcasts in connection with a political campaign in behalf of or against the candidacy of a legally qualified candidate for nomination or election to public office, or in behalf of or against a public proposal which is subject to ballot. This exception is made because at certain times the contending parties want to use and are entitled to use more time than broadcasters could possibly afford to give away.”

Surely it is evident that the adoption of these principles, by which broadcasters willingly assume their basic obligations to the public to provide time without charge for the discussion of all controversial public issues, clearly reflects the spirit of a free, democratic medium of information, properly serving a free, democratic people. And it is noteworthy that it is only during the brief campaign periods when broadcasters cannot possibly afford to give away the properly required amounts of political time that the single exception is made to charge for broadcasters in this specific category.

Under the provisions of the Code for this single exception, it seems clear to us that time could properly be sold for the proposed broadcasts, or any other broadcasts of a strictly political nature during the current political campaign, provided that equal opportunity be afforded for the presentation of opposing views. To maintain this scrupulous fairness in public debate, which is not only an element of democracy itself, it is logical and necessary that stations should know, before making any commitment for time, what side of what issues the broadcasts will support, and which candidacy, or candidacies will be advocated.

We call this to your particular attention in relation to your program schedule, because it is a problem which does not arise in the usual sale of time to political parties whose positions on issues and candidates is self-evident in advance. The need for such information is even more necessary in making commitments for a series of broadcasts during consecutive weeks, because the problem of time for opposing viewpoints is multiplied by the number of such broadcasts.

The foregoing interpretation of the Code is limited, as stated, to the duration of the current political campaign, since the Code clearly specifies that all broadcasts on controversial public issues are to be made on unpaid time, except when they are for or against a legally qualified political candidate, or an issue subject to ballot during political campaign periods.

In this connection it is disquieting to the committee to learn that the proposed broadcasts are being offered for a 52-week series. We know of no interpretation of the Code which would permit the sale of time for broadcasts on controversial national public issues beyond the period of the national campaign. We believe stations therefore, should limit any commitments which are made to reflect the principles of the Code in this respect.

For the Code Committee,
EDGAR BILL,
Chairman.

Foreign Language Broadcasts

Foreign Language Broadcasts proved an interesting subject at the Convention and a large group attended the two breakfast round table sessions on Tuesday and Wednesday, at which the subject was discussed. Chairman James Lawrence Fly was the guest of honor at the Wednesday morning session and participated in the discussion. President Miller recently made the following statement concerning these programs:

Foreign language broadcasts are of real value to the nation, especially under conditions which exist today; and the said broadcasts properly programmed strengthen our national unity and defense. It is recognized that some members of the public are critical of the broadcasts, but it is believed that this is due to lack of knowledge concerning the broadcasts, inability to understand the language, and failure to realize the true purpose and need for the broadcasts. I suggest that stations, as occasions permit, explain to the public that the foreign language broadcasts are not foreign broadcasts, but are American broadcasts in a foreign language. The reason these broadcasts are not in English is that in many areas as much as two-thirds of the population falls into foreign language classifications, that is, the inhabitants themselves or their parents were born in a foreign country. In order to talk to these millions of people, it is necessary to use the language they understand best, and in carrying these foreign language broadcasts the stations do so in the knowledge and certainty that they are performing a necessary and vital task, i.e., of bringing to these people a message of Americanization which they can get into foreign language. The reason these broadcasts are not in English is that in many areas as much as two-thirds of the population falls into foreign language classifications, that is, the inhabitants themselves or their parents were born in a foreign country. In order to talk to these millions of people, it is necessary to use the language they understand best, and in carrying these foreign language broadcasts the stations do so in the knowledge and certainty that they are performing a necessary and vital task, i.e., of bringing to these people a message of Americanization which they can get in no other way; and, if this work is not done by the American stations, it would be tantamount to turning over vast segments of our population to the very forces we are combating, in that these groups would be driven to securing their news and their programme of activities from the foreign stations abroad broadcasting in their own tongues. If we are to have a united nation, we must realize that a large number of people in the United States understand other languages better than English, and it is necessary to talk to them in their language if we desire to build loyalty among them. It is worth noting that many stations are carrying on interesting Americanization programs in connection with the foreign language broadcasts, and distribute copies of the Constitution and pamphlets on Americanization subjects upon receipt of requests from listeners to these programs.

It is agreed that every effort should be made to continually impress upon all connected with the foreign language broadcasts that the station has a special trust to perform in the public service, and that special efforts should be exercised to scrutinize these programs to see that they express only the highest ideals of Ameri-
canism and that we continue to take definite steps to guard against and eliminate any influences which may be trying to use our American System of Broadcasting to incite the foreignisms or ideologies. It is further thought wise that a committee be appointed to consider ways and means of working with various groups in the community interested in Americanization programs, to arrange for speakers, etc., and to report the result of the committee's activity to stations carrying foreign language broadcasts. Therefore the following Committee has been appointed:

Joseph Lang, WHOM, Jersey City, N. J., Chairman;
Samuel Gellard, WLTH, New York City;
M. S. Novik, WNYC, New York City;
W. C. Alcorn, WBNX, New York City;
David Casem, WOV, New York City;
Arthur Simon, WPEN, Philadelphia, Pa.;

I wish to stress the importance of continued vigilance regarding the programs to insure their integrity. Among the precautions believed indispensable are the following:

a) All scripts in foreign languages should be carefully read and appraised in the light of American national defense;

b) After the station's approval of such scripts, adequate and capable linguists in whom complete confidence may be reposed, should be utilized to supervise active presentation on the air to prevent possible ad lib insertions or deviations from the scripts;

c) A complete file of continuity and script of all foreign language broadcasts should be kept.

Many stations are making recordings of the programs and I believe this is an excellent additional precaution. I recommend to all stations that detailed information concerning all personnel connected in any way with any foreign language program should be kept up to date, and further, that copies of the questionnaire which is used to secure this information be kept on hand for delivery to any government official or other person who desires to know what steps are being taken to insure the integrity of the programs.

Although it is recognized that there are circumstances where commentators were doing a splendid job, the majority of broadcasters report that they are limiting news broadcasts to translations of recognized news services, and every effort is being made to impress upon the listener the authenticity of the news.

Many stations have adopted a policy prohibiting announcements over the radio of picnics and other meetings of racial groups.

I believe that it is of extreme importance that we maintain intimate contact and understanding with the foreign groups in our communities, and I am sure that the licensees of broadcasting stations operating in the foreign language field are capable of handling this problem intelligently. I am further sure that it is to the best interests of broadcasters that they voluntarily continue to take all definite and positive steps necessary to protect the integrity of the foreign language broadcast programs.

The NAB will continue to gather information upon all aspects of the subject and will keep all stations advised of developments.

Ninety-three stations carrying foreign language broadcasts recently returned a questionnaire sent out by the NAB. Although it does not present the complete picture, a detailed tabulation by NAB Districts of the languages used in the programs of these 93 stations is printed below, and I believe it will be of interest. Stations which have not returned the questionnaires are urged to do so.

**LANGUAGES USED IN CURRENTLY BROADCAST FOREIGN LANGUAGE PROGRAMS**

4524 — August 23, 1940
NEW BMI LICENSE

Below is the new BMI licensing agreement form, to be used after next April 1. It calls for a graduated scale of payments, ranging from 1.5 per cent for stations with income of $15,000 or less to 2.5 per cent for stations with income in excess of $100,000.

BROADCAST MUSIC, INC.
FIRST RENEWAL PERFORMING RIGHT LICENSE AGREEMENT

AGREEMENT made this day of 

194 , between BROADCAST MUSIC, INC., a corporation organized under the laws of the State of New York (hereinafter called Music) with principal offices in New York New York, and

A corporation organized under the laws of the State of

A partnership

An individual residing at

hereinafter called Broadcaster) with offices located at

City of , State of

WITNESSETH:

I. The parties hereto have heretofore entered into a performing right license agreement for a term expiring not earlier than March 31, 1941 and desire to extend the terms and conditions of this agreement, hereinafter called First Renewal Agreement.

II. Music hereby grants to Broadcaster a non-exclusive license to perform by radio broadcasting over Station all musical works the copyrights or rights to grant broadcasting performing licenses of which Music may, during the term hereof, own. Music agrees to deliver to Broadcaster from time to time during the term hereof lists of musical works covered by this license. The rights granted hereby shall include the right to broadcast dramatic performances of each such musical work unless Music at any time shall have given notice to Broadcaster that it does not own the dramatic performing rights thereof.

III. Broadcaster agrees to pay to Music, as a license fee hereunder, such sum not in excess of $ as Music may require Broadcaster to pay, payment to be made in instalments as and when required by Music, each such instalment being payable within ten (10) days after the date specified by Music in a written demand therefor, provided that no demand or demands shall be made for the payment during any consecutive thirty (30) day period of any instalment or instalments aggregating in excess of 15% of the foregoing maximum total license fee. Broadcaster represents and warrants that the broadcasting station licensed hereby falls into category of Schedule "A" hereto annexed, and that the said maximum total license fee represents the applicable percentage of Broadcaster's 1939 station income as defined in said schedule. In the event that Broadcaster shall fail to make any payment under this agreement or under the initial performing right license agreement between the parties hereto, when and as due, Music may, in addition to any and all other remedies which it has at law or in equity, terminate this license upon ten (10) days' notice in writing. (It shall be a condition precedent to the licensing hereunder of any broadcasting stations managed or operated by National Broadcasting Company, Inc., or Columbia Broadcasting System, Inc., that such companies shall agree to make the additional special network payments set forth in said Schedule "A").

IV. Music agrees to indemnify, save and hold harmless and to defend Broadcaster, its advertisers and advertising agencies, from and against all claims, demands and suits that may be made or brought against Broadcaster, its advertisers and advertising agencies, with respect to the performance under this license agreement of any material licensed hereunder, provided that this indemnity shall not apply to broadcasts of any composition performed by Broadcaster after written request from Music to Broadcaster that Broadcaster refrain from performance thereof. Broadcaster agrees to give Music immediate notice of any suit or demand, or suit, and agrees immediately to deliver to Music all papers pertaining thereto. Music shall have full charge of the defense of any such claim, demand or suit, and Broadcaster shall cooperate fully with Music therein.

V. The term of this license shall commence on the day following the date of expiration of the term of the initial performing right license agreement between the parties hereto and shall continue for such period of time, not less than one (1) year, as may be designated in writing by Music. This license shall be non-assignable except to the person, firm or corporation legally succeeding to the entire business of Broadcaster to which this license shall have been assigned or transferred.

VI. Music, at its option, and on written notice to Broadcaster, at Music's option, either terminate this license, or shall suspend this license and all payments hereunder for the period that such condition continues. In the event that Music elects to suspend this license, such suspension shall not continue for longer than six (6) months, and this license shall automatically terminate at the end of six (6) months' suspension. In the event that the condition giving rise to the suspension shall continue for less than six (6) months, Music, at its option, and on written notice to Broadcaster, may reinstate this license at any time within thirty (30) days after the cessation of such condition.

VIII. Music agrees, (a) that all First Renewal Agreements between Music and its stockholders shall (except as to terminations for breach) terminate simultaneously, (b) that Music shall not demand the payment of any instalment of the license fee hereunder unless Music simultaneously demands from all other stockholders of Music with whom Music has made First Renewal Agreements the payment of an instalment of the license fee in the same percentage and payable on the same date, (c) that all First Renewal Agreements between Music and stockholders shall require the payment of a maximum license fee in accordance with Schedule "A" hereto annexed, except that in the discretion of Music a different license fee may be specified in a First Renewal Agreement between Music and any stockholders whose broadcasting stations named therein in such agreement was not in operation during the entire calendar year 1939 or if there was a material change in the power or hours of operation or in the network affiliation status of the broadcasting station named therein subsequent to January 1, 1939, and prior to the execution of the First Renewal Agreement, and (d) that the excess of any license fee paid by Broadcaster shall not apply to broadcasts of any composition performed by Broadcaster after written request from Music to Broadcaster that Broadcaster refrain from performance thereof. Broadcaster agrees to have such license agreements with all such stockholders, or assignees of such stockholders, with respect to performing right license agreements for the period expiring not earlier than March 31, 1941, and the First Renewal Agreements and all subsequent performing right license agreements of Music available to such stockholders.

IX. The term "stockholder-licensees" as hereinbefore used shall include only such stockholders as have held the initial performing right license agreements for the term expiring not earlier than March 31, 1941, and the First Renewal Agreements and all subsequent performing right license agreements of Music available to such stockholders. For the purpose of this Article IX, stockholder-licensees shall be divided into the following categories: (1) stockholder-licensees whose broadcasting stations have network affiliations; (2) stockholder-licensees operating both broadcasting stations and national networks; and (3) stockholder-licensees operating broadcasting stations affiliated with, but not operated by, national networks. Broadcaster, with respect to performing right license agreements for any period subsequent to the expiration of the license hereby granted, shall propose, (a) the alteration of material terms of licenses or the method of fixing or allocating performing right license fees, so
as to effect a change discriminatory against any of the foregoing categories of stockholders-licensees, or (b) the denial of licenses to stockholders-licensees, or (c) the omission from future performing right license agreements with stockholder-licensees of provisions to the same effect as any of those contained in this Article IX, then Music shall give notice of such proposal to all stockholder-licensees in any category which contains adversely affected stockholder-licensees, and, in the event that notice of objection to such proposal shall aggregate one-third or more of the annual license payments made by all stockholder-licensees in the same category, such proposal may be put into effect.

X. This Agreement shall become effective as a license agreement upon the execution and delivery of a copy hereof by Music. In consideration of Music using its best efforts to obtain the signature of First Renewal Agreements by other broadcasters, and in consideration of the signature of First Renewal Agreements by other broadcasters, Broadcaster agrees that this instrument shall constitute a continuing offer which cannot be revoked by Broadcaster for forty (40) days from the date of the receipt hereof by Music.

XI. All notices required or permitted to be given hereunder shall be duly and properly given if mailed to the party to whom such notice is required or permitted to be given, by United States mail, postage prepaid, addressed to said party at its main office for the transaction of business. This agreement constitutes the entire understanding between the parties and shall be construed in accordance with the laws of the State of New York.

BROADCAST MUSIC, INC.

By

(Corporations or partnerships sign here)

By

(Individuals sign here)

(This agreement should be executed in duplicate by the licensee of the station named in Article II hereof. If such licensee is a corporation, the title of the officer signing the agreement should be stated.)

The National Broadcasting Company and the Columbia Broadcasting System have declared their approval of the principle of clearance at the source when an economically and legally feasible method of so clearing can be devised which is not more burdensome to the said networks than the basis of increased payments set forth in Schedule "A" of the foregoing agreement and they have agreed that at an appropriate time the said networks will make an earnest cooperative effort with the network affiliates to work out such a feasible plan of clearance at the source.

The Board of Directors of Broadcast Music, Inc., in adopting the foregoing form of First Renewal Agreements by other broadcasters, and in the absence of the principle of clearance at the source, has approved the principle of clearance at the source when an economically and legally feasible method of so clearing can be devised which is not more burdensome to the said networks than the basis of increased payments set forth in Schedule "A" of the foregoing agreement and they have agreed that at an appropriate time the said networks will make an earnest cooperative effort with the network affiliates to work out such a feasible plan of clearance at the source.

XI. All notices required or permitted to be given hereunder shall be duly and properly given if mailed to the party to whom such notice is required or permitted to be given, by United States mail, postage prepaid, addressed to said party at its main office for the transaction of business. This agreement constitutes the entire understanding between the parties and shall be construed in accordance with the laws of the State of New York.

SCHEDULE "A"

Station income shall mean the gross income from sales by Broadcaster of time on the air over the station named in Article II of the foregoing agreement, including station payments by networks, made or accrued during the calendar year 1939, less only advertising agency commissions not in excess of 15% and time discounts actually allowed and paid or accrued, and less the amounts credited to managed or operated stations of the basis set forth in Schedule "A" of the foregoing agreement and they have agreed that at an appropriate time the said networks will make an earnest cooperative effort with the network affiliates to work out such a feasible plan of clearance at the source.

The Board of Directors of Broadcast Music, Inc., in adopting the foregoing form of First Renewal Agreements by other broadcasters, and in the absence of the principle of clearance at the source, has approved the principle of clearance at the source when an economically and legally feasible method of so clearing can be devised which is not more burdensome to the said networks than the basis of increased payments set forth in Schedule "A" of the foregoing agreement and they have agreed that at an appropriate time the said networks will make an earnest cooperative effort with the network affiliates to work out such a feasible plan of clearance at the source.

XI. All notices required or permitted to be given hereunder shall be duly and properly given if mailed to the party to whom such notice is required or permitted to be given, by United States mail, postage prepaid, addressed to said party at its main office for the transaction of business. This agreement constitutes the entire understanding between the parties and shall be construed in accordance with the laws of the State of New York.

FLORIDA MUSIC MONOPOLY LAW HELD UNCONSTITUTIONAL

Below is the complete text of the final decree and the findings of a three-judge federal court in the Florida ASCAP case, in which the court enjoined state officials from enforcing the state's music monopoly law as unconstitutional:

UNITED STATES DISTRICT COURT
Northern District of Florida
Gainesville Division
Filed August 5, 1940
G. E. Buck, individually and as President of the American Society of Composers, Authors and Publishers, et al., Complainants,

v.

GEORGE COUPER GIBBS, individually and as Attorney General of the State of Florida, et al., Defendants.

FINAL DECREE

This case is deemed to be heard at this term, under Section 380, Title 28, U. S. C. A. (Jud. Code Sec. 266) on the 15th, 16th and 17th days of April, 1940, and the Court sat as provided therein; and the cause was tried and testimony taken and argument heard thereon, the Court having made its Findings of Fact and Conclusions of Law, upon consideration thereof, it is ORDERED, ADJUDGED AND DECREED, as follows, viz.:

1. The temporary injunction order awarded herein on April 5, 1938, against the enforcement of the Florida ASCAP Act, be and the same hereby is made permanent and perpetual.

2. The temporary injunction order awarded against the enforcement of the 1939 Act, be and the same is hereby vacated and dissolved as to the whole act and all of its sections except Section 4-a and 4-c, and as to these sections, the order is made permanent and perpetual.

3. That Defendants George Couper Gibbs, individually and as Attorney General of the State of Florida; R. A. Gray, individually and as Secretary of the State of Florida; J. M. Lee, individually and as Comptroller of the State of Florida; E. Dixie Bees, individually and as State Attorney for the First Judicial Circuit of Florida; O. C. Parker, Jr., individually as State Attorney for the Second Judicial Circuit of Florida; A. K. Black, individually and as State Attorney for the Third Judicial Circuit of Florida; William D. Hall, individually and as State Attorney for the Fourth Judicial Circuit of Florida; J. W. Hunter, individually and as State Attorney for the Fifth Judicial Circuit of Florida; Chester B. McMullen, individually and as State Attorney for the
Sixth Judicial Circuit of Florida; Murray Sams, individually and as State Attorney for the Seventh Judicial Circuit of Florida; T. A. Duncan, individually and as State Attorney for the Eighth Judicial Circuit of Florida; Murray W. Overstreet, individually and as State Attorney for the Ninth Judicial Circuit of Florida; L. Grady Burton, individually and as State Attorney for the Tenth Judicial Circuit of Florida; G. A. Worley, individually and as State Attorney for the Eleventh Judicial Circuit of Florida; J. Rex Farror, individually and as State Attorney for the Twelfth Judicial Circuit of Florida; J. T. J. Doerner, individually and as State Attorney for the Thirteenth Judicial Circuit of Florida; D. McCrea, individually and as State Attorney for the Fourteenth Judicial Circuit of Florida; Phil O'Connell, individually and as State Attorney for the Fifteenth Judicial Circuit of Florida, and the respective agents, servants and employees of each of them, be and they are, each of them, severally, enjoined and restrained permanently from bringing directly or indirectly, any proceeding at law or in equity, for the purpose of enforcing or executing the Statute of Florida, known as Chapter 17507, Laws of Florida, 1937, enacted June 9, 1937, and Secs. 4-a and 4-c, of Chapter 19635, Laws of Florida, 1939, enacted June 12, 1939, against the Complainants and others similarly situated, their representatives, employees, agents or any of them, and from threatening to enforce against any citizens or residents of the State of Florida the penalties of the 1937 Act for violation of Sections 4-a and 4-c, and from prosecuting criminally the Complainants, their representatives, or agents, or any of them or others similarly situated, under the 1937 Statutes, for doing any act or thing to carry out or enforce any of the provisions of the 1939 Act, and from exercising any of the rights granted by the 1939 Act under the Copyright Act in the Federal Courts of the State of Florida, or elsewhere, and generally from doing any act or thing to carry out or enforce any of the provisions of the 1937 Statute or Sections 4-a and 4-c of the 1939 Statute.

4. Cost to be taxed against Defendants.

Dated August 5, 1940.

BY THE COURT:

(S) J. C. Hutcheson, Jr., U. S. Circuit Judge.
(S) Augustine V. Long, U. S. District Judge.
(S) William J. Barker, U. S. District Judge.

UNITED STATES DISTRICT COURT
Northern District of Florida
Gainesville Division

GENE BUCK, Individually and as President of the American Society of Composers, Authors and Publishers, etc., et al., Complainants, against

GEORGE COUPER GIBBS, Individually and as Attorney General of the State of Florida, et al., Defendants.

FINDINGS OF FACT AND CONCLUSIONS OF LAW

This suit having been duly commenced on February 7, 1938, by filing a subpoena and Bill of Complaint in this Court, and personal service of copies thereof having been duly made upon all the Defendants, and the Supplemental and further supplemental Bills of Complaint herein having been duly filed thereafter, and personal service of copies thereof having been duly made upon all the Defendants herein, and this Court having granted a temporary injunction on April 5, 1938, and the same having been affirmed by the Supreme Court of the United States April 17, 1939, and this Court having granted a further temporary injunction on October 30, 1939, and Defendants having filed their answers to said Bills on June 21, 1939, and November 15, 1939, respectively, and this case having come on for trial on the 15th, 16th and 17th days of April, 1940, in the District Court of the United States, Northern District of Florida, Gainesville Division, at the Court House thereof in the City of Gainesville, Florida, and Complainants having been upon their request granted leave to make an answer in open court, before Louis D. Frohlich and Herman Finkelstein, of Counsel, and Defendants having appeared by George Couper Gibbs, Attorney General, (Thomas J. Ellis, Assistant Attorney General, and Lucien H. Boggs, Special Assistant Attorney General, and Andrew W. Bennett of Counsel), and evidence having been adduced upon the merits of this case, and due deliberation having been had, and the Court having filed its opinion, hereby makes the following Findings of Fact and Conclusions of Law:

1. The State of Florida enacted Chapter 17507 General Laws of Florida which became effective June 9, 1937. Said Statute is hereinafter referred to as the "1937 Act." The State of Florida enacted Chapter 19635 which became effective on June 12, 1939. Said Statute is hereinafter referred to as the "1939 Act." Both Statutes are public laws, and both are collected in the Session Laws of Florida.

2. The plaintiff American Society of Composers, Authors and Publishers, is a voluntary unincorporated association organized in 1914 under the General Associations Law of New York. Its membership consists of a substantial number of persons, firms and corporations who own or control copyrighted vocal or instrumental musical compositions, as authors, composers and publishers.

It brings this suit through Gene Buck, its President, who has been duly authorized to bring this suit on behalf of the Society and all its members. Other plaintiffs are certain individuals who are owners of works of the American Society.

3. The Attorney General, the Secretary of State, and the Comptroller of the State of Florida, as well as State Attorneys of all the fifteen Judicial circuits of Florida, all citizens and residents of Florida, are the Defendants.

4. There are approximately 1,425 composers and author members of the American Society of Composers, Authors and Publishers, and 131 publisher-members who constitute the principal music publishers of the country. Each member has assigned to the Society the exclusive right of public performance for profit of his copyrighted musical compositions for periods of five years at a time, and his consent for performing the compositions thereafter. The current contracts between the Society and its members, all of which expire December 31, 1940. The Society has issued and still does issue only blanket licenses to the users of its copyrights by which such users are permitted publicly to perform at any time all of the musical compositions owned, written or composed by members of the Society, with the right to the Society of the expenditures of all moneys received, including distribution to the members, the sale of copies of a composition, and all other rights incident to the ownership of the particular composition performed. These blanket licenses include not only the right to perform the works of the members of the Society, but also grant the right to perform the works of some 45,000 members of other similar societies in foreign countries throughout the State of Florida.

The defendants are all members of the American Society of Composers, Authors and Publishers; and the Society has exclusive contracts authorizing the Society to grant such licenses. The management of the Society is vested by its Articles of Association exclusively in a self-perpetuating Board of Directors of 24 members consisting of 12 directors representing the membership of the American Society of Composers, Authors and Publishers, etc., et al., and 12 directors representing composer and author members. The Board has absolute control over the fixing of prices to be charged for performance licenses, the expenditures of all moneys received, including distribution to the members, the sale of copies of a composition, and all other rights incident to the ownership of the composition performed. These blanket licenses include not only the right to perform the works of the members of the Society, but also grant the right to perform the works of some 45,000 members of other similar societies in foreign countries throughout the State of Florida.

The defendants are all members of the American Society of Composers, Authors and Publishers; and the Society has exclusive contracts authorizing the Society to grant such licenses.

5. At the time the 1937 Act was passed, there were in existence 410 signed contracts between the Society and establishments in the State of Florida in the business of publicly performing copyrighted musical compositions for profit. For the year, these licenses paid the Society $61,347.94 pursuant to such contracts. Among such licenses of the Society were the owners of 188 motion picture theatres, 12 radio broadcasting stations, and 210 hotels, restaurants, dance halls and miscellaneous establishments. Among the 12 radio stations in Florida licensed by the Society, six are affiliated with the Columbia Broadcasting System and four with the National Broadcasting Corporation. Part of the programs broadcast by the eleven affiliated stations emanate from points outside the State. In addition, the Society receives some 131 publisher-members of such Florida broadcasters or elsewhere within the State. There were on January 1, 1939, 308,000 radio receiving sets in private homes in the State of Florida. No license fees are paid by the owners of these receiving sets inasmuch as they do not engage in public performances for profit. In 1937 and 1939 respectively the Society's net income from motion picture theatres, broadcasting stations, hotels, restaurants, cabarets and miscellaneous establishments in the State of Florida was approximately $46,623.00 and $71,316.00. When the 1937 Act was passed, the following annual license fees were paid by users of various types in the State of Florida to the Society as follows:

August 23, 1940 — 4527
The cost of operation of the Society is approximately 20% of the gross amount received.

The Society has given its members the exclusive right to make collections, fix prices for blanket licenses, and otherwise carry on the licensing of the right of public performance for profit of all the musical compositions copyrighted by its members. Some $6,000,000 was received for public performance rights by the Society in the entire United States during 1938, of which approximately 20% was used to defray all expenses, the balance being distributed among its members. 50% of such net income was divided among the composer- and author-members and the other 50% was divided among the publisher-members, in accordance with a method of classification defined in the Articles of Association of the Society.

7. Prior to the organization of the plaintiff Society, authors, composers and publishers who had obtained copyrights for their productions had no practical means of enforcing the exclusive right given them by the Copyright Act. They were not so equipped nor organized to discover violations of their rights, and it would require much time and a large amount of money to detect infringement and to enforce their rights by means of litigation. None of them secured any revenue from the public performance for profit of their copyrighted musical compositions. Users of music, on the other hand, who wished to obtain the rights of public performance for profit, were unable to ascertain who the copyright owner was and to whom to go and could not economically obtain individual licenses for the separate performance of each separate musical composition. It was for the purpose of protecting the legal rights of its members in their copyrighted musical compositions against infringement by public performance for profit and to give users ready access to a substantial repertoire of music for such purposes that the Society was organized.

8. The Society and its members, including the other complainants, come within the purview, and regulative provisions of the State Statutes.

9. Complainants are jointly interested in the subject of the action and in obtaining the relief demanded; the questions raised by the Bill of Complaint, the supplemental Bill of Complaint and further supplemental Bill of Complaint are of common and general interest to all the members of the Society who constitute a so numerous as to make it impracticable to bring them before the Court; Complainants are unable to join themselves in any proceeding in their own behalf and on the behalf of all the members of the Society.

10. The value of the matter in dispute herein between Complainants and Defendants is in excess of the sum of $3,000.00 exclusive of interest and costs.

11. The repertoire of music controlled by the Society is sufficiently diversified and substantial to furnish a comprehensive and instantaneously available reservoir upon which licensees may draw at will. Indeed it is so complete and comprehensive that users are not required to, and never have, filed with the Society or with any State Authority, copies of the respective compositions copyrighted by their respective members.

12. The Society's practice has been to grant blanket licenses to theatres according to their seating capacity, to radio broadcasting stations according to their income, power and coverage, and to hotels, cabarets and dance halls according to their respective size, business and the number of orchestras, methods of performance, income and standing. Certain of such users have for many years consistently refused to pay license fees to the Society or its members, until investigations were made by the Society, infringements ascertained and suits brought.

13. The radio broadcasting stations in the State of Florida are members of the National Association of Broadcasters, which association on behalf of its members, for many years past, has acted and presently acts collectively in dealing with the Society.

14. Under the contracts between the Society and foreign societies, the latter are not required to, and never have, filed with the Society or with any State Authority, copies of the respective compositions copyrighted by their respective members.

15. Many thousands of the copyrighted musical compositions owned and published by Complainants, as well as others similarly situated, have been recorded under the compulsory license provision of Section 115 of the Copyright Act by manufacturers of phonograph records, music rolls and electrical transcriptions. Such manufacturers have paid to copyright owners not more than two cents for each record and said copyright owners have no right to demand any further sums from such manufacturers; Complainants and others similarly situated are paid only a small fraction of the cost of or the disposition of such phonograph records, music rolls or electrical transcriptions and they cannot compel the manufacturers thereof to affix any price upon them or to collect a price for the public performance for profit thereof, or if collected, to remit or give to them the sums so collected respectively for the public performance for profit thereof.

16. The requirements of Section 2 of the 1939 Act with reference to the disclosure of information concerning the identification and ownership of musical copyrights to be licensed for public performance in the State of Florida are not unreasonable or difficult of compliance.

17. There are a great number of separate performing rights with separate owners of each of such rights. The 1939 Act implies to both dramatico-musical works and musical compositions, A dramatico-musical composition (an opera, operetta or musical comedy) usually includes a great number of separate musical compositions. The entire work is copyrighted as a dramatico-musical composition under Section 5(e) of the Copyright Act and that copyright protects each of the separate musical compositions under Section 3 of the Copyright Act. With respect to compositions included in dramatico-musical works, the Society licenses the performance of separate numbers from such composition when such performances are given in non-dramatic form. The dramatic rights are not granted to the Society. Such rights are usually owned by a number of different persons, each of whom has an interest in the rights of the others. The producer of a musical stage show or a motion picture in which the separate musical compositions are performed is拥有的 dramatico-musical composition (an opera, operetta or musical comedy) usually includes a great number of separate musical compositions. The entire work is copyrighted as a dramatico-musical composition under Section 5(e) of the Copyright Act and that copyright protects each of the separate musical compositions under Section 3 of the Copyright Act. With respect to compositions included in dramatico-musical works, the Society licenses the performance of separate numbers from such composition when such performances are given in non-dramatic form. The dramatic rights are not granted to the Society. Such rights are usually owned by a number of different persons, each of whom has an interest in the rights of the others. The producer of a musical stage show or a motion picture in which the separate musical compositions are performed is usually owned by an entirely different person, who, together with the authors, licenses performances by “stock companies.” The amateur dramatic rights are owned by still another person.

18. The rights granted to the publisher and the rights reserved by the composer and author may not be exercised in such manner as to unduly restrict or suppress the utilities of the dramatic rights for the purpose of protecting the investment of the producer of a stage show or motion picture in which the separate musical compositions restricted are incorporated. The right to restrict numbers is the most valuable right certain composer-and publisher-members of the Society have. All these rights are constantly being licensed in the State of Florida. In many cases, the publisher has an interest in in the dramatic rights and will fix a price for dramatic uses in collaboration with the composer.

19. Complainants and others similarly situated are not willing to permit their musical compositions to be performed within the State of Florida publicly or profit on any basis wherein the price for such performance would not include in the price paid for a copy of the sheet music, phonograph records, music roll, electrical transcription or sound track thereof.

20. The musical compositions of the Society's members and Claimants have for many years past, and are presently being performed within the State of Florida in hotels, dance halls, avenue and motion pictures. The fees paid are not sufficient for the benefit the 410 users within the State of Florida; the object, purpose and effect of the said Statute is to discriminate against, and in fact, confiscate the Complainants' copyrighted musical compositions as well as those of others similarly

Conclusions of Law

1. The 1937 Statute is not a reasonable exercise of the police power of the State of Florida, and the penalties and confiscatory provisions provided for therein are not reasonably necessary to meet any alleged evil; enactment of the said Statute was not necessary to protect, nor does it serve the public interest of the State of Florida; the object, purpose and effect of the said Statute is to benefit the 410 users within the State of Florida; the said Statute discriminates against, and in fact, confiscates the Complainants' copyrighted musical compositions as well as those of others similarly
situating; it is contrary to and hinders carrying out the purpose of Article 1, Section 8 of the Constitution of the United States, and will deter composers, authors and publishers from securing copyright registration of their works.

2. The 1937 Statute is an invasion of Complainants' constitutional rights in the following respects:

(a) It interferes with and destroys the pattern of the Copyright Law by which Congress has endeavored to carry out the purpose of the Constitution to insure uniformity and certainty in the field of copyright.

(b) It denies to Complainants' equal protection of the laws, and by making them presumptively guilty of the criminal provisions therein deny to the Complainants due process of law.

3. Complainants have no adequate remedy at law and are reliable only in this Court of Equity, and if Complainants are not afforded the equitable relief prayed for in the Bill of Complaint and supplemental Bills of Complaint, but are required to resist, when criminal prosecutions and other suits or proceedings are instituted under said State Statutes, it will result in such a multiplicity of suits and entail such delay and so jeopardize and injure Complainants in their persons and property as to make the remedy at law grossly inadequate, and unless an injunctional order is issued, Complainants will be irreparably damaged.

4. Complainants are entitled to an injunction perpetually enjoining and restraining the Defendants and each of them individually and in their capacity as officials of the State of Florida, charged by said State Statute with the enforcement of the provisions thereof, from bringing directly or indirectly any proceeding at law or in equity for the purpose of enforcing said State Statute against the Complainants and others similarly situated, their representatives or agents of any of them, and from interfering with all existing contracts entered into by the Complainants and others, including the Society and citizens and residents of the State of Florida, and from threatening to enforce against any citizen or resident of the State of Florida the penalties of said State Statute, in the event such citizens and residents desire to carry out their contracts with the American Society of Composers, Authors and Publishers, or Complainants, or others similarly situated, and from prosecuting criminally the Complainants, their representatives or agents of any of them or others similarly situated for doing any act or thing to detect infringements and to enforce their respective rights under the Copyright Act in the Federal Court of the State of Florida or elsewhere, and generally from doing any act or thing to carry out or enforce any of the provisions of said State Statutes.

5. The said Statute constitutes an attempt to restrict and to regulate the right of Complainants to the full enjoyment of the exclusive rights granted them by the laws of the United States, generally known as the Copyright Laws.

6. The Court has jurisdiction of this suit.

7. The 1939 Act, based as it is upon the purpose to compel disclosure as to the ownership of copyrighted compositions is, except as to Section 4-a and 4-c, which are not germane to the purpose of the act, for the reasons set out in the opinion, a valid exercise of the police power of the state. Sections 4-a and 4-c of that act are, for the reasons set out in the opinion, invalid as an arbitrary interference with liberty of contract and with the rights granted under the copyright laws. Complainants should have their decree, making the temporary injunction awarded April 5, 1938, against the 1937 Act, permanent and perpetual and the temporary injunction awarded October 30, 1939, against the enforcement of the 1939 Act, modified and made permanent and perpetual as to Sections 4-a and 4-c of that act.

As to the balance of the 1939 Act, the decree should deny plaintiffs the injunction prayed.

Let decree be entered accordingly.

Dated August 5, 1940.

GOVERNOR OF NORTH DAKOTA SPEAKS AT WDAY'S RADIO WEEK

John Moses, Governor of North Dakota, was the headline opener of Radio Week over WDAY, Fargo, Sunday afternoon, August 18. He spoke from the station's Red River Valley fairground studios.

The week's events were planned by Bill Dean, WDAY publicity director, as a combination Radio Festival and celebration for WDAY's grant of increased nighttime power to 5,000 watts. New equipment is to be installed.

Incorporated in Radio Week were LISTEN BEFORE YOU VOTE and LISTEN WHILE YOU DRIVE campaigns.

Included in the opening program were a series of pick ups from fairground locations with the station's new ultra-modern mobile unit and pack transmitter. The entire WDAY program and technical staff took part.

Among special daily programs were "Meet Your Neighbor" and "Do You Know Your Radio?" which covered every department in radio.

All buses throughout Fargo and Moorhead carried big bumper signs calling attention to Radio Week. These were augmented by window displays, street signs and lobby banners.

LISTEN BEFORE YOU VOTE

LISTEN BEFORE YOU VOTE posters are now en route to all NAB members. Shipments included the additional orders which were placed by members up to Tuesday, August 20.

With much earlier than announced delivery, station managers will have ample supply of samples to solicit poster sponsorship. Tens of thousands of additional posters will thus be displayed. Orders are now accumulating for a second run of posters.

Peter Lyman, public relations director, KOMO and KJR, Seattle, called a meeting of all local broadcasters.
for Thursday, August 22, to arrange the details of city wide cooperative efforts behind the “Listen Before You Vote” campaign.

“In addition,” wrote Mr. Lyman, “we are keeping in contact with NAB stations throughout the state, and have so far received encouraging results from them to make this a state wide campaign.”

What people hear over their radio sets between now and November is going to decide the presidential issue. It will pay every station to capitalize on the tremendous national interest which the forthcoming election has generated. Radio, the medium employed to determine the man to lead this nation for the next four years, is the medium for every prospective business concern to use in its own behalf. Because of this angle the campaign is applicable to southern states as well as to east, west and north.

Such realization will be speeded by broadcasters promoting the campaign. There is ample time for everyone to complete their plans along the general lines as discussed in the LISTEN BEFORE YOU VOTE bulletin of July 18. There is also time for stations to get additional supplies of posters needed for a complete tie-in job.

Miscellaneous

AFRA CERTIFIED AT KXOK

The Labor Relations Board has certified AFRA as the sole collective bargaining agency selected by a majority of the staff and free-lance actors, singers, and announcers employed by Star-Times Publishing Company at radio station KXOK, St. Louis, Missouri.

Board action was based upon a secret ballot election held July 31, resulting in an 11 to nothing count in favor of the AFL union.

PUBLIC SERVICE OPPORTUNITY

The United States Committee for the Care of European Children, headed by Marshall Field, is sending out announcements for use in connection with its drive to obtain American homes for European children for the duration of the war.

FEDERAL COMMUNICATIONS COMMISSION

FINAL ORDER

FCC has adopted an Order granting the application of Sharon Herald Broadcasting Company (WPIC), Sharon, Pa., for authority to install a new transmitter and increase power from 250 watts to 1000 watts, operating daytime only on 780 kilocycles.

NEW INTERNATIONAL STATION

Columbia Broadcasting System, Inc., has been granted construction permit by the FCC for a new international broadcast station to be located at Brentwood, N. Y., and use 50 kilowatts, the minimum power required by the Commission necessary for satisfactory international service.

The new station, using 2A emission, will operate on 6060, 9590, 11830, 15270, 17830 and 21520 kilocycles, sharing time on 6060, 9590 and 21520 kilocycles with other stations.

The construction permit by the FCC for a new international broadcast station was issued to Sharon Herald Broadcasting Company (WPIC), Sharon, Pa., for the above frequencies.

The construction permit by the FCC for a new international broadcast station was issued to Sharon Herald Broadcasting Company (WPIC), Sharon, Pa., for the above frequencies.

The construction permit by the FCC for a new international broadcast station was issued to Sharon Herald Broadcasting Company (WPIC), Sharon, Pa., for the above frequencies.

The construction permit by the FCC for a new international broadcast station was issued to Sharon Herald Broadcasting Company (WPIC), Sharon, Pa., for the above frequencies.

The construction permi...
required under provisions of the Communications Act or the Commission's rules. Decision rests with the individual station or the network.

It is mostly in the matter of complaints with reference to broadcasting that the Commission has to advise lack of jurisdiction. The following current cases are typical:

A Toronto, Canada, woman objects to radio commentators who "spread terror by innuendo."

A San Francisco man dislikes the "hysterical broadcasting" of war news by a particular commentator.

A Mason, Ga., man would prohibit networks from carrying news reports originating in Germany.

A Philadelphia man suggests censorship of news and comment by radio and press during "continuation of the present unsettled world conditions."

A New Yorker asks the Commission to make radio stations broadcast a song he has written.

A Bismarck, N. Dak., man wants the Commission to require a network to carry a particular religious broadcast.

An Asheville, N. C., man would require newspapers owning radio stations to publish the programs of competing broadcast stations.

A Philadelphia man thinks he is entitled to a prize from one of the radio contest programs.

**BROADCAST MEASUREMENTS**

In July FCC officials measured 705 broadcast stations, leaving 144 not measured.

Of the total 642 stations showed a maximum deviation within 0-10 cycles; 57 stations maximum deviation within 11-25 cycles; 4 stations maximum deviation within 26-50 cycles; no stations showed a maximum deviation over 20 cycles, while 2 stations showed a maximum deviation over 50 cycles.

**FCC BILL PASSES HOUSE**

The House this week passed H. R. 10205 to amend section 4 (f) of the Communications Act of 1934 as amended to provide for extra compensation for overtime of inspectors in charge and radio inspectors of the Field Division of the Engineering Department of the Federal Communications Commission. There was no discussion.

**FCC RULES OF PRACTICE AMENDED**

FCC has amended Section 1.38 of its Rules of Practice and Procedure by designating the existing rule as subsection (a) and by adding an additional subsection reading as follows:

"(b) No member, officer or employee of the Commission (1) whose active service with the Commission has terminated but who is receiving pay while on annual leave not taken prior to separation from such active service, or (2) who is in any other leave status, shall appear as attorney or participate in the preparation or handling of any matter before, or to be submitted to, the Commission."

**FEDERAL COMMUNICATIONS COMMISSION DOCKET**

Following broadcast hearing is scheduled before the Federal Communications Commission for the week beginning Monday, August 26. It is subject to change.

**FUTURE HEARINGS**

During the past week the Commission has announced the following future broadcast oral arguments. They are subject to change.

**September 26**

Reargument Before the Commission

NEW—The Mayflower Broadcasting Corp., Boston, Mass.—C. P., 1140 kc., 500 watts, 1 KW LS, unlimited time (requests facilities of WAAB).

WAAB—The Yankee Network, Inc., Boston, Mass.—Renewal of license, 1410 kc., 1 KW, unlimited time; and auxiliary, 1110 kc., 500 watts, 1 KW LS. Time: Auxiliary purposes only.

**FEDERAL COMMUNICATIONS COMMISSION ACTION**

There was no regular meeting of the Commission this week.

**MISCELLANEOUS**

WIZE—Radio Voice of Springfield, Inc., Springfield, Ohio.—Granted modification of construction permit for new station, for approval of antenna system, new transmitter, and approval of studio and transmitter site; 1510 kc., 100 watts, unlimited time (B2-MP-1056).

WMPC—The First Methodist Protestant Church of Lapeer, Lapeer, Mich.—Granted modification of license to change name of licensee from The First Methodist Protestant Church of Lapeer to The Liberty Street Gospel Church of Lapeer; 1200 kc., 250 watts, specified hours (B2-ML-1018).

WEGF—Berk's Broadcasting Co. (area of Reading, Pa.), Portable-Mobile.—Granted license to cover construction permit for increase in power to 2 watts and installation of new transmitter (B2-LRE-319).

KFAS—Midnight Sun Broadcasting Co. (area of Fairbanks, Alaska), Portable-Mobile.—Granted license to cover construction permit for new relay broadcast station, frequencies 20820, 35740, 35820, 37980 kc., 2 watts power (B2-LRE-314).

WKEU—Radio Station WKEU, Griffin, Ga.—Granted special temporary authority to operate from 6:45 p. m. to 8:30 p.m., CST, on August 15, 1940, in order to broadcast a political speech by Abil Nix, candidate for Governor.

W2XOY—General Electric Co., Schenectady, N. Y.—Granted special temporary authority to operate W2XOY with 1000-watt amplifier from August 14, 1940, to not later than September 12, 1940, pending completion of manufacturing and installation of the Model 4AF2A1 amplifier as stipulated in construction permit (File No. B1-PNB-112).

WPAY—Chester A. Thompson and The Brush-Moore Newspapers, Inc., Portsmouth, Ohio.—Granted petition to take deposits in re hearing on application for transfer of control of the Bee Bee Corp., licensee of station WPAY; 1370 kc., 100 watts night, 100 watts LS, unlimited time (B2-TC-190).

The Huntsville Times Co., Inc., Huntsville, Ala.—Passed over to August 23 the petition to accept amendment to application for construction permit for new broadcast station to request the facilities of station WBHP; applicant requests 1200 kc., 250 watts night, 250 watts LS, unlimited time (B2-TC-190).

WAUV—Courier-Journal and Louisville Times Co., Louisville, Ky.—Granted license to cover construction permit as modified for new relay broadcast station, frequencies 16140, 2090, 2150, 2830 kc., power 50 watts (B2-LRY-203).

WINX—Lawrence J. Heller, Washington, D. C.—Granted modification of construction permit for new broadcast station, for...
approval of antenna, approval of transmitter and studio sites, and approval of synchronous amplifier site, and change in type of transmitter; 1310 kc., 250 watts, unlimited time, with 50-watt synchronous amplifier (B1-MP-1045).

WEGM—Bamberger Broadcasting Service, Inc., New York, N. Y.—Granted modification of construction permit for local move of transmitter, to change transmitter location from 500 Fifth Ave. to 444 Madison Ave., New York City; add AI emission and extend commencement date from June 8, 1940, to 90 days after grant, and completion date from December 8, 1940, to 150 days thereafter (B1-MPRE-45).

WEAF—National Broadcasting Co., Inc., New York, N. Y.—Granted modification of construction permit as modified for move of transmitter, installation of directional antenna, and changes in equipment, for extension of completion date from September 6, 1940, to November 6, 1940.

WJAR—The Outlet Co., Providence, R. I.—Construction permit to increase power from 1 KW night, 5 KW day and night, and install directional antenna for night use. Class III-A station.

The Mayflower Broadcasting Corp. and The Yankee Network, Inc., Boston, Mass.—Scheduled for reargument on September 26, 1940, in re applications of The Mayflower Broadcasting Corp. for construction permit for new broadcast station and The Yankee Network, Inc., for renewal of license of station WAAB.

APPLICATIONS FILED AT FCC

620 Kilocycles

WLBZ—Maine Broadcasting Co., Inc., Bangor, Maine.—Construction permit to increase power to 500 watts night, 1 KW day, to 5 KW day and night, and install new equipment and directional antenna for day and night use. Class III-A station.

660 Kilocycles

WEAF—National Broadcasting Co., Inc., New York, N. Y.—Modification of construction permit (B1-P-2339) as modified for move of transmitter, installation of directional antenna, equipment changes, requesting extension of completion date from 9-6-40 to 11-6-40.

690 Kilocycles

NEW—Fred Jones, Mary Eddy Jones, and W. E. Hightower, d/b as Fred Jones Broadcasting Co., Tuska, Okla.—Construction permit for a new broadcast station to be operated on 690 kc., 50 KW, unlimited time. Class II station (contingent on Havana Treaty), directional antenna day and night.

890 Kilocycles

WBAU—Purdue University, W. Lafayette, Ind.—Construction permit to install new transmitter; make changes in antenna; change hours of operation from specified to unlimited time; increase power from 500 watts night, 1 KW day, to 1 KW night, 5 KW day; move transmitter from West Lafayette to north of Romney, Wea Twp., Ind., directional antenna for night use; request Class III-B station. Amended. To change type of transmitter.

KTDC—Tulare-Kings Counties Radio Associates (Chas. A. Whitmore, Pres.), Visalia, Calif.—Modification of license to change the licensee from an unincorporated association to a partnership. No change in name. Amended to give name of partnership as J. E. Richmond, Percy M. Whiteside, Homer W. Wood and Visalia Publishing Co., d/b as Tulare-Kings Counties Radio Associates.

WJAR—The Outlet Co., Providence, R. I.—Construction permit to increase power from 1 KW night, 5 KW day, to 5 KW day and night, and make change in directional antenna (directional antenna day and night use), and move transmitter. Amended re antenna changes.

930 Kilocycles

WBRC—Birmingham Broadcasting Co., Inc., Birmingham, Ala.—Construction permit to increase power from 1 KW night, 5 KW day, to 5 KW day and night, and install directional antenna for night use. Class III-A station.
of license from Leland M. Perry & Harold Johnson, d/b as Johnson & Perry, a partnership, by Leland M. Perry and May Wright Johnson, Adm. to Southern Utah Broadcast-

WFRH—William F. Huffman, Wisconsin Rapids, Wisc.—Modification of construction permit (B4-P-1902) for a new station requesting approval of antenna system, new transmitter, studio site and transmitter site.

WDAC—L. J. Duncan, Lella A. Duncan, Josephine A. Keith, Effie H. Allen, Aubrey Gay, d/b as Valley Broadcasting Co., West Point, Ga.—Authority to determine operating power by direct measurement of antenna power.

1330 Kilocycles

WDRC—WDRC, Incorporated, Hartford, Conn.—Authority to determine operating power by direct measurement of antenna power.

WDRC—WDRC, Incorporated, Hartford, Conn.—License to cover construction permit (B1-P-2223) as modified, to install directional antenna for day and night use, and increase power.

1340 Kilocycles

WPAB—Portorican American Broadcasting Co., Inc., Ponce, P. R.—License to cover construction permit (B-P-2389) as modified, for a new broadcast station.

WPAB—Portorican American Broadcasting Co., Inc., Ponce, P. R.—Authority to determine operating power by direct measurement of antenna power.

WSPD—The Fort Industry Co., Toledo, Ohio.—License to cover construction permit for a new broadcast station to be operated on 43900 kc.; coverage, 16,030 square miles; population coverage, 5,641,981.

NEW—Dorman Schaeffer, Klamath Falls, Ore.—Construction permit for a new broadcast station to be operated on 43900 kc.; coverage, 16,030 square miles; population coverage, 5,641,981.

NEW—Capitol Broadcasting Co., Inc., Schenectady, N. Y.—Construction permit for a new high frequency broadcast station to be operated on 43900 kc.; coverage, 16,030 square miles; population coverage, 5,641,981.

NEW—Radio Service Corporation of Utah, Salt Lake City, Utah.—Modification of construction permit (B2-P-2879) for a new station, requesting change in type of transmitter.

1370 Kilocycles

WTMC—Ocala Broadcasting Co., Inc., Ocala, Fla.—Authority to transfer control of corporation from John T. Alsop, Jr., to News-Journal Company, 101 shares.

WSLS—Roanoke Broadcasting Corp., Roanoke, Va.—Modification of construction permit (B2-P-2879) for a new station, requesting approval of antenna system and approval of transmitter site.

KSAI—KSAI, Inc., Salina, Kans.—Construction permit to increase power from 500 watts night, 1 KW day, to 1 KW day and night, and make changes in directional antenna system. Amended: To make changes in directional antenna system and request Class III-A station.

WBOC—The Peninsula Broadcasting Co., near Salisbury, Md.—Modification of construction permit (B1-P-2713) for a new station requesting approval of antenna and approval of transmitter and studio sites at U. S. Route No. 13, outside city limits of Salisbury.

WMJM—Cordele Dispatch Publishing Co., Inc., Cordele, Ga.—Modification of construction permit (B3-P-2384) as modified, for a new station, requesting change in type of transmitter.

1530 Kilocycles

WAKR—Summit Radio Corp., Akron, Ohio.—Modification of construction permit (B2-P-2879-14) as modified, for changes in transmitter, antenna and move of transmitter, approval of studio site, extend commencement date to date of grant and completion date to 60 days thereafter.

FM APPLICATIONS

NEW—The Journal Company (The Milwaukee Journal), Milwaukee, Wis.—Construction permit for a new high frequency broadcast station to be operated on 43900 kc.; coverage, 15,642 square miles; population coverage, 2,168,091. Amended to change frequency to 43100 kc.

NEW—Walker & Downing Radio Corp., Pittsburgh, Pa.—Construction permit for a new high frequency broadcast station to be operated on 43500 kc.; coverage, 8,400 square miles; population coverage, 2,100,000.

NEW—John Lord Booth, Detroit, Mich.—Construction permit for a new high frequency broadcast station to be operated on 44100 kc.; coverage, 4,400 square miles; population coverage, 2,514,753.

NEW—The Evening News Assn., Detroit, Mich.—Construction permit for a new high frequency broadcast station to be operated on 43100 kc.; coverage, 25,280 square miles; population coverage, 5,641,981.

NEW—General Electric Co., Schenectady, N. Y.—Construction permit for a new high frequency broadcast station to be operated on 43900 kc.; coverage, 16,030 square miles; population coverage, 5,641,981.

NEW—Zenith Radio Corp., Chicago, Ill.—Construction permit for a new high frequency broadcast station to be operated on 43500 kc.; coverage, 10,760 square miles; population coverage, 6,502,594.

NEW—Columbia Broadcasting System, Inc., Chicago, Ill.—Transmission permit for the new television broadcast station to be operated on Channel 3, 66000-72000 kc., 1000 watts visual and aural, emission A3 and AS.

NEW—University of Illinois, South of Champaign, Ill.—Construction permit for a new relay broadcast station to be operated on 44100 kc.; coverage, 4,400 square miles; population coverage, 194,102.

NEW—Columbia Broadcasting System, Inc., Los Angeles, Calif.—Construction permit for a new television broadcast station to be operated on Channel 3, 66000-72000 kc., 1000 watts visual and audio, emission A3 and AS.

NEW—Television Productions, Inc., Portable-Mobile (area of Los Angeles, Calif.).—Construction permit for a new relay television broadcast station to be operated on Channels 9 and 10, 186000-186000 and 186000-192000 kc., 200 watts visual, emission A5. (To be used with new television station B5-PVB-33, granted 8-5-40).

NEW—Warner Brothers, Inc., Hollywood, Calif.—Construction permit for a new television relay broadcast station to be operated on Channels 9 and 10, 186000-186000 and 186000-192000 kc., 200 watts visual, emission A5. (To be used with new television station B5-PVB-33, granted 8-5-40).
Federal Trade Commission Action

COMPLAINTS

Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Associated Denver Tailors—See Associated Tailors.

Associated Tailors—Harry Hindlemann, trading as Associated Tailors and as Associated Denver Tailors, 1745 Champa St., Denver, Colo., is charged in a complaint with the dissemination of misleading representations in the sale of men’s suits and coats.

The respondent, by means of radio broadcasts, circulars, letters, folders and samples of material, allegedly misrepresents that he sells custom made men’s suits; that the suits are carefully cut and tailored to individual measurements and made with up-to-date patterns of imported fabrics and up-to-date linings and finishings, and that the quality of his materials and tailoring is equal to that obtained in custom made suits of high quality and price.

It is further alleged in the complaint that the respondents are Maine Spinning Company, Skowhegan, Me., and Old Colony Knitting Mills, Inc., Hingham, Mass.

According to the complaint, the Maine Spinning Company represents that certain of its yarns are made of material imported from the British Isles, and are made in whole or in part of genuine Shetland wool. Such representations have been allegedly made to the Old Colony Knitting Mills, Inc., among others, in connection with the sale to it by the Maine Spinning Company of certain yarn which is used in the manufacture of sweaters. These sweaters are then allegedly represented by the Old Colony Knitting Mills, Inc., to be manufactured from imported yarns made of a blend of Scotch wool and Shetland wool, and from yarn made of genuine Shetland wool.

In truth, the complaint charges, comparatively few offensive breath odors arise from decayed food particles in the mouth and that Listerine Antiseptic in no way affects the usual sources of halitosis. (4232)

Masterkraft Guild Weavers, Inc., Asia Mohi Company, Ltd., and C. James Garofalo, president of both corporations, 295 Fifth Ave., New York, New York, allegedly misrepresent, by means of designsations such as “Hong Kong” and “Canton,” that certain of their sweaters are true genuine Chinese Oriental sweaters, and by designations such as “Noh,” “Kirma,” “Numda” and “Numda,” that certain of their sweaters are true genuine Chinese Oriental sweaters, and that such of these sweaters are true genuine Chinese Oriental sweaters. (4236)
The respondents further allegedly represent that certain of their rugs are reproductions and copies, except as to material, of true Oriental, Chinese Oriental, and Indian "Numdah" rugs, when in truth such rugs merely simulate them in appearance.

The complaint further charges that the respondents, by naming certain of their rugs "Chatham," "Dixie," "New Cape Colony" and "Old Cabin," represent that such products were made in the United States, when in truth they are of foreign origin.

Further alleged misrepresentations made by the respondents are that certain of the rugs sold by them were manufactured by the Masterkraft Guild Weavers, Inc.; that the Masterkraft Guild Weavers, Inc., is an association of weavers established for mutual aid in carrying out a common purpose; that certain of their rugs have been approved and accepted by a disinterested, independent agency qualified to pass judgment on such matters, and that the use of the name "Wool-Tex," that other of their rugs are composed wholly of wool. (4237)

Old Colony Knitting Mills, Inc.—See Maine Spinning Company.

Parr Sales Company—Mitchell F. Brice, trading as Parr Sales Company, Vidalia, Ga., buying agent in the purchase of general merchandise, particularly foodstuffs, on behalf of the Tanner-Brice Company, Inc., is charged such a complaint, with violation of the brokerage paragraph of the Robinson-Patman Act. Mitchell F. Brice allegedly owns and controls 83 per cent of the outstanding capital stock, and actively manages and conducts the business of the Tanner-Brice Company, Inc.

According to the complaint, Tanner-Brice Company, Inc., places orders for its merchandise with sellers through the Parr Sales Company. Since June 19, 1936, the Parr Sales Company has accepted from the sellers brokerage fees and commissions which represented a certain percentage (usually from 2 1/2 per cent to 5 per cent) of the sales prices of such purchases.

It is charged in the complaint that the payment of brokerage fees and commissions by sellers to the respondent Mitchell F. Brice as a member of the brokerage firm trading as the Parr Sales Company, and the acceptance of such brokerage fees and commissions by the respondent upon the purchases of the Tanner-Brice Company, Inc., is in violation of subsection (c) of Section 2 of the Clayton Act as amended by the Robinson-Patman Act. (4233)

Stetson Felt Mills—Meyer Dorfman and Arthur Cohler, trading as Stetson Felt Mills, 223 East 4th St., St. Paul, Minn., are charged with a complaint in which they are alleged to be misleading representations in the sale of felt rugs and felt pillows.

According to the complaint, the respondents misleadingly represent that they are affiliated with the John B. Stetson Company of Philadelphia and that their rugs and pillows are made from felt trimmings obtained from this widely known felt hat manufacturing concern.

The respondents further allegedly misrepresent that their rugs and pillows are fire-proof; that they are hand-made; and that the rugs and pillows shipped to purchasers will be of the grade and quality of the samples displayed.

It is further charged in the complaint that the respondents and their salesmen have adopted the practice of "padding" orders given them orally by purchasers by stating in the written order blank a quantity of goods greatly in excess of that actually contracted for by a particular purchaser, and then have attempted to collect larger sums of money than such purchasers originally agreed to pay, by threats to sue and other forms of intimidation. (4234)

Wood & Hyde Company, Gловсвилл, N. Y., is charged in a complaint with the dissemination of misleading representations in the sale of capeskin and cabretta glove leathers.

According to the complaint, the respondent company specializes in the tanning and manufacture of capeskin and cabretta glove leathers produced from sheepskins and sells the skins to various glove manufacturers.

In the complaint, the respondent alleges that the inferior quality of its capeskin and cabretta leathers, the complaint alleges, due to the inferior methods of processing and tanning, had a heavy and coarse appearance, but about five years ago, the respondent began tanning such skins by an improved and secret process which produces a leather so similar in appearance to that of kid that only experts can distinguish gloves made of such leather from those made of genuine kid.

Each piece of leather sold and shipped to a glove manufacturer allegedly bears the label "KinKid," and glove manufacturers using the respondent's glove leathers are supplied with KinKid transfer stamps to be used in stamping the name "KinKid" on the inside of gloves manufactured from such products. It is further charged that KinKid leathers and gloves are marketed with no indication that they are produced from sheepskins and are not true kidskins.

It is further alleged that the use of the trade name "KinKid" by the respondent in describing its leathers and gloves produced from the skins of sheep misleads the consuming public into the erroneous belief that such gloves are made from genuine kid-skin. (4235)

STIPULATIONS

Following stipulations have been entered into by the Commission:

Anthony Brice—H. S. Bird, trading as Anthony Brice, 179 Sidney St., Cambridge, Mass., agrees to cease representing that his device known as "Vac-U-Massage Cup," "Vacu-Bell No. 1," and "Vac-Bell No. 2," enables one to massage all parts of the scalp; is a competent remedy or effective treatment for baldness or falling hair; has any therapeutic value in excess of a massage medium resulting in increased cutaneous circulation, or aids in the removal of surplus fat from the body. (02621)

Bridgewater Workers Cooperative Association, Inc., Bridgewater, Mass., has entered into a stipulation in which it agrees to discontinue certain representations in the sale of shoes to cancellation shoe stores.

The respondent agrees to cease designating its product with the name or private brand of well-known advertised products of shoe manufacturers or shoe dealers so as to convey the belief to purchasers that the product is in fact such a well-known advertised article.

The respondent further stipulates that it will discontinue use of the words "Lord Kent English Custom Shoes" as descriptive of domestically made, machine-manufactured shoes; that it is fraudulent to imply that they are of English make or are English custom shoes; and that it is fraudulent to use the words "Stetson Quality Shoes" or the word "Stetson" so as to convey the belief to purchasers that its shoes are products made by or for or in accordance with the standards and specifications of the Stetson Shoe Co., Inc.

It was also stipulated by the respondent that it will desist from use of a price figure, the amount of which purports to be the retail selling price of shoes, when in fact, such indicated retail selling price is fictitious or much in excess of the price customarily asked for the shoes in the usual course of retail trade. (2906)

El Dorado Hatchery—J. M. Atkinson, trading as El Dorado Hatchery, El Dorado Springs, Mo., agrees to desist from stating directly or by implication, that chicks which are lost within 14 days after delivery will be replaced without cost to the purchaser, when such is not the fact. (02622)

Embassy-Fairfax Dairy, Inc., 530 Seventh St., S. E., Washington, D. C., agrees to cease using the word "Guernsey" either alone or in connection with the word "milk" so as to imply that their product has been obtained exclusively from Guernsey cows. If, according to the stipulation, its product is composed in substantial part of milk obtained from Guernsey cows and in part of milk obtained from other cows, and the word "Guernsey" is used, then the fact that such milk is composed in part of milk obtained from other than Guernsey cows shall be made to appear conspicuously. (2905)

James & Harwell, Inc., 1511 Chapman St., Houston, Tex., agrees to cease representing that polished rice is without substantial food value; that the nutritional value of its Uncle Ben's Rice is far superior to that of polished rice and contains all necessary food properties; that the nutritive elements of Uncle Ben's Rice are more nearly those of brown than polished rice, and that due to "Natural Milling," its rice has more nourishment. (02617)
Treasure Research—Findley Haile, trading as Treasure Research, San Bernardino, Calif., has entered into a stipulation with the Federal Trade Commission in which he agrees to discontinue certain representations in the sale of an instrument known as Aztec Mercuroid Earth Needle recommended for locating gold, gold ore, silver, silver ore and buried treasure.

According to the stipulation, the respondent agrees to cease representing that his device will enable one to locate gold, gold ore, silver, silver ore, other veins of ore, and buried treasure.

The Commission's order prohibits the respondent from representing that he is a manufacturer, or that he manufactures any of the products sold by him.

The order further forbids representations by the respondent that the prices at which his products are offered for sale constitute special or reduced "clearance sale" prices, when they are in fact the customary and usual prices at which such products are sold in the normal course of business.

The respondent was also forbidden to represent, by the use of purported samples or otherwise, that his products are of a quality or value different from the actual quality or value of such products. (3410)

Monarch China Company—R. Frank Yancey, trading as The Monarch China Company, 701 Chestnut St., Greensboro, N. C., has been ordered to discontinue the dissemination of misleading representations in the sale and distribution of earthenware products including dinnerware sets designated by the respondent as "china.

The Commission's order prohibits the respondent from representing that his device is capable of increasing the power of the motor; that its use eliminates spark plug trouble and saves the user oil and gasoline; that its users are able to drive up to 2,500 miles or more on a change of oil; that the use of his device reduces carbon and makes easier starting for the motor; that manufacturers of automobiles and gasoline motors have neglected the advancement and development of the ignition systems and that his product puts the ignition system in keeping with the other improvements made in motors; that an offer made to purchasers and prospective purchasers of automobiles and gasoline motors has neglected the advancement and development of the ignition systems and that his product puts the ignition system in keeping with the other improvements made in motors; that an offer made to purchasers and prospective purchasers is a special thirty day offer which will expire at the end of that time and is more advantageous than that generally made, and that his device is approved and endorsed by a recognized automotive association which is equipped with laboratories for testing and approving various automotive equipment.

The Commission's order prohibits the respondent from making these representations and from using the name "Stromberg" or any other name similar in spelling or phonetic sound, as a trade name for doing business or as a brand name in designating his product. (4064)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders during the past week:

Lambert Pharmacal Company, St. Louis, has been ordered to cease and desist from violating the Robinson-Patman Act in the sale of its “Listerine Antiseptic” and allied products by allowing to certain customers compensation for sales services or facilities furnished by them without making such payments available on proportionally equal terms to all other competing buyers of the Lambert products.

Commission findings are that the respondent company granted to certain wholesalers and retailers compensation for either carrying warehouse stocks or furnishing selling services and facilities, or both, as follows:

To one group of wholesalers, a sum equal to 10 per cent of the respondent’s net billing prices of Lambert products sold by such wholesalers during the previous month.

To another group of wholesalers, five per cent of the previous month’s purchases.

To a group of retailers, 10 per cent of the previous month’s purchases.

To another group of retailers, for services and facilities less extensive than those supplied by the 10 per cent retailers, a sum equal to five per cent of the previous month’s purchases.

It was found that the respondent corporation failed and refused to make available or pay compensation for similar services and facilities offered by other wholesalers and retailers competing with those dealers receiving the Lambert company’s compensations. It was further found that some of the respondent corporation’s customers who received compensation equal to five per cent of the previous month’s purchases claimed that they were able and willing to furnish services and facilities for which the Lambert company paid their competitors 10 per cent of their previous month’s purchases, but that the respondent corporation refused to accept their offers or to pay them the 10 per cent compensation.

In failing and refusing to pay the compensation requested in these instances, the respondent corporation, according to findings, failed to make such compensation available to all of its customers competing in the distribution of its commodities, on proportionally equal terms, thereby violating section 2 (d) of the Clayton Act, as amended by the Robinson-Patman Act.

The Commission’s order specifically forbids the granting or allowing of the 10 and 5 per cent compensations to the wholesale and retail groups aforementioned unless such payments are made on proportionally equal terms to all competing buyers. The order also generally prohibits the allowing of any compensation to any customer for services or facilities furnished, unless such payments are made on proportionally equal terms to all competing buyers.

The Commission’s case relates to operation of the respondent corporation’s plan as it was in effect on March 29, 1939, the date of the Commission’s complaint. (3749)

Monarch China Company—R. Frank Yancey, trading as The Monarch China Company, 701 Chestnut St., Greensboro, N. C., has been ordered to discontinue the dissemination of misleading representations in the sale and distribution of earthenware products including dinnerware sets designated by the respondent as "china.

The Commission’s order prohibits the respondent from representing that his device is capable of increasing the power of the motor; that its use eliminates spark plug trouble and saves the user oil and gasoline; that its users are able to drive up to 2,500 miles or more on a change of oil; that the use of his device reduces carbon and makes easier starting for the motor; that manufacturers of automobiles and gasoline motors have neglected the advancement and development of the ignition systems and that his product puts the ignition system in keeping with the other improvements made in motors; that an offer made to purchasers and prospective purchasers is a special thirty day offer which will expire at the end of that time and is more advantageous than that generally made, and that his device is approved and endorsed by a recognized automotive association which is equipped with laboratories for testing and approving various automotive equipment.

The Commission’s order prohibits the respondent from making these representations and from using the name "Stromberg" or any other name similar in spelling or phonetic sound, as a trade name for doing business or as a brand name in designating his product. (4064)

Trippe Manufacturing Company, 564 West Adams St., and Trippe Sales Company, 600 West Jackson Boulevard, Chicago, were ordered to discontinue certain misleading representations in the sale of an electric auxiliary light known as "Trippe Safety Light" and "Trippe Speed Light."

The order forbids representations by the respondents that their light will penetrate and conquer fog, regardless of its density; that fog close to the ground is thin and less dense in all cases, or that their light cuts under and stays under the fog blanket in all cases.

Further representations forbidden by the order are that the respondents' light gives adequate illumination in fog, rain, mist or snow, regardless of the density, or that it affords the user 1,000 feet of visibility ahead under all conditions.

The order also prohibits the respondents from making claims that their light has been used or used by the United States Coast Guard officially, or by any other agency of the United States Government. (4037)

Trippe Sales Company—See Trippe Manufacturing Company.
THE WEEK IN WASHINGTON

Senator Tobey (R-N. H.) introduced a resolution calling for a Senate investigation of the FCC and the broadcasting industry, after long hearings on confirmation of Thad H. Brown for reappointment to the FCC. Confirmation of the Brown reappointment is still in the Senate Interstate Commerce Committee. (p. 4541.)

The House approved and sent to the Senate an excess-profits tax bill which the chairmen of the NAB legislative and accounting committees are studying. (p. 4542.)

A BMI tune made the Hit Parade last week. Name bands are making increased use of BMI music. (p. 4542.)

The NAB-Radio Council Survey of children’s programs is continuing. Mrs. Lewis is starting on a trip to the West Coast. (p. 4543.)

The Code Committee has advised two New Orleans stations that the Code does not require acceptance of “better business bureau” advice. (p. 4543.)

The American Civil Liberties Union asks that all foreign language broadcasts be transcribed. (p. 4546.)

The Radio Manufacturers Association is cooperating with the NAB in obtaining set advertising for radio. (p. 4545.)

Chairman Fly of the FCC discusses movies, television and his proposed Defense Committee at a press conference. (p. 4547.)

Legislation

TOBEY ASKS BROADCASTING INVESTIGATION

Senator Tobey (R-N. H.) has introduced S. Res. 300 calling for an investigation “of any monopoly in radio broadcasting” and also of the FCC.

The resolution, which has been referred to the Senate Committee on Interstate Commerce, is as follows:

“Resolved, That the Committee on Interstate Commerce, or any duly authorized subcommittee thereof, is authorized and directed to make and complete investigation with respect to (1) the existence, extent, formation, legality, and effect upon the public or any individual or group, of any monopoly in radio broadcasting or any phase thereof or in the production, sale, or distribution of radio receiving or broadcasting apparatus; (2) the administration by the Federal Communications Commission of those provisions of the Communications Act of 1934, as amended, which relate in any manner to radio communication; (3) the manner of exercise by licensees of the Federal Communications Commission of the privileges conferred upon them by their licenses from the Federal Communications Commission; (4) the effect upon the public interest of any contract pertaining to radio to which any such license or any broadcasting network is a party; and (5) any attempts made by any such licensee, broadcasting network, or any person, company, or corporation engaged in any business relating to radio, or by any attorney, agent, or representative of any such licensee, network, person, company, or corporation, to unduly influence any public official in the exercise of his duties with respect to any matter pertaining to radio. The committee shall report to the Senate, at the earliest practicable date, the results of its investigation, together with its recommendations, if any, for necessary legislation.

“For the purposes of this resolution, the committee, or any duly authorized subcommittee thereof, is authorized to hold such hearings, to sit and act at such times and places during the sessions, recesses, and adjourned periods of the Seventy-sixth and succeeding Congresses, to employ such clerical and other assistants, to require by subpoena or otherwise the attendance of such witnesses and the production of such correspondence, books, papers, and documents, to administer such oaths, to take such testimony, and to make such expenditures as it deems advisable. The cost of stenographic services to report such hearings shall not be in excess of 25 cents per hundred words. The expenses of the committee, which shall not exceed $25,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman.”

Introduction of the resolution followed the hearing on the confirmation of Thad H. Brown’s reappointment to the FCC. No vote was taken on a report on confirmation at a meeting Thursday of the Interstate Commerce Committee. The committee adjourned subject to the call of Chairman Wheeler (D-Mont.) after an hour and a half’s discussion.

TOBEY QUESTIONS FCC

A letter was sent last week to each member of the FCC by Senator Tobey (R-N.H) asking for specific information as follows:

In going into the matters in connection with the hearing pending before the Interstate Commerce Committee regarding radio matters, there has come to me information that some members of the Federal Communications Commission have in the past received perquisites, gifts, favors or emoluments of one kind or another from either a radio station, one or more of the broadcasting

(Continued on page 4542)

August 30, 1940 — 4541
TOBEY QUESTIONS FCC
(Continued from page 4541)

companies or systems, or R.C.A., or from officials of the foregoing, these sometimes taking the form of expenses being paid to different places, sometimes gifts of radio or television instruments, and other things.

I now write to ask if you will kindly advise me whether or not you have received any such favors, perquisites or gifts, and if so, will you kindly state the nature of these and the number in detail.

I am writing this letter to each member of the Commission in an entirely impersonal way, but to the end that this information may be secured.

Senator Tobey also sent a separate letter to Chairman Fly asking for substantially the same information about employees of the Commission.

EXCESS PROFITS TAX

Chairman Doughton (D-N.C.) of the Ways and Means Committee, introduced a bill in the House Tuesday, August 27, which provides for (1) Excess Profits Tax, (2) 5-year amortization of plant and facilities occasioned by national defense activities, (3) suspension of profit limiting provision of the Vinson Act, and (4) amendments to Internal Revenue code.

The report of the Ways and Means Committee on the bill was read to the House on August 28 and the House approved the bill on August 29. It then went to the Senate.

The portion of the bill of interest to broadcasters is that of the Excess Profits Tax. The purpose of the tax is to eliminate during the period of national defense activities the amassing of war profits as was experienced in connection with the last war.

In applying the tax, corporations may select either of two methods in determining normal profits as a credit against excess profits. The first of these is the use of incorporate earnings during the period 1936 through 1939 to determine average profits. Earnings above this average would be subject to the Excess Profits Tax. The second method would be based on invested capital in the corporation, allowing a maximum of 10 per cent profit but mode definitely the per cent to invested capital which average earnings represent for the period 1936 through 1939. In both cases, an exemption of $5,000 increase in earnings will be permitted. In the case of corporations beginning operations after 1936, the invested capital method must be used. The rates of tax on the two methods are as follows:

<table>
<thead>
<tr>
<th>Amount of Excess Profits</th>
<th>Rates of Tax</th>
</tr>
</thead>
<tbody>
<tr>
<td>First $20,000</td>
<td>25%</td>
</tr>
<tr>
<td>Next $30,000</td>
<td>20%</td>
</tr>
<tr>
<td>Next $50,000</td>
<td>30%</td>
</tr>
<tr>
<td>Next $150,000</td>
<td>35%</td>
</tr>
<tr>
<td>Next $250,000</td>
<td>40%</td>
</tr>
<tr>
<td>All over $500,000</td>
<td>45%</td>
</tr>
</tbody>
</table>

* In addition to the higher tax rate on the average earnings method, there is also an increase of 4.1 per cent in the normal corporation tax.

John Kennedy, Chairman of the NAB Legislative Committee, and C. T. Lucy, Chairman of the NAB Accounting Committee, are studying the provisions of the Excess Profits Tax Bill to determine whether it will be necessary for the NAB to take part in the Senate hearings which Senator Pat Harrison, Chairman of the Senate Finance Committee, has announced will be held next week after the bill is sent to the Senate.

BMI DEVELOPMENTS

BMI FEATURE TUNES
September 2-9

1. THE SAME OLD STORY
2. PRACTICE MAKES PERFECT
3. THERE I GO
4. MADAME WILL DROP HER SHawl
5. SWINGIN' AT THE SEANCE
6. WE COULD MAKE SUCH BEAUTIFUL MUSIC

The first BMI song to appear on the Lucky Strike Hit Parade was Practice Makes Perfect (August 24th). It is thus stamped as one of the ten most popular tunes in the country. It is being further buttressed in popularity by Kay Kyser's "Kollege of Musical Knowledge" and Ted Weems' "Beat the Band" program and other hit-spotting schedules.

This week it is tied for first place on Variety's list of the numbers most often played with a score of 36. The Same Old Story appears a little further down with 21, followed by We Could Make Such Beautiful Music, showing up for the eighth week, with 19, and There I Go with 16. Because the latter has taken such a grip on the public it has been moved up into third place on BMI's own feature list, and because Beautiful Music is holding on so remarkably it is once more added to the list.

Madame Will Drop Her Shawl and Swingin' at the Seance, two of the newer numbers, are beginning to make talk about themselves and they are destined for the hit lists along with the rest of the current feature tunes.
“Don Roberts,” who is credited with the words for *Practice Makes Perfect*, is a mythical person, a combination of Don McCray and Robert Sour, who have written so many other successful BMI songs. Bob Sour is not a newcomer in the ranks of leading hits. He wrote the lyrics for the sensational success, *Body and Soul*, a few years ago.

BMI subscribers will also recognize the name of Ernest Gold, the composer of *Practice Makes Perfect*, who also wrote *Here In The Velvet Night*, *Pied Piper, Jr.*, and a number of other BMI tunes. He is the brilliant young nineteen-year-old whose first song was published this spring by BMI.

Still they come! BMI welcomes to its list of subscribers two more stations:

WSIX, Nashville, Tennessee.
KAND, Corsicana, Texas.

Tommy Dorsey has been creating a sensation with his Amateur Songwriters’ Contest. The conditions of the contest provide that each song submitted must be written by persons who have never before written words or music of a professionally published song. Three songs each week are being performed by Tommy Dorsey and receive prizes of $25, $15, and $10 respectively. In addition, the first prize song of each week is to be published by BMI, which has the right to publish any song submitted if it so desires.

Manuscripts have poured in by thousands from every State in the Union. In response to requests, more than 3,000 application blanks have been mailed out in a single day. Twenty-five people examining the manuscripts have not been able to keep up with the incoming mail.

The program, which has been on WEAF on Saturdays from 5 to 6 p.m., has been so remarkably successful in attracting interest that it has now acquired a sponsor, the Lewis Howe Co. of St. Louis, Missouri. Beginning on October 3rd it will be carried by NBC at 9 p.m., following the *Pot of Gold* program. In its new spot the program is to be known as *Fame and Fortune*.

The winning songs for the first five weeks, which will be published by BMI, are the following:

*Why Am I Still Dreaming*, by Mabel Toole,
*At Last a Little Love*, by Charles O’Neil and Joseph L. Peluso,
*Falling in Love*, by Jack Simmons and John Antrim,
*Often*, by Arnold Sucherman,
*The Thoughtless Things I Do*, by Judy Park.

RCA-Victor releases on August 30, a recording by Dick Todd of *We’re All Americans, All True Blue*, by James T. Mangan (record number, B-10840). This number is published by the Bell Music Company, but BMI has acquired the performance rights. Mr. Mangan is Director of Advertising and Merchandising for the Mills Novelty Company of Chicago, one of the large manufacturers of automatic phonographs, and is well known throughout the industry. His song is the first popular number of the patriotic type to go into the BMI catalogue.

BMI has received strong and welcome evidence of the concern of the automatic phonograph industry in the effort to create an open and competitive market for music and of the desire of phonograph operators to have BMI music made available to them in record form. The number of such records is now growing every week and will be greatly strengthened by this new patriotic number.

A list of all phonograph records of BMI music obtainable in the retail shops is to be given out shortly for the information of BMI subscribers.

### The Code

**NAB RADIO COUNCIL SURVEY OF CHILDREN’S PROGRAMS**

Continuing the field survey in 44 states begun last spring in conjunction with the Radio Council on Children’s Programs, Mrs. Dorothy Lewis, vice chairman, former advertising agency writer, and nationally known club woman, starts on a journey September 9 that will take her to stations through the mid-west, far west, Pacific Coast, Texas and the southwest, returning through the southern states to complete her trip December 20 reporting to NAB headquarters.

The Radio Council on Children’s Programs was set up voluntarily last year by the outstanding women’s, teacher and library organizations to cooperate with NAB in the improvement of children’s programs as outlined in the NAB Code. Stations visited are very high in their praise of Mrs. Lewis and her work. She is interested in securing from each station a report on their experience with children’s programs, especially from the standpoint of the children’s own reaction. She is likewise interested in merchandising tactics which have been successful in this field. The result of her findings will be made available next winter to advertising agencies and clients. The Radio Council, a non-profit, public service organization, is prepared to throw its full support to commercially sponsored radio programs which conform to the standards for children’s programs set up in the NAB Code. Further information about the Council may be found in the NAB Code Manual.

Where local women and civic clubs have not already set up luncheon meetings or conferences, stations in the same city have found it most helpful to arrange such
luncheons themselves. This is a matter of course, subject to individual station desires.

Below we publish the itinerary of Mrs. Lewis which has just come to us from the RCCP:

**SCHEDULE—FALL TRIP—1940—RADIO SURVEY**

**Note:** Where conferences are indicated, it is expected that all Radio Chairmen of women's organizations, educators, children's librarians, representatives of advertising agencies and nearby Radio Stations, sponsors and prospect sponsors of children's programs, will attend. A local club woman will act as chairman and cooperate with the local station managers in arranging the meeting. Each luncheon should include its own lunch or dinner, except where the station makes it a practice to hold such meetings and might wish to use this occasion for one of them, acting as host.

September 10, Tuesday.—Buffalo. Noon Conference. P. M. to Cleveland.

Buffalo Conference Chairman, Mrs. Frank Messenger, Town Club, Town Club, Buffalo, N. Y., cooperating with the New England Women.

September 11, Wednesday.—A. M. Survey stations in Cleveland. P. M. Meeting with address. D. A. R. Chapter.

Cleveland Conference Chairman, Mrs. Charles Dickey Dyer, 2851 Berkshire Road, Cleveland Heights, Ohio, and New England Women's Society.

September 12, Thursday.—A. M. Survey, continued. Noon Conference—Representatives from stations in Akron, Canton and Youngstown. P. M. to Toledo.

September 13, Friday.—A. M. Survey stations, Toledo. Noon Conference. P. M. to Columbus. Toledo Conference Chairman, Miss Alice Kinsey, 4150 Overland Park; Mrs. Floyd Dewey, 2021 Shenendoah Road; and Mrs. Helen Buchanan Bruyres, 359 Winthrop Street, Toledo, Ohio.

September 14, Saturday.—A. M. Columbus. Noon Conference—Representatives from Zanesville station. P. M. Survey, continued.

Columbus Conference Chairman, Mrs. D. C. Bryant, 2053 Iyka Ave., Columbus.

Cincinnati ConferenceChairmen, Mrs. M. Y. Newcomb, 1722 Fairfax Ave., Walnut Hill, Cincinnati, Ohio, and Mrs. L. F. Holbert, 3130 Fairlaid Ave.

September 17, Tuesday.—A. M. to Indianapolis. Noon Conference. P. M. Survey, Indianapolis.

Indianapolis Conference Chairman, Mrs. George Jacqua, 203 E. Washington, Winchester, Indianapolis, Indiana.

September 18, Wednesday.—A. M. Survey, continued. Noon to Elkhart.

Mail Address: Mr. R. R. Baker, Station WTRC, Elkhart, Indiana.

Chicago Conference Chairmen: Mrs. William Bruckner, 307 S. Lincoln, Hinsdale, Illinois; Mrs. Willis Grant Murray, Kenwood Hotel, Chicago; Miss Lavinia Schwartz, Station WBBM, Chicago.

September 21, Saturday.—Chicago Survey, continued.

September 22, Monday.—Chicago Survey, continued.

September 24, Tuesday.—A. M. Chicago Survey, continued—Survey Joliet Representatives from Aurora.

September 25, Wednesday.—Peoria. Noon Conference. Representatives from Bloomington, etc.

Peoria Conference Chairman, Mrs. MacFarland, Station WMBD, Peoria.

September 26, Thursday.—Springfield. 11 A. M. Conference. Representatives Stations, Champaign, Decatur, Quincy, Tuscola and Danville.

September 27, Friday.—A. M. Survey St. Louis. Noon Conference. Representatives from East St. Louis, Illinois; Poplar Bluff, Cape Girardeau.

St. Louis Conference Chairman, Mrs. G. Brandt Leitch, 6113-A Pershing Ave., St. Louis.

September 28, Saturday.—Columbia. P. M. Survey.

September 30, Monday.—Noon Conference. Representatives from Kansas City, Kansas; Sedalia, Missouri; Pittsburgh, Pennsylvania, and Lawrence, Kansas.

Kansas City Conference Chairman, Miss Helen Smith, c/o Mrs. Truitt (see above address) and Mrs. J. H. States, 3308 E. 60th St., Kansas City.

October 1, Tuesday.—Topka. 10 A. M. Conference and Survey Topka. Representatives from Salina. Noon Emporia. P. M. to Wichita.

October 2, Wednesday.—A. M. Survey Wichita. Noon Conference. Representatives from Great Bend. P. M. to Dodge City.

October 3, Thursday.—A. M. Dodge City to Lamar, La Junta and Pueblo, Colorado.

October 4, Friday.—A. M. Pueblo to Denver. Noon Conference. Denver.

October 5, Saturday.—A. M. Denver. P. M. Boulder.

Cheyenne Conference Chairman, Mrs. J. L. Jordon, Cheyenne, Wyoming.

October 8, Tuesday.—Evening Conference, Rock Springs.

Rock Springs Conference Chairman, Mrs. Herbert Webster, Rock Springs.

October 10, Thursday.—A. M. Salt Lake City survey. Noon Conference, Representatives from Provo and other nearby stations, Ogden.

Salt Lake City Chairman, Mrs. Walter Hassler, Provo, Utah, and Mrs. H. A. Dittman, 608 Harrison Ave., Salt Lake City; Mrs. Earl Glade, KSL, Salt Lake City.

October 12, Saturday.—P. M. to Idaho Falls. Conference Chairman, Mrs. B. S. Arrington, Pocatello, Idaho.

October 15, Tuesday.—A. M. Butte Survey. P. M. to Helena, Montana.

October 16, Wednesday.—A. M. Helena, Representatives from Great Falls. Noon to Missoula.

Helena Conference Chairman, Mrs. Dolly D. Burgess, Helena, Montana.

Spokane Conference Chairman, Mrs. P. H. Brady, 1725 W. Pacific Ave., Spokane, and Mrs. H. E. Doelic, Vista Court Apartments, Spokane.

October 18, Friday.—A. M. to Seattle, Wenatchee survey en-route.

October 20, Sunday.—A. M. Seattle to Tacoma. Noon Conference. Representatives from Olympia.

Tacoma Conference Chairman, Mrs. Walter M. Snell, 810 South G St., Tacoma, Washington.

October 22, Tuesday.—A. M. Tacoma to Portland, Oregon. 

Portland Conference Chairmen, Mrs. Sue K. Woodward, 1831 N. E. Hancock; Mrs. Kletzer, PTA, National President; Mrs. Sadie O. Dunbar, President, General Federation of Women's Clubs.

October 25, Friday.—A. M. Survey Medford; Chico, California.

October 26, Saturday.—Sacroamento. Noon Conference. P. M. survey Sacramento 2 stations.

Sacramento Conference Chairman, Mrs. Ralph Parker, 2100 Marshall Way, Sacramento, California.

October 29, Tuesday.—A. M.-P. M. Survey.

October 30, Wednesday.—Noon Conference. Representatives from San Jose, Monterey and Santa Rosa.

San Francisco Conference Chairman, Mrs. Alice May Baker, 285 Oak Street, San Francisco, California.

October 31, Thursday.—Merced survey. P. M. to Yosemite.

November 2, Saturday.—A. M. to Fresno survey. Noon to Sequoia.

November 3, Sunday.—A. M. to Los Angeles via Visalia and Bakersfield.

November 4, Monday.—A. M. Optional from Sequoia to Los Angeles scheduled on November 3 or Los Angeles.

November 6, Wednesday.—Southern California Conference Chairman, Mrs. W. H. Boyd, 1255 E. 2nd Street, Long Beach, Calif.;
ADVERTISING PROBLEM

The Code Committee last week was asked by stations WSMB and WWL, New Orleans, for an opinion regarding a type of advertising claim made by a local furniture store in its radio continuity. The letter from the stations outlining the case was as follows:

“Gentlemen:

The Better Business Bureau and ourselves are having an honest difference of opinion regarding certain radio continuity now being used by a furniture store here. The continuity reads:

... is neither a finance company nor a corporation, but an individually owned store that does its own financing. When you buy from ... you pay no exorbitant interest rates or hidden charges.

The BBB admits that all this is true, but say that other furniture stores object to that type of advertising, and that by inference it is derogatory to competitors; therefore they have ruled that it is contrary to the advertising code.

We contend that it is hard to refuse truthful copy, that it borders on censorship, and that it would be inconsistent for us to allow advertising on network programs and refuse substantially the same type of copy to our local advertisers. The networks regularly broadcast ‘contains no harmful ingredients’ and a certain cigarette ‘contains no harsh irritants’. Also that ‘They are toasted’ and are ‘Kind to your throat’, which infers that some others are not.

The ruling we would like to get from you is:

1. Whether the advertising given above by ... is a violation of the present Broadcasters’ Code.

2. If not, does our Code stipulate that we should abide by local rulings on the Advertising Code or Furniture Rules of Ethics, etc.

Hoping to hear from you, and with kind regards, we are

WWL Development Co., Inc.,

W. H. Summerville, Manager.

WSMB, Inc.,

H. Wheelahan, Manager”

The Code Committee’s reply:

“Gentlemen:

In considering the application of the Code to the radio continuity of this advertiser, the Code Committee has based its opinion upon the copy submitted in your letter of August 15:

... is neither a finance company nor a corporation, but an individually owned store that does its own financing. When you buy from ... you pay no exorbitant interest rates or hidden charges.

The Committee finds that there is nothing in the NAB Code to prevent a statement of fact or truth in advertising copy. The burden of deciding what the facts are rests clearly on the broadcaster. The Committee feels that a statement of fact cannot be
construed as constituting an unfair attack upon competitors, competing products or upon other industries, professions or institutions as provided for in the Code.

There is nothing in the Code that stipulates that radio stations should or should not abide by local rulings on the Advertising Code or Furniture Rules of Ethics, etc. Their opinion might well be taken into account in resolving questions of judgment and in developing wholesome trade practices. However, in any difference of opinion the broadcaster must be the final judge because as the licensee, he and he alone is held accountable for what is broadcast over his station.

Sincerely,
Ed Kirby, Secretary,
Code Compliance Committee

Foreign Language Broadcasts

Headquarters has received a copy of the following letter addressed to Commander T. A. M. Craven, FCC, by Quincy Howe, of the American Civil Liberties Union:

Mr. T. A. M. Craven
Federal Communications Commission
New Post Office Building,
Washington, D. C.

Dear Mr. Craven:

We understand that Station WHIP has banned the German Hour Program of the Einheits Front. In cancelling the commercial broadcast, the Station stated that such action was taken "because the German Hour as now being presented is of such controversial nature as to make it unacceptable to many Americans."

The Council disapproves of the discussion of controversial matters on commercial programs. Such programs, as under the NAB Code, should be handled on sustaining time with opportunity of discussion for other views.

The difficulty in dealing with foreign language broadcasts, however, is that it is often impossible to ascertain or prove what in fact has been said. Thus in the case of Station WHIP it is alleged that the German Hour, in advising the audience of the Chicago "Keep America Out of War" meeting twice broadcast:

"I bring a pressing summons to all members and to all listeners to the United Front Radio Hour to do their duty by attending the great mass meeting in Soldier's Field. Entrance is free and the speakers are Col. Lindbergh and Senator Bennett Champ Clark. None dare or should fail!"

Whether the above quotation is an accurate report or translation cannot, as a practical matter, be conclusively proved even if scripts are supplied, since there is always the possibility of interpolation. It would seem to us that one way to meet the problem of foreign language broadcasts is by a regulation requiring stations to have recordings made of all such programs. Such a requirement would very likely, in our opinion, provide all interested persons and government agencies with a record of what was in fact broadcast.

Because we deem this a vital matter, we sincerely request that hearings be held by the Commission to ascertain both the advisability and practicability of requiring recordings of foreign language broadcasts.

Sincerely yours,
(Signed) Quincy Howe,
Chairman.

Promotion

RMA COOPERATION

Following the recent Radio Manufacturers Association bulletin to members urging that distributors and dealers be supplied with broadcast copy, Bond Geddes, executive vice president, reports that the request has already been complied with by a number of companies.

This voluntary action by the Radio Manufacturers Association automatically places broadcast salesmen on an equal competitive basis with newspaper salesmen for the dealers' 50-50 cooperative advertising allotment.

NATIONAL DEFENSE

Three broadcasting stations which have been using man-power announcements from the beginning, not previously reported, are:

<table>
<thead>
<tr>
<th>DISTRICT 3</th>
<th>Pennsylvania</th>
</tr>
</thead>
<tbody>
<tr>
<td>WPIC—Sharon</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>DISTRICT 5</th>
<th>Alabama</th>
</tr>
</thead>
<tbody>
<tr>
<td>WHBB—Selma</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>DISTRICT 10</th>
<th>Missouri</th>
</tr>
</thead>
<tbody>
<tr>
<td>KSD—St. Louis</td>
<td></td>
</tr>
</tbody>
</table>

This brings to 612 the number of stations that are banded together to locate skilled workers for national defense.

The United States Civil Service Commission last week distributed 10,000 "Men Wanted" posters. Five thousand were sent to police stations to enlist the aid of patrolmen, who, in a great many instances, know heads of families out of work who may be competent to handle some of the jobs that are open. The second 5,000 will be displayed in the 5,000 first and second class post offices throughout the United States.

SERVICEMEN'S QUALIFICATIONS

Suggested qualifications for Radio Servicemen's organizations, formulated by the NAB engineering committee, were approved by the NAB Executive Committee at the 18th annual convention in San Francisco.

The committee's findings, forwarded by John V. L. Hogan, chairman, were adopted without change.

The qualifications were prepared only as a guide to stations for use in determining whether a radio servicemen's organization is reliable enough to warrant the station entering into a cooperative plan for encouraging the public to keep sets in proper repair.

The suggestions cover five general subjects:

1—Code of ethics and by-laws.
2—Standards of admission.
3—Standards of conduct.
4—Guaranteed service plan.
5—Method of self-policing.

The recommended requirements for each are discussed in the complete document which will be mailed direct to member stations.
NEW BUSINESS POSSIBILITIES

Two “free offers” and four cost-per-inquiry proposals have been reported to the NAB Bureau of Radio Advertising by members during the past month. Surprisingly enough, several well-known advertising agencies are included among the concerns seeking free time for commercial purposes, or asking for guaranteed advertising, and the Bureau has written them pointing out that such requests hardly serve to further the mutual interests of agencies and media.

The Bureau has invited the following concerns to use radio advertising on a regular basis:

M. Barrows & Company, Inc., 286 Fifth Avenue, New York (Toll House Cook Book)
Hays, MacFarland & Company, 333 N. Michigan Ave., Chicago (United Wall Paper Factories, Inc.)
H. C. Morris & Company, Graybar Bldg., New York (The Book-a-Week Club)
National Classified Advertising Agency, Youngstown, Ohio, (Air Conditioning Training Corp.)
Arthur Rosenberg Company, 570 Seventh Ave., New York
Weinberg-Weinberg-Alpern, 1400 Broadway, New York (Sensibly Young Fashions)

Member stations may wish to have their representatives follow up all these companies for possible new business, since they have shown themselves interested in the power and influence of radio advertising.

NOTICE TO MANAGERS

The Burns Detective Agency and two Seattle radio stations are looking for a young man who appeared in Seattle several months ago, and obtained temporary radio work, leaving town with many unpaid bills, and some of the station’s property. The young man gave his name as Jack MacDonald and gave WLW as a reference. He is unknown at WLW.

His description: five feet ten inches tall, dark brown straight hair, dark eyes, dark complexion, suave appearance and manner, wears English tweeds, has good knowledge of radio and fine announcing voice.

Any station knowing of this person is asked to communicate with NAB headquarters.

Any station approached by a person who represents himself as Graham Grigg, President of the Grigg Brothers Company, a packing house near Salisbury, Md., will be interested to know the following: There is no such company in Salisbury, Md. A Washington, D. C., bank given as reference never heard of him. In Philadelphia recently this gentleman secured dental service in the amount of $50.00 on his representation that he was a client of a radio station there.

MILLER TO GEORGIA

Neville Miller will attend a meeting of the Georgia Association of Broadcasters scheduled for September 10 in Macon.

FEDERAL COMMUNICATIONS COMMISSION

FLY TALKS ON TELEVISION AND DEFENSE COMMITTEE

James Lawrence Fly, FCC chairman, at a press conference on Monday discussing the communications defense committee which has been on the fire for a long time expressed the opinion that this committee might materialize within “a week or so.”

Mr. Fly too told the newsmen that he had been looking into the defense committee since his return from the NAB convention and has the impression that no serious question has developed. He said that in the early days of the talk of this committee some of the broadcasters of the country were alarmed but they have now been reassured that this is not primarily a broadcast matter but largely a communications matter involving relationship of all services to national defense. The matter is now before the President, Mr. Fly said, for his action.

Chairman Fly told the correspondents that he had been much impressed by his visit to motion picture producing lots when he was on the West Coast recently, particularly with the possible coordinated relationship between motion pictures and television. Mr. Fly said that he now thinks that conceivably too little emphasis may have been laid on the production of television and he said that he had not appreciated all the motion pictures offer from that point of view.

Mr. Fly’s thought is apparently that there is a tremendous lot of equipment, personnel and materials in the hands of motion picture producers which can and should be drawn into television production. He said that he feels sorry that there are not more applications for television stations from the motion picture industry on file at the FCC.

Mr. Fly said that he was impressed most of all on the motion picture lots with the manner in which the movies are prepared to move in and do a job as compared with the lack of facilities at television studios. In some way, the chairman said, television could and should utilize some of the things that the movies have to offer.

FCC LABOR RELATIONS ADVISER

Sidney D. Spear, assistant to the legal adviser of the State Department, has been appointed to the Law Department of the FCC to advise on matters involving employment and labor problems in relation to the regulation of communications.

Mr. Spear’s background is labor economics and research, and he is completing a chapter on international communications for the Digest of International Law.

August 30, 1940 — 4547
Born in Seattle March 16, 1909, Mr. Spear was graduated from the University of Washington, magna cum laude, with A.B. degree in 1931. He had graduate work in psychology and sociology and was Assistant Dean of Men at the University of Washington until 1934. He received his LL.B from Harvard in 1937.

In his service with the State Department, since 1937, Mr. Spear has specialized in the legal aspects of electrical communications.

TELEVISION STATION FOR CROSLEY

The Crosley Corporation, Cincinnati, Ohio, has been granted a construction permit by the FCC for a new television broadcast station in that city. The proposed station, at Vine and Fifth Streets, will operate experimentally on television channel No. 1 (50,000 to 56,000 kilocycles) with 1 kilowatt aural and visual power, A3 and A5 emission.

It was among the applications tentatively approved in June subject to proper showing of programs of research and development, including engineering experimentation tending to develop uniform transmission standards of acceptable technical quality. The Crosley station intends to work with a transmitting system in which the picture is composed of 30 frames per second interlaced. Tests will be conducted with 441 and 507 lines as well as an intermediate number of lines. It also contemplates research on wave forms, and experimentation on various types of antennas and the effect of vertical and horizontal polarization.

The initial cost of the station is estimated to exceed $100,000.

FCC ASSIGNMENTS

The FCC announces that the work, business and functions of the Commission for the month of September have been assigned as follows:

Commissioner Payne: Designated to determine, order, report or otherwise act upon all applications or requests for special temporary standard broadcast authorizations.

Commissioner Craven: Designated to hear and determine, order, certify, report or otherwise act upon: (a) except as otherwise ordered by the Commission, all motions, petitions or matters in cases designated for formal hearing, including motions for further hearing, excepting motions and petitions requesting initial disposition of a case on its merits, those having the nature of an appeal to the Commission and those requesting change or modification of a final order made by the Commission; provided, however, that such matters shall be handled in accordance with the provisions of Sections 1.251 and 1.256, inclusive, of the Commission's Rules of Practice and Procedure; (b) the designation pursuant to the provisions of Sections 1.231 to 1.235 of the Commission’s Rules of Practice and Procedure of officers, other than Commissioners, to preside at hearings.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following broadcast hearings are scheduled before the Commission for the week beginning Monday, September 2. They are subject to change.

Wednesday, September 4

NEW—Hobart Stephenson, Milton Edge, Edgar J. Korsmeyer, d/b as Stephenson, Edge & Korsmeyer, Jacksonville, Ill.—C. P., 1150 kc., 250 watts, daytime.

NEW—Helen J. Walton and Walter Bellatti, Jacksonville, Ill.—C. P., 1150 kc., 250 watts, daytime.

FUTURE HEARINGS

Following future hearings and oral arguments in broadcast cases have been scheduled by the Commission during the past week. They are subject to change.

September 19

Oral Argument Before the Commission

Report No. B-110:

KGKB—East Texas Broadcasting Co., Tyler, Tex.—In re: Revocation of Station License of KGKB.

Report No. B-108:

KSAM—Sam Houston Broadcasting Assn., H. G. Webster, President, Huntsville, Tex.—In re: Revocation of Station License of KSAM.

Report No. B-99:

WRENT—The WREN Broadcasting Co., Inc., Lawrence, Kans.—C. P., 1220 kc., 1 KW night, 5 KW LS, shares time with KFKU.

September 26

Reargument Before the Commission

Report No. B-107:

NEW—The Mayflower Broadcasting Corp., Boston, Mass.—C. P., 1140 kc., 500 watts, 1 KW LS, unlimited time (requests facilities of WAAB).

WAAB—The Yankee Network, Inc., Boston, Mass.—Renewal of license, 1140 kc., 1 KW, unlimited time; and auxiliary, 1110 kc., 500 watts, 1 KW LS. Time: Auxiliary purposes only.

Oral Argument Before the Commission

Report No. B-99:

WREN—The WREN Broadcasting Co., Inc., Lawrence, Kans.—C. P., 1220 kc., 1 KW night, 5 KW LS, shares time with KFKU.

September 30

NEW—George F. Meyer, Medford, Wis.—C. P., 1500 kc., 100 watts night, 100 watts LS, unlimited time.

WAPI—Alabama Polytechnic Institute, University of Alabama and Alabama College (Board of Control), Birmingham, Ala.—Renewal of license, 1140 kc., 5 KW night, 5 KW LS, simultaneous day KVOO, share KVOO night.

October 7

WBZ—Westinghouse Electric & Mfg. Co., Boston, Mass.—Renewal of license, 990 kc., 50 KW night, 50 KW LS, unlimited when synchronized with station WBZA.
APPLICATIONS GRANTED

Crosley Corp., Cincinnati, Ohio.—Granted construction permit for new television broadcast station to operate on the frequencies 50,000 to 50,000 kc. (television Channel No. 1), on an experimental basis only, conditionally, with power of 1 kW aural and visual, A1 and A5 emission (B2-PV-VB-23).

WMBS—Fayette Broadcasting Corp., Uniontown, Pa.—Granted construction permit to install new transmitter, change frequency from 1420 kc. to 390 kc., increase power from 250 watts unlimited to 1 kW unlimited, and install directional antenna for night use (B2-P-2711).

The Tribune Company, Tampa, Fla.—Granted construction permit for new broadcast station to operate on 910 kc., 1 kW night, 5 kW day unlimited time, using directional antenna at night; granted with conditions (B3-P-2866).

KFBF—The Farmers & Bankers Broadcasting Corp., Wichita, Kans.—Granted modification of construction permit to change hours of operation to unlimited and reduce night power from 5 kW to 1 kW with directional antenna; 1050 kc., 5 kW power day (B4-MP-896).

WLOK—The Fort Industry Co., Lima, Ohio.—Granted construction permit to increase power from 100 watts to 250 watts, unlimited as a Class IV station; frequency 1210 kc. (B2-P-2306).

Midwestern Broadcasting Co., Traverse City, Mich.—Granted construction permit for new broadcast station to operate on 1370 kc., 250 watts power, unlimited time; exact transmitter site and type of antenna to be determined with Commission's approval (B2-P-2565).

W. Montgomery Harrison, Augusta, Ga.—Granted construction permit for new broadcast station at Augusta, Ga., to operate on frequency 1120 kc., 250 watts power, unlimited time (B3-P-2872).

Mutual Broadcasting System, Inc., Chicago, Ill.—Granted extension of authority to transmit programs to CKLW and other Canadian stations owned and operated by the Canadian Broadcasting Corp., and to stations named in the application licensed by the Canadian Minister of Transport as the Canadian Broadcasting Corp., deems advisable, to be transmitted through the facilities of the American Telephone and Telegraph Co., for the period from September 1, 1940, to September 1, 1941 (B4-FP-81).

Columbia Broadcasting System, Inc., New York, N. Y.—Granted extension of authority to transmit programs to Canadian Stations CFRB and CKAC, and to stations under supervision of the Canadian Broadcasting Corp., by means of wire line facilities furnished by the American Telephone and Telegraph Co., for the period from September 15, 1940, to September 15, 1941 (B1-FP-82).

RENEWAL OF LICENSES

KTW—First Presbyterian Church of Seattle, Seattle, Wash.—Granted renewal of license of broadcast station KTW for the period ending October 1, 1940; 1290 kc., power 1 kW, sharing time with KWSB (B3-R-64).

KGFI—Eagle Broadcasting Co., Inc., Brownsville, Tex.—Granted extension of present license to October 1, 1940, upon temporary basis only, subject to the terms and conditions of the order of revocation entered March 22, 1940, and subject further to the final determination of the Commission on said order (B3-S-401).

KTBC—State Capital Broadcasting Association, Inc., Austin, Tex.—Granted extension of present license to October 1, 1940, upon a temporary basis only, subject to the terms and conditions of the order of revocation entered February 7, 1940, and subject further to the final determination of the Commission on said order (B3-S-1007).

W2XOY—General Electric Co., Albany, N. Y.—Granted further extension upon a temporary basis only, of station license, pending receipt and/or determination upon application for renewal of license, to not longer than October 1, 1940 (B1-SHB-32).

MISCELLANEOUS

WWJ—The Evening News Association, Detroit, Mich.—Granted special temporary authority to operate from 10:15 p.m. to 11:15 p.m. EST, with power of 5 kW on August 20, 1940, in order to permit more coverage for the 20th Anniversary Program only.

WTRB—Associate Broadcasting Corp., Cumberland, Md.—Granted special temporary authority to operate from 8:15 p.m. EST, to the conclusion of American Legion programs only, August 23, 1940.

W2XWG—National Broadcasting Co., Inc., New York, N. Y.—Granted special temporary authority to operate with amplitude modulation in addition to frequency modulation on 12500 kc. on August 20 and 21, 1940, in order to demonstrate amplitude versus frequency modulation at the meeting of the NBC engineers.

KSAM—Sam Houston Broadcasting Assn., Huntsville, Tex.—Granted motion to postpone oral argument in re revocation of station license to September 19, 1940. (Docket No. 5838.)

WREN—The WREN Broadcasting Co., Inc., Lawrence, Kans.—Scheduled for oral argument the Proposed Findings of Fact (B-99) in re application of the Wren Broadcasting Co. (WREN), for a construction permit to move the station transmitter, install directional antenna for day and nighttime use, and establish the main studio in Kansas City, Mo.

The Huntsville Times Co., Inc., Huntsville, Ala.—Granted petition to vacate order of intervention in re above application (B3-P-2784).

The Huntsville Times Co., Inc., Huntsville, Ala.—Dismissed petition to vacate order of intervention in re above application (B3-P-2784).
WREN—The WREN Broadcasting Co., Inc., Lawrence, Kans.—Granted special temporary authority to operate from 7:15 a. m. to 10 a. m., EST, for the period beginning August 20, 1940, and ending August 27, 1940, in order to broadcast a special political program only, and to operate unlimited time August 27, 1940, in order to broadcast said programs only.

WBNO—Roy L. Albertson, Buffalo, N. Y.—Granted special temporary authority to operate from 8:30 a. m. to 10 a. m., EST, for the period beginning September 8, 1940, to not later than September 8, 1940, in order to broadcast sustaining musical programs as described in letter dated August 14, 1940, only (provided WSYS remains silent).

WAJU—Couier-Journal and Louisville Times Co., Louisville, Ky.—Granted special temporary authority to operate the equipment of radio station WHAS, for a period not to exceed 30 days, in order to conduct tests to determine antenna requirements for a forthcoming application for a high frequency FM station.

KIN—Southern Oregon Broadcasting Co., Grants Pass, Ore.—Granted special temporary authority to rebroadcast Forest Service fire messages to be received from forestry stations serving Siskiyou National Forest, for a period not to exceed 30 days.

WPIC—Sharon Herald Broadcasting Co., Sharon, Pa.—Granted special temporary authority to operate from 6:30 p. m., EST, to the conclusion of a religious program by the Holy Name Society on September 8, 1940, in order to broadcast said programs only.

KEHS—WDAY, Inc., Farzo, N. Dak.—Granted special temporary authority to operate the equipment described in construction permit (File No. Bl-PIB-23), with larger tubes and power of 5 watts, on 1330 kc., on August 24, 1940, in order to conduct tests, and from 3 p. m. to 4 p. m., CST, August 25, 1940, in order to relay broadcast programs entitled "American Way of Broadcasting" to radio station WDAY.

KFRU—KFRU, Inc., Columbia, Mo.—Granted special temporary authority to operate simultaneously with station WGBF with power reduced to 250 watts, from 9 p. m. to approximately 11 p. m., CST, on September 4, 1940, and from 8 p. m. to approximately 11 p. m., CST, on September 20, 1940, in order to broadcast baseball games only.

WGBF—Evansville on the Air, Inc., Evansville, Ind.—Granted special temporary authority to operate as above except interchangeaneously with KFRU, in order to permit KFRU to broadcast baseball game only.

WLOG—Clarence H. Frey and Robert O. Greweer, Logan, W. Va.—Granted special temporary authority to operate from local sunset (Sept. 6:45 p. m., EST) to 9 p. m., EST, September 6, 1940, in order to broadcast speech by Senator Joseh Lee at Roosevelt Neely Democratic Dinner only.

KGGF—Hugh J. Powell, Coffeyville, Kans.—Granted special temporary authority to operate from 7:15 p. m. to 9:15 p. m., CST, on September 3, 5, 10, 12, 17, and 19, 1940, and from 8:15 p. m. to 9:15 p. m., CST, on September 4, 11, and 18, 1940, in order to permit WNAD to remain silent during the summer vacation (provided WNAD remains silent).

WNAD—University of Oklahoma, Norman, Okla.—Granted special temporary authority to remain silent during above periods in order to observe the summer vacation.

KGKE—Emerson C. Beehler, Sterling, Colo.—Granted special temporary authority to operate from 8:45 p. m. to 11:30 p. m., MST, on August 30, 1940, in order to broadcast a special Musical Festival only.

WJMC—Walter H. McGerty, Rice Lake, Wis.—Granted special temporary authority to operate from 7:15 p. m. to 12 p. m., CST, on August 21 and 22, 1940, in order to broadcast Barron County Fair events only.

WPIT—Westinghouse Electric & Mfg. Co., Baltimore, Md.—Granted special temporary authority to operate the equipment of international broadcast station WPIT, authorized in construction permit, File No. Bl-PIB-23, with a power of 35 KW, using WL 893R tubes in final amplifier stage in lieu of 50 KW power with Federal 1242R tubes, respectively, specified in construction permit, for a period beginning August 31, 1940, and ending not later than September 28, 1940.

Broadcasting Corp. of America.—Dismissed petition for rehearing directed to Commission's action of July 16, 1940, granting application of Riverside Broadcasting Co., Riverside, Calif., for construction of a new broadcast station, inasmuch as the Commission, on July 26, 1940, on its own motion, reconsidered its action of July 16 granting without hearing the application of Riverside Broadcasting Co. and designated same for hearing.
APPLICATIONS FILED AT FCC

550 Kilocycles

KSD—The Pulitzer Publishing Co., St. Louis, Mo.—Construction permit to move transmitter from northeast corner 12th and Olive Sts., St. Louis, Mo., to approximately 3 miles west of Columbia, Ill., install new transmitter and new directional antenna for night use, and increase power from 1 KW night, 5 KW day, to 3 KW day and night.

590 Kilocycles

NEW—West Publishers, Inc., Corpus Christi, Tex.—Construction permit for a new broadcast station to be operated on 590 kc., 500 watts night, 1 KW day, unlimited time. Class III-B station. Amended to give transmitter site as north of Corpus Christi, Texas, and change requested power from 500 watts night, 1 KW day, to 1 KW day and night.

610 Kilocycles

**FEDERAL TRADE COMMISSION ACTION**

**COMPLAINTS**

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Alfred Brothers Candy Company—See Consumers Mercantile Service.

Lee Boyer's Candy—Complaints have been issued charging Lee Boyer's Candy, a Portland, Oreg., corporation, and Hugh C. Mitchum and Carl B. Tucker, trading as Southern Candy Company, Charlotte, N. C., with the sale of assortments of candy so packed and assembled as to involve the use of a lottery when sold and distributed to the consuming public.

Use of the respondents' sales methods, the complaints charge, is a practice contrary to established public policy and in violation of the criminal laws, and is an unfair practice under the Federal Trade Commission Act. (4265-4266)

J. T. Carlton Candy Company—See Dixie Candy Company.

Central Buying Service, Inc.—See Jack Herzog & Company.

Clito Company—Rene P. Balditt, trading as Clito Company, 325 North Frio St., San Antonio, Tex., allegedly misrepresents that his preparation designated as "Clito" and as "Clito Emmenagogue Capsules" is a competent treatment for delayed menstruation and that it is harmless. The complaint further alleges that the respondent misleadingly represents that his preparation known as "Rayo de Sol" is a competent and effective cure for cataracts, cloudiness of vision, ulcers and inflammation of the eyes. It is further charged that the respondent has disseminated false advertisements in that his advertisements of "Clito Emmenagogue Capsules" fail to reveal that use of this preparation, under the conditions prescribed in such advertisements or under such conditions as are customary or usual, may result in serious and irreparable injury to health. (4262)

Colonial Drug Company—See Colonial Sales Company.

Colonial Sales Company—M. A. Younkin and Alice Younkin, trading as Colonial Sales Company and as Colonial Drug Co., 21 E. First St., Tulsa, Okla., are charged in a complaint with the dissemination of misleading representations in the sale of a medicinal product known as "Natural Mineral Extract.

The complaint alleges that while this preparation has no therapeutic value other than that of a mild laxative and mild diuretic, the respondent advertises and recommends it for use both internally and externally as a cure, remedy and competent treatment of a large number of diseases and ailments for which it has no therapeutic value.

The complaint further charges that the respondent falsely represents that the preparation supplies minerals essential to health, that it has therapeutic value in the treatment of female diseases, and is an effective treatment for ill-nourished, backward or defective children. (4260)

Consumers Mercantile Service—Charging use of lottery methods in the sale of merchandise, complaints have been issued against John J. Schocket, trading as Consumers Mercantile Service,
According to the complaints, the respondents use push cards to sell their merchandise wholly by lot or chance. (4242-4243-4244)

**Dixie Candy Company**—Charging use of lottery methods in the sale of merchandise, complaints have been issued against Dixie Candy Company, Inc., 732 East Seventh St., Charlotte, N. C., dealer in candy; and Lambert Agin, trading as Jacks Chemical Company, Inc., 337 7th Ave., New York, and Central Buying Service, Inc., 101 West 37th St., New York.

According to the complaints, the respondents receive and accept from sellers commissions on purchases made in behalf of the respondents' buyer clients, in violation of subsection (c) of Section 2 of the Clayton Act as amended by the Robinson-Patman Act (4257-4259)

**Hamilton, Harris & Company**—See Trinidad Creamery Company.

**Jack Herzog & Company**—Two New York firms acting as commission resident buyers of fur garments and of millinery, respectively, are charged in complaints with violation of the brokerage section of the Robinson-Patman Act. The respondents are Jack, Michael, George and Louis Herzog, trading as Jack Herzog and Company, 337 7th Ave., New York, and Central Buying Service, Inc., 101 West 37th St., New York.

According to the complaints, the respondents receive and accept from sellers commissions on purchases made in behalf of the respondents' buyer clients, in violation of subsection (c) of Section 2 of the Clayton Act as amended by the Robinson-Patman Act (4257-4259).

**Jack's Chemical Company**—Lambert Agin, trading as Jacks Chemical Company and as Jacque Chemical Company, pleasant Ridge Station, Cincinnati, allegedly represents that his medicinal preparation called "JACKS" and "JACQUE" constitute a cure or remedy for gall, kidney and bladder stones, diabetes, rheumatism, swollen limbs, hives, excess acid and excess uric acid, when in truth it is wholly incapable of effecting any of the results claimed by the respondent. (4247)

**Lessing Hat Company, Inc., and Joseph Loring**—Loring Hat Company, Third and Mercer Sts., New York, are charged in a complaint with the dissemination of misleading representations in the sale of caps and hats.

The complaint alleges that the respondents buy second-hand, old, worn and previously used felt hats, and recondition them for sale to retailers and wholesale dealers without any adequate designation to indicate to the purchasing public that they are manufactured from old, worn and previously used hat bodies. It is further charged that on some part of the sweat band or size labels are stamped the words "Made of castaway hats" but that jobbers, wholesale dealers and retailers can readily and easily remove this designation, and such designation does not adequately inform the purchasing public that such hats are made of old, worn and previously used hat bodies. Such practices by the respondents, the complaint continues, tend to create the mistaken belief that their hats are made from new and unused materials. (4245)

**Loring Hat Company**—See Lessing Hat Company.

**Helena Rubinstein, Inc.**, 715 Fifth Ave., New York, is charged in a complaint with the dissemination of misleading representations in the sale of certain cosmetic preparations.

The respondent allegedly misrepresents that ordinary powder particles swell within the pores and cause enlarged pores, blackheads and blemishes; that its "Town and Country Face Powder" because of a pre-expanded quality or balsamizing process is moisture-proof, prevents and removes enlarged pores, blackheads and blemishes; that its "Eye Lash Grower Cream" has special properties which will be effective in causing eye lashes to grow, and that its "Eye Lash Cream and Darkener" makes the lashes dark, silky and luxuriant looking and has special properties which will be effective in preventing eye lashes from breaking. It is also charged in the complaint that the respondent misrepresents that its "Egg Complexion Soap" will benefit the complexion through the presence of eggs therein and that such products purifies the skin. (4254)

**Kuhn Remedy Company**, 1855 North Milwaukee Ave., Chicago, is charged in a complaint with the dissemination of misleading representations in the sale of a medicinal preparation formerly described as "Kuhn's Rheumatic Fever Remedy," and now known as "Kuhn's Remedy."

According to the complaint, the respondent misleadingly represents that its preparation is a cure or remedy for rheumatism, rheumatic fever, gout, neuralgia and lumbago, and for muscular and joint aches and pains generally, and that it possesses substantial therapeutic value in the treatment of such ailments and conditions.

The complaint points out, however, that the preparation possesses no therapeutic value in the treatment of rheumatism, rheumatic fever, gout, neuralgia or lumbago, and that its use may result in serious or irreparable injury to health, in that such advertisements do not contain any cautionary statement to the effect that its preparation should be used only as directed on its label. (4264)

**Progressive Laboratories**—See Progressive Medical Company.

**Progressive Medical Company**—Blanche Kaplan, trading as Progressive Medical Company, Progressive Laboratories, Ladies Aid Company, Ladies Aid, and as Ladies Aid Products, 330 South Wells St., Chicago, allegedly misrepresented that "Ladies Aid No. 1 H.Y.G. Tablets" is a competent antiseptic and reliable germ destroyer; that it is an effective prophylactic and dependable contraceptive; that "Ladies Aid No. 4" is an effective treatment for certain conditions peculiar to women; that "Promecod Cod Liver Oil Compound Tablets" is an effective remedy for every condition for which physicians might prescribe cod liver oil, and that "Ladies Aid Reducing Tablets" is a safe and effective treatment for obesity. The complaint declares that the respondent also has disseminated false advertisements in that they fail to reveal that use of its preparation under the conditions prescribed in the advertisements or under such conditions as are customary or usual may result in injury to health, in that such advertisements do not contain any cautionary statement to the effect that its preparation should be used only as directed on its label. (4261)

**Schoell Manufacturing Company, Inc.**, 211 West Shiller St., Chicago, allegedly misrepresents that the use of "Dr. Scholl's Zinopads" stops pain instantly; constitutes a cure or remedy for corns, callouses and bunions; has healing properties, and abolishes shoe pressure and friction. The respondent further is alleged to misrepresent that its preparation is an effective prophylactic and dependable contraceptive; that "Ladies Aid No. 4" is an effective treatment for certain conditions peculiar to women; that "Promecod Cod Liver Oil Compound Tablets" is an effective remedy for every condition for which physicians might prescribe cod liver oil, and that "Ladies Aid Reducing Tablets" is a safe and effective treatment for obesity. The complaint declares that the respondent also has disseminated false advertisements in that they fail to reveal that use of "Ladies Aid Reducing Tablets" under the conditions prescribed in the advertisements or under such conditions as are customary or usual, may result in serious or irreparable injury to health. (4261)

**Shaw's Jewelry Company**—Complaint has been issued against Shaw's Jewelry Company and Shaw's, 1018 Main St., Dallas, Texas, alleging misleading representations in the sale of jewelry and precious stones.

According to the complaint, the respondents misrepresent that their silverware is of genuine Rogers Brothers silverplate; is guaranteed for a lifetime by the International Silver Company; manufacturer of Rogers Brothers silverware; that the diamonds...
in their “Miss Centennial” and “His Majesty” rings are certified perfect diamonds, and that their watches are made wholly of gold or solid gold. (4250)

Southern Candy Company—See Lee Boyers’ Candy.

Spors Company—Frank Spors, trading as The Spors Company, Le Center, Minn., is charged in a complaint with the dissemination of misleading representations in the sale of various drugs, cosmetics, fountain pens, mending tissue, and household accessories.

It is charged in the complaint that the respondent misleadingly represents that his “Electro-Heat-Kwik” water heater is capable of heating substantial quantities of water; that it may be used with entire safety; that it heats substantial quantities of water more quickly than gas, coal or wood, and that it has been approved by the Underwriters’ Laboratories.

The respondent further allegedly misrepresents that the product “Savapir” is of substantial value in the prevention of runs, snags and breaks in silk and rayon hosiery and lingerie; that it renders such garments ripsnout proof; prevents shrinking and fading, and prolongs the life of such garments.

The complaint further alleges that the respondent represents that his “Super-Pure Laxative Bromide Quinine Tablets” constitute a cure or remedy for colds, when, in truth, they may afford only partial and temporary relief for the symptoms of colds.

The respondent also allegedly misrepresents that his fountain pens are comparable to those retailing for sums up to $5 each; that the flow of ink from such pens is unusually even and steady, and that agents and salesmen reselling his pens are enabled to make a profit of 300 per cent. (4246)

L & H Stern, Inc.—See Dixie Candy Company.

Style & Merit Buying Service—Violation of the brokerage section of the Robinson-Patman Act is charged in a complaint issued against the Style & Merit Buying Service, a buying agent in the purchase of ladies’ and children’s ready-to-wear, leather goods, furs and fur coats. Lewis Block, Frank Block, Mac Goldberg, Otto Langer, Morris Block and Dora Block are co-partners trading as Style & Merit Buying Service, 225 West 34th St., New York.

According to the complaint, the co-partnership has charged and received from various sellers and manufacturers commissions on purchases made in behalf of the respondents’ buyer clients.

It is charged in the complaint that the payment of the brokerage fees and commissions by the various sellers and manufacturers to, and the receipt and acceptance thereof by, the respondents is in violation of subsection (c) of Section 2 of the Clayton Act as amended by the Robinson-Patman Act. (4249)

Terpezone Incorporated, 738 Washington Boulevard, Chicago, is charged in a complaint with the dissemination of misleading representations in the sale of a device called “Terpezone Generator,” which produces a vapor designated as “Terpezone” for use in the treatment of various bodily conditions.

According to the complaint, the respondent misleadingly represents that its device generates a vapor known at “Terpezone,” the inhalation of which will increase vitality, and constitutes a remedy for anemia, hardening of the arteries and heart disease.

The respondent further allegedly misrepresents that the inhalation of “Terpezone” will kill disease germs; constitutes a remedy for colds, hay fever, tonsillitis, pneumonia and tuberculosis; neutralizes toxins, and is a competent treatment for all diseases having a toxic origin.

The complaint declares that under the conditions of use, “Terpezone” is of no therapeutic value in the treatment of such ailments in excess of possibly loosening the congestion of mucous in some cases of respiratory disorders. (4248)

Trinidad Creamery Company—Charging use of lottery methods in the sale of merchandise, complaints have been issued against Trinidad Creamery Company, 528 Commercial St., Trinidad, Colo., dealer in butter; H. M. Williams, trading as Williams Candy Company, 2819 Monroe Road, Charlotte, N. C., dealer in candy, and Hamilton, Harris & Co., 302 W. South St., Indianapolis, Ind., dealer in fishing tackle, pipes, robes and cameras.

According to the complaints, the respondents employ various games of chance, gift enterprises or lottery schemes to sell their merchandise to consumers thereof. (4251-4252-4253)

Union Concession Company, 456 South State St., Chicago, engaged in the manufacture and distribution of candy, is charged in a complaint with the sale to dealers of assortments of candy and other merchandise to be sold and distributed to the consuming public by means of a game of chance, gift enterprise or lottery scheme.

Use by the respondent of these sales plans or methods, the complaint alleges, is a practice contrary to established public policy and in violation of the criminal laws, and is an unfair practice under the Federal Trade Commission Act. (4263)

David M. Weiss—A New York buying agent in the purchase of garments in behalf of approximately sixty retail fur outlets, is charged in a complaint with violation of the brokerage paragraph of the Robinson-Patman Act. The respondent is David M. Weiss, 370 Seventh Ave., New York.

The complaint alleges that the respondent receives from various retail fur stores, for whom he acts as agent, requests to purchase fur garments. He contacts various fur garment manufacturers and places the orders at the most advantageous prices from the standpoint of the buyer. The manufacturers are located in New York, and the client buyers are located in Detroit, South Bend, Memphis and Atlanta, and elsewhere.

In the course of the purchasing transactions by the respondent, the complaint continues, sellers have, since June 19, 1936, paid to the respondent commissions based on a certain percentage of the sales price agreed upon, and the respondent has received and accepted such commissions on purchases of merchandise by retail buyers in whose behalf he has acted and in fact acting. These acts and practices, the complaint declares, are in violation of subsection (c) of Section 2 of the Clayton Act as amended by the Robinson-Patman Act. (4240)

William Candy Company—See Trinidad Creamery Company.

STIPULATIONS

During the week the Commission has entered the following stipulations:

Farmington Shoe Manufacturing Company. Dover, N. H., agrees to cease and desist from the use of words “J. W. Stetson Quality Shoes” or word “Stetson” in conjunction with other words, or arranged within a triangle so as to simulate the brand or label or name heretofore used by the Stetson Shoe Company, Inc., the effect of which may tend to convey the belief that its shoes are products made by or in accordance with the standards and specifications of the Stetson Shoe Company, Inc. The respondent further agrees to desist from the use of the name or private brand of well-known advertised products of shoe manufacturers or dealers so as to convey the belief to purchasers that the respondent’s shoes are in fact such well-known advertised products. It was also agreed by the respondent that it will cease representing a fictitious or excessive price to be the price customarily asked for shoes in the usual course of retail trade. (2911)

Federal Raw Fur Exchange—See Leo M. Goldberg Fur & Wool House, Inc.

Leo M. Goldberg Fur & Wool House, Inc., and Leo M. Goldberg, trading as The Federal Raw Fur Exchange, 1040 Helena St., Helena, Mont., in connection with their buying and selling of furs, agree to cease and desist from quoting any fictitious or exorbitant prices which trappers or fur dealers may expect to receive from them for their furs, representing that they pay a higher price for furs than do any other fur buyers; conveying the impression or belief that they are in a position to control the
resale prices of furs; using the word "Guaranteed" in connection with prices offered for furs, or representing that such prices are guaranteed unless they actually pay the prices quoted during the period of time for which such price lists are effective or in force. (2909)

Mechanix Universal Aviation Service Company—J. A. Vaughan, trading as Mechanix Universal Aviation Service Company, Wayne County Airport, Detroit, entered into a stipulation in which he agrees to discontinue certain representations in the sale of correspondence school courses for home study intended to assist students to obtain employment in the aviation industry and to qualify for airplane mechanic's licenses.

The respondent agrees to cease and desist from representing that persons answering his advertisements or applying for registration will or may receive employment; that his courses of instruction include apprenticeship work or practical training either with or without compensation; that students completing his home study courses will or may be qualified for aviation mechanic's license issued by the former United States Bureau of Air Commerce, or that his courses have the endorsement of such agency or any other agency of the Federal Government.

The respondent also agrees to desist from using on his stationery or in his advertising, illustrations of the Wayne County Airport buildings in conjunction with the letters "M U A S" or the phrase "Home of M.U.A.S." so as to convey the belief to students that study courses will or may be qualified for airplane mechanic's licenses.

The respondent agrees to cease and desist from representing that his business was established at any date prior to the period of time for which such price lists are effective or in force. (2908)

Tyson & Company, Inc., Paris, Tenn., has entered into a stipulation in which it agrees to discontinue certain representations in the sale of medications and cosmetics.

The respondent agrees to cease and desist from representing that J & T Tried and True Vegetable Compound is a dependable and competent remedy for ailments peculiar to women; it is a competent remedy for nervousness, malnutrition or dysmenorrhea, or it is scientifically compounded.

The respondent further agrees to cease and desist from representing that La Dainty Temple Grower, La Dainty Pressing Compound, La Dainty Quinine Pomade, or La Dainty Sheik Cream makes hair natural; restores natural color to the hair; prevents baldness; overcomes deficiencies of the skin and scalp, and eliminates the cause of dandruff.

It is further agreed that the respondent will cease using the words "Hair Grower," "Special Hair Grower" or "Temple Grower" so as to imply that its products will cause hair to grow or will restore a growth of hair.

Further representations which the respondent agrees to discontinue are that La Dainty Cold Cream, Mme. Carue Tissue Cream, Mme. Carue Cleansing Creme, La Dainty Lucky Lovin' Cream, Tyson's Ideal Bleaching Creme, La Dainty Vanishing Cream or any similar preparation, is a skin food or skin invigorator; makes skin beautiful or makes the skin lighter.

The respondent further agrees to cease representing that La Dainty Bleaching Ointment gives youthful beauty and glow to the skin; that La Dainty Beauty Bar nourishes and stimulates the skin; that La Dainty Special Face Soap will cause skin to become young looking; that its products are compounded by skilled and experienced cosmeticians, beauty experts or chemists, or that its products are "Guaranteed" unless clear and unequivocal disclosure is made of exactly what is offered by way of security, as for example, refund of purchase price. (2910)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Air Conditioning Textiles, Inc., 1441 Broadway, New York, is ordered to cease and desist from certain misleading representations in the sale and distribution of a soap designated as "Air Conditioning the Human Body" soap and as "Air Conditioning" soap.

The respondent is ordered to cease and desist from using the term "Air Conditioning" or "Air Conditioning the Human Body," or any other similar term, to describe its soap, or otherwise representing that its soap possesses air-conditioning properties; representing that its soap reduces body temperature, reduces humidity or eliminates perspiration objections, or representing that the human body breathes through the pores of the skin. (3974)

L. Hoffman—Louis Hoffman, trading as L. Hoffman, 459 Broadway, New York, is ordered to cease and desist from the dissemination of misleading representations in the sale and distribution of desk pads and other office accessories.

The respondent is ordered to cease and desist from using the phrase "Grecian Gold Tooled Border" or "Genuine Gold Tooled Border" or any other phrase containing the word "gold," or the word "gold" alone to refer to borders of desk pads which borders are not in fact manufactured from gold leaf, or using pictorial representations of desk pads not offered for sale and sold by respondent as representative of the desk pads offered for sale and sold by him.

The order to cease and desist further directs the respondent to cease representing, through the use of the words "Flexhide," "Top Grain," "Leather," or in any other manner, that desk pads manufactured in whole or in part from the under layer or flesh side of hides, known as split leather, are made from the outside or surface layer of the hide.

The respondent is also ordered to cease and desist from representing that his business was established at any date prior to the time that it was in fact established, or through the use of statements, pictures, or otherwise, that his desk pads or other office accessories are of a grade, quality and value greater than that which actually exists. (4165)

Imogene Shepherd, Ltd., 100 East Ohio St., Chicago, has been ordered to discontinue certain misleading representations in the sale of its "Baby Skin Oil" and "Baby Skin Oil Soap."

The respondent is directed to cease and desist from representing that its preparations are remedies or effective treatments for dryness, roughness of the skin, eczema and acne; will prevent and correct skin disfigurements; will rejuvenate the texture of the skin, or restore to adults the soft and silken texture of baby skin.

The order further directs the respondent to cease representations that its products will nourish or cause permanent benefit to the skin on account of their Vitamin E and so-called "Vitamin F" content; that they will restore essential lipids to the skin, or that they are amazing discoveries and the outstanding development in beauty culture of the present day. (3625)
THE WEEK IN WASHINGTON

Practice Makes Perfect, BMI tune, stands at the head of the list of numbers most played on the air and also has climbed into the list of best sheet music sellers. Four more stations join BMI. Only two sections of Florida's 1939 Copyright Law are unconstitutional. (p. 4560.)

CBS demonstrates television in color to James Lawrence Fly, FCC Chairman and the press. Mr. Fly says he is much impressed. (p. 4558.)

Samuel J. Henry, Jr., NAB director of the Bureau of Radio Advertising, will address the Associated Chain Druggists on the "Why and How of Radio for Chain Drug Stores." (p. 4562.)

The "Listen Before You Vote" promotion campaign is proving highly successful. (p. 4563.)

Westinghouse licenses for four stations formerly programmed by NBC are renewed, but the FCC says that "its action must not be interpreted as a precedent for subsequent approval of broadcast station licensees disposing of their rights and privileges through contract. (p. 4563.)

Miscellaneous

STAR-SPANGLED BANNER

The NAB has received the following letter from John J. Gillin, Jr., manager of Station WOW, and asks all members to cooperate:

I believe it is true that a great many stations—perhaps a majority of them—are opening and closing each broadcast day with our national anthem "The Star-Spangled Banner."

Because it is playing such an important role in Americanization work, the Americanization Committee of the United States Junior Chamber of Commerce would like to have a full report on just how many stations are doing this.

They have come to me, as Chairman of the Radio Committee of the US JCC, and if we may clear the matter through the NAB I shall appreciate it very much.

Will all stations that are signing on and off with "The Star-Spangled Banner," and those that plan to do so, please be so kind as to advise NAB headquarters to that effect?

EDDIE CARTER

Station managers contemplating hiring Mr. Eddie Carter, marathon piano player, should write W. W. Behrman, radio Station WBOW, Terre Haute, Indiana.

ANALYSIS OF CONVENTION ATTENDANCE

Members will be interested in the following facts relative to attendance at the Eighteenth Annual Convention at San Francisco, August 4 to 7. The total attendance was 661.

A breakdown of this total figure discloses the following:

The 15th District, embracing northern California, Nevada and Hawaii, had a 100 per cent record of NAB attendance—20 NAB members, 20 convention attendants.

From a sectional standpoint, NAB member stations were represented as follows:

Pacific Coast stations (California, Oregon, Washington, Nevada, New Mexico, Arizona and the territories of Hawaii and Alaska) had over 90 per cent.

Rocky Mountain states (Idaho, Montana, Utah, Wyoming and Colorado), over 65 per cent.

Mid-west (Ohio, Kentucky, Missouri, Oklahoma, Wisconsin, Kansas, Nebraska, Iowa, Minnesota, Michigan, North Dakota, South Dakota, Illinois and Indiana) had over 47 1/2 per cent.

East Central and South Atlantic (Maryland, Virginia, West Virginia, North Carolina, South Carolina, and the District of Columbia) 48 per cent.

South (Georgia, Florida, Alabama, Louisiana, Tennessee, Arkansas, and Mississippi) had 25 per cent.

Texas, 66 per cent.

In addition to these NAB member stations attending, 64 non-member stations had representatives on hand.

This is almost 20 per cent of the non-member stations.

These figures reflect what we believe to be the universal opinion that the Eighteenth Annual Convention marks a high point in the radio industry. It can be truly said that the radio broadcasters now present a united front in both numbers and in spirit.
Arrangements are now being made through which the Association hopes to fulfill the requests for cuts of the NAB seal. It will be helpful if member stations desiring cuts will so advise headquarters.

Engineering

COLORED TELEVISION

On Wednesday, September 4, Columbia Broadcasting System demonstrated its new television in color to a group of about 50 representatives of the press. A prelude to this demonstration was the private showing tendered James L. Fly, Chairman of the FCC, on Thursday, August 29.

Colored motion pictures were used for the demonstration and Columbia announced that it hoped to have live pick-up equipment by the first of the year. CBS explained the operation of the color system as follows:

"An attempt to detail the technical phenomena in not too technical language follows:

1. A color motion picture is run through a film scanner. Between the film and an electronic pickup tube there is a rotating disc containing red, green, and blue filters in that order. When the red filter is in front of the tube only those parts of the picture which contain red register in the picture tube. When the green filter is in front of the tube only those parts of the picture which contain green (and this includes yellow) register in the tube. Similarly with the blue filter.

2. The three filters (red, green and blue) are balanced to give the effect of pure white when the picture is white.

3. Synchronized with the disc in front of the pickup tube is a similar disc in front of the receiver tube. In other words, at the instant when the red filter is in front of the pickup tube, a red filter is in front of the receiver tube. The same holds for the green and blue.

4. The scanning method differs somewhat from that used in most black and white systems. The picture is completely scanned every sixtieth of a second instead of every thirty-sixth of a second. However, at the end of the first sixtieth of a second only two colors have been used. The third color requires an additional one one-hundred-twentieth of a second, bringing the total to one-fortieth of a second for a single picture in full color.

The following sequence may help to make this clear:

The odd number lines are scanned in red in $\frac{1}{120}$ of a second.

The even number lines are scanned in green in $\frac{1}{120}$ of a second.

At this point the whole picture has been scanned but there is yet no blue in the picture. Time thus far: $\frac{1}{60}$ of a second.

Now the red on the odd number lines has faded and these same lines are scanned in blue in $\frac{1}{120}$ of a second.

At this point the whole picture has been scanned one and one-half times, but in full color only once. Time thus far: $\frac{3}{40}$ of a second.

Now the green on the even number lines has faded and these same lines are scanned in red in $\frac{1}{120}$ of a second.

At this point the picture has been scanned twice but in full color only once and a third. Time thus far: $\frac{3}{20}$ of a second.

Now the blue on the odd number lines has faded and these same lines are scanned in green in $\frac{1}{120}$ of a second.

Time thus far: $\frac{5}{120}$ of a second.

Now the red on the even number lines has faded and these same lines are scanned in blue in $\frac{1}{120}$ of a second.

At this point the whole picture has been scanned three times and in full color twice. Elapsed time thus far: $\frac{3}{20}$ of a second.

And now the whole progressive cycle begins again with the even number lines being scanned in red.

5. When there is no color disc in front of the receiver tube the picture appears as a black and white image."

The color television was invented by Peter C. Goldmark, Chief Engineer for CBS, after making an exhaustive study of the retentive qualities of the human eye. It was Dr. Goldmark's conclusion that if he would transmit each of three colors in succession that the human eye would remember long enough for the colors to properly mix in the eye, thus giving the appearance of the true colors. By successive transmission of the three colors Dr. Goldmark has been able to transmit good colored pictures and still stay within the standard 6 megacycle channel assigned to television. Another interesting point about the color system is that it can be picked up on a receiver designed for black and white and the picture will then appear in black and white.

James Lawrence Fly, Chairman of the FCC, said at a press conference this week that he was very much im-
pressed by the color television demonstration which was given to him last week when he visited the New York studios of Columbia Broadcasting Company.

Mr. Fly said that of course color television is in its early stages and there is considerable development work to do and while he doesn't want to pass on the feasibility of it, he expressed the opinion that it is a tremendous improvement in television.

The Chairman told the newsmen that what he had seen indicated to him a very substantial beginning and he expressed the hope that the various good engineers of the industry will get together and bring it to a practical state of efficiency. Mr. Fly said that while he does not in any way pose as an expert, he was very favorably impressed by the demonstration, and in his opinion there is no comparison between black and white and color television. Color television gives, he said, more satisfactory realism, definition and clarity.

Perspective in itself is a remarkable improvement Mr. Fly said. He explained transmitter has nothing to do with the colors as same are due to a device on the camera and a rapidly rotating disc between the spectator and the tube which reflects different type rays. The result of the picture he said is even and not jumpy. Color television, Mr. Fly told the newsmen, is more satisfactory than technicolor in the movies. Mr. Fly expressed the opinion that the use of one camera and one frequency band in itself is appealing and contrasted to other methods of using three cameras and three channels comprising an 18 megacycle band which at the present time is impracticable.

OPERATORS CITIZENSHIP PROOF

FCC adopted Order No. 75-B, further extending the effective date of Order No. 75, as amended by Order No. 75-A, from September 15 to October 15, allowing an additional month's extension of time within which to file proof of citizenship of all radio operators.

RADIO INTERFERENCE

Extracts from address by E. K. Jett, Chief Engineer of the Federal Communications Commission, at the 19th Annual Session of the American Congress of Physical Therapy, Cleveland, Ohio, September 2, 1940.

Interference is the problem child of radio. If it were not for interference, one of the principal reasons for Government regulation of radio would be lacking.

Radio interference is of three kinds. Except under special conditions, radio stations can interfere with one another unless they are assigned separate frequencies—that is, separate highways in the ether. This kind of interference is taken care of through Government regulation and international agreement. Every station is assigned a specific frequency or channel and is required to operate within this channel.

The second type of interference is caused by nature—thunder storms or electric discharges, which listeners call "static" or atmospheric noise. There is always a varying amount of atmospheric noise present in radio reception. This type of interference is overcome in large measure by assigning sufficient power to radio stations to override the noise.

The third type of interference is industrial—electrical or man-made. It is caused by electric machines used in the industry or the home, such as oil burners, electric razors, automatic sign flashers, and the like. Automobile ignition and electric railways are other producers of interference. Fortunately, this third type of interference travels a very short distance from the source. It has been possible to control it to a large extent through cooperation between manufacturers, radio operating companies, and the user of the equipment.

The interference caused by diathermy equipment appears in a class of its own. It is not only capable of interfering with radio reception but in many cases is actually now doing so.

The Federal Communications Commission recognizes the importance of electro-medical apparatus to the medical profession in the treatment of human ills. As a matter of fact, the Inter-American Radio Communications Arrangement, signed at Santiago in 1940, specifically states that the use of diathermy apparatus has an important place in therapeutics, surgery, and industry. The immediate problem, therefore, is how may the public enjoy the benefits of radiocommunication as well as those resulting from the use of electro-medical apparatus without conflict between these services.

The Commission has been studying this problem for several years and has received excellent cooperation from the Council on Physical Therapy and other interested parties. A number of States and municipalities have enacted statutes and ordinances to deal with the subject. However, the general problem of interference has been approached by the Commission from the point of view that the public as a whole will be best served through cooperation in the industry. The Commission believes that through further cooperation it will be able to adopt standards of good engineering practice to guide manufacturers and users of electrical equipment and thus prevent radio interference.

However, local interference in the broadcast services is not the greatest cause for concern in this problem. Transmissions from diathermy machines are capable of being received across the continent and even across the ocean. The frequencies upon which they operate are used by the national defense and safety services. Interruptions of these services may jeopardize life or property, or seriously affect the nation's interests. Communication companies appeal repeatedly to the Commission as being their only source of relief from these interruptions. Municipalities, as many as thirty at a time, have also petitioned the Commission for assistance in the protection of their police services.

Any curtailment of diathermy apparatus would cause great hardship to many sufferers and would prevent the saving of many lives. No one would suggest such a step. Diathermy, like radio, is a safety service. It is used by physicians and surgeons in many ways to combat disease and for surgical purposes. In the hospital it has become an indispensable tool. There are thousands of therapeutic departments in hospitals in the United States, all of which possess one or more diathermy machines, and there are thousands of privately owned machines being operated by physicians in this and other countries. The Commission would not want to prevent the use of these machines if it would seek to curtail the activities of the doctors themselves. But it is confronted with a very serious problem. It must find a way in which diathermy and radio can get along together.

The reason operation of diathermy apparatus affects radio reception is that the machines are essentially radio transmitters. The radiation which results in interference is not essential for therapeutic purposes and may be regarded as a by-product of the
means used to attain the objective. It can, however, be eliminated or minimized if reasonable methods are employed.

From an engineering standpoint, the solution of the problem is simple. While economic factors are important, they are not of such great importance as to be regarded as being unreasonable from the standpoint of cost to the users of therapy apparatus.

In those cases where it is necessary to take the apparatus to the patient, in circumstances where screening the room is not practicable or advisable economically, or, if for any other reason entire screening of the patient and the apparatus is not possible, it would appear that the only solution would be to use apparatus with a restricted frequency band of emission which does not extend over more than one communication channel. Great care should be exercised in the selection of the channel to make certain that no interference will result to radio reception.

This problem was considered in detail at the Inter-American Radio Conference held in Havana in 1937, and again at Santiago in 1940. It is significant that the question was an important topic for discussion at these meetings. There are international aspects. For example, the diathermy machines in Mexico or in Canada cause interference with reception in the United States, and vice versa.

A report prepared by the Canadian delegation and adopted at Havana gives the results of a very comprehensive study of diathermy interference and of the most effective and economic methods of suppressing it. Details as to the different kinds of shielding, their costs, and the manner in which they may be applied to rooms, walls, doors, etc., in hospitals and offices are given.

Representatives at Santiago agreed that their respective countries should adopt measures to suppress or alleviate, insofar as possible, interference caused by apparatus or equipment which may generate or radiate radio frequency currents capable of interfering with, or adversely affecting, the reception of radio transmissions. In this connection, the following is quoted from the annex to the Inter-American Radiocommunications Arrangement:

"All diathermy machines designed for the same service can operate on the same frequency without impairing their usefulness, since their operation is not affected by radiation from other machines. Operation on a specific frequency with a very close frequency tolerance is practicable, with little added cost. It is understood that the present design of diathermy equipment has to a great extent gravitated to frequencies above approximately 12 megacycles, hence it is recommended that the subscribing countries consider requiring all diathermy machines to use not more than two frequencies in harmonic relation above 12 megacycles which will not interfere with existing radio assignments. The harmonic relationship between the two frequencies provides a further guarantee against interference to radio communication."

"Standards of good engineering practice are believed to be practicable at the present time and consideration of the adoption by the governments of such standards at the earliest practicable date is recommended. The standards should include the following subjects:

(a) Frequencies to be used.
(b) Automatic frequency control.
(c) Frequency stability.
(d) Type of emission.
(e) Maximum power output.
(f) Harmonic radiation to be effectively suppressed.
(g) Internal circuits to be effectively shielded.
(h) Radiation from power supply connection to be eliminated.

"Where diathermy apparatus does not comply with the standards which may be adopted by the subscribing countries they should consider the desirability of requiring such apparatus to be operated in a properly shielded room."

There has been splendid cooperation among all concerned—the manufacturers of the apparatus, the medical profession, the Government, and commercial agencies whose radio services are affected, and the general public. When the medical profession has agreed on the most effective region of the radio spectrum for diathermy treatments, it will be the first task of the Commission to find a suitable frequency for diathermy operation. The provisions which must then be met insofar as the apparatus is concerned, should be arrived at by cooperative efforts on the part of the Government and other interested parties. The Federal Communications Commission stands ready to assist, and is planning to call a conference for this purpose in the near future.

BMI DEVELOPMENTS

BMI FEATURE TUNES
September 9-16

1. THE SAME OLD STORY
2. PRACTICE MAKES PERFECT
3. THERE I GO
4. MADAME WILL DROP HER SHAWL
5. SWINGIN' AT THE SEANCE
6. WE COULD MAKE SUCH BEAUTIFUL MUSIC

Practice Makes Perfect this week stands at the head of the list of numbers most played on the air and has also climbed into the list of the 15 best sheet music sellers. It has now been heard for two weeks on the Lucky Strike Hit Parade and the first phonograph records of the song are just being released this week and next.

There I Go, The Same Old Story, and We Could Make Such Beautiful Music hold their places on the "sheet," the latter for the ninth week.

Variety (September 4) says:

"What has been suspected is now gaining credence, that sundry ASCAP songsmiths have been authoring pop tunes for BMI under nom-de-plumes. It recalls that BMI made frank offers to ASCAP writers and the Society is supported to have tactfully told any and all that if they wanted to 'knock off some easy money' it was all right to write songs under phoney names.

The manner in which a couple of BMI tunes have been asserting themselves belies one premise that you can't find songwriters under rockpiles—but then again these tunesmiths may be better than the casual variety."

BMI has, of course, made no "frank offers" to ASCAP writers unless the writers could free themselves of ASCAP.

To contradict Variety's implication that BMI hits may have been written by ASCAP writers in disguise it is worth while identifying the composers and authors concerned.

The writers of Practice Makes Perfect, who are all members of the BMI staff, were discussed in this column last week.

There I Go was composed by Irving Weiser, a thoroughly real young man, using his own name, which is the same under which he won an honorable mention in a Paul Whiteman contest a few years ago. Hy Zaret, who wrote the words, is a young New York lawyer, author of the lyrics of half a dozen successful songs. He is far from being somebody else's "phoney name." It is not
many years since he was playing football for New York's High School of Commerce and wrestling for the University of West Virginia.

*The Same Old Story* is the result of collaboration in both words and music of Michael Field and Newt Oliphant. "Michael Field" is a pseudonym for Milton Schwartz, one which he has used as pianist as well as composer. He was for seven years a student in the Juilliard Graduate School of Music, where he held a fellowship under the famous piano teacher, Carl Friedberg. He was accompanist for Charles Hackett, of the Metropolitan Opera Company, has appeared as a recitalist at Steinway Hall, and has this past year presented the first recital by his piano pupils in Carnegie Hall. *The Same Old Story* is his first published composition.

Newt Oliphant is Newt Oliphant, a nephew of the late Herman Oliphant, who was General Counsel of the United States Treasury and a close adviser of President Roosevelt. Newt, who has previously published one song, is a pupil of Joseph Piastre, brother and teacher of Michael Piastro, one of the most famous of living violinists.

*We Could Make Such Beautiful Music* was written by Robert Sour, of the BMI staff, one of the co-authors of *Practice Makes Perfect*, and "Henry Manners," who in private life is Henry Katzman, also a member of BMI staff.

Four more new stations join the BMI parade: KOB, Albuquerque, New Mexico, WGAN, Portland, Maine, WKBN, Youngstown, Ohio, WOPI, Bristol, Tennessee.

Sunday, September 8, the day appointed by President Roosevelt for special prayers for peace, is to be marked by widespread use of a new hymn, *Hail, Prince of Peace*, written by Thomas Patton Mock and published by Broadcast Music, Inc. The last stanza contains words almost identical with those used by Winston Churchill in a radio address when he asked for prayers that "Right should conquer might
On land and sea."

It will be heard on at least four network broadcasts during the day, one of them originating in the Temple of Religion at the World's Fair, where it is to be sung at two services.

The hymn, composed early this year, was first sung last Easter in a radio broadcast by the Byzantine choir of the Holy Trinity Cathedral in New York. On May 3rd it was presented at the annual spring concert of the General Motors Glee Club, of which the composer is a member. Two days later it was sung by audience as well as choir at the General Conference of the Methodist Church in Atlantic City.

On Peace Sunday it is to be sung at the World's Fair by a choir under the direction of Rhys Morgan in an arrangement made by Dana Merriman, assistant editor of Broadcast Music, Inc. This performance will occur during the noon service at the Temple of Religion and will be carried by the Mutual Broadcasting System over a coast-to-coast hookup from WOR. The new hymn will be sung also at the five o'clock service in the Temple of Religion by the Churchmen's Glee Club and Chorus Choir.

It is also scheduled for Tone Pictures, NBC Blue, 8:30 to 9:00 a.m., Sunday Vespers, NBC Blue, 4:00 to 4:30 p.m., and Richard Maxwell's Songs of Comfort and Cheer, CBS, at 9:30 a.m.

Specially bound copies of *Hail, Prince of Peace* are being prepared for presentation to President Roosevelt, to Archbishop Spellman, and to Pope Pius XII, for whom the lyrics have been translated into Latin.

Inspired by Christmas broadcasts in a world at war, the song has stirred the enthusiasm of musicians and churchmen alike and has been accepted by different denominations as a profoundly moving expression of the common prayer for peace. Among those praising it have been Bishop Edwin E. Hughes of the Methodist Church, Dr. Ralph Sockman, National Chairman of the Methodist Peace Commission, Archbishop Athenagoras of the Greek Orthodox Church, and numerous others.

The League of Nations Assembly has requested the hymn for use at its opening services in the Cathedral at Geneva. The first stanza of the hymn contains the slogan of the League—

"May peace on earth now reign,
Good will toward men."

A radio sales executive is the latest recruit to join the ranks of popular composers under the banner of Broadcast Music, Inc. He is Paul Mills, young accountant executive at Westinghouse stations WOWO-WCL, Fort Wayne, Indiana.

Mills' tune, *Little Star*, recently accepted for publication by BMI, will be a familiar one to radio audiences in many sections of the country, for it is the theme song of "Friendly Neighbors," the popular Alka-Seltzer radio serial, now featured on 41 stations including the complete Don Lee Network and KGMB, Honolulu.

The three judge federal court did not hold Florida's music monopoly law unconstitutional in its entirety. *The court sustained the constitutionality of Florida's 1939 law with the exception of Sections 4 (a) and 4 (c).* (NAB Reports, p. 4526.) It merely held unconstitutional the 1937 Florida law, which was a duplicate of the statute enacted in Nebraska, and based this part of
its decision rendered in Nebraska last fall. It held that the state had the right to enact monopoly legislation but that the monopoly provisions of the 1937 statute could not be separated from the unconstitutional provisions and therefore that the entire statute must fall.

Laws similar to the Florida 1939 law which were sustained as constitutional also have been enacted in Kansas, North Dakota, Montana and, in part, in Vermont and are in force in those states. New Mexico likewise enacted a similar statute, but it was subjected to a pocket veto by the Governor.

The temporary injunction entered last October against the enforcement of the 1939 act was "vacated and dissolved as to the whole act and all of its sections except Sections 4 (a) and 4 (c)." The principal features of this statute now are in full force and effect in Florida. These require that copyright owners selling performing rights in the state must make full disclosure of all copyrighted music which they intend to sell by filing under oath with the State Comptroller full information concerning each music copyright. This information includes the name of the composition, the names of the composer, author and publisher, the date and Copyright Office number of the copyright, the present owner of the performing rights and a statement that the owner of the performing rights has a legal right to license. This sworn information must be filed with the Comptroller as a condition precedent to doing business in the state, and no suits may be brought in the state by the copyright owner until it is shown affirmatively that the disclosure provisions of the statute have been complied with. Certified copies of all data filed with the Comptroller must be submitted to a prospective licensee at the time of negotiations for a license if the prospective licensee so requests, in order that he may know what rights he is acquiring. A 3 per cent privilege tax based on gross income is provided for, and the law also requires that the Secretary of State be appointed agent by the copyright owners for the service of process in any action brought against the copyright owners. In the past, it has been impossible to obtain jurisdiction in local courts in suits against licensing combinations such as ASCAP, SESAC, AMP and others, with the result that music users were compelled to abandon the enforcement in court of any legal rights which they might have, or attempt to enforce those rights by bringing suit in New York. Violation of the statute subjects the offender to fine or imprisonment, or both.

The Florida Attorney General now is considering the taking of an appeal to the United States Supreme Court from the decision of the lower court with regard to the monopoly provisions of the 1937 statute and Sections 4 (a) and 4 (c) of the 1939 statute.

This is the first final decision rendered by an authoritative court in which the power of the state legislature to regulate the licensing of public performance rights in copyrighted music has been sustained as constitutional. It is believed substantial progress has been made and that ASCAP came out second best in the litigation.

Attorneys representing the State of Florida were Assistant Attorney General Thomas J. Ellis of Tallahassee, Special Assistant Attorney General Lucien H. Boggs of Jacksonville and Andrew W. Bennett, Counsel, of Washington, D. C. ASCAP was represented by Frank J. Wideman, Manley P. Caldwell, Louis D. Frohlich and Herman Finklestein.

Advertising

ADVERTISING DIRECTOR TO SPEAK BEFORE CHAIN DRUGGISTS

The Bureau of Radio Advertising has been invited to address the annual convention of the Associated Chain Druggists, scheduled for the Hotel Biltmore, New York, September 16-18. The subject of the talk, to be delivered by Samuel J. Henry, Jr., is "Why and How Radio for Chain Drug Stores." The date has been set for September 17.

Roy Goldheim, advertising manager of the Read Drug Chain, Baltimore, is chairman of the program committee, and arranged for the radio session through Purnell Gould, commercial manager, WFBR.

MGM PICTURE PLAYS

Some member stations have recently been offered an "Electrical Transcription" series by Metro-Goldwyn-Mayer Studios, to start on or about September 15, to continue for a period of 13 weeks.

In the offering blank sent stations to fill out, the station is asked to agree "to play each transcription delivered to us at least once on the best time available either before or during the run of the picture which the transcription exploits."

In addition, the transcriptions are "not to be played on a sponsored program (other than a program sponsored by the theater in which M-G-M pictures appear)...."

The majority of radio stations agree with the Bureau of Radio Advertising that the only manner in which these transcriptions should be broadcast is "on a program sponsored by the theater in which M-G-M pictures appear" and at regular card rates.

In addition, stations may well consider the desirability of airing these transcriptions which doubtless will plug ASCAP tunes exclusively, to the detriment of BMI and other non-ASCAP music.
LISTEN BEFORE YOU VOTE

Orders for a substantial number of “Listen before You Vote” posters were received at headquarters this week with more anticipated next week.

It is suggested that as many stations as possible tie-in with the “Listen before You Vote” theme. As one manager expressed it, listening to both sides of the question is the spirit of democracy. The American way of life must continue, he said, or the American system of broadcasting will fade out of the picture.

Despite increased demands for time by various agencies, state and national, many station managers are continuing their individual campaigns to keep the virtues and benefits of the American system of radio constantly before listeners. One of them is Ellis Atteberry, manager, KCKN, Kansas City, Kansas. He recently enclosed a letter of approval of the practice, representative of hundreds of similar letters the station had received, “since we began to follow your NAB suggestions to sell the American system of broadcasting to listeners.”

Into such planning the “Listen before You Vote” theme fits hand-in-glove; it is the very essence of democracy.

Several suggestions for tying-in with the “Listen before You Vote” theme were made in a bulletin of July 18. From September 16 to election day “Listen before You Vote” is a natural for all member stations.

Many of the posters by individual stations are indicated by letters from managers. Because of their use in competitive markets the listing of purchasers of additional quantities is omitted.

NATIONAL DEFENSE

The week ends with the thirteen district managers of the United States Civil Service Commission meeting in Washington for protracted conferences with commission headquarters personnel.

While the field executives are in session they will be asked a number of questions, at NAB’s request, the answers to which may contribute to the efficiency of man power procurement by the broadcasting industry.

As of Thursday, September 5, 619 stations have notified NAB that they are broadcasting man power announcements. Previously unpublished cooperating stations are:

DISTRICT 1
VERMONT
WCAX—Burlington

DISTRICT 4
NORTH CAROLINA
WFNC—Fayetteville

DISTRICT 5
GEORGIA
WDAK—West Point

DISTRICT 9
VERMONT
WCAX—Burlington

DISTRICT 10
IOWA
KWLC—Decorah

DISTRICT 13
TEXAS
KMAC—San Antonio

FEDERAL COMMUNICATIONS COMMISSION

WESTINGHOUSE LICENSES RENEWED

Cautioning that its action must not be interpreted as a precedent for subsequent approval of broadcast station licensees disposing of their rights and privileges through contract, the FCC has granted applications of Westinghouse Electric and Manufacturing Co. for renewal of licenses of stations WBZ and WBZA, at Boston, KYW at Philadelphia, and KDKA at Pittsburgh.

These stations were among those which the Commission, on January 29, designated for hearing in the matter of contractual relations. Hearing on the Westinghouse stations, set for October 7, is now cancelled.

In its petition for reconsideration and grant of the renewal applications without hearing, Westinghouse alleged that it has held operating licenses for these stations for more than 18 years, and as “the pioneer” in the development of broadcasting has continued its interest and research therein; that prior to Commission’s decision to hold hearing the company considered the desirability of terminating its agreement with the National Broadcasting Co., and did so as of July 1; that Westinghouse now supplies its own programs for local broadcasting and has a new arrangement with National on the usual station affiliation basis for network programs.

Declares the Commission in its opinion and order:

“We are of the opinion that in entering into the agreement of November 21, 1932, and in permitting National to operate the stations, Westinghouse disposed of rights and privileges through contract, the FCC has granted applications of Westinghouse Electric and Manufacturing Co. for renewal of licenses of stations WBZ and WBZA, at Boston, KYW at Philadelphia, and KDKA at Pittsburgh.

These stations were among those which the Commission, on January 29, designated for hearing in the matter of contractual relations. Hearing on the Westinghouse stations, set for October 7, is now cancelled.

In its petition for reconsideration and grant of the renewal applications without hearing, Westinghouse alleged that it has held operating licenses for these stations for more than 18 years, and as “the pioneer” in the development of broadcasting has continued its interest and research therein; that prior to Commission’s decision to hold hearing the company considered the desirability of terminating its agreement with the National Broadcasting Co., and did so as of July 1; that Westinghouse now supplies its own programs for local broadcasting and has a new arrangement with National on the usual station affiliation basis for network programs.

Declares the Commission in its opinion and order:

The week ends with the thirteen district managers of the United States Civil Service Commission meeting in Washington for protracted conferences with commission headquarters personnel.

While the field executives are in session they will be asked a number of questions, at NAB’s request, the answers to which may contribute to the efficiency of man power procurement by the broadcasting industry.

As of Thursday, September 5, 619 stations have notified NAB that they are broadcasting man power announcements. Previously unpublished cooperating stations are:

FEDERAL COMMUNICATIONS COMMISSION

WESTINGHOUSE LICENSES RENEWED

Cautioning that its action must not be interpreted as a precedent for subsequent approval of broadcast station licensees disposing of their rights and privileges through contract, the FCC has granted applications of Westinghouse Electric and Manufacturing Co. for renewal of licenses of stations WBZ and WBZA, at Boston, KYW at Philadelphia, and KDKA at Pittsburgh.

These stations were among those which the Commission, on January 29, designated for hearing in the matter of contractual relations. Hearing on the Westinghouse stations, set for October 7, is now cancelled.

In its petition for reconsideration and grant of the renewal applications without hearing, Westinghouse alleged that it has held operating licenses for these stations for more than 18 years, and as “the pioneer” in the development of broadcasting has continued its interest and research therein; that prior to Commission's decision to hold hearing the company considered the desirability of terminating its agreement with the National Broadcasting Co., and did so as of July 1; that Westinghouse now supplies its own programs for local broadcasting and has a new arrangement with National on the usual station affiliation basis for network programs.
forth exercise control over the stations. To deny the renewal applications because of this earlier violation of law would result in depriving the public of the broadcast service now available from the stations.

"The contracts now in existence between Westinghouse and National appear to be of the usual character extensively employed by the several networks in relation to licensed broadcast stations. The Commission, by a special committee, has held lengthy hearings and has obtained much information upon the subject of such contracts in its investigation of chain broadcasting, and now has this general subject under consideration. Pending final action by the Commission on this subject, we do not deem it desirable either to approve or disapprove the new contracts between Westinghouse and National, and therefore expressly reserve any decision or opinion with respect to these contracts until our consideration of the entire subject of chain broadcasting agreements is completed and action taken thereon.

"Upon all of the facts we are of the opinion that public interest will be served by granting the renewal applications here involved. This action, however, must not be interpreted as a precedent which in the future will permit licensees of broadcast stations to dispense by contract or agreement, oral or written, of the rights and privileges conferred upon them under licenses issued by this Commission or to transfer control of stations to non-licensees without first obtaining the written consent of the Commission and thereafter abrogate such agreements, contracts or understandings and urge the Commission to overlook such actions and grant renewals of licenses by the Commission."

**FEDERAL COMMUNICATIONS COMMISSION DOCKET**

Following broadcast hearing is scheduled before the Commission during the week beginning September 9. It is subject to change.

**September 9**

WPAY—Chester A. Thompson (Transferor), The Brush-Moore Newspapers, Inc. (Transferee), Portsmouth, Ohio.—Transfer of control of corporation; 1870 kc., 100 watts, unlimited time.

**FEDERAL COMMUNICATIONS COMMISSION ACTION**

**APPLICATIONS GRANTED**

KFD—Amarillo Broadcasting Corp., Amarillo, Tex.—Granted modification of license to change frequency from 1500 kc. to 1200 kc.; power 250 watts, unlimited time (B3-ML-1013).

WOLF—Civic Broadcasting Corp., Syracuse, N. Y.—Granted modification of license to increase power from 100 watts to 250 watts on frequency 1500 kc., unlimited time (B1-ML-994). Burns Avenue Baptist Church, Detroit, Mich.—Granted authority to transmit religious programs from applicant's church auditorium in Detroit by lines of the Michigan Bell Telephone Co., to station CKLW, Windsor, Ontario, Canada (B2-FL-80).

WSAZ—WSAZ, Inc., Huntington, W. Va.—Granted construction permit to change frequency from 1150 kc. to 990 kc.; increase hours from limited-WOAI to unlimited; move transmitter; install new transmitter and directional antenna for day and night use; power 1 KW; granted pending conference (B2-P-2856).

WCLS—Robert W. Thomas, Administrator, Joliet, Ill.—Granted consent to the involuntary transfer of control of WCLS, Inc., licensee by granting WCLS, upon the death of L. W. Wood, to Robert W. Thomas, Administrator; 1310 kc., 100 watts, specified hours (B4-TC-243).

KDTD—Telegraph Herald, Dubuque, Iowa.—Granted modification of construction permit as modified to increase power from 500 watts to 1 KW; change hours of operation from daytime to unlimited; install directional antenna for night use; and give location of studio, and extend commencement date to 60 days after grant and completion date to 180 days thereafter; granted conditionally upon approval of transmitter site and antenna system by the Commission (B4-MP-1028).

WING—WSMK, Inc., Dayton, Ohio.—Granted construction permit to increase power from 250 watts night, 500 watts LS, to 5 KW; move transmitter location; install new transmitter; and change directional antenna for night use; 1890 kc. (B2-P-2761).

**RELAY BROADCAST STATION RENEWALS**

The Commission granted the following applications for renewal of relay broadcast station licenses for the period beginning 3 a. m., Eastern Standard Time, October 1, 1940, and ending 3 a. m., Eastern Standard Time, October 1, 1941.

WPAY—Chester A. Thompson, Transferor, and Brush-Moore Newspapers, Transferee, Portsmouth, Ohio.—Denied petition for reconsideration and grant without hearing of application for consent of transfer of control of Vee Bee Corp., licensee of Station WPAY.

RENEWAL OF LICENSES

Westinghouse Electric & Manufacturing Co.: WBZ, Boston, Mass.; WBZA, Boston, Mass.; KYW, Philadelphia, Pa.; KDKA, Pittsburgh, Pa.—Granted petition for reconsideration, canceling hearings previously scheduled, and granted renewal of licenses of broadcast stations WBZ, WBZA, KYW, and KDKA.

MISCELLANEOUS

KMBC—Midland Broadcasting Co., Kansas City, Mo.—Granted special temporary authority to rebroadcast material to be received from police transmitter KGPE between 7:30 p.m. and 9 p.m., CST, on September 11, 1940, in connection with educational broadcasting concerning the police department, subject to the condition that only routine police communications are rebroadcast.

WMAS—Southeastern Broadcasting Co., Inc., Macon, Ga.—Granted special temporary authority to operate from 8:15 p.m. to 10 p.m., EST, on September 10, 1940, in order to broadcast the political speeches of Abil Nix, A. M. Anderson, and others.

WMAS—Southeastern Broadcasting Co., Inc., Macon, Ga.—Granted special temporary authority to operate from 8:15 p.m. to 10 p.m., EST, on September 12, 1940, in order to broadcast the political speeches of Abil Nix, A. M. Anderson, and others.

WFMD—The Monocacy Broadcasting Co., Frederick, Md.—Granted special temporary authority to operate from 8:45 p.m. to 10:15 p.m., EST, on August 29, 1940, in order to broadcast the annual Ritchie Day Dinner only.

KGCA—Charles Walter Greenley, Decorah, Iowa.—Granted extension of special temporary authority to remain silent for the period August 16, 1940, to not later than September 14, 1940, pending the filing of modification of license and completion of arrangements with Station KWLC.

WPAY—Chester A. Thompson, Transferor, and Brush-Moore Newspapers, Transferee, Portsmouth, Ohio.—Denied petition for reconsideration and grant without hearing of application for consent of transfer of control of Vee Bee Corp., licensee of Station WPAY.

Broadcasting Corp. of America, Riverside, Calif.—Granted petition for intervention in re hearing on application of Mollin Investment Co., Riverside, Calif., for construction permit for new station to operate on 1390 kc., 500 watts, daylight (B5-P-2464).

WRK—City of Dallas, Tex.—Granted motion for leave to amend application so as to request 5 KW, move transmitter, install new equipment and directional antenna system; frequency 1280 kc. and unlimited hours to remain same (B3-P-2229).

Trent Broadcasting Corp., Trenton, N. J.—Granted petition for leave to amend application for new station, with reference to proposed transmitter site and directional antenna system.

WDK—L. J. Duncan, Leila A. Duncan, Josephine A. Keith, Effie H. Allen, Aubrey Gay, d/b as Valley Broadcasting Co., West Point, Ga.—Granted license to cover construction permit as modified for new broadcast station, 1310 kc., 250 watts, unlimited time (B3-L-1214). Also granted authority to determine operating power by direct measurement of antenna input (B3-Z-466).

WFME—Monocacy Broadcasting Co. (area of Frederick, Md.), Portable-Mobile.—Granted license to cover construction permit for new relay broadcast station, frequencies 1922, 2038, 2150, 2790 kc., power 40 watts (B1-LRY-202).

KMYR—F. W. Meyer, Denver, Colo.—Granted modification of construction permit for new station, for approval of antenna and transmitter site, and change type of transmitter; 1310 kc., power 100 watts, 250 watts LS, unlimited time (B5-MP-662).

WMJM—Cordele Dispatch Publishing Co., Inc., Cordele, Ga.—Granted modification of construction permit as modified for construction of new station, for change in type of transmitter; 1590 kc., 100 watts, 250 watts LS, unlimited time (B3-MP-1026).

WNBX—Twin State Broadcasting Corp., Keene, N. H.—Granted modification of construction permit for changes in directional antenna for both day and night, and move of transmitter and studio, for extension of completion date from September 10, 1940, to December 10, 1940 (B1-MP-1294).

WSWD—The Fort Industry Co., Toledo, Ohio.—Granted license to cover construction permit to increase power from 1 to 5 KW night, installation of directional antenna for night use (B2-L-1216). Also granted authority to determine operating power by direct measurement of antenna power (B2-L-467).

WCAR—Pontiac Broadcasting Co., Pontiac, Mich.—Granted special temporary authority to operate from local sunset (Aug. 7:30 p.m., EST) to 11 p.m., EST, on August 30 and 31, 1940, and from local sunset (Sept. 6:45 p.m., EST) to 11 p.m., EST, on September 1, 2, 3, 4, 5, 6, 7, and 8, 1940, in order to broadcast Michigan State Fair programs daily.

WEAU—Central Broadcasting Co. Eau Claire, Wis.—Granted special temporary authority to operate from 7:30 p.m. to 9 p.m., EST, August 29, 1940, in order to broadcast the acceptance speech of Henry A. Wallace, Democratic Vice Presidential candidate.

WSAY—Brown Radio Service & Laboratory, Rochester, N. Y.—Denied petition for reconsideration of Commission action of August 14, 1940, which ratified the action taken July 29, 1940, by a Board of Commissioners granting the application for Watertown Broadcasting Corp., Watertown, N. Y., for a construction permit for new broadcast station to operate on frequency 1210 kc., 250 watts power, unlimited time.

WJHP—The Metropolis Co., Jacksonville, Fla.—Granted extension of time to September 25, 1940, within which to file answer to petition of Florida Broadcasting Co. (WMBR) for rehearing, with hearing on Commission’s grant of a license to cover construction permit to The Metropolis Co. on July 23, 1940, for new broadcast station to operate on 1290 kc., 250 watts power, unlimited time.

KYSY—F. B. Clements & Co., d/b as Southern Minnesota Supply Co., Mankato, Minn.—Denied petition for immediate grant of application for construction permit to install new equipment, directional antenna, and to operate on 910 kc. contingent on the shifting of station frequencies pursuant to the North American Regional Broadcasting Agreement.

WBOC—The Peninsula Broadcasting Co., near Salisbury, Md.—Granted modification of construction permit for new broadcast station for approval of antenna, approval of transmitter and studio sites; 1500 kc., 250 watts, unlimited time (B1-MP-1047).

WFAM—Westchester Broadcasting Corp., White Plains, N. Y.—Granted license to use old main transmitter for auxiliary purposes only (B1-L-1217).

WFBG—The Gable Broadcasting Co. (Lessee), Altoona, Pa.—Granted license to cover construction permit for changes in equipment and increase in power; 1310 kc., 250 watts, unlimited time (B3-P-2115).

KOH—The Bee, Inc., Reno, Nev.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-472). Also granted license to cover construction permit, as modified, for change in frequency and power, installation of directional antenna for night use and move of transmitter and studio; 630 kc., 1 KW, unlimited time, directional antenna at night (B5-L-1218).

WLW—The Crosley Corp., Cincinnati, Ohio.—Granted modification of construction permit for equipment changes, for extension of completion date from October 22, 1940, to April 24, 1941.

WGNV—WGNV Broadcasting Co., Inc., Newburgh, N. Y.—Granted special temporary authority to operate from 6:15
p. m. to 7 p. m. EST, September 2, 9, 16, 23, and 30, 1940, in order to broadcast a religious program, a Novena, conducted by Monsignor Connelly.

WAIA—Press Union Publishing Co. (area of Atlantic City, N. J.).

W9XA—Everett L. Dillard, tr. as Commercial Radio Equip. Co., Kansas City, Mo.—Granted extension of special temporary authority to operate a high frequency broadcast station W9XA on a frequency of 26300 kc., using maximum power of 1000 watts, special emission (FM) in cooperation with the licensee of high frequency broadcast station W2XK, for the period beginning August 31, 1940, and ending not later than September 29, 1940, to conduct and determine the extent of mutual sky-wave interference existing between two stations operating with 1 KW on 26300 kc., employing frequency modulation, and to determine to what field strength contour of the desired station the interfering station whose transmissions are received via sky-wave will interfere with program reception of the desired station in its own coverage area.

APPLICATIONS FILED AT FCC

900 Kilocycles

WJLS—Joe L. Smith, Jr., Beckley, W. Va.—Construction permit to install new transmitter, install directional antenna for night use, change frequency from 1210 to 900 kc., and increase power from 250 watts to 1 KW. Amended: To make minor changes in directional antenna.

1320 Kilocycles

WADC—Allen T. Simmons, Village of Tallmadge, Ohio.—License to cover construction permit (B2-P-2495) as modified, for new equipment, installation of directional antenna, increase in power and move of transmitter.

WADC—Allen T. Simmons, Village of Tallmadge, Ohio.—Authority to determine operating power by direct measurement.

NEW—WJR, The Goodwill Station, Detroit, Mich.—Construction permit for a new high frequency broadcast station to be operated on 45700 kc.; coverage, 14,144 square miles; population, 3,636,615.

MISCELLANEOUS

WEMB—Westinghouse Electric and Manufacturing Co., Mobile-Chicopee Falls, Mass.—Construction permit to install new transmitter and decrease operating power from 50 watts to 2 watts.

WEMB—Westinghouse Electric and Manufacturing Co., Mobile-Chicopee Falls, Mass.—License to cover construction permit (B1-PRE-365) for new equipment and decrease in operating power.

KEGN—Don Lee Broadcasting System, Portable-Mobile, San Francisco, Calif.—License to cover construction permit (B5-PRE-289) as modified for installation of new transmitter.

KQCB—Queen City Broadcasting Co., Inc., vicinity of Northwest Washington State.—License to cover construction permit (B3-PRE-223) for installation of new transmitter and increase in power.

WBAE—L. B. Wilson, Inc., Cincinnati, Ohio.—License to cover construction permit (B2-PRY-217) for new relay station.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition in complaints issued against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Belle Blouse Corporation, New York, is alleged to misrepresent the constituent fiber or material of which its blouses and other wearing apparel for women are made. A typical representation, the complaint continues, is its use of the terms "Pure Dye Silk" and "Pure Crepe Silk," and other terms indicative of silk, on tags, labels, price lists and other advertising matter. By these means and by failing to disclose the rayon content of certain of its products, the complaint alleges, the respondent represents that its fabrics so described are composed of silk, when in fact they consist in whole or in part of rayon. (4273)

Federal Sales Company.—See Jordan Stevens Company.

Parker T. Frey Company.—Parker T. Frey, trading under the names of Parker T. Frey Company and Nearby Sales Company, 135 South Second St., Philadelphia, a broker in the sale of food products, particularly canned sea food and vegetables, is charged with violation of the brokerage provision of the Robinson-Patman Act in a complaint.

The complaint alleges that the respondent has carried on his brokerage business principally under the firm name of Parker T. Frey Company and that he is also in the business of buying and selling food products for his own account principally under the firm name of Nearby Sales Company but also under the name Parker T. Frey Company. According to the complaint, the respondent, in the purchase of food products for his own account, and trading under the two firm names, receives and accepts from numerous sellers of such products so purchased, brokerage fees or allowances or discounts in lieu thereof, on many of the purchases made for his own account. (4290)
S. Friedman & Sons—Abraham and Samuel Friedman, trading as S. Friedman & Sons, and as Sunray Yarn House, New York, are alleged to have used in connection with the sale and distribution of their knitting yarns as "Sunray Cashmere Sport Yarn" and as "Sunray Cashmere Sport" and "Cashmere Sport," and another yarn as "Sunray Cashmere De Laine," representing that they are made entirely from the hair of the Cashmere goat. The complaint points out that in fact neither of the yarns is made entirely from such hair, the "Sunray Cashmere Sport Yarn" containing no hair of the Cashmere goat and "Sunray Cashmere De Laine" being a mixture of hair of the Cashmere goat and Australian wool, with the Australian wool predominating. (4274)

Gardner & Company—Everett J. Graneer, Mame Portin, Frances Martin, Hattie G. Gardner, Thelma Maas, Bernice Feitler and Erwin Feitler, individually and trading as Gardner & Company, 2309 Archer Ave., Chicago, are charged, in a complaint, with the distribution of lottery devices.

The complaint alleges that the respondents are engaged in the manufacture and distribution of push cards and punch boards involving lottery features when used in connection with the sale or distribution of other merchandise to ultimate consumers.

Through the sale and distribution of their devices the respondents are alleged to furnish others with the means of conducting lotteries. (4278)

Gottlieb Brothers—Charging misrepresentation in the sale of knitting yarns, a complaint has been issued against Samuel and Peter Gottlieb, trading as Gottlieb Brothers and as Jack Frost Yarn Company, 207 Avenue C, New York.

The complaint alleges that the respondents represent the constituent fiber or material of which their products are made by means of misleading designations on labels, sample cards and other advertising matter and by failure to disclose the rayon content of certain of their products.

Typical instances of the respondents' misrepresentation of the constituent fiber or material of their products, the complaint continues, are their use of the wool-denoting terms "Sport Angora," "Cashmere Sport," "Imported Cashmere," "Zephyr Tweed," "Persian Curl" and other similar words for products made from fibers other than those so named.

Some of the terms employed by the respondents, the complaint continues, do not disclose or indicate the kind or type of material from which the products are made, and are used on materials having the appearance and feel of either silk or wool; for example, use of the terms "Heatherstone," "Pompadour," "Paradise," "Dyveen," "Magic Duveen," "Willow Down," "Sopersheen," "Germanstow" and "Persian Curl," when in fact the products are composed in whole or in part of rayon.

Typical also of the respondents' representations of their products as being of a finer grade, higher quality or different fiber than is actually the case, the complaint continues, has been their use of terms indicative to the public of certain fiber, grade or quality; for example, use of the words and phrases "Cashmere Sport" and "Imported Cashmere" in advertising matter to describe certain of their products which do not contain the hair of the Kashmir goat but instead are composed of other fiber.

A further typical practice of the respondents, the complaint continues, has been their use of words associated in the public mind as descriptive of wool exclusively, to describe yarn products consisting partly of wool and partly of other materials; for example, use of the words "Twist," "Worsted," "Angora" and "Cashmere" and other words of similar meaning indicative of wool to designate yarn products actually composed of rayon and wool. (4268)

Minetree Brokerage Company—Alleging violation of the brokerage provision of the Robinson-Patman Act, a complaint has been issued against T. A. Ward, Wilma Ward and Carr Ward, trading as Minetree Brokerage Company, Poplar Buff Mo.

The complaint points out that the Poplar Buff Wholesale Grocery Company, Poplar Buff, Mo., in which the respondents T. A. and Wilma Ward own 85 per cent of the outstanding capital stock and of which they are officers, place orders for a substantial portion of its merchandise requirements, particularly foodstuffs, with various sellers through the respondent brokerage firm of T. A. Ward, Wilma Ward and Carr Ward, trading as Minetree Brokerage Company.

Sellers delivering the goods ordered by Poplar Buff Wholesale Grocery Company, the complaint alleges, transmit and pay to the respondent brokerage firm substantial brokerage fees or commissions amounting to a certain percentage, usually from 2½ to 5 per cent of the sales price of the grocery company's purchases.

In all of these transactions, the complaint continues, the respondents have acted for and on behalf of the Poplar Buff Wholesale Grocery Company. (4285)

National Proprietaries, Inc.—Misrepresentation of a drug product is alleged in a complaint issued against National Proprietaries, Inc., 767 North Milwaukee Ave., Chicago.

Advertising a preparation known as "Nuga-Tone," the respondent is alleged to represent that it has substantial value in treating nervous disorders when in fact it does not possess such value.

The complaint alleges that in addition the respondent has disseminated false advertisements in that such advertisements fail to reveal that use of the preparation under the conditions prescribed in the advertisements or under such conditions as are customary and usual may result in serious and irreversible injury to health.

The complaint points out that the respondent's preparation is not safe and harmless in that it contains the drugs corrosive sublimate, strychnine sulphate, arsenic trioxide, reduced iron, extract gentian, extract cascara sagrada, extract taraxacum and zinc phosphate. The complaint alleges that these drugs are present in quantities sufficient to produce serious and irreversible injury to health if used under the conditions prescribed in the advertisement or under such conditions as are customary and usual. (4271)

Nearby Sales Company—See Parker T. Frey Company.

The complaint charges that The Thomas Page Mill Company, Inc., has paid brokerage fees and granted allowances or discounts in lieu of brokerage upon purchases by buyers for their own account, including the Piedmont Wholesale Grocery Company, and that the latter company has received and accepted allowances or discounts in lieu of brokerage upon its purchases from The Thomas Page Mill Company, Inc. (4286)

Poplar Buff Wholesale Grocery Co.—See Minetree Brokerage Company.

Thomas Roberts & Company—Charging violation of the brokerage provision of the Robinson-Patman Act in the sale and purchase of food products, a complaint has been issued against W. E. Thrasher, Wainwright Churchill, trading as Thomas Roberts & Co., 135 South Second St., Philadelphia, who purchase canned fruits and vegetables for their own account and resell them to jobbers, wholesalers, retail chain stores and other purchasers.

Substantial brokerage fees and commissions or allowances and discounts in lieu thereof have been received and accepted by the respondents from sellers in connection with the purchase of commodities for their own account in interstate commerce, according to the complaint, and have been granted by them to purchasers in connection with the respondents' resale of such commodities.

Substantially the same complaints are made in this case as in the case against Minetree Brokerage Company above. (4286)
modities to their respective brokers for effecting sales of such products to other purchasers.

The complaint alleges that the respondents' receipt and acceptance from the sellers, and their granting and allowing to the purchasers upon resale, of brokerage fees and commissions or allowances and discounts in lieu thereof, are in violation of Section 2(c) of the Clayton Act, as amended by the Robinson-Patman Act. (4282)

Albert W. Sisk & Son—Six firms engaged as brokers in the purchase and sale of food products are charged with violation of the brokerage provision of the Robinson-Patman Act in complaints issued against them.

The respondents, according to the complaints, act as agents of sellers in transactions of sale and purchase of canned vegetables between sellers and jobbers, wholesalers, retail chain stores and other purchasers. The C. F. Unruh Brokerage Company, H. M. Ruff & Son, and W. E. Robinson Co., Inc., also handle canned fruits.

The complaints allege that the respondents effect sales for the sellers both by direct transactions with the purchasers and through corresponding or local brokers employed by the respondents; that for their services to the sellers the respondents receive from the sellers a brokerage fee or commission, usually four per cent of the price paid by the purchaser, and that in instances where the respondents effect sales for the sellers directly with the purchasers, an allowance or discount in lieu of brokerage is granted to such purchasers by the respondents, such allowance and discount usually being the equivalent of the brokerage paid by the respondents to local or corresponding brokers when sales are effected through them. This allowance or discount, according to the complaint, usually amounts to 50 per cent of the brokerage fees or commissions paid by the sellers to the respondents.

The complaints point out that the respondents also purchase canned products for their own account for resale to jobbers, wholesale jobbers, retail chain stores and other purchasers and that in connection with such purchases and the resale of such commodities they have received and accepted from the sellers and have granted and allowed to the purchasers on resale, substantial brokerage fees and commissions or allowances and discounts in lieu thereof.

The complaints charge that the respondents have violated Section 2(c) of the Clayton Act, as amended by the Robinson-Patman Act, by receiving and accepting and by granting and allowing the brokerage fees and commissions or allowances and discounts in lieu thereof, as alleged. (4275, 4283, 4284, 4292, 4294 and 4298)

Jordan Stevens Company—A Minneapolis seller of coffee and a Flushing, N. Y., candy dealer have been served with complaints alleging the sale of products so packed and assembled as to involve the use of lottery methods when sold and distributed to the consumers publicly.

The respondents are Jordan Stevens Company, 200 Third Ave., North, Minneapolis, and John Shapiro, trading as Federal Sales Company, 150-35 Thirty-fourth Ave., Flushing, Long Island, N. Y.

Use of the respondents' sales methods, the complaints charge, is a practice contrary to established trade policy and in violation of the criminal laws, and is an unfair act or practice under the Federal Trade Commission Act. (4269-4270)

Stomar Manufacturing Company—Alleging misrepresentation in the sale of graters and shredders for use in preparing foods, a complaint has been issued against Joseph H. and Joseph D. Kevorkian, and Louis Stone, trading as Stomar Manufacturing Company, 1027 Ridge Ave., Philadelphia.

Advertisements of the respondents allegedly referred to the "Stomar Stainless Safety Grater" and "Stomar Stainless Safety Grater and Shredder" and contained the expressions "Won't Rust", "Won't Tarnish" and "Won't Corrode".

Through use of the word "Stainless" the respondents, according to the complaint, represent that their grater is stainless steel when in fact it is made from ordinary carbon steel wire with a re-tinned finish. The respondents, through their use of the expressions "Stainless", "Won't Rust", "Won't Tarnish" and "Won't Corrode", are alleged to create the impression that their grater successfully resists rust, stain and corrosion; when, in fact, according to the complaint, it is not stainless and will rust and stain when brought into contact with agencies which do not rust or blemish stainless steel. (4272)

Sunray Yarn House—See S. Friedman & Sons.

Uco Food Corporation—Violation of the brokerage provision of the Robinson-Patman Act in the purchase of food products is alleged in complaints issued against Giant Tiger Corporation, Philadelphia, operating a chain of retail food stores commonly known as "Super Markets"; Uco Food Corporation, Newark, N. J., food wholesaler; R. C. Williams & Co., Inc., New York, food importer and exporter; A. Krasne, New York, food wholesaler, and General Grocer Company, St. Louis, food wholesaler.

The respective complaints allege that each respondent, in connection with the purchase of its requirements in interstate commerce, has received brokerage fees and allowances and discounts in lieu of brokerage in substantial amounts. Usually, the complaints continue, the receipt and acceptance of the allowances and discounts in lieu of brokerage is accomplished by the respondents through the purchase of commodities at prices lower than the prices at which such articles are sold to other purchasers.

The prices paid by the respondents, according to the complaints, are lower by an amount which reflects all or a portion of the brokerage currently being paid by the sellers of such commodities to their respective brokers for effecting sales of similar products to other purchasers. (4276-4277-4279-4280-4281)

Wool Trading Company, Inc.—A complaint has been issued charging the Wool Trading Company, Inc., 361 Grand St., New York, with misrepresentation in the sale of knitting yarns.

In its catalogs, sample books and other printed matter the respondents, according to the complaint, make misleading representations concerning the composition of its products and their place of origin, the status of its business, and persons purported to be connected with it.

The complaint alleges, among other things, that the respondent employs the term "Cashmere Sport" for yarn containing none of the wool of the cashmere goat; "Ascot Tweed," "Zephyr Tweed" and "Shag Tweed" for yarns composed not wholly of wool but of part wool and part rayon; "Sparkle Crepe" for yarn not made wholly of silk but entirely of wool and rayon; "Angora" for yarn not composed wholly of the wool of the Angora goat but consisting in part of other wool; and "Frazee" and "Gimp" for yarns having the appearance of being part silk products but in fact consisting of wool and rayon or cotton and rayon.

Yarns not imported from the Shetland Islands or Scotland have been designated by the respondent as "Shetland Floss," "Scotty Heather" and "Scotty Tweed," according to the complaint, and yarn of domestic origin has been described as "Imported Cashmere (Feather Tone)."

Typical of the respondent's misrepresentation of persons allied with its business, the complaint continues, has been its use of the name "Elsie Janice" and "Elsie Janis," represented to be its "chief instructor," such fictitious name so closely resembling that of Elsie Janis, the actress, as to be misleading.

Letterheads of the respondents, it is alleged, bear the wording "Wool Trading Co., Inc., Manufacturers of Peter Pan Yarns," when in fact this company does not manufacture yarns but purchases them from others. (4257)

STIPULATIONS

No stipulations were entered into by the Commission during the past week.
CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders during the past week:

National Converters Institute—Nine members of the transparent materials converting industry and their trade association have been ordered to cease and desist from agreeing to maintain uniform prices of transparent cellulose sheets and rolls such as cellophane, sylphrap, kodapak and proteoid. The manufacturer-members are dominant factors in their industry, controlling more than 90 per cent of the country's output and sale of such products.

The respondents are National Converters Institute, 111 West Washington St., Chicago, the trade association; Shellmar Products Company, Mount Vernon, Ohio; Milprint Products Corporation (now Milprint, Inc.), 431 West Florida St., Milwaukee, with branch factories in Philadelphia and Los Angeles; Traver Paper Corporation, 358 West Ontario St., Chicago; Dobeckmun Company, 3301 Monroe Ave., Cleveland; Dennison Manufacturing Company, Framingham, Mass.; Caton Printing Company, 422 West 8th St., Kansas City, Mo.; Thomas M. Royal & Company, 5800 North Seventh St., Philadelphia; Nashua Gummed and Coated Paper Company, Nashua, N. H., and Pioneer Wrapper and Printing Company, 837 East 4th Place, Los Angeles. The last three mentioned respondents resigned their memberships in the trade association shortly prior to the service of the Commission's complaint on September 19, 1939.

Also named as respondent is Richard M. McClure, secretary-treasurer and manager of the National Converters Institute.

Commission findings are that the member respondents entered into agreements with each other to maintain uniform prices for the sale of their products, including the discounts to be allowed purchasers; exchanged through the medium of the trade association and of McClure, current price lists and confidential detailed information as to the conduct of their businesses.

The respondents are ordered to cease and desist from filing uniform prices and discounts at which their products are to be sold either directly or through the medium of the National Converters Institute and Richard M. McClure, or any other agency; exchanging through the medium of the Institute and its manager, or any other agency, price lists containing proposed or future prices and discounts of their products in order to establish net prices at which they will sell such products, or filing with the Institute and its manager, or any other agency, deviations in current price lists of their products in order to establish and maintain uniform net selling prices.

The respondents were also ordered to desist from agreeing among themselves that they will maintain proposed future prices and discounts published by them and filed with the Institute and Richard M. McClure, or any other agency, or collecting or disseminating information as to instances where respondent corporations have sold their products at prices and discounts other than those set forth in their respective price lists, in order to maintain the net prices and discounts which the respondent manufacturers agreed to maintain. (3897)
REALLOCATION—MARCH 29, 1941

In conformity with provisions of the North American Regional Broadcasting Agreement, the Federal Communications Commission yesterday filed with the State Department its proposed reallocation of frequencies in the standard broadcast band, to go into effect simultaneously with the pact March 29, 1941. The signatory governments are exchanging their respective tentative assignments for final check before making them operative.

Changes necessitated by the Havana agreement will affect 777 of the 862 radio stations now operating in the standard broadcast band (550 to 1600 kilocycles) in the United States. These are published below in the REPORTS. In shifting the United States frequencies the Commission plans but minimum alteration in the present broadcast service.

Here, in general, is how the domestic shift will be accomplished:

Stations now operating on channels of from 550 to 720 kilocycles will retain their present assignments.
Stations operating between 740 and 780 kilocycles will move up 10 kilocycles (which is the engineering equivalent to one channel).
Stations using from 790 to 870 kilocycles will move up 20 kilocycles (two channels).
Stations between 880 and 1450 kilocycles will generally advance 30 kilocycles (three channels).
Clear channel stations will shift from 1460-1490 kilocycles to 1500-1530 kilocycles.
Local stations now on 1500 kilocycles will move down one channel—to 1490 kilocycles.

The chief noticeable difference to the average listener will be that his favorite station above 730 kilocycles will occupy a slightly different place on his receiver dial—usually higher. The NAB is immediately preparing plans for an educational campaign to inform listeners of these changes. Plans will seek to bring about a simultaneous switch-over by all stations so that reallocations can be made in an orderly manner with minimum disturbance to program service and listener following.

The correlated shifting of the frequencies of some 100 broadcast stations in Canada, and of numerous stations in Mexico and Cuba will serve to eliminate in considerable measure the long-complained of interference from these sources, and thereby improve broadcast reception in the North American continent generally. Interference from Mexican and Cuban stations has been particularly objectionable to the rural listeners.

Certain obnoxious broadcast stations on the Mexican border are to be eliminated. These stations are largely run by persons denied the use of frequencies in the United States. They have featured the types of programs which caused them to be eliminated from the United States scene. The Havana pact contains no provision for the continued operation of these high-powered stations just across the border.

The United States broadcaster, on his part, does not have to replace present transmis-

(Continued on page 4572)
REALLOCATION—MARCH 29, 1941

(Continued from page 4571)

This date is now extended to be coincident with the effective date of the Havana pact—March 29th next.

The treaty itself does not specify the changes which must be made in the operating frequencies of broadcast stations in the United States. Nor does it designate the operating assignment of individual stations. However, the assignment of certain classes of stations in Canada, Cuba, and Mexico very nearly controls the assignments in the United States.

It was particularly necessary to provide five clear channels for Mexico which, prior to the agreement, had no frequencies reserved for high power stations in the standard broadcast band. So, some changes in the allocation structure previously set up by the Commission was necessary.

Two clear channels were obtained by taking United States stations on the present 1010 kilocycle regional channel and the present 1180 kilocycle clear channel and reassigning these stations to different frequencies. Three additional channels were secured by shifting the frequencies of stations commencing with the 740 kilocycle clear channel to other channels—10, 20 and 30, and in some cases 40, kilocycles above the channel now occupied. In this manner a clear channel is provided at 740 kilocycles, another at 800 kilocycles, and still another at 900 kilocycles. Thus, five channels are made available for use by Mexican stations. Canada provided an additional clear channel for Cuba.

Under the reassignments, the United States still retains six local channels. Its number of regional channels has been reduced from 42 to 41. On the other hand, its number of clear channels has increased from 44 to 59, and it can use 15 additional clear channels under certain restrictions set out in the treaty.

The compact is a mutual arrangement to allocate frequencies for the best public service in the countries involved and typifies the high spirit of cooperation among

(Continued on page 4593)
Assignments of United States Standard Broadcast Stations to be Made Effective on the Effective Date of the North American Regional Broadcasting Agreement

Including Changes in Station Assignments, as Noted, to be Made Effective on or Before the Effective Date of this Agreement

---

The North American Regional Broadcasting Agreement was reached at Havana on December 13, 1937. It was ratified by the four countries concerned. Formal filing by the fourth of these (Mexico) on March 29, 1940, confirmed the agreement and makes it operative one year from that date. Previously there was no real compact with respect to sharing of frequencies by the principal countries of this continent for the best mutual advantage.

The Commission in its statement stresses that the agreement should not, in any sense, be interpreted as creating any vested rights to broadcasters in the new frequencies thus established. That broadcast channels are public domain for use in the public interest, convenience and necessity is attested by statute and rule requirement that...
licenses are for limited terms and broadcasters are licensed at stated intervals only upon showing of proper public service.

EXTENSION OF LICENSES TO MARCH 29, 1941

The Commission yesterday entered an Order further extending standard broadcast station authorizations expiring October 1, 1940 for an additional period ending March 29, 1941. The order applies to all standard broadcasting station licensees and extends the expiration date of all such licenses for which applications for renewal have been filed. If an application for renewal for regular operation covering the period beyond August 1, 1940 has been filed, it will not be necessary to referee such application under the provisions of the Commission's Order.

The Order of the Commission by its own terms extends the effective date of the licenses to which it applies. Modified licenses to cover the new expiration date will not be issued. Licensees are required to post the Commission's Order attached to their licenses in accordance with the rules governing posting of licenses.

ORDER

At a meeting of the Federal Communications Commission held at its offices in Washington, D. C., on the 10th day of September, 1940.

The Commission having under consideration the provisions of the North American Regional Broadcasting Agreement; and

WHEREAS, it is necessary to make and amend rules and regulations of the Commission and prescribe restrictions and conditions in order to carry out the provisions of said Agreement; and

WHEREAS, the carrying out of said Agreement requires readjustment in the allocation of frequencies available for assignment to standard broadcast stations; and

WHEREAS, the United States is required under said Agreement to furnish the several countries signatory thereto, at least 180 days before the effective date thereof, with lists showing "broadcast stations actually in operation," "changes authorized to be made with respect to said stations," and "new broadcast stations authorized but not yet in operation"; and

WHEREAS, said lists are available for public inspection at the offices of the Commission, and copies thereof have been furnished all licensees of standard broadcast stations and all applicants for standard broadcast facilities; and

WHEREAS, following the conclusion of the conferences provided for under Article III, Section 1, of said Agreement, and the resolving, in accordance with the provisions thereof, of any conflicts which may arise, the Commission will enter appropriate Orders in the premises.

It is ORDERED, that effective March 29, 1941, Sections 3.25 to 3.29, both inclusive, and 3.34 of the Rules and Regulations of the Commission be, and the same are hereby, repealed; and Sections 3.25 to 3.29 and 3.34 as set forth in Annex A hereto, BE, and the SAME ARE HEREBY, ADOPTED.

The Federal Communications Commission.

T. J. SLOWIE, Secretary.

ANNEX A

Amendments to Rules and Regulations Governing Standard Broadcast Stations

3.25 Clear channels: Class I and II Stations.—The frequencies in the following tabulation are designated as clear channels and assigned for use by the classes of stations as given:

(a) To each of the channels below there will be assigned one Class I Station and there may be assigned one or more Class II stations operating limited time or daytime only: 640, 650, 660, 670, 700, 720, 750, 760, 770, 780, 820, 830, 840, 850, 870, 880, 890, 902, 1040, 1090, 1100, 1120, 1190, 1180, 1200, and 1210 kilocycles. The power of the Class I stations on these channels shall not be less than 30 kilowatts.

(b) To each of the channels below there may be assigned Class I and Class II Stations: 680, 710, 810, 940, 1000, 1030, 1060, 1070, 1090, 1090, 1110, 1130, 1140, 1170, 1170, 1190, 1510, 1520, 1530, and 1560 kilocycles.

(c) For Class II stations located not less than 650 miles from the nearest Canadian Border and which will not deliver over 5 microvolts per meter ground wave or 25 microvolts per meter 10 per cent time sky wave at any point on said border, 690, 740, 860, 990, 1010, 1580 kilocycles.

(d) For Class II stations which operate daytime only with power not in excess of 1 kilowatt and which will not deliver over 5 microvolts per meter ground wave at any point on the nearest Mexican Border, 730, 800, 900, 1050, 1220 and 1570 kilocycles.

(e) For Class II stations located not less than 650 miles from the nearest Cuban Border and which will not deliver over 5 microvolts per meter ground wave or 25 microvolts per meter 10 per cent time sky wave at any point on said border, 1540 kilocycles.

3.26 Regional channels: Classes III-A and III-B stations—The following frequencies are designated as regional channels and are assigned for use by Class III-A and III-B stations: 550, 560, 570, 580, 590, 600, 610, 620, 630, 790, 910, 920, 930, 950, 960, 970, 980, 1150, 1250, 1260, 1270, 1280, 1290, 1300, 1310, 1320, 1330, 1350, 1360, 1370, 1380, 1390, 1410, 1420, 1430, 1440, 1460, 1470, 1480, 1590, and 1600 kilocycles.

3.27 Local channels: Class IV stations.—The following frequencies are designated as local channels and are assigned for use by Class IV stations: 1230, 1240, 1340, 1450, and 1490 kilocycles.

3.28 (a) The individual assignments of stations to channels which may cause interference to other United States stations only, shall be made in accordance with the standards of good engineering practice prescribed and published from time to time by the Commission for the respective classes of stations involved. For determining objectionable interference see "Engineering Standards of Allocation" and "Field Intensity Measurements in Allocation," Section C.

(b) In all cases where an individual station assignment may cause interference both to or may involve a channel assigned for priority of use by a station in another North American country, the classifications, allocation requirements and engineering standards set forth in the North American Regional Broadcasting Agreement shall be observed.

3.29 On condition that interference will not be caused to any Class III station, and that the channel is used fully for Class III stations and subject to interference as may be received from Class III stations, Class IV stations may be assigned to regional channels.

3.30 Normal license period.—All standard broadcast station licenses will be issued so as to expire at the hour of 3 a.m. Eastern Standard Time, and will be issued for a normal license period of 1 year, excepting as follows:

(a) For stations operating on the frequencies 640, 650, 660, 680, 690, 700, 710, 720, 730, 740, 750, 760, 770, 780, 800, 810, 820, 830, 840, 850, 880, 900, 940, 950, 960, 1000, 1020, 1030, 1040, 1050, 1060, 1070, 1080, 1090, 1100, 1110, 1120, 1130, 1140, 1150, 1170, 1180, 1190, 1200, 1210, 1220, 1500, 1510, 1520, 1530, 1540, 1550, 1560, 1570, and 1580 kilocycles, February 1.

(b) For stations operating on the frequencies 550, 560, 570, 580, 590, 600, 610, 620, 630, 790, 910, 920, 930, and 950 kilocycles, April 1.

(c) For stations operating on the frequencies 960, 970, 980, 1150, 1250, 1260, 1270, 1280, 1290, 1300, 1310, and 1320 kilocycles, June 1.

(d) For stations operating on the frequencies 1330, 1350, 1360, 1370, 1380, 1390, 1410, 1420, 1430, 1440, 1460, 1470, 1480, 1500, and 1600 kilocycles, August 1.

(e) For stations operating on the frequencies 1230, 1240, and 1340 kilocycles, October 1.

(f) For stations operating on the frequencies 1400, 1450, and 1490 kilocycles, December 1.

1 A station on 1010 kilocycles shall also protect a Class I-B station at Havana, Cuba.

2 See North American Regional Broadcasting Agreement for special provision concerning the assigning of Class II stations in other countries of North America to these regional channels.

3 See Agreement with Mexico for further use of this channel.
COMMISSION EXTENDS TIME ON CHAIN REPORT

To meet the request of the major networks for more time in which to file briefs in connection with the Federal Communications Commission committee report on chain broadcasting, the Commission today announced that the time originally set for receiving such briefs (September 15) will be extended until October 25.

This was upon consideration of the requests of the National Broadcasting Company and the Columbia Broadcasting System, which asked that the time be extended to December 15 and December 1 respectively, and the Independent Radio Network Affiliates, which also asked for more time. These networks stated that the committee report, submitted to the Commission on June 12, is so voluminous that considerable study of its 1300 pages and of the record itself is necessary before briefs can be compiled to properly cover the subject and adequately represent their views.

NAB-FCC APPLICATION FORMS CONFERENCE

As the Reports go to press the NAB special committee is meeting with a special committee of FCC and FM broadcasters, looking to the revision of the application forms 301 and 319. Satisfactory progress on specific suggestions is being made. The meeting was continued and a full report will be given in subsequent Reports.

BMI Developments

BMI FEATURE TUNES
September 16-23

1. THE SAME OLD STORY
2. PRACTICE MAKES PERFECT
3. THERE I GO
4. MADAME WILL DROP HER SHAWL
5. SWINGIN' AT THE SEANCE
6. WE COULD MAKE SUCH BEAUTIFUL MUSIC

BMI’s Practice Makes Perfect continues to make records. It has now been three weeks on the Lucky Strike Hit Parade, stands second in Variety’s list of network performances, and ninth on the list of sheet music sales. Figures for the sales of BMI leading hits for the week ending September 7th show 17,662 sheet music copies of Practice Makes Perfect, 3,072 of The Same Old Story and 1,882 of There I Go, and 995 orchestrations of Practice Makes Perfect for the same week.

This proof of the success of the BMI music with the public gives the strongest support to the judgment of program makers as to its quality. Members of the BMI Editorial Board have been told recently by men in the program departments of some of the leading advertising agencies, that the music submitted to them by BMI, maintains a higher percentage of good material than the submissions they receive from any other source.

Nothing distresses ASCAP officials more deeply, or is more impossible for them to argue aside, than the musical success achieved by non-ASCAP writers whose work is reaching the public through BMI. A short time ago, an ASCAP official, who is also a prominent officer of one of the largest ASCAP publishing houses, nearly came to blows with one of the nation’s most famous band leaders in a night-club, where the band in question was then playing. The ASCAP official, obviously smarting under the warm reception accorded to BMI music which had been played, is said to have gone up to the band leader and demanded why he continued to play “that BMI tripe.” It is reported that the band leader replied, “Because it is a darn sight better music than anything your house has published since you’ve been there.”

ASCAP VICTORY?

Warner Brothers motion picture interests control the Remick, Witmark and Harms music publishing houses, which are understood to receive considerably more than $500,000 a year from ASCAP.

Warner Brothers motion picture interests control Station KFWB of Los Angeles, which has, presumably, paid ASCAP something in the neighborhood of $30,000 a year. KFWB has signed the new ASCAP contract.

A full page advertisement in Variety announces the consummation of this undoubtedly difficult negotiation.

NEW BMI MEMBERS

We are happy to welcome the following stations to the BMI roster:

WOMI—Owensboro, Kentucky
KHAS—Hastings, Nebraska
KDRO—Sedalia, Missouri
KBND—Bend, Oregon

Another advertising man turns out to be a composer. BMI will shortly publish a song by Ralph Skedgell, of the Young & Rubicam agency. We have also had word from an officer of a leading advertising trade publication that he belongs to a group who for some time have been exchanging, discussing, and performing each other’s compositions. This may perhaps be an added reason why members of the advertising industry have so friendly an
attitude towards the organization which is rescuing the independent writer from the discouraging and unprofitable obscurity to which the ASCAP system has relegated him.

BMI is also publishing music by a number of well-known band leaders. Among those who have recently been added to the list of BMI composers are Ray Herbeck, Paul Martin, Gray Gordon, Don Marcotte and Sleepy Hall.

In his article for Variety’s “Battle Page,” ASCAP’s Paine repeats the statement previously made by ASCAP’s Mills, that ASCAP receives from the broadcasters only 2.42% of their income from sale of time. They arrive at this figure by taking $171,000,000 as the figure for the broadcasters’ income for 1939, and $4,142,024 as the figure for payments to ASCAP. That figure for the broadcasters’ income is, of course, completely fictitious. It does not allow for the agency discounts, which the broadcasters never receive, nor for frequency discounts which represent an amount that nobody ever receives. The broadcasters’ net revenue from sale of time in 1939 as shown by the FCC table was $112,062,612. This specious argument of ASCAP results from the frequency with which fictitiously high figures are given for the gross receipts of the broadcasting industry.

---

**Legislative**

**SENATE REVISIONS EXCESS-PROFITS TAX BILL**

Today (Friday) the Senate version of the Excess-Profits Tax Bill will be called up for debate. The report on the bill was not available up to the time this issue of the NAB Reports went to press. However, it is understood the Senate Finance Committee has drafted a bill which provides several major changes from that passed recently by the House.

Both the average earnings method and the return on invested capital method as bases for determining normal profits in the base period, 1936-39, have been retained and are optional to the taxpayer. The penalties for using the average earnings method, of an increase in the normal tax of 4.1% and higher excess-profits tax rates, have been removed. Substituted, however, is an increase of 3.1% in the normal tax brackets applicable to all corporations. Moreover, the higher excess-profits tax rates ranging from 25% to 50%, applicable in the House bill only to corporations using the average earnings method, are made to apply when either method of determining excess profits is used. The increase of 3.1% in the normal corporate tax is construed purely as a revenue measure.

The specific exemption of $5,000 on excess profits has been increased to $10,000. This has been done in the interests of easing the burden on smaller corporations. It is felt that this revision will exempt from filing returns and payment of tax, many of the smaller stations on whom the burden, under the House bill, would have been relatively severe.

The Senate bill eliminates the House provision that a corporation not in existence during the entire base period, 1936-37, is required to use the invested capital method. Allowing such corporations to use average earnings will provide relief for many stations licensed since January 1, 1936.

Provision for consolidated returns for purposes of the excess-profits tax is included. However, ownership of at least 95% of the stock of subsidiary corporations is required to file a consolidated return.

Prompt passage of the bill in the Senate is expected.

---

**Labor**

James C. Petrillo is notifying non-network broadcasters who have musicians’ contracts expiring this month that the A. F. of M. is willing to let the current “National Plan of Settlement” pass out of existence without demand for its renewal, providing satisfactory arrangements are made with the local unions for the employment of staff musicians.

---

**The Code**

**ORGANIZE LOCAL NAB CODE COMMITTEE**

Member stations in Minneapolis and St. Paul have organized a local NAB Code Committee to work in conjunction with the national NAB Code Committee, it was announced this week. Kenneth M. Hance of KSTP was selected as chairman, serving with Wallace Stone of WDGY and Edward P. Shurick of WLOL.

In commenting upon this development, Edgar Bill, chairman of the Code Committee, said, “This is a splendid idea and certainly will be most beneficial to the stations in the Twin Cities as well as to the Code Committee in its work of rendering helpful service to the members. Perhaps in those cities where there are several stations in operation, members may develop the idea and set up additional Code Committees.”

**GEORGIA BROADCASTERS REORGANIZE**

At a meeting in Macon, Georgia, attended by Neville Miller, NAB president, the Georgia Broadcasters Association was reorganized. James Woodruff, WRBL, was
elected president; Roy Ringson, WRDW, vice president; and Mrs. Marjorie Willis, WTOC, secretary-treasurer.

Those elected to the Board of Directors were Senator Jack Williams, Sr., WAYX; Leonard Reinsch, WSB; and E. K. Cargill, WMAZ, Macon.

The following broadcasters attended the meeting: John M. Outler, Jr., Leonard Reinsch, WSB, Atlanta; Clarence Calhoun, WGST, Atlanta; Maurice Coleman, WATL, Atlanta; Don Ioset, Howard Donahue, WAGA, Atlanta; Roy Ringson, Thurston Bennett, WRDW, Augusta; John Pidcock, Henry Hix, WMGA, Moultrie; W. T. Knight, Mrs. Marjorie Willis, Ben Williams, WTOC, Savannah; Harben Daniel, WSAV, Savannah; A. T. Spies, WJPD, Albany; Tom Phillips, WDAK, West Point; John Greer, WGOV, Valdosta; Ken White, WMOG, Brunswick; Bob Leagin, Henry Lowe, Charles Pittman, Alfred Lowe, WBML, Macon; E. K. Cargill, Wilton Cobb, “Red” Cross, Walter Graham, Mrs. Allie Williams, WMAZ, Macon; H. Wimpy, WPAX, Thomasville; Jack Williams, Sr., Jack Williams, Jr., WAYX, Waycross; Happy Quarles, Major Mitchell, WRGA, Rome; Alan Marshall WKEU, Griffin; James Woodruft, WRBL, Columbus.

NEW MEMBERS KEEP COMING

It is a pleasure to report the further expansion of NAB membership. With the receipt this week of the membership application of KINY at Juneau, Alaska, NAB now has member stations in every state and territory. In addition to the Alaska station, the following new memberships have been received:

WJNO—West Palm Beach, Florida
WKPA—New Kensington, Pennsylvania
WMRC—Greenville, South Carolina
KWLM—Willmar, Minnesota

There are still some stations out of the fold. Members are urged to look about them, make the necessary contacts to make NAB membership one hundred per cent of all operating stations.

REVISED BY-LAWS

A complete reprint of the By-Laws with the amendments adopted at the recent Eighteenth Annual Convention has been made. These will be sent out next week to all members. They will take the place of the previous copy and will be so punched as to fit into the standard books. Members are cautioned to be sure to use the revised By-Laws and to destroy the old ones.

LISTEN BEFORE YOU VOTE posters have already been used in many state primaries and they were also used in this week’s Maine election.

WCSP, Portland, also intends using the posters in connection with the November election.

Bill Dean, publicity director, WDAY, Fargo, N. D., completed, on August 31, observance of National Radio Festival Week, held at the same time of the famous Red River Valley fair. Now he is well along with the LISTEN BEFORE YOU VOTE promotion.

“We’re for it 100%,” says Bill.

Mayor Harold H. Burton, of Cleveland, who is running for the United States senate on the Republican ticket, is an “Is Your Hat in the Ring” fan.

To Ellis C. Vander Pyle, merchandise manager, WGAR, the Mayor wrote:

“I value highly the professional advice contained in this publication...”

“As you know, I am a believer in the radio as providing perhaps the salvation of democracy itself. I am greatly interested in its proper and most effective use and am glad to see the helpful attitude which the industry is taking by helping the radio broadcasters to improve their effectiveness.”

Immediate shipment of “Is Your Hat in the Ring,” from headquarters. Four cents (4¢) each plus postage.

Photos of station displays at the recent NAB convention in San Francisco were taken by the official photographer. Several displays are shown on each print and a number of shots were required to get the whole pictorial story. These prints are offered interested members at 50¢ each. Write headquarters.

CUTS OF NAB SEALS

We have obtained a supply of cuts of the NAB seal for use by member stations. Two sizes are available—5/8 inch and one inch in size. Stations desiring these cuts should specify the size desired.

We wish again to encourage member stations to make the widest and most effective use possible of these cuts.

CIVIL SERVICE COMMISSION THANKS INDUSTRY

In a letter addressed to Arthur Stringer, the United States Civil Service Commission expressed its appreciation to the NAB and to its member stations “for the invaluable...”
work which they are performing in the national defense program."

The letter follows:

On behalf of the United States Civil Service Commission, I wish to express appreciation to the National Association of Broadcasters, its member stations and all cooperating stations for the invaluable work which they are performing in the national defense program.

The Commission is charged by law with the task of recruiting more than 100,000 civilian employees for defense agencies. The cordial cooperation of the radio stations associated with the National Association of Broadcasters in presenting these needs to the American public has been instrumental in securing a large number of employees for navy yards, arsenals, and other defense stations. In no other way would it have been possible to present the situation so promptly and effectively.

You will be interested in the fact that an official of the Navy Department in Washington stated on September 7 that the results achieved already have been worthy of the highest commendation. He stated also to the Commission: "I wish to extend the thanks of the Navy Department and myself for your fine response and to congratulate you on your most satisfactory achievements."

The Commission in turn desires to pass on to the National Association of Broadcasters and its members a liberal portion of this commendation, because the Commission feels that your work has been exceedingly useful and the cordiality and promptness with which your cooperation has been given has been highly gratifying to all of us. The Commission has made public acknowledgment of this before and we wish you to know how much we appreciate what has been and is being done.

Very sincerely, Harry B. Mitchell, President.

STILL MORE MEN NEEDED

At a conference with the Commission this week it was learned that the job ceiling, now set at 100,000 will undoubtedly be raised. This will naturally increase the opportunity of the broadcasting industry for even more important service to the nation.

Six hundred twenty-seven stations (627) are now broadcasting the Man Power announcements. Those previously unreported are:

DISTRICT 5
Georgia
WAYX—Waycross

DISTRICT 9
Illinois
WJFP—Herrin

DISTRICT 11
South Dakota
KGFX—Pierre

DISTRICT 13
Texas
KBST—Big Springs

DISTRICT 14
Wyoming
KWYO—Sheridan

DISTRICT 15
California
KGDV—Stockton

It is suggested that stations, which have not reported their cooperation, do so by writing headquarters.

NEW BROADCAST STATION FOR SAN DIEGO, CALIF.

Proposed findings of fact and conclusions proposing to grant the application of Worcester Broadcasting Corp. for a new broadcast station at San Diego, Calif., to operate on the frequency 1420 kilocycles with power of 250 watts, unlimited time, antenna and transmitter site to be determined subject to approval of the FCC has been announced by the Commission.

In its findings of fact, the Commission concludes:

(1) The applicant is legally, technically, financially and otherwise qualified to construct and operate the proposed station.
(2) No objectionable interference would result from the simultaneous operation of the proposed station and any existing station in the United States, or with radio broadcast facilities requested in any pending applications.
(3) While the applicant herein seeks the use of a local channel to serve a metropolitan district, we have found that more than 90% of the population residing in said area will receive interference-free service from the proposed station. In other words, practically the entire population of San Diego, California, will receive such service, if this application is granted.
(4) We conclude that public interest, convenience and necessity will be served by the granting of the instant application, such grant, however, to be made subject to the following condition: The applicant corporation shall furnish to the Commission within thirty days from the effective date of the Commission's final order herein satisfactory proof of its authority to issue its capital stock.

KGFI REVOCATION ORDER AFFIRMED

The FCC has announced its proposed findings of fact and conclusions proposing to affirm the recommendation of Commissioner Payne to revoke the license of Eagle Broadcasting Co., Inc. (KGFI), Brownsville, Tex.

Upon consideration of all the facts of record, the Commission concludes in its proposed findings that "the respondent, Eagle Broadcasting Company, Inc., licensee of Station KGFI, on October 10, 1938, without the consent in writing of this Commission transferred and delivered to James G. Ulmer and M. D. Gallagher, their heirs, successors and assigns, complete and exclusive possession, management, operation and control of said station, and also assigned and transferred to them all of the rights theretofore granted to the licensee corporation in and by the terms of the station license, in violation of Section 310(b) of the Communications Act of 1934 as amended and the Rules and Regulations of the Commission. . . . The respondent corporation failed to file with the Commission the said contract with James G. Ulmer and M. D. Gallagher, or other information, affecting and concerning the ownership, operation and control of Station KGFI, as required by, and in violation of, the Rules and Regulations of the Commission. . . . Such acts and conduct on the part of the respondent constitute grounds for revocation of the license to operate said Station KGFI, issued by this Commission to the Eagle Broadcasting Co., Inc. In view of the foregoing, the revocation order heretofore entered in this matter on the 22nd day of March, 1940, should be affirmed."

REVOCATION ORDER FOR KAND RESCINDED

Rather than deprive a community of its only local broadcast station, and because previously offending licensees are now acting in good faith, the FCC has rescinded a prior order of revocation in the case of station KAND, operated by the Navarro Broadcasting Association, Corsicana, Texas, on 1310 kilocycles, unlimited time with 100 watts power.
The revocation order was issued by the Commission on February 7, 1940. Hearing was held in Dallas on April 23-26, at which time it was disclosed that respondents misrepresented to the Commission their intentions as to the financing, construction, control and operation of the station in securing their original construction permit and station license. In addition, it was found that they transferred the rights granted them to James G. Ulmer and Roy G. Terry without Commission consent, in violation of Section 310(b) of the Communications Act. These facts taken alone would support an affirmation of the Commission’s Order of Revocation,” observes the Commission in its Decision and Order (No. B-118). However, balancing factors in the record lead the Commission to conclude:

“These violations were committed by the respondents either prior to the commencement of the operation of this station or within less than six months thereafter. Though ignorance of the law is no excuse, yet their conduct must be viewed in its true light as that of men at the outset of their career in radio broadcasting without any previous experience with the Commission. “On November 6, 1937, Ulmer and Terry in consideration of the payment of $6,000 by the respondents ‘released, relinquished and quit-claimed’ to the respondents all their interest in this station. Thus, within six months of the time Station KAND began to operate the respondents had obtained full control of the station and ended all affiliation of James G. Ulmer and Roy G. Terry therewith. Since that time, in so far as may be ascertained from the record in these proceedings, Station KAND has been operated by the respondents in the interest of the public in that area. Accordingly, this station, which began its program tests on May 17, 1937, and was issued its station license and began operation on June 1, 1937, has been operated since November 6, 1937, in full compliance with the representations made by the respondents to this Commission. There is nothing in this record to indicate that the respondents, if permitted by this Commission, will not continue to operate in the public interest as they have done since November 1937.

“In determining whether to revoke the license of a radio broadcast station for false representations to the Commission and other violations of the Communications Act, the Commission is faced with competing considerations. The Commission’s primary duty is to the listening public and, in dealing with a licensee, the Commission must be guided by this primary duty. On the other hand, if the Commission is to carry out its function of granting and denying applications for licenses, it must obtain true and accurate information from those who seek to operate radio stations and must take disciplinary action against those who make false representations to the Commission. But discipline should not be inexorably applied when station licenses demonstrate to the Commission, as these respondents have now done, that they are ready to act in good faith.

“To revoke their license at this time would deprive the community of the service of this station when there is no reason to believe that the respondents will not continue to operate it in the public interest. From their conduct since 1937 and from their good reputation in their community, the Commission feels that the respondents may be trusted with the public responsibilities contained in an authorization to continue to operate station KAND.”

However, in cancelling its previous order of revocation, in the public interest, the Commission reserves all rights to incorporate the facts developed in the case in any future proceeding involving this station.

AMATEUR LICENSE SUSPENDED

The FCC has announced adoption of its proposed findings of fact and conclusions, and entered its final order suspending the amateur radio operator li-
cense of Louis Raymond Choiniere, Holyoke, Mass., for a period of three months, for “deceptive tactics” in broadcasting music and singing in “deliberate violation” of certain rules governing amateur stations.

This action affirms the Commission’s order of suspension dated August 8, 1939, which had been held in abeyance pending hearing.

FROM THE FCC MAIL BAG

(No. 14 of a series)

The Federal Communications Commission has had to censure, by mail, a Pacific Coast ship captain who, in radio discussion with another vessel about position and weather, could not refrain from cussing the latter. His unlawful superfluous language was heard by others and reported to the Commission.

A Long Islander is interested in the possibility of a three-way communication system between a vessel, a land station, and an automobile. Except for emergency service involving the safety of life and property, the Commission has not recognized the operation of any type of land station for the purpose of communicating with portable or movable equipment of organizations or individuals.

Proposal that a special rate of “about 50 cents” be allowed by telegraph companies for the transmission to members of Congress of messages expressing the views of constituents on “various subjects of public interest” has been received from a Los Angeles resident.

A Californian asks whether the Commission prohibits the broadcasting of telephone conversations with persons who have previously agreed to that procedure. Neither the Communications Act nor the Commission’s rules prohibit this. But the tariffs of the American Telephone and Telegraph Co., filed with the Commission, prohibit the use of the company’s lines for the purpose described.

From Baltimore a postcard inquires eligibility of the writer for a license to operate an amateur station on premises which he owns jointly with his mother who is an alien. This would be contrary to regulations which restrict place of amateur station operation to control of United States citizens exclusively.

A State police bureau seeks information relative to procedure to be followed in filing an application for a restricted radiotelephone permit by an officer whose birth certificate indicates a name different from that shown in the application. It is suggested that the application be filed in the name the applicant has been using, but supported by affidavits attesting to the facts in the case.

Annoyance caused by his neighbors’ radios “turned full volume” is cited by a Piqua, Ohio, resident. Such things are outside the Commission’s jurisdiction. Many cities have anti-noise ordinances intended to meet this situation.

There is no specific amount of time which radio stations
are required to devote to public and educational agencies, the Commission advises a Philadelphia body. Licenses are issued on general determination that the stations will serve the public interest, convenience and necessity. It is up to the broadcasters to include programs of an educational, religious and civic nature, but the amount of time devoted to these subjects rests between the stations and the groups concerned.

The Commission advises an Illinois would-be radio announcer that it has no authority over and so cannot recommend “announcing schools.” Nor can it accommodate a New York listener who would compel the major networks to discontinue identical programs.

863 STATIONS

The FCC issued operating licenses to seven stations and granted six permits for the construction of new stations during the month of August, 1940. A comparative table by months follows:

FEDERAL COMMUNICATIONS COMMISSION

FINDINGS OF FACT

FCC has announced its proposed findings of fact and conclusions proposing to grant the application of J. D. Falvey, for a construction permit for a new broadcast station in Ottumwa, Iowa, to operate on 1210 kilocycles, with power of 100 watts, unlimited time, and deny the application of Louis R. Spiwak and Maurice R. Spiwak, co-partners, doing business as the L. & M. Broadcasting Co., for a construction permit for a new broadcast station in the same city, to operate on the same frequency with power of 250 watts day, 100 watts night, unlimited time.

Commission has also announced its proposed findings of fact and conclusions, proposing to grant the application of Thomas R. McTammany and William H. Bates, Bates, Jr., for a construction permit to change hours of operation of KTRB from daytime to limited (WSB, Atlanta, Ga.), permitting operation after 10 p. m., PST, install new equipment, increase power from 250 watts to 1 KW, on its present frequency of 740 kilocycles and change transmitter site, subject to condition that applicants shall file an application for modification of construction permit specifying the exact transmitter location and antenna system within two months after the effective date of the order. The application of KXL Broadcasters, Portland, Oregon (KXL), seeking authority to install new transmitter and directional antenna, change frequency from 1120 to 740 kilocycles, increase power from 250 watts to 10 KW, change hours of operation from sharing with KBPS, Portland, to limited (WSB, Atlanta, Ga.), and move transmitter and studio, was denied.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following oral arguments are scheduled before the Commission in broadcast cases during the week beginning Monday, September 16. They are subject to change.

Thursday, September 19

Oral Argument Before the Commission

Report No. B-110:
KGKB—East Texas Broadcasting Co., Tyler, Tex.—In re: Revocation of Station License of KGKB.

Report No. B-108:
KSAM—Sam Houston Broadcasting Assn., H. G. Webster, President, Huntsville, Tex.—In re: Revocation of Station License of KSAM.

FUTURE HEARINGS

During the past week the Commission has announced the following future broadcast hearings and oral arguments. They are subject to change.

October 7

Joint Hearing

Pursuant to action of the Commission on July 11, designating KRLC and KUJ applications for joint hearing with three applications from Riverside, California, which were consolidated on the Commission's own motion September 6.

KUJ—KUJ, Inc., Walla Walla, Wash.—C. P., 1390 kc., 1 KW night, 1 KW LS, unlimited time. (Present assignment: 1370 kc., 100 watts night, 100 watts LS, unlimited time.)

KRLC—H. E. Studebaker, Lewiston, Idaho.—Modification of license, 1370 kc., 250 watts night, 250 watts LS, unlimited time. (Present assignment: 1390 kc., 250 watts night, 250 watts LS, unlimited time.)

NEW—Broadcasting Corporation of America, Riverside, Calif.—C. P., 1390 kc., 1 KW night, 1 KW LS, unlimited time.

NEW—Mollin Investment Co., Riverside, Calif.—C. P., 1390 kc., 500 watts, daytime.

NEW—Riverside Broadcasting Co., Riverside, Calif.—C. P., 1420 kc., 250 watts night, 250 watts LS, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WBAL—WBAL Broadcasting Co., Baltimore, Md.—Granted construction permit to increase power from 10 KW, sharing 4600 — September 13, 1940
time with WTIC on 1060 kc., with special authority to operate simultaneously with KTHS from 6 a.m. to 9 p.m. EST, on the 1060 kc., and synchronous with WJZ on 760 kc., 2.5 kw until 12 midnight, to 50 kw; increase time of operation to unlimited; install directional antenna for night use; change transmitter site locally, and install new transmitter (B1-P-2290).

WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn.—Granted modification of license to change frequency from 1063 kc. to 1040 kc., and hours of operation from sharing time with WBAL to unlimited, using directional antenna after sunset at Dallas, Tex. (B1-ML-1012).

KRLD—KRLD Radio Corp., Dallas, Tex.—Granted license to cover special experimental authority for unlimited time and changes in directional antenna system; 1040 kc., 50 kw night and day, directional antenna night and day; present agreement, shared with KTHS (B3-L-1180).

KRLD—KRLD Radio Corp., Dallas, Tex.—Granted modification of license to change from directional antenna day and night to directional antenna night only (B3-ML-999).

KRLD—KRLD Radio Corp., Dallas, Tex.—Granted authority to determine operating power by direct measurement of antenna input in compliance with Section 3.54 of the Rules Governing Standard Broadcast Stations (B3-Z-435).

KLBM—Harold M. Finlay and Eloise Finlay (Assignors), Harold M. Finlay (Assignee), La Grande, Ore.—Granted consent of station KLBM from Harold M. Finlay and Eloise Finlay to Harold M. Finlay; 1120 kc., 250 watts, unlimited time (B5-AP1-7).

KALE—KALE, Inc., Portland, Ore.—Granted construction permit to increase nighttime power from 1 kw to 5 kw, operating on 1500 kc., unlimited time, using directional antenna at night (B5-P-2729).

WHIP—Hammond-Calumet Broadcasting Corp., Hammond, Ind.—Granted permission to operate from 6:15 p.m. to 12 midnight, to 5 kw; increase time of operation to unlimited; install directional antenna for night use; change transmitter site locally, and install new transmitter (B5-P-2272).

KSOO—Sioux Falls Broadcast Assn., Inc., Sioux Falls, S. Dak.—Granted motion to change ownership to application to broadcasting by changing the reply to Item 31(d) by substituting “58%” (regarding mechanical productions) (B4-P-2267).

WREN—The WREN Broadcasting Co., Inc., Lawrence, Kans.—Granted petition to amend application to specify type of antenna and exact transmitter site (B1-P-2690).

Western Gateway Broadcasting Corp., Schenectady, N. Y.—Granted petition to change frequency to 1310 kc., 1 kw, 5 kw LS, unlimited time (B5-P-2648).

KNET—John Calvin Welch, William M. Keller and Bonner Frizzell, d/b/a Palestine Broadcasting Assn., Palestine, Tex.—Granted special temporary authority to operate from local sunset (Sept. 6 to 30) 6 a.m. to 5 p.m., CST, on Sept. 20 and 27, 1940, in order to broadcast Palestine High School football games only.

WAGF—John T. Hubbard, Julian C. Smith, and Fred C. Mosely, d/b/a Dothan Broadcasting Co., Dothan, Ala.—Granted special temporary authority to operate from 6:15 p.m. to 7:15 p.m., CST, September 14, 1940, and from 6:15 p.m. to 7 p.m., CST, September 21, 28, October 5 and 12, 1940, in order to broadcast political speeches only.

WDGY—Dr. George W. Young, Minneapolis, Minn.—Granted special temporary authority to operate from 7:15 p.m. to 7:30 p.m. CST, September 6, 1940, in order to broadcast a political program only.

WBAI—The WBAI Broadcasting Co., Baltimore, Md.—Granted special temporary authority to operate simultaneously with Station KTHS on 1060 kc. from 9 p.m., November 4, 1940, to 1 a.m. EST, November 5, 1940, in order to broadcast campaign programs only, and from 9 p.m., November 5, 1940, to 6 a.m. EST, November 6, 1940, in order to broadcast election returns only.

WSPR—WSPR, Inc., Springfield, Mass.—Granted special temporary authority to operate from 8 p.m. to 9:30 p.m., EST, September 9, 1940, in order to broadcast Defense Day ceremonies only.

WSPR—WSPR, Inc., Springfield, Mass.—Granted special temporary authority to operate from 6:30 p.m. to 6:45 p.m. EST, October 7, 21, 22, 24, November 1 and 4, 1940, from 9:30 p.m. to 10 p.m., EST, October 24, 29, 31, November 2, 1940; from 7:45 p.m. to 8 p.m., EST, October 28, 30, November 1 and 4, 1940; from 9 p.m. to 10 p.m., EST, November 3, 1940, from 11 p.m. to 12 p.m., EST, November 4, 1940, in order to broadcast political programs only as described in letter dated August 26, 1940.

KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—Granted special temporary authority to operate from 6:15 p.m. to 6:45 p.m. PST, to the conclusion of a patriotic Americanism rally to be held on September 12, 1940, in order to hold audience for broadcast of the Republican State Committee only.

WKEU—Radio Station WKEU, Griffin, Ga.—Granted special temporary authority to operate from 6:30 p.m. to 6:45 p.m. EST, on October 4, 11, 18, 23, 25, 28, 29, 30, and 31, 1940, in order to rebroadcast political programs sponsored by the Republican State Committee only.

WKEU—Radio Station WKEU, Griffin, Ga.—Granted special temporary authority to operate from localunset (Sept. 5:45 p.m., CST) to 12 midnight, CST, on September 11, 1940, and from 12 a.m. to 5 a.m., CST, on September 12, 1940, in order to rebroadcast political speeches only.

KKOK—Star-Times Publishing Co., St. Louis, Mo.—Granted modification of construction permit which authorized new transmitter, changes in directional antenna. change of frequency, increase of power and move of transmitter, for change of type of transmitting equipment; frequency 670 kc. to 5 kw, unlimited time, directional antenna day and night (B4-MP-1048).

WTCN—Minnesota Broadcasting Corp., Minneapolis, Minn.—Granted application to install new automatic frequency control equipment; 1250 kc., 1 kw, 5 kw LS, unlimited time (B2-ML-1260).

Courier-Journal and Louisville Times Co., Louisville, Ky.—Granted construction permit for new relay broadcast sta-tion, frequencies 156750, 158300, 159300, 161100 kc., power 50 watts, special emission (B2-PRE-361).

Riverside Broadcasting Co., Riverside, Calif.—Granted petition to accept appearance filed late in re hearing on application for construction permit for new station to operate on 1120 kc., 250 kw, unlimited time (B5-P-2648).

Broadcasting Corp. of America, Riverside, Calif.—Dismissed petition for intervention and on the Commission's own motion directed that the proceedings be consolidated in Docket No. 5888, application of Mollin Investment Co., Docket No. 5780, application of Broadcasting Corp. of America, all for construction permit for new stations in Riverside, Calif. (B5-P-2648).

EDST, September 13, 1940.
12 midnight, CST, on September 17, 1940, in order to broadcast election returns.

The Travelers Broadcasting Service Corp., Portable-Mobile (area of Hartford, Conn.).—Granted construction permit for new relay broadcast station, frequencies 31220, 35620, 37920, 39260 kc., power 0.2 watts, A3 emission (B1-PRE-362).

KEHV—The Associated Broadcasters, Inc., Portable-Mobile (area of Omaha, Nebr.).—Granted license to cover construction permit for new relay broadcast station, frequencies 1622, 2058, 2150, 2790 kc., power 15 watts, A3 emission (B3-LRY-205).

KAVQ—Central States Broadcasting Co., Portable-Mobile (area of Omaha, Nebr.).—Granted license to cover construction permit for new relay broadcast station, frequencies 1638, 2092, 2105, 2758 kc., power 2 watts, A3 emission (B4-LRY-196).

WMBO—WMBO, Inc., Auburn, N. Y.—Granted request for special authorization to remain silent after 8 p. m. daily, for a period of 30 days.

WREN—WREN Broadcasting Co., Lawrence, Kans.—Granted license for leave to amend application and substitute request for 5 KW nighttime power at the proposed new location of applicant’s transmitter in Kansas City instead of 1 KW as now requested.

Chattanooga Broadcasting Corp., Chattanooga, Tenn.—Denied petition for rehearing and for reconsideration of the grant of construction permit to Joe W. Engel for a new station in Chattanooga to operate on 1370 kc., with 250 watts power, which was granted by the Commission on July 5.

KMED—Mrs. W. J. Virgin, Medford, Ore.—Denied request for waiver of Section 3.71 of the Rules Governing Standard Broadcast Stations, in order that station may cease operation at 8 p. m. daily.

KIUP—The San Juan Broadcasting Co., Inc., Durango, Colo.—Denied request for waiver of Section 3.71 of the Rules Governing Standard Broadcast Stations, in order that station KIUP may cease operation at 7:30 p. m. daily.

WAGM—Aroostook Broadcasting Corp., Presque Isle, Maine.—Granted special temporary authority to operate from 8 p. m. to 12 p. m., EST, September 9, 1940, in order to avoid election returns only.

W2XW—Portable-Mobile Broadcasting Co., Inc., New York, N. Y.—Granted special temporary authority to operate on 43.9 m., for the period ending in no event later than 3 a.m., EST, January 1, 1941, in order to clear interference condition.

KGKF—KGKL, Inc., Portable-Mobile (area of San Angelo, Tex.).—Granted license to cover construction permit for new relay broadcast station, frequencies 1622, 2058, 2150, 2790 kc., power 20 watts (B3-LRY-200).

APPLICATIONS FILED AT FCC

550 Kilocycles

KOY—Salt River Valley Broadcasting Co., Phoenix, Ariz.—Authority to determine operating power by direct measurement of antenna power.

630 Kilocycles

KVOD—Colorado Radio Corp., Denver, Colo.—Construction permit to install new transmitter and increase power from 1 KW to 5 KW, using directional antenna night. Amended to make changes in directional antenna.

880 Kilocycles

WRNL—Richmond Radio Corp., Richmond, Va.—License to cover construction permit (B2-P-1805) for new transmitter, installation of directional antenna for day and night use, increase in power, and change in hours of operation.

WRNL—Richmond Radio Corp., Richmond, Va.—Authority to determine operating power by direct measurement of antenna power.

1120 Kilocycles

WISN—Hearst Radio, Inc., Milwaukee, Wis.—Construction permit to install new transmitter, directional antenna for day and night use; increase power from 250 watts night, 1 KW day, to 5 KW day and night, and move transmitter from 231 West Michigan St., Milwaukee, Wis., to near Milwaukee, Wis. Amended to change request of power from 1 KW to 5 KW, make changes in directional antenna for day and night use, and install new transmitter.

1200 Kilocycles

NEW—Manuel M. Grau, Mayaguez, P. R.—Construction permit for a new station to be operated on 1200 kc., 100 watts night, 250 watts day, unlimited time. Class IV.

1210 Kilocycles

WSBC—WSBC, Inc., Chicago, Ill.—Voluntary assignment of license from WSBC, Inc., to Gene T. Dyer, Evelyn M. Dyer, John A. Dyer and Elizabeth M. Hinzman, d/b as Radio Station WSBC.

WJMC—Walter H. McGenty, Rice Lake, Wis.—Modification of license to change hours of operation from daytime to unlimited time, using 250 watts power.

1280 Kilocycles

WRR—City of Dallas, Texas, Dallas, Tex.—Construction permit to install new transmitter and increase power from 500 watts to 1 KW. Amended to request 5 KW power, install directional antenna for night use, install new transmitter, and move transmitter from Centennial Grounds, Dallas, Tex., to Highway 114 at White Rock Lake, Dallas, Tex.

1310 Kilocycles

KFWO—Plains Radio Broadcasting Co., Lubbock, Tex.—Construction permit to install new transmitter and vertical antenna; change frequency from 1310 kc. to 1380 kc.; increase power from 100 watts to 1 KW; and move transmitter from 2312 Fifth Street, Lubbock, Tex., to site to be determined at or near Lubbock, Tex. Amended to change request of power from 1 KW to 5 KW, install directional antenna for day and night use, make changes in equipment, and give exact transmitter site as U. S. 82, 4.2 miles northeast of city, Lubbock, Tex., Class III-A.

WFJP—Orville W. Lyerla, Herrin, Ill.—License to cover construction permit (B4-P-2097) as modified for a new station.

WFJP—Orville W. Lyerla, Herrin, Ill.—Authority to determine operating power by direct measurement of antenna power.

NEW—Herbert L. Wilson, Middletown, N. Y.—Construction permit for a new station to be operated on 1370 kc., 250 watts, unlimited time. Amended to request 1310 kc.

1370 Kilocycles

WORD—Spartanburg Advertising Co., Spartanburg, S. C.—License to cover construction permit (B3-P-2261) as modified for a new broadcast station.

WORD—Spartanburg Advertising Co., Spartanburg, S. C.—Authority to determine operating power by direct measurement of antenna power.

1420 Kilocycles

NEW—Grenco, Inc., Greenwood, S. C.—Construction permit for a new broadcast station to be operated on 1420 kc., 100 watts, daytime only. Class IV. Amended: To specify transmitter site as Lander College, Greenwood, South Carolina, make changes in antenna and transmitting equipment, change power from 100 watts to 250 watts and hours of operation from daytime to unlimited time.

WNB—Harold Thomas, Bridgeport, Conn.—Modification of construction permit (B5-P-2141) for a new station, requesting changes in transmitting equipment, approval of transmitter site at rear of 60 Main St., Bridgeport, Connecticut, and approval of vertical antenna.
**FEDERAL TRADE COMMISSION ACTION**

**COMPLAINTS**

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

**Abbott & Walker, Inc.**—Nineteen New York distributors of ready-made advertising materials consisting of advertising copy, displays, cuts, mats and other printed matter and material, all operating under the same control, are charged with unfair competition and unfair and deceptive acts and practices in the sale of their products in a complaint.

Under the direction and control of the respondent Ryder, the complaint alleges, the respondent corporations, individually and jointly, have sold three copyrighted advertising features, each consisting of a series of prepared advertising copy; mats and cuts, and each series including illustrations and wordings with a continuous idea or theme indicated by the title, the titles being: "It's a Fact," "Isn't It the Truth?" and "Where's Elmer?"

Through their canvassing salesmen, agents and representatives, the complaint alleges, the respondents have made false, misleading, deceptive and threatening representations to the effect that certain similar ready-made advertising copy and materials offered and sold by certain competitors have been copied from the copyrighted features or series sold by the respondents, and that purchasers of the competing advertising features or series, assertingly copies, would become liable to actions at law by reason of their use thereof. The competing features or series were sold under titles such as "It's the Truth" and "Where's George?", according to the complaint.

The respondents' representations, the complaint continues, were made in bad faith for the sole purpose of discouraging purchase from, or dealing with, the respondents' competitors, and were otherwise made without cause or right.

The complaint further alleges that the respondents, in order to induce the purchase of their advertising features or series, have represented that a purchaser would hold exclusive rights to their use in his community, and that the features or series were new and original ideas protected by copyrights whereby the purchaser would be the only one in his trade territory using advertising or trade promotional publicity of the same character, type and style, with the effect that certain similar ready-made advertising copy and materials offered and sold by certain competitors have been copied from the copyrighted features or series sold by the respondents, and that purchasers of the competing advertising features or series, assertingly copies, would become liable to actions at law by reason of their use thereof. The competing features or series were sold under titles such as "It's the Truth" and "Where's George?", according to the complaint.

**Atlas Health Appliance Company**—Alleging misrepresentation in the sale of an electrical device advertised for use in the treatment of certain diseases, a complaint has been issued against Jacob L. Goldman, alias J. L. Coleman, trading as Atlas Health Appliance Company, 2430 West Sixth St., Los Angeles.

By use of various representations the respondent, according to the complaint, advertises that his device, designated as "Atlas Short Wave Diathermy", when used by the unskilled lay public in the treatment of self-diagnosed diseases by individual self-application in the home, is a scientific, safe, harmless and effective means for curing and treating some 35 listed ailments; that it definitely aids in killing bacteria, and that its use will have no ill effects, when such are not the facts.

The complaint alleges that in addition the respondent has disseminated false advertisements in that the advertisements of its device fail to reveal that its use under the conditions prescribed in the advertisements or under such conditions as are customary or usual, may result in serious and irreparable injury to health. The use of the device under such conditions by the unskilled lay public, according to the complaint, may result, in certain specified instances, in ailments such as peritonitis and blood poisoning, serious irritation of the mucous membranes, growth of tumors and cells, tissue destruction, severe burns, and other serious conditions. (4291)
Bedeck Cloak Company, Inc., 247 West 37th St., New York, is charged with misrepresentation in the sale of women's textile fabric garments, in a complaint.

Pointing out that the words "Persian" and "Persian Lamb," applied to women's coats or similar garments, are accepted to mean the highly prized peltries of the young of the Karakul breed of sheep originally found in Russia and marketed through Persian traders, the complaint alleges that the respondent designates its textile fabric women's coats and other garments as "Duro-Persian," "Duro Persian," and attaches tags and labels some of which bear pictorial designs of sheep or lambs and the words "Duro-Persian.

The respondent's use of these terms and pictorial designs, according to the complaint, represents that garments so designated are made from the peltries of "Persian" lambs, the young of the Karakul breed of sheep, or the wool of any animal, but are, on the contrary, made of a textile material composed of rayon twisted into a pile about a core of all-cotton yarns having the appearance of silky, tightly curled fur, thus closely resembling Persian lamb fur. These garments, the complaint continues, are not imported either from Persia or elsewhere, but are of domestic manufacture, and the labels, tags and advertising material employed do not disclose the presence of rayon and cotton.

George A. Bounds & Company—Violation of the brokerage section of the Robinson-Patman Act is alleged in a complaint issued against George C. Bounds and William H. Phillips, partners trading as George A. Bounds & Co., Salisbury, Md., who own and operate a factory at Hebron, Md., for packing, processing and canning tomatoes and sweet potatoes.

The complaint alleges that the respondents have granted to purchasers, the sales to whom have been effected by brokers not accepting brokerage from the respondents on such sales, discounts and allowances in lieu of or as brokerage, by selling and invoicing their commodities to such purchasers at a net price which is lower than the respondents' prevailing market price by an amount which approximately equals the customary brokerage usually granted and allowed by the respondents and accepted by the respondents' brokers on similar sales to purchasers.

The complaint further alleges that the respondents have granted to brokers, the sales to whom have been effected by brokers controlled by such purchasers, discounts and allowances in lieu of or as brokerage, by selling their commodities to such purchasers at a net price which is lower than the respondents' prevailing market price by an amount which approximately equals the customary brokerage usually granted and allowed by the respondents and accepted by the respondents' brokers on similar sales to other purchasers effected by such brokers.

The complaint further alleges that the respondents have granted to brokers, the sales to whom have been for such brokers' own account, discounts and allowances in lieu of or as brokerage, by selling their commodities to such brokers at a net price which is lower than the respondents' prevailing market price by an amount which is equal to the customary brokerage usually granted and allowed by the respondents to such brokers on similar sales to other purchasers when effected by such brokers.

Continental Briar Pipe Company, Inc., Brooklyn, Harry Yates, trading as Cumberland Candy Company and as Dixie Candy Company, Fayetteville, N. C., and Robert R. Raynor, trading as Southern Sales Company, a candy distributor of Dunn, N. C., have been served with complaints alleging the sale of products so packed and assembled as to involve the use of lottery methods when sold and distributed to the consuming public.

Use of the respondents' sales methods, the complaints charge, is a practice contrary to an established public policy of the Government of the United States and in violation of the criminal laws, and is an unfair method of competition and an unfair or deceptive act or practice under the Federal Trade Commission Act. (4293-4296-4297)

Cumberland Candy Company—See Continental Briar Pipe Company, Inc.

E. R. Davis Prescription Company—Charging misrepresentation in the sale of a medicinal preparation, a complaint has been issued against E. R. Davis, trading as E. R. Davis Prescription Company, Bellingham, Wash.

By means of advertising matter disseminated through the mails, and through newspaper advertisements, radio continuities, and circular matter, the respondent, according to the complaint, represents that his preparation, designated "Asthma and Hay Fever Remedy No. 7895" is a cure or remedy and a competent and effective treatment for asthma, hay fever and bronchial asthma, and that the use of the product will prevent attacks of asthma and hay fever or their recurrence and will relieve suffering incident to these ailments.

The complaint alleges, however, that the respondent's preparation is not a cure or remedy for asthma, hay fever and bronchial asthma and does not constitute a competent and effective treatment therefor in excess of furnishing temporary symptomatic relief from the paroxysms of asthma and attacks of hay fever. According to the complaint, the respondent's product is of no value in the prevention or treatment of hay fever or respiratory infections or in increasing the resistance of nasal mucous membranes.

Dixie Candy Company—See Continental Briar Pipe Company, Inc.

Gates Medicine Company, Inc.—Alleging false and misleading advertisement in the sale of drugs represented as cures for the liquor habit, a complaint has been issued against Gates Medicine Company, Inc., 42½ Capitol St., Charleston, W. Va.

Through the mails and by other means, the complaint alleges, the respondent has disseminated advertisements representing its "White Ribbon Remedy" as a competent, effective, safe and reliable cure for the liquor habit and its "Improved White Ribbon Remedy" as a competent, effective and reliable cure for the liquor habit and as a remedy or cure for nervousness, fatigue, illness and other conditions caused by excessive drinking of alcoholic beverages.

The complaint alleges that the respondent's preparations will not accomplish the results advertised and further charges that the respondent's advertisements are false in that they fail to reveal that use of its White Ribbon Remedy, under conditions prescribed by the respondent and under such conditions as are customary and usual, may result in serious illness. According to the complaint, White Ribbon Remedy contains tartar emetic which produces expectorant, nauseant and depressant effects, which may be harmful and dangerous to health.

Honey-Web, Inc.—Alleging the misrepresentation of the sale of fly ribbons, a complaint has been issued against Honey-Web, Inc., 50 East 42nd St., New York, a distributor of fly ribbons.

In its circular matter, the complaint alleges, the respondent corporation has made, among others, the following misrepresentations: "Honey-Web Ribbon Fly Catchers. The Very Finest, Actually catches 40 to 60% more flies as compared to ordinary Fly catchers. Will not run regardless of heat or atmospheric conditions. Will not dry up even when exposed to sun or wind for as long as 4 weeks. Will remain fresh in stock for as long as 4 years."

Through use of the term "Honey-Web" as a trade and corporate name, the complaint alleges, the respondent also represents and
L. W. Powers Company—Lawrence W. Powers, trading as L. W. Powers Company, a New York commission resident buyer of women’s ready-to-wear apparel, with offices at 1338 Broadway, is charged with violation of the brokerage section of the Robinson-Patman Act in a complaint. According to the complaint, the respondent Powers employed as purchasing agent for a number of out-of-town retail dealers, places their orders for merchandise with manufacturers, who usually ship the goods so ordered directly to the retail purchaser. On such orders placed by him, the complaint alleges, the respondent Powers, while acting as the buyers’ purchasing agent, has received and accepted from the seller manufacturers brokerage fees or commissions in substantial amounts, in violation of section 2(c) of the Clayton Act as amended by the Robinson-Patman Act. (4299)

Premium Candy Company—A complaint has been issued charging Joe L. Thompson, trading as Premium Candy Company, Fayetteville, N. C., with the sale to agents and dealers of candy so packed and assembled as to involve the use of lottery methods when sold and distributed to the consuming public.

Use of the respondent’s sales methods, the complaint charges, is a practice contrary to established public policy and in violation of the criminal laws, and is an unfair method of competition and an unfair and deceptive act or practice under the Federal Trade Commission Act. (4287)

Southern Sales Company—See Continental Briar Pipe Company, Inc.

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

King Sales Company—See National Premium Company.

National Premium Company—Benjamin Jaffe, trading as National Premium Company and as King Sales Company, 418 South Wells St., Chicago, has been ordered to cease and desist from using lottery methods in the sale of merchandise.

The Commission order directs the respondent to cease supplying or placing in the hands of others, punch boards, push or pull cards, or other devices, which may be used in selling or distributing merchandise to the public by means of a game of chance, gift enterprise or lottery scheme; or transporting to agents, distributors or the public, such devices so prepared and printed that sales of merchandise may be made to the public by means of a game of chance, gift enterprise or lottery scheme. (5662)

Perfektum Products Company—See Popper & Klein, Inc.

Piecadilly Hosiery Mills—An order has been issued requiring Benjamin Gould, hosiery distributor, trading as Piccadilly Hosiery Mills and Piccadilly Hosiery Company, 1019-1021 Arch St., Philadelphia, to cease and desist from using the word “Mill” or “Mills” as a part of his trade name, or otherwise representing that he is a manufacturer.

Commission findings are that formerly on certain of the respondent’s printed matter appeared the words “Piccadilly Hosiery Mills, 1019-1021 Arch St., Philadelphia, Pennsylvania,” and that the respondent, in April, 1938, abandoned use of the trade name Piccadilly Hosiery Mills and substituted the name Piccadilly Hosiery Company. (3774)

Popper & Klein, Inc., trading under its corporate name and as Perfektum Products Company, 300 Fourth Ave., New York, distributor of laboratory supplies, has been ordered to cease and desist from using the term “Made in U. S. A.” or any other term indicative of American manufacture, to describe or refer to microscope cover glasses of foreign origin.

The Commission order also requires the respondent to cease and desist from causing imported microscope cover glasses to be removed from the containers in which they were imported into the United States, and on which appear brands or marks indicating their foreign origin or manufacture, and to be placed in containers which do not bear legible brands or marks fully informing prospective purchasers of the foreign origin of such articles.

The respondent corporation is successor to the business formerly conducted by its president under the trade names “Popper & Klein” and “Perfektum Products Company,” according to Commission findings. (3288)

STIPULATIONS

During the past week the Commission has entered into the following stipulations:

Economy By-Products Company, Inc., 782 Minnesota St., San Francisco, has entered into a stipulation in which that company agrees to cease and desist from certain representations in the sale of motor lubricating oil.

The respondent agrees to cease using the word “Penn” or “Pennfield” as a brand or label for or as a part of the trade name under which it sells a certain motor oil, which in fact is not composed wholly of Pennsylvania oil, and agrees to discontinue employing the word “Penn” alone or in connection with other words or letters so as to imply that the product is composed of Pennsylvania oil in its entirety.

Under its stipulation the respondent further agrees to desist from use of the phrase “100% Pennsylvania Oil” as descriptive of its product, and from employing that phrase or any other representation of like import, the effect of which conveys the impression that the product referred to is composed of Pennsylvania oil, when in fact it contains oil other than Pennsylvania oil. The respondent also agrees to cease and desist from failing to clearly and unequivocally disclose in its invoices and advertising matter the fact that its product contains used or reclaimed oils. (2920)

Extermital Chemicals, Inc., 11 St. Mary's St., Dayton, Ohio, has entered into a stipulation in which it agrees to cease and desist from certain representations in the sale of two products offered for use in conjunction with each other as soil treatments about the foundations of buildings to check or prevent infestation of the woodwork by termites.

The stipulation points out that the respondent’s treatments are applied by what it refers to as its “extermital process” or what is known as the “bar-hole method,” consisting of the making of holes in the soil adjacent to a building and inserting the preparations in the holes, which are then covered or closed.

By the sale of its preparations, designated “Extermital A” and “Extermital B,” the respondent agrees to discontinue representing that either the preparations or the method advocated for application are based on U. S. Government findings; that soil poisoning is recommended or recognized by Federal Government authorities as the direct termite control method or is advocated by these authorities other than as an adjunct to feasible structural changes, and in place of them only on condition that the structural changes necessary to block termites are impracticable; or that these authorities advocate soil treatments by the bar-hole system or by any method other than that known as the trenching method.

The respondent corporation further stipulates that it will cease representing that the repellent effectiveness of its products, when placed in the soil, is of such permanency as to guard against all further termite infestations; that either the H. O. L. C. specifica
tions or those of any other Government agency recommend soil treatment by means of holes, the method used by the respondent, or the use of its chemical mixture for treating; and that the U. S. Government has spent several hundred thousand dollars repairing damage caused by termites to the Treasury and Interior Buildings and in the Smithsonian Museums. (2922)

Holland Racine Shoes, Inc., Holland, Mich., shoe manufacturer, has entered into a stipulation to cease and desist from certain representations in the sale of its products.

September 13, 1940 — 4605
The respondent corporation agrees to cease employing the words "J. W. Stetson Quality Shoes" or the word "Stetson," alone or in connection with other words or arranged within a triangle so as to simulate the brand or label or name heretofore used by the Stetson Shoe Company, Inc.; to desist from using the words "Martin & Martin," alone or in connection with the words "Custom Made" or the name "Dominick & Domonick," alone or in connection with the words "Custom Grade," or the phrase "Made Exclusively for Altman," so as to simulate the brand or label or name heretofore used, respectively, by Martin & Martin, Dominick Fine Shoes, Inc., and B. Altman & Co., in the sale and distribution of shoes.

Other representations which the respondent agrees to discontinue are the use on its shoes of the phrase "Quality Shoemakers Since 1875," so as to imply that its shoes have been sold on the market for such indicated period of time, and from use of the words "Custom Made" or "Custom Grade," alone or in connection with the name of an alleged shoe dealer so as to imply that the products designated are of custom quality or have been made in accordance with the specific order of a dealer. (2923)

May Seed and Nursery Company—See May Seed and Nursery Company.

Mead-Suydam Company—Fred J. Mead, sole trader as Mead-Suydam Company, 400 Sheridan St., Orange, N. J., a manufacturer of concrete burial vaults, stipulates that he will cease representing that his products "Outlast the Tomb" have the quality of "Permanence", or, by other presentations, made either directly or indirectly, that his vaults will endure for a longer period than has been scientifically proven. The respondent also agrees to desist from the unqualified representation that a vault purchased from him "will not fail", or otherwise representing that it will perform satisfactorily under any and all conditions of installation or use. (2914).

Miller Chemical Company—See May Seed and Nursery Company.

R. Mills & Company—Richard O. Mills, sole trader as R. Mills & Co., 5154 South Union Ave., Chicago, in the sale of a medicinal preparation designated "Nature's Laxative," agrees to cease representing that the product is mild or soothing and is a cleansing agent for the promotion of internal hygiene generally. He also agrees to cease from advertising that "Best to Aid Nature" or "The Ideal Laxative" in any manner tending to imply that use of the preparation is indicated for all types of constipation, or that it contains laxative principles or ingredients not present in other preparations. The respondent also agrees to desist from representing that its "Nu-Nile Double- Strength Hair Grower" is medicated or contains a significant amount of tar, will aid in the growth of hair in any way, will contribute any food or nourishment to the scalp, is an effective or competent treatment for dandruff, for stopping the falling of hair, for prevention or correction of thin temples, or for eczema of the scalp or any other kind of eczema. The respondent further agrees to discontinue representing that "Owl Stimulators" is a systemic tonic, or by any other terminology representing that it has any effect upon the system as a whole, or upon any part of the body except the intestinal tract. He also agrees to cease advertising that this product will assure good health or the return of normal strength, energy, stamina or nerve force, and that it is a special preparation or a remedy generally or for any specified condition or disease. (02624)

Owl Stimulator Tablet Company—See Owl Stimulators Company.

Peerless Products Company, 96 Atlantic St., Jersey City, N. J., agrees to cease representing that its preparation "Nu-Nile Double- Strength Hair Grower" is medicated or contains a significant amount of tar, will aid in the growth of hair in any way, will contribute any food or nourishment to the scalp, is an effective or competent treatment for dandruff, for stopping the falling of hair, for prevention or correction of thin temples, or for eczema of the scalp or any other kind of eczema. The respondent further agrees to discontinue representing that "Nu-Nile Double- Strength Hair Grower" or any similar preparation has any special value as a hair grower, and that it will keep the hair soft, smooth or glossy or do other than impart an oily substance to the surface of the hair shafts to temporarily make them feel soft and appear smooth and glossy. The respondent also agrees to cease representing or concealing its的真实 product by the words "Owl Stimulators" or any similar preparation having a tendency to disparage comparable competitive products. (02623)

Nitrarin Company, Inc., 3747 North Booth St., Milwaukee, distributor of "Nitrarin," a nitrogen-fixing bacteria culture for the inoculation of seeds of leguminous plants, agrees to discontinue representing that its product is tested and recommended by experimental stations, agricultural workers and farmers everywhere, or from using statements implying that the product has been recommended generally by Federal or State agricultural experiment stations. The respondent agrees to cease representations tending to convey the belief that all or certain products, regardless of their quality, which are sold in competition with the respondent's product, are inferior or without worth or value, or any other representation having a tendency to disparage comparable competitive products. (2917)

O.S.T. Company—See Owl Stimulators Company.

Mohawk Rubber Company, Akron, Ohio, tire manufacturer, and Irving and Gurdie Fine, trading as Imperial Tire Company and Lafayette Tire Company, 1423 Bedford Ave., Brooklyn, tire distributors, have entered into stipulations to cease and desist from certain representations in the sale of their products. The respondents each agree to cease using the numeral "6" in connection with the word "plies" or with any other word, as a mark, stamp, brand or label for tires which are not composed of six plies, and from use on such tires or the wrappings thereof or in any other way, of the numeral "6" or of any mark, stamp, brand or label implying that the tires are composed of six or any other indicated number of plies which is in excess of the actual number.

Each respondent also agrees to discontinue from use of the word "Dual" or the phrase "Extra Heavy Duty" or other words of similar meaning as descriptive of the plies of which its tires are composed, the effect of which representation tends to convey the belief that the construction of the tires is such that their presence in the tires renders the tires of dual or double efficiency or capable of extra heavy duty, as compared with tires containing a like number of plies of similar quality.
